- (b) Number of inspections made for the purpose ... 3
3. Number of dwelling houses found to be in a state so dangerous or injurious to health as to be unfit for human habitation ... 2
4. Number of dwelling houses (exclusive of those referred to under the preceding sub-head) found not to be in all respects reasonably fit for human habitation ... 25

## II. Remedy of Defects during the Year without Service of Formal Notices.

Number of defective dwelling houses rendered fit in consequence of informal action by Local Authority or their Officers ... .. 25

## III. Action under Statutory Powers during Year.

A. Proceedings under Sections 9, 10 and 16 of the Housing Act, 1936 ... .. 0

I. Number of dwelling houses in respect of which notices were served requiring repairs ... .. 0

(II.) Number of dwelling houses which were rendered fit after service of formal notices :—

(a) By Owners ... .. 0

(b) By Local Authority in default of owners ... 0

B. Proceedings under Public Health Acts :—

(I.) Number of dwelling houses in respect of which notices were served requiring defects to be remedied ... .. 0

(II.) Number of dwelling houses in which defects were remedied after service of formal notices :—

**IV. HOUSING ACT, 1936.—PART IV.—OVERCROWDING.**

(I.) Number of cases of overcrowding relieved during the year ... .. 1

(II.) Number of persons concerned in such cases ... 12

Owing to the large influx of evacuees and war workers into the district, both official and unofficial, all available housing accommodation was taken, and there is no doubt that many cases of overcrowding occurred, which, even if the Local Authority had been aware of, would have been unable to take any action. The changing population makes it difficult to keep any record.

## V. WATER SUPPLIES.

Number of private supplies to houses improved	...	3
Number of premises connected to public mains	...	42
Number of samples taken during the year	...	30

During the year the Council's supplies were augmented by the completion of the No. 1 Area Scheme and springs at Postlip. The former yield a dry weather flow of 140,000 gallons per day, and the latter 60,000. The cost of the works totalled £33,468. Further improvements to the distribution scheme were commenced at the end of the year at an estimated cost of £2,277. Repeated demands from Military Authorities resulted in work being commenced at Stanway to pick up further springs, and this work, together with proposed extension of mains, was estimated to cost £6,700.

## VI. INSPECTION OF FOODSTUFFS.

### (a) Meat and other Foods.

Owing to centralisation no regular slaughtering has been carried out in this area. A few emergency slaughters of pigs took place, and these were inspected in the normal manner.

A number of inspections of shops were made, and a total of 14 cwt. 1 qr. 18½ lb. of tinned and other foodstuffs were condemned.

### (b) Milk and Dairies.

Thirty-two samples of milk were taken during the year for the purpose of ascertaining the standard of cleanliness.

During the year 166 inspections of dairy premises were made, and the majority of these being at the time of milking.

Two Statutory Notices were served and, as a result of conditions observed at one premises in December, the Council later decided to take Police Court proceedings and cancel the retail licence of the purveyor.

(c) **Bakehouses, etc.**

Two visits were paid to Bakehouses, and no fault found with conditions.

(d) **Factories and Workshops.**

Twenty-one visits were paid to Factories and Workshops. One canning factory caused serious pollution of the stream by the discharge of wastes, and this became a matter of discussion between the owners and the Ministry of Health and the Council.
