# Cannock Rural District Council.

*Cheslyn Hay,*

*Walsall,*

*February 7th, 1905.*

**To the Chairman and Councillors.**

GENTLEMEN,

I have the honour of presenting to you my Report for the year 1904.

## Population Estimates.

Population.

Brewood Sub-Registration District, estimated to April, 1904 :—

Bushbury ... ..	3650	Stretton ... ..	250
Brewood ... ..	2500	Teddesley ... ..	125
Penkridge ... ..	2370	Coppenhall... ..	85
Lapley ... ..	740	Featherstone ... ..	50
Acton and Bednall	560	Kinvaston ... ..	20
Dunston ... ..	270	Total ... ..	10,620.

An estimated increase of 85. Agricultural labourers, a few colliers, railway workmen, and artizans.

Cannock (Rural) Sub-Registration District:—

Cheslyn Hay ... ..	2800	Hatherton ... ..	530
Essington ... ..	1900	Shareshill ... ..	365
Great Wyrley ... ..	1785	Saredon ... ..	320
Huntington ... ..	550	Hilton ... ..	80
Total ... ..	8,330.		

An estimated increase of 250. Mostly a mining population; a few agriculturalists, edge tool workers, brick and tile workers.

Entire District Population ... 18,950.

Increase for the year ... 335.

Births in the year, 531—Males, 282. Females, 249.

Births.

General Birth Rate ... 28·02 per thousand.

Former Birth Rates :—

1903 ... ..	33 per thousand.	1899 ... ..	30 per thousand.
1902 ... ..	33 „	1898 ... ..	31 „
1901 ... ..	30 „	1897 ... ..	33 „
1900 ... ..	31 „		

The 1904 rate is the lowest in my experience. This, I believe to be a common experience in the country, a decline in the Birth Rate, which may be partially accounted for by depression in trade, and the tendency in many cases for the modern young man to ponder before he incurs the extravagant business of matrimony.

Birth Rate for Staffordshire in 1903 ... 32·5.  
 Cannock Birth Rate in 1904 ... 33·8 per thousand.  
 Brewood Birth Rate in 1904 ... 23·4 per thousand.

Here is seen the marked difference in the mining and agricultural areas.

Deaths. Deaths in the year, 244—Males, 128. Females, 116.  
 General Death Rate ... 12·87 per thousand.

Former Death Rates:—

In 1903...10·85 per thousand.	In 1899...13 per thousand.
In 1902...13·07	In 1898...14
In 1901...13·6	In 1897...14
In 1900...14	

Death Rate for Staffordshire in 1903...15·2 per thousand.

The rates for 1903 were exceptionally satisfactory, and the Cannock Rural District was not alone in this respect. We may also regard the rate for 1904 as being better than the average of past years. Rate for Country Districts of England in 1903, 14·8. Whilst we are termed a Rural District, many of our parishes are practically Urban, and in Urban areas the Death Rate is usually higher.

Cannock Death Rate in 1904...12·1 per thousand.  
 Brewood " " 13·4 "

Mortality as to time of year:—

Quarterly Mortality.	Cannock—1904		1903		Brewood—1904		1903

	—	—	—	
	101	143	244	

## Respiratory Death Rate, 2·69 per thousand.

In 1903...2·52 per thousand.	In 1900...3·23 per thousand.	Respiratory Death Rate.
In 1902...2·31	In 1899...3·03	„
In 1901...1·84	In 1898...4·17	„

## New Cases of Sickness:—

	1904	1903	1902	1901	Sickness.
Scarlet Fever ...	37	137	164	312	
Diphtheria ...	11	6	6	18	
Enteric Fever ...	3	3	12	3	
Erysipelas ...	17	24	14	19	
Membranous Croup ...	2	...	...	...	
Puerperal Fever ...	1	...	...	...	
	—	—	—	—	
	71	170	196	352	

From 1895 to the end of 1904 (10 years) the average number per annum of Scarlet Fever Cases amounted to 126: in 1904 the total is 37. These figures appear to me

to prove the efficacy of the arrangements made for isolation, and upon this point I tender my thanks to the Council for their public spirit in establishing an Isolation Hospital, upon the working of which a separate report will be embodied.

#### School Closures.

#### Closure of Schools advised:—

COVEN.—February 26th to April 11th, Whooping Cough.  
 BISHOPSWOOD.—March 7th to 21st, Whooping Cough.  
 STRETTON.—May 12th to 27th, Measles.  
 BREWOOD.—Sept. 28th to Oct. 24th, Measles & Diphtheria.  
 SHARESHILL.—October 3rd to 24th, Mumps.  
 HUNTINGTON.—Nov. 21 to Dec. 31, Scarlet Fever & Mumps.  
 BEDNALL.—Nov. 21st to Dec. 19th, Mumps and Measles.  
 STRETTON.—Nov. 24th to Dec. 19th, Measles.  
 DUNSTON.—Nov. 24th to Dec. 19th, Measles.

#### Uncertified Deaths.

#### Causes of Uncertified Deaths:—

Heart Disease—Lapley 1, Shareshill 1, Brewood 1.  
 Natural Causes—Wyrley 1.  
 Premature Birth—Penkridge 1.  
 Measles—Dunston 1. Total, 6.

#### Percentage of Total Deaths, 2·4.

1903, 5·4. 1902, 2·1. 1901, 1·6. 1900, 1·2. 1899, 2·5.

#### Vaccination.

#### Vaccination Report:—

I am in a position to state that progress has been made in this department of what is really sanitary work. Messrs. Dakin and Spooner, the Vaccination Officers, have done their work well, and materially assisted the Public Vaccinators in their work. The number of successful vaccinations in the district has increased, and every facility for public-re-vaccination being given by the Guardians many availed themselves of the opportunity.

#### Typhoid Fever.

#### Typhoid Fever in the District:—

In 1904—Cases, 3. Deaths, 0. Houses Infected, 3.

In 1903—Cases, 3. Deaths, 1. Houses Infected, 3.

Brewood, 1. Dunston, 1. Stretton, 1.

In the case at Four Ashes (Brewood) the drains were untrapped and defective, and the well water loaded with sewage matter. In the case at Dunston no cause was to be found in water or drainage. There had been a history of the recent eating of polonies, which in others partaking of such had induced symptoms of gastro intestinal irritation. In the case at Stretton, the water was polluted.

## Puerperal Fever:—

Puerperal  
Fever.

In a case at Essington, I instructed a midwife to undergo a process of disinfection and to cease attendance upon confinement cases for two months.

## Diphtheria in the District:—

Diphtheria.

In 1904—Cases, 11. Deaths, 2. Houses Infected, 6.

In 1903—Cases, 6. Deaths, 1. Houses Infected, 3,

Brewood, 5. Essington, 6.

In the five cases from Brewood the water was condemned in both dwellings and the drainage defective. The case in the Bargate proved fatal. Four cases occurred in a cottage on the Coven road; one case was sent to Wolverhampton Hospital; another remained at home, after an injection of anti-toxin; and two cases were removed to the Isolation Hospital.

In a cottage at Hilton (Essington) instructions were given for the cleaning of the well. In other cases in Essington a foul ditch containing stagnant sewage, and a contaminated well, were the exciting causes.

## Scarlet Fever in the District:—

Scarlet Fever.

In 1904—Cases, 37. Deaths, 0. Houses Infected, 24.

In 1903—Cases, 137. Deaths, 5. Houses Infected, 80.

## Distribution:—

Huntington, 14. Bushbury, 12. Brewood, 3. Bednall, 2.

Stretton, 2. Hatherton, 2. Essington, 1. Penkridge, 1.

Total, 37. Removed to Isolation Hospital, 26.

I am pleased to report that the District has kept clear of Smallpox, in spite of serious scares upon our borders, notably in the Cannock Urban District. In my Report to the Council in September, I stated "I have arranged with the Urban District Medical Officer for a due provision in the Joint Hospital for any case which might occur in the Rural area. Whilst fully admitting that the present Smallpox Hospital has been of excellent service to the community, in permitting of Isolation, and in vastly reducing the number of cases in the district, I am bound to condemn the existing institution under the circumstances now to be found. In the immediate vicinity of the Hospital there is a considerable aggregation of houses, with a prospect, in view of colliery developments, of much more building going up. This fact, together with its position by four cross roads, and its contiguity to the cemetery, condemns the Hospital for Isolation purposes, and I would advise the Joint Committee to make arrangements for the erection of a Hospital for Smallpox only, in

Smallpox.

a more isolated area, with provision on the spot for disinfection arrangements. I would recommend the Council to join in with the Urban Council for a Smallpox Hospital, and for a joint system of ambulance, including local provision for disinfection at the Hospital. There may arise at any moment serious legal difficulties if a new Hospital is not soon planned, for property owners might involve the Joint Committee in heavy expenditure from the nuisance created by the present Hospital—a nuisance which year by year has gone on rapidly increasing, and the responsibility for such might be put upon the shoulders of the Sanitary Authorities.

The difficulties at the existing Hospital for the proper accommodation of patients and nurses have been great, and the public will welcome the advent of an Institution where better accommodation can be provided, better nursing obtained, and more effective isolation enforced."

Action by the  
Council.

Summary for 1904 of action of the Council:—

Infectious  
Disease.

The District Council issued posters, upon my advice, requesting the inhabitants over ten years of age to take precautions against Smallpox by re-vaccination. The public notices had a good effect in causing several primary vaccinations in many young persons, who for some reason or another had escaped vaccination in infancy. The epidemic of Smallpox in the Cannock Urban District proved that the existing accommodation for the isolation of Smallpox is unsatisfactory and insufficient. The Local Government Board have requested the Urban and Rural Councils to consider the provision of improved accommodation. The Joint Smallpox Hospital Committee have appointed a Sub-Committee to deal with this question, either by building upon a suitable site, or the provision of larger premises suitably isolated. This Sub-Committee, however, has not been able to make any recommendation.

Essington  
Water.

The deputation appointed to approach the Wolverhampton Corporation with a view to making arrangements for the supply of water to the principal portion of the Parish of Essington by the Corporation, has successfully arranged for water to be supplied on the Council guaranteeing ten per cent. on the capital outlay.

Great Wyrley  
and Cheslyn  
Hay Water.

The Council has taken steps to enforce those householders who have not already done so to connect up to the mains, and take the water in both parishes, and practically all houses in Cheslyn Hay and most of those in Great Wyrley are now connected to the Council's mains. A plan of the whole of the Cheslyn Hay water mains has been

prepared and deposited with the Clerk of the Peace. Extensions of the water mains have been made to Coppice Lane, Lewis's Tileries, and Messrs. Hawkins's Colliery cottages.

During the year, I reported to the Council the necessity of a public water supply for Brewood, many of the wells being found to be contaminated with sewage matter. The question was referred by the Council to the Brewood Parish Council, who have appointed a Committee to make a house to house inspection in the parish, with the view of ascertaining whether the present polluted condition of the wells is due to unsatisfactory house drainage. The District Council have instructed the Inspector of Nuisances to accompany such Committee. The Council have served notices upon several owners to provide a proper supply of wholesome water to their properties in Brewood.

Brewood  
Water.

The Council are in negotiation with the Right Hon. H. Staveley Hill for land in Bushbury for the Bushbury (Oxley) Sewerage Works. The Engineers to the Council have submitted their plans to him, and explained exactly the position and extent of the land required.

Bushbury  
Sewerage  
(Oxley).

The Council's Engineer, Mr. H. M. Whitehead, has prepared a scheme for sewerage and sewage disposal of Ford Houses, Bushbury. This scheme has been adopted by the Council. Arrangements have been made for the necessary land, and a tender accepted for the carrying out of the work.

Fordhouses  
Sewerage.

The sewage from this district is proposed to be dealt with by means of a Septic Tank and Fiddian Patent Distributor.

A Joint Committee of the District Council and the Great Wyrley Parish Council has been appointed for the purpose of promulgating a scheme for the sewerage and sewage disposal of Great Wyrley. A scheme has been submitted by Messrs. Wilcox and Raikes, and provisionally approved by the Council. It is proposed that this scheme be carried out under the Council's own Engineer (Mr. H. M. Whitehead), and that Messrs. Wilcox and Raikes be retained as Consulting Engineers only. This scheme is, however, to be again submitted to the Committee for final approval.

Great Wyrley  
Sewerage.

The original scheme submitted by Messrs. Wilcox and Raikes for the construction of works of sewerage and sewage disposal for Cheslyn Hay has been amended by the Council. The amended plans are being completed by the

Cheslyn Hay  
Sewerage.

Engineers preparatory to being submitted to the Local Government Board. There is no doubt in the mind of any reasonable person that a scheme of sewerage and sewage disposal for Cheslyn Hay is a necessity in the interest of public health, but it is felt by all persons cognisant of Cheslyn Hay that great economy is needed compatible with efficiency. The rateable value of the Parish is small, and the high rates severely press upon many of the thrifty working men who live in their own houses. The demands upon the Parish for water, education, and other public purposes have become so heavy that unless absolute economy is considered over the question of sewerage the position of the Parish financially will mean stoppage in building operations, and a state bordering on bankruptcy.

Brewood  
Sewerage.

The Brewood Parish Council are attempting to formulate a scheme for the drainage of Brewood. The Parish Council have taken this action in the hope of their scheme being one that could be carried out at less cost than the scheme prepared by Messrs. Wilcox and Raikes. Mr. Whitehead has been instructed to afford all assistance to the Parish Council in their efforts. The Council have not taken any further action to carry out Messrs. Wilcox and Raikes's scheme, approved by them.

Essington  
Sewerage.

The Council have provisionally adopted a scheme prepared by Messrs. Wilcox and Raikes for the sewerage and sewage disposal for that portion of the Parish of Essington comprising the vicinity of the Minerva Inn and Sneyd Lane. The Council's Engineer (Mr. Whitehead) has been instructed to discuss the above scheme with Messrs. Wilcox and Raikes, with a view, if possible, of reducing the cost of the scheme. Negotiations are proceeding with Lord Barnard for the purchase of the necessary land for outfall. Mr. Whitehead has been instructed to examine and report upon the question of the saving which would be effected by the above scheme being defrayed out of current rates rather than out of a loan.

As a temporary measure, and until the above scheme is carried out, Mr. Whitehead has been directed to construct a dumb well to be emptied weekly.

The Council have provided a portable sewage pump for use in connection with the above and similar dumb wells.

Urban Powers  
—  
Essington.

The Local Government Board have conferred upon the Council, in so far as concerns the Parish of Essington, the Urban Powers contained in the Public Health Act, 1875, Section 157, Public Health Act Amendment Act, 1890, Sections 23, 25, and 33.

The Council have under consideration the making of Byelaws for New Streets and Buildings for Essington, and a Committee has been appointed to draft and settle Byelaws for submission to the Local Government Board.

Byelaws.  
—  
Essington.

The Byelaws prepared by the Council for new streets and Buildings for Cheslyn Hay and Great Wyrley have received the final approval of the Local Government Board, and are now in operation.

Byelaws.  
—  
Cheslyn Hay  
and  
Great Wyrley

The Council have renewed the Contract for Public Scavenging in Bushbury.

Scavenging.  
—  
Bushbury.

The Contractor for Cheslyn Hay Scavenging having become bankrupt, and numerous complaints having been made as to his negligence in carrying out his duties, the Council determined his contract. Temporary measures were adopted for public scavenging. The Council have entered into a two years' contract for public scavenging in Cheslyn Hay, and I am able to report that the new contractor is carrying out his duties in a satisfactory manner.

Scavenging.  
—  
Cheslyn Hay.

In February, the Inspector submitted for my inspection the udder and the lungs of a cow belonging to a butcher in Essington. Both the organs were full of tubercular deposits, and condemned as unfit for human food.

Unsound  
Meat.

### III.—OTHER MATTERS.

Action taken in matters referred by H.M. Inspectors as remediable under Public Health Acts, but not under the Factory Act—Notified by H.M. Inspector, 1. Report of action taken sent to H.M. Inspector, 1.

## HOME WORK.

Lists of Out Workers (s. 107)—Number of Lists received, 1. Number of Out Workers, 1.

Addresses of Out Workers received from other authorities, 1.

Workshops on the Register (s. 131) at end of 1904—Workshops, 27. Retail Bakehouses, 18. Total, 45.

I append the usual tables—

- (1) Vital Statistics of Whole District.
- (2) Vital Statistics of Various Localities.
- (3) Infectious Diseases.
- (4) Causes of and ages at death.

I beg to thank the Council for their kind acceptance of my suggestions. I have throughout the year received much help from the Clerk, and am pleased to acknowledge it; and I wish to express my thanks to the Council's Engineer (Mr. Whitehead) and the Sanitary Inspector (Mr. Pickering) for their active co-operation during the year in their department of sanitary work.

I remain,

Mr. Chairman and Gentlemen,

Yours respectfully,

**W. Hosegood, M.B.C.M.,**

Medical Officer of Health.

# REPORT OF THE MEDICAL SUPERINTENDENT OF THE ISOLATION HOSPITAL.

## CANNOCK RURAL DISTRICT COUNCIL.

### To the Chairman and Councillors.

GENTLEMEN,

I beg to submit my first report upon the working of the Isolation Hospital for the year 1904.

The hospital is situate in the parish of Cheslyn Hay, is well isolated from the township, but easily approached by a good road made out of an old disused lane. The Surveyor (Mr. Whitehead) deserves great credit for completing the erection of the hospital and its approaches, and in the fitting up and furnishing; in every detail he displayed great skill and acumen. The structure is of galvanised iron and wood; and every arrangement was made for the supply of gas and water, for the hot water heating apparatus, and for the local treatment of the sewage from the hospital. A steam disinfecter has also been provided, and every suitable provision made for the comfort of the patients and the hospital officials.

The central administrative block consists of two sitting rooms and two bedrooms for nurses; a very convenient dispensary; caretaker's sitting and bedroom; a pantry; a ward maid's room; a large kitchen; a scullery; bath rooms and w.c.'s. There are two side fever blocks—one for scarlet fever, and one for typhoid fever and diphtheria. In each block are two wards, each ward having four beds, so that we have ample accommodation for 16 patients, and can, if necessary, provide for further emergencies. There are good bath rooms, and between each ward is the nurses' duty room, from which everything in the ward can be thoroughly seen. The wards are lofty, well ventilated, and well lighted. At the rear of the hospital are the wash house, the steam disinfecter, the coach house for the ambulance, and the mortuary.

The resident staff consists of the nurse matron and the caretakers—a married couple.

The hospital was opened on April 7th, 1904, by T. A. Hawkins, Esq., the chairman of the Council; and the first case was introduced on July 3rd.

## Dietary Tables for Patients:—

No. 1, Meat Diet.—Bread, 10oz. ; butter,  $1\frac{1}{2}$ oz. ; tea, 1 pint ; milk, 1 pint ; sugar, 2oz. ; meat, 4oz. ; vegetables, 8oz. ; pudding, 6oz.

No. 2, Middle Diet.—Bread, 8oz. ; butter,  $1\frac{1}{2}$ oz. ; tea, 1 pint ; milk, 2 pints ; sugar, 2oz. ; fish, 4oz. ; pudding, 4oz.

No. 3, Milk Diet —Milk, 3 to 4 pints ; beef tea or broth, 1 pint.

No. 4, Children's Diet (up to 8 years).—Bread, 8oz. ; milk,  $1\frac{1}{2}$  pints ; meat (minced)  $2\frac{1}{2}$ oz. ; vegetables, 4oz. ; pudding, 4oz. ; butter,  $1\frac{1}{2}$ oz. ; sugar, 2oz.

When the hospital is empty of patients, the officials are upon board wages, otherwise on rations.

Connie Stockley, 6 years.....	"	"	"

During the year, on two occasions, acting in co-operation with the Clerk to the Council, I engaged an extra nurse, (1) for the diphtheria cases, where we found the anti-toxic serum of great use; (2) for the night duty, when the patients in the hospital were of tender years and requiring special supervision.

I can only say in conclusion that I consider this hospital has rendered excellent service to the district, and parents have invariably expressed to me their gratification in the condition of their children when they got home. I must express my greatest thanks to Mr. Whitehead for the study he has bestowed and the success he has achieved in the structure of the hospital, in the sanitary arrangements, and the fire appliances. I have received most valuable help from Mr. Carver in the working of the Institution. I would cordially thank Nurse Rutter for her able and successful work. I have every confidence in her, and the patients have been most kindly treated by her. The caretakers have given me every satisfaction, and done their work well. I have had occasionally to call in extra ward assistance, when having several cases in the hospital. The ambulance arrangements have worked well, and the Sanitary Inspector has devoted much time and attention to the removal of cases.

Yours respectfully,

**W. Hosegood, M.B.,**

Medical Superintendent.

February 7th, 1905.

WM. HOSEGOOD, Medical Officer of Health.

# Report of Inspector of Nuisances.

T. F. Pickering, Assoc. Royal San. Inst.

(Certified Sanitary and Meat Inspector).

FOR THE YEAR ENDING 1904.

OXLEY PLACE,

BUSHBURY LANE,

FEBRUARY 24TH, 1905.

*To the Chairman and Members of the Cannock Rural  
District Council.*

GENTLEMEN,

I have again the honour of submitting to you my report of the work carried out by me as Inspector of Nuisances, etc., to your Council during the year 1904.

Inspections :—

During the year, I have made 1,774 inspections, re-inspections, and calls, and upon reference to the summary at the end of this report the result of my work can readily be seen.

Five hundred and sixteen nuisances have been discovered whilst making above inspections, which have rendered it necessary for me to issue 86 preliminary notices and 18 duly authorised statutory notices. There have been nearly 300 letters written in connection with these notices.

Water Supply :—

Eleven houses have been found to be without a proper water supply, and after communicating with the owners I have succeeded in getting these houses supplied.

Eleven samples of drinking water have been taken for analysis, 8 of which were condemned as being unfit for drinking purposes.

Water Certificates :—

Twenty-two applications have been made for water certificates for 40 newly erected houses. I have visited each of these houses, and upon my report being satisfactory you have granted the certificates.

One prosecution has been taken out against the owner of a house situated in Bushbury for allowing same to be occupied without first obtaining a water certificate from the Council. This case was adjourned for two months to give the defendant the opportunity of obtaining the certificate, during which time he made application and obtained same.

## Slaughter Houses :—

Seventy-nine visits have been made to the slaughter houses in the district, and they have been found to be conducted in a satisfactory manner.

Eight applications for slaughter house licenses have been received, 2 for renewals, 2 to erect, and 4 to use certain premises as slaughter houses. Six of these applications were granted, and 2 refused owing to the buildings being dangerous, without paving, and any means of drainage.

One case of seizure of diseased meat has been made during the year, which consisted of the lungs and udder of a cow, diseased with tuberculosis. This was found in a barn in Essington, which was being used as a slaughter house by A. Cresswell, Walsall. I reported the case to the Council, and was instructed to prosecute. The case was heard at Willenhall, and the Magistrates decided to dismiss it.

Owing to this decision, the Council decided to appoint me as Inspector under the Knackers Act, which will give me power to take action against persons for slaughtering cattle upon any premises for other purposes than for human food, unless the premises are duly licensed.

## Dairies, Cowsheds, and Milkshops.

One hundred and seventy-six cowsheds, dairies, and milkshops have been inspected, and 45 infringements under the Dairies, Cowsheds, and Milkshops Order found. The chief infringements will be seen in the summary to consist of (1) insufficient light and ventilation, (2) premises without any means of drainage, and (3) walls in a filthy condition. To get these infringements remedied, I have only found it necessary to issue preliminary notices.

## Workshops :—

Sixty-one inspections of Factories, Workshops, and Bakehouses have been made, and 6 infringements found, which consisted of walls being found in a dirty condition, and one factory being without proper means of escape in case of fire. I have served notices in each of these cases, and have succeeded in getting the necessary work done.

## Infectious Diseases :—

I have investigated 55 cases of Scarlet Fever, Diphtheria, and Typhoid Fever, reported to me by the Medical Officer of Health, and have removed (upon the instructions of the Medical Officer) 28 patients to the Isolation Hospital. I also received notice from the Admiralty of two men who had left vessels from which there had been cases of Smallpox. These I found, and kept same under observation during the incubation period of the disease.

Since the opening of the Isolation Hospital, the Council appointed me to take sole charge of removing patients from their homes to the Hospital, and I desire to call the attention of the Council to the increased

work caused by this appointment, owing to many of the cases having to be removed in specified time to meet the wishes of the parents, and in several instances we have removed cases on Sundays. I have found great difficulty in some cases to persuade parents to allow their children to be removed, and have made as many as three visits to some homes in order to get the instructions of the Medical Officer carried out. After removing the patients, I again visit and do the necessary disinfecting.

#### Scavenging :—

One hundred and thirty-six complaints have been received of ash-pits having not been attended to; 103 of these were in Cheslyn Hay, and 33 in Bushbury. I have visited these premises, and found that the complaints were justifiable. I therefore gave instructions to the contractor for the immediate emptying of the ashpits.

I am pleased to be able to report that since the appointment of Mr. J. Hemingsley as contractor for scavenging at Cheslyn Hay there has been a decided improvement in the manner in which this work is carried out, and the number of complaints has been reduced considerably.

#### Petroleum.

In June last, the Council decided to appoint an officer under the Petroleum Act, and this office was conferred upon myself. I have, therefore, made 17 inspections under this appointment, and have found that we have several qualities of oil being stored in the district, some of which I consider doubtful as to the flashing point.

I have received five applications for licenses to store inflammable oils, two for the storage of colzalene, two for petrol and petroleum, and one for petroleum and benzalene. I inspected these premises, and found that two of the stores were improperly constructed and situated, and I therefore advised the Council to withhold the licenses until the necessary work had been done. This was decided, and after the work had been done satisfactorily all the licenses were granted.

#### Canal Boats :—

Appended is a copy of my Annual Report to the Local Government Board showing work executed under the Canal Boats Acts during the year 1904.

In conclusion, I again respectfully desire to express my thanks to the Chairman and Members of the Council, the Medical Officer of Health, and the Clerk, for the very courteous treatment and assistance given me since my appointment.—I am, Your Obedient Servant,

T. F. PICKERING, Inspector of Nuisances.

Untrapped openings in drains	...	5
Total	...	45

*Improvements made in compliance with notices served :—*

Cowsheds provided with proper light and ventilation	8
Overcrowding of cowsheds abated ... ..	1
Walls of cowsheds cleansed and limewashed ...	8
Premises properly drained ... ..	6
Drains improved or repaired... ..	6
Floors and channels repaired and re-laid ...	6
Proper and sufficient water supply provided ...	1
Total ... ..	36

## CANAL BOATS.

The following is a copy of the report submitted to the Local Government Board showing the work executed under the provisions of the Canal Boats Acts, 1887—1884 :—

*CANNOCK RURAL DISTRICT COUNCIL.**Canal Boats Report for Year ending 1904.*

The duties of Canal Boats inspection in this district are carried out by the Inspector of Nuisances.

Fifty boats have been inspected during 1904, and the following infringements discovered :—

Certificates not produced... ..	3
Certificates not identifying owner ... ..	5
Marking ... ..	5
Overcrowding ... ..	2
Painting ... ..	3
Provision of water vessel... ..	4
Cabins damp dilapidated... ..	3
Total ... ..	25

Legal proceedings have been taken in respect of one boat, the owner having refused to produce the Certificate of Registration. A fine of 10s. and costs was inflicted, which amounted to the sum of 19/9.

All the other infringements have been dealt with by issuing notices, and following same up with letters. Twelve notices have been issued, supplemented by 23 letters.

The condition of the boats generally has been found to be satisfactory, and the occupants clean and courteous in their manner.

T. F. PICKERING, Canal Boats Inspector.

# STAFFORDSHIRE COUNTY COUNCIL.
