Public Health Department,  
Greyfriars,  
North Street,  
Chichester.

September, 1970.

To the Right Worshipful the Mayor, Aldermen and Councillors  
of the City of Chichester.

Mr. Mayor, Ladies and Gentlemen,

I submit herewith the Annual Report on the health and sanitary  
circumstances on the City. The Chief Public Health Inspector's report  
is included (coloured sheets).

Population. The estimated population for 1969 was 20,740, which  
is an increase of 30 over the previous year. Total births (224) fell  
yet again to a post war record low, giving a corrected birth rate of  
11.2 per thousand population. This is a significant indication of the  
wider use of the oral and other contraceptives. The illegitimate births  
numbered 12, giving a rate of 5.0 which compares with 7.5 for West Sussex  
as a whole and 8.0 for England and Wales.

Deaths numbered 331, which was 53 fewer than in the previous year.  
It can be seen that although deaths exceeded births by 107, the total  
population figure rose by 30. This increase of population was due,  
presumably, to new residents moving into the City.

Housing. New houses completed during the year numbered 128,  
(see page 22). The number of dwellings in the City at 31st March, 1970  
totalled 6,702 of which the Local Authority owned 1,951.

Meals on Wheels. Once again I should like to thank the W.R.V.S.  
for their splendid achievement in delivering 25,243 meals throughout the  
year. This represents an increase over the previous year of 7,366 meals  
served to residents. In addition 3,075 meals were served to the Sunray  
Club.

Infectious Diseases. Measles totalled 44 (see page 11). It is  
anticipated that the introduction of measles prophylaxis vaccine will  
shortly reduce the incidence to negligible proportions.

D. WARREN BROWNE

MEDICAL OFFICER OF HEALTH

# SECTION I

## STATISTICS AND SOCIAL CONDITIONS

The City is chiefly a residential and administrative centre with outlying agricultural parts. It lies almost in the centre of Chichester Rural District, in the coastal plain of West Sussex, between the South Downs and the sea, which is some seven miles from the centre of the City.

Industries are varied in nature and not concentrated in any one sector, apart from the Industrial Estate being developed by the Council to the south of the Portsmouth-Brighton railway line. There are no large industries which might have a prejudicial effect on the health of the City inhabitants.

### General Statistics

|                                                                            |            |
|----------------------------------------------------------------------------|------------|
| Area in Acres                                                              | 2,873      |
| 1961 Census Population (as April, 1961)                                    | 20,124     |
| Registrar-General's Estimate of Population (mid 1968)                      | 20,710     |
| Registrar-General's Estimate of Population (mid 1969)                      | 20,740     |
| Number of inhabited dwellings (according to Rate Books at 1st April, 1969) | 6,617      |
| Rateable Value (at 1st April, 1969)                                        | £1,249,052 |
| Estimated product of a Penny Rate (1969/70)                                | £4,975     |

### VITAL STATISTICS

#### Live Births

|                                                |       | M   | F   |                                 |             |                                 |                 |                                 |
| 1968                                           | 384   | 158 | 226 | 18.5                            | 10.0        | 9.5                             | 10.6            | 11.9                            |
| 1969                                           | 331   | 160 | 171 | 16.0                            | 9.4         | 9.1                             | 10.1            | 11.8                            |

The natural decrease in population, i.e. the excess of deaths over births was 107.

The chief causes of deaths, in order of frequency, were:-

|                                                    | 1968 | 1969 |
|----------------------------------------------------|------|------|
| (i) Diseases of the heart and circulatory system   | 193  | 156  |
| (ii) Respiratory diseases (excluding tuberculosis) | 77   | 71   |
| (iii) Neoplasms (cancer)                           | 72   | 69   |

Of total deaths, 258 occurred in persons aged 65 years or over, and, of these 166 were of persons aged 75 years or over.

A table at the end of this Section shows the age, sex distribution and causes of death during 1969.

Table 4

Perinatal Mortality  
Stillbirths & Deaths under 1 week

| Stillbirths & Deaths under 1 week: Chichester City |       |     |   |              | Rate per 1,000 live births |             |                 |
|----------------------------------------------------|-------|-----|---|--------------|----------------------------|-------------|-----------------|
| Year                                               | Total | Sex |   | Illegitimate | Chichester City            | West Sussex | England & Wales |
|                                                    |       | M   | F |              |                            |             |                 |
| 1968                                               | 8     | 5   | 3 | -            | 33.4                       | 22.8        | 25.0            |
| 1969                                               | 7     | 3   | 4 | 1            | 31.0                       | 22.0        | 23.0            |

Table 6 below gives details of age, sex and cause of death of the 4 infantile deaths in 1969.

Table 6

| Cause of death           | Age and sex analysis |         |        | Total |   |
|--------------------------|----------------------|---------|--------|-------|---|
|                          | 7 hours              | 8 hours | 2 days | M     | F |
| Prematurity              | 1 (F)                | 1 (M)   | 1 (M)  | 2     | 1 |
| Congenital Abnormalities | -                    | -       | -      | -     | - |
| Respiratory Disease      | -                    | -       | -      | -     | - |
| TOTALS:                  | 1 (F)                | 1 (M)   | 1 (M)  | 2     | 1 |

It will be seen from the above table that these 3 infantile deaths occurred within the first four weeks of life; this compares with 2 such deaths in 1968.

## Cancer

This classification includes all deaths registered as being due to cancer, malignant and lymphatic neoplasms, epithelioma, sarcoma, etc.

The total number of deaths in the City during 1969 from all forms of cancer was 69 a decrease of 3 compared with 1968.

The death rate from this cause per 1,000 population is 3.3 (3.5 in 1968) which compares with a rate (provisional) of 2.3 for England & Wales for 1969.

The mortality from cancer for the years 1960/69 inclusive is set out below:-

Table 7

| Year | Deaths |         | Total | Death rate per 1,000 population |
|------|--------|---------|-------|---------------------------------|
|      | Males  | Females |       |                                 |
| 1960 | 24     | 18      | 42    | 2.2                             |
| 1961 | 30     | 26      | 56    | 2.9                             |
| 1962 | 19     | 26      | 45    | 2.3                             |
| 1963 | 27     | 25      | 52    | 2.6                             |
| 1964 | 23     | 23      | 46    | 2.2                             |
| 1965 | 25     | 29      | 54    | 2.6                             |
| 1966 | 28     | 29      | 57    | 2.8                             |
| 1967 | 25     | 26      | 51    | 2.5                             |
| 1968 | 35     | 37      | 72    | 3.5                             |
| 1969 | 32     | 37      | 69    | 3.3                             |

In the following table, the sites of fatal cancer for both sexes are shown for the year 1969:-

Table 8

| Lung Bronchus |   | Breast |   | Stomach |   | Other sites |    | Total |    |
|---------------|---|--------|---|---------|---|-------------|----|-------|----|
| M             | F | M      | F | M       | F | M           | F  | M     | F  |
| 11            | 6 | -      | 8 | 1       | 6 | 20          | 17 | 32    | 37 |

Deaths from cancer for the year 1969 by age groups (male and female) were as follows:-

Table 9

| Age Group      | Male | Female |
|----------------|------|--------|
| 1 - 4          | 1    | -      |
| 5 - 14         | -    | -      |
| 15 - 24        | 1    | 1      |
| 25 - 34        | 1    | -      |
| 35 - 44        | -    | -      |
| 45 - 54        | -    | 5      |
| 55 - 64        | 11   | 8      |
| 65 - 74        | 11   | 8      |
| 75 and upwards | 8    | 16     |
| Total          | 32   | 37     |

Table 10

| Causes of Death                            | Under 4 weeks | 4 weeks and under 1 year | Age in Years |      |       |       |       |       |       |       | M           | F   | Total all ages |
|--------------------------------------------|---------------|--------------------------|--------------|------|-------|-------|-------|-------|-------|-------|-------------|-----|----------------|
|                                            |               |                          | 1-4          | 5-14 | 15-24 | 25-34 | 35-44 | 45-54 | 55-64 | 65-74 | 75 and over |     |                |
| 1. Meningococcal Infection                 | -             | -                        | -            | -    | 1     | -     | -     | -     | -     | -     | -           | 1   | 1              |
| 2. Malignant Neoplasm, Oesophagus          | -             | -                        | -            | -    | -     | 1     | -     | -     | -     | -     | 3           | 2   | 5              |
| 3. Malignant Neoplasm, Stomach             | -             | -                        | -            | -    | -     | -     | -     | -     | 3     | 1     | 1           | 6   | 7              |
| 4. Malignant Neoplasm, Intestine           | -             | -                        | -            | -    | -     | -     | -     | -     | 2     | 5     | 4           | 3   | 8              |
| 5. Malignant Neoplasm, Lung, Bronchus      | -             | -                        | -            | -    | -     | -     | -     | 2     | 8     | 11    | 1           | 6   | 17             |
| 6. Malignant Neoplasm, Breast              | -             | -                        | -            | -    | -     | -     | -     | 2     | 2     | -     | -           | 8   | 8              |
| 7. Malignant Neoplasm, Uterus              | -             | -                        | -            | -    | -     | -     | -     | 1     | -     | -     | -           | 1   | 1              |
| 8. Malignant Neoplasm, Prostate            | -             | -                        | -            | -    | -     | -     | -     | -     | 1     | -     | 2           | -   | 2              |
| 9. Leukaemia                               | -             | -                        | -            | -    | -     | -     | -     | -     | 1     | 1     | 3           | 1   | 4              |
| 10. Other Malignant Neoplasms              | -             | -                        | 1            | -    | -     | -     | -     | -     | 2     | 6     | 7           | 10  | 17             |

## SECTION II

### PREVALENCE OF, AND CONTROL OVER, INFECTIOUS AND OTHER DISEASES

#### Notifiable Infectious Diseases

Routine enquiries to trace the source of infection are made immediately on receipt of a notification of infectious disease and advice given to parents as to home nursing, exclusion from school, etc. Where desired disinfection is carried out, either terminally or on removal of the patient to hospital.

Table 12

#### POLIOMYELITIS

No cases of poliomyelitis were notified during the year. Generally oral vaccine continued to be used.

#### DIPHTHERIA

No cases of the disease were notified during the year, the last notification being in 1954 (the only confirmed case in the past 22 years).

#### VACCINATION AND IMMUNISATION

The West Sussex County Council, as the local health authority, is responsible for immunisation programmes, and with new procedures and immunisation techniques (and particularly the use of a computer for routine organisational and statistical purposes), every encouragement and assistance is given to parents to ensure that children receive combined protection against the more serious infectious diseases. Triple antigen vaccine against diphtheria, whooping cough and tetanus has simplified the immunisation programme. Measles vaccination is now available routinely for children in the second year of life and to susceptible children up to school-leaving age. Details of the numbers of children under 16 vaccinated during the year are given in Table 14.

TUBERCULOSIS

One case was added to the Register during the year. This was a new notification and was Pulmonary.

Seven cases were removed from the Register during 1969, five having recovered, and the other two having died from causes other than Tuberculosis. The figures are further analysed below.

Table 15

# MASS RADIOGRAPHY

Set out below are the details of information relating to the weekly half-hour visits throughout the year of the X-Ray Unit which is based at Portsmouth. These visits are primarily intended to enable patients referred by their own doctor to have an X-Ray as quickly as possible.

I am indebted for this report to Dr. J.D. Lendrum, the Medical Director of the Unit.

## MASS RADIOGRAPHY 1969 - CHICHESTER

| <u>Number X-Rayed:</u>            | <u>Male</u> | <u>Female</u> | <u>Total</u>  |
|-----------------------------------|-------------|---------------|---------------|
| Industry & General Public Unit    | 1185        | 721           | = 1906        |
| General Practitioner Service Unit | 736         | 683           | = 1419        |
|                                   | <u>1921</u> | <u>1404</u>   | <u>= 3325</u> |

## Number X-Rayed in Groups:

|                        |             |             |             |
|------------------------|-------------|-------------|-------------|
| G.P. Referrals         | 632         | 472         | = 1104      |
| Positive Reactors      | 12          | 12          | = 24        |
| Industry, Schools etc. | 1251        | 900         | = 2151      |

## SECTION III

### GENERAL PROVISION OF HEALTH SERVICES IN THE AREA

#### 1. Hospitals

A comprehensive treatment and consultant specialist service for residents of the City and surrounding district is provided by the following general and other hospitals which are administered by the South-West Metropolitan Regional Hospital Board:

- |                               |                                                                                                                                                                               |
|-------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| (a) <u>General</u>            | (Royal West Sussex Hospital, Chichester<br>(St. Richard's Hospital, Chichester                                                                                                |
| (b) <u>Infectious Disease</u> | Chichester Infectious Disease Hospital                                                                                                                                        |
| (c) <u>Chest</u>              | (Aldingbourne Chest Hospital, Norton,<br>(Near Chichester.<br>(Bognor Regis Chest Hospital Annexe.                                                                            |
| (d) <u>Maternity</u>          | Zachary Merton Maternity Home, Rustington.<br>(A considerable number of confinements also<br>take place in the Maternity Department of<br>St. Richard's Hospital, Chichester) |
| (e) <u>Mental</u>             | Graylingwell and Summersdale Hospitals<br>Chichester.                                                                                                                         |

#### 2. General medical and dental services

General medical, dental and ophthalmic services are provided in the area under arrangements made by the National Health Executive Council for West Sussex.

#### 3. Laboratory Service

The Public Health Laboratory at Priorsdean Hospital, Milton Road, Portsmouth undertakes all routine bacteriological and virological work for this department, and it is a pleasure to record my appreciation of the efficient service and helpful and willing co-operation afforded by the Medical Director, Dr. Payne, and his staff. A daily collection by road enables specimens to reach the laboratory from Chichester with the minimum delay.

#### 4. Ambulance and Hospital car service

For the City and surrounding district, a directly-administered service is operated by the West Sussex County Council.

#### 5. Local Health Authority Services

A full range of personal health services is provided in the City by the West Sussex County Council. Details are given below:-

- |                                          |                                                                                                                                                 |
|------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------|
| (a) <u>Nursing and Midwifery</u>         | Domiciliary midwifery and general nursing services are available to all who require them.                                                       |
| (b) <u>Maternity and Child Welfare</u>   | Ante and post natal and infant welfare clinics are held each week at the Health Centre, together with relaxation classes for expectant mothers. |
| (c) <u>School Health Service Clinics</u> | Minor Ailments, Aural, Child Guidance, Eye, Orthopaedic and Speech Therapy Clinics are in operation.                                            |

5. Local Health authority services (continued)

(d) Home Help Service

The County Council operate a directly-administered service. A Neighbourly Help Scheme has been brought into operation to utilise the services of neighbours unable to work the set hours of home helps.

(e) Vaccination and immunisation.

Facilities are available, either at the Health Centre or by general practitioners at their surgeries, for protective vaccination against smallpox, poliomyelitis, diphtheria, whooping cough, tetanus and measles. BCG vaccination of school children aged 13 and over is carried out (where parents so desire) in those cases where Mantoux skin-tests have indicated an inadequate resistance to tuberculosis infection.

(f) Chiropody

A directly-provided chiropody service for the aged, physically-handicapped and expectant mother groups is available on a sessional basis.

6. Other facilities

(a) Family Planning

Advice is available at a family planning and sub-fertility clinic held, under arrangements made by the Family Planning Association, every Monday between 7 and 8.30 p.m. at the Health Centre.

(b) Venereal Disease

Clinics are held on Wednesday evenings and Saturday mornings at St. Richard's Hospital, Chichester. Additional diagnostic and treatment facilities are available at St. Mary's Hospital, Portsmouth and at Worthing Hospital.

(c) Nursing Homes

One nursing home in the City, with accommodation for 8 medical or chronic patients is registered by the County Council under Section 187, Public Health Act, 1936.

7. National Assistance Act, 1948 and 1951

(a) Section 47 - Removal of persons in need of care and attention

During the year it was happily not found necessary to have recourse to the compulsory powers for removal to hospital, etc., of persons found to be in need of care and attention. With the close and ready co-operation of the geriatricians and almoners at hospitals, together with the health and welfare services of the County Council, admissions were arranged to local hospitals by tactful persuasion in those difficult cases where patients were not at first prepared to leave their homes.

(b) Section 50 - Assisted burials

No arrangements were made during 1969 for burials under this section of the National Assistance Act, 1948.

## SECTION IV

### WATER SUPPLY

The following report on the City's water supply for the year is supplied by Mr. L.J. Simpson, Engineer to the Portsmouth Water Company.

#### Sources of Supply, Treatment and Sampling Results

The public water supply to the City is all derived from the chalk of the South Downs by means of wells, boreholes, and adits at Fishbourne, Funtington and Lavant Pumping Stations. The supply was satisfactory, both in quality and quantity, throughout the year.

The raw waters were free from any tendency towards plumbo-solvent action. They underwent continuous purification before being pumped either directly into the distribution system or into the storage reservoir at Lavant.

At all three sources treatment consisted of the application of chlorine in minimum quantities except at Fishbourne where a higher dose of chlorine was applied followed by de-chlorination by sulphur dioxide to a normal chlorine residual.

All the three Stations supplying the City are under automatic operation with supervisory control.

During the year 65 samples collected from the distribution system within the City were examined, together with 234 samples of treated water derived from the same source but taken outside the City. Additionally, 78 samples of untreated water were examined in the Company's laboratory.

All the samples of treated water were reported to be of the highest standard of bacterial purity indicative of a wholesome water suitable for public water supply purposes.

The total hardness of the supply varied from 250 p.p.m. (Funtington source) to 280 p.p.m. (Fishbourne Source). The average total hardness of the City's supply being 255 p.p.m. of which the permanent hardness was between 30 and 40 p.p.m.

During the year there were 187 connections to the public water supply and 19 disconnections, making a net increase of 168.

The number of dwelling houses in the City of Chichester supplied from public water mains, direct to the house is 6,910.

The fluoride content of all the raw waters is less than 0.1 p.p.m.

## DRAINAGE AND SEWAGE DISPOSAL

Chichester is drained as far as possible on the separate system of main drainage (i.e. rain water is drained separately from soil water).

The Sewage Disposal Works, the outfall from which discharges into Chichester Harbour, are situated at Appledram.

### Cesspool Drainage

The majority of houses in the City are on main drainage, but in the unsewered areas there are approximately 180 properties with cesspool drainage. During the year 580 emptyings of cesspools were carried out by the Council, 4 free emptyings being allowed per year for each premises.

### Public Cleansing

Trade refuse is collected from shops and offices in the main streets twice weekly. A weekly domestic collection is operated; disposal being the Corporation's controlled tip at Westhampnett Road, where a programme of in-filling of disused gravel pits is continuing.

Street cleansing is carried out daily in the main streets and at frequent intervals in other streets using a mechanical sweeper supplemented by manual orderlies when necessary.

## COMMON LODGING-HOUSES

There are no registered common lodging-houses in the City.

## PUBLIC MORTUARY

Continued use was made during the year of the facilities provided by the public mortuary, which include refrigerated storage. An arrangement is in operation for bodies from Chichester, Midhurst and Petworth Rural Districts to be admitted, mainly where post-mortem examinations are subsequently carried out. The following table summarises and analyses the admissions during the year.

Table 17

|                     | Reason for admission: |                             | Total |
|---------------------|-----------------------|-----------------------------|-------|
|                     | Awaiting burial       | For post-mortem examination |       |
| Chichester          | 1                     | 24                          | 25    |

SECTION VHOUSINGSlum Clearance

No clearance areas were declared. During the year confirmation was received in respect of four clearance areas comprising fourteen houses. Nine individual houses were represented as being unfit for habitation and seven tenants of unfit properties were rehoused. At the end of the year a clearance area comprising three houses was outstanding.

It is considered improbable that any unfit houses will be represented for inclusion in clearance areas within the foreseeable future. Since 1946 well over five-hundred houses have been dealt with, either as individually unfit or under Part III of the Housing Act. Some four-hundred and fifty have been demolished whilst the remainder have been, or are being reconditioned with the aid of improvement grants, to continue a useful life.

There are however a number of properties which are likely to be the subject of closing or demolition orders but the main emphasis must now be directed towards the rehabilitation of some nine-hundred city houses lacking basic amenities and in varying stages of disrepair. The provisions of the Housing Act 1969 enabling both improvements and essential repairs to attract grant aid should prove an added inducement to owner/occupiers who wish to improve their houses. In the case of tenanted properties, however, there is much less incentive for owners to carry out works of improvement.

Improvement of Houses

During the year twenty-nine applications for improvement grants, (three discretionary and twenty-six standard) were approved. Of the standard applications approved, twelve were for extended grants.

|                                    | <u>Standard</u> |                 | <u>Extended Standard</u> |                 | <u>Discretionary</u> |                 |
|------------------------------------|-----------------|-----------------|--------------------------|-----------------|----------------------|-----------------|
|                                    | <u>o/occ.</u>   | <u>tenanted</u> | <u>o/occ.</u>            | <u>tenanted</u> | <u>o/occ.</u>        | <u>tenanted</u> |
| Applications received and approved | 8               | 6               | 9                        | 3               | 1                    | 2               |
| Dwellings improved                 | 6               | 4               | 5                        | 7               | 1                    | 1               |
| Amounts paid in grants             | £1,236          |                 | £3,319                   |                 | £700                 |                 |
| Average grant per house            | £124            |                 | £277                     |                 | £350                 |                 |

Two further houses were improved following the service of preliminary notices under Section 19 of the Housing Act, 1964.

Housing Act 1961 and 1969  
Houses in Multiple Occupation

This type of accommodation is present in the City to a limited extent only. Unfortunately, these properties are, in the main, fairly old and lack some or all of the basic amenities and usually do not come to the knowledge of the department until the lettings have taken place. Following inspections action is taken where unsatisfactory standards are found, i.e. disrepair, inadequate lighting or ventilation, insufficient washing facilities, sanitary conveniences, means of heating and facilities for the storage, preparation and cooking of food. Where water closets are shared between different families, there is a serious public health hazard. When overcrowding conditions are found, action can be taken to reduce the number of occupants and/or lettings. The fire authority is consulted when it is considered that properties are inadequately protected against fire risks.

Six houses are recorded as being used for multiple occupation at the present time. Five others have reverted to single occupation following representations or recommendations.

#### Rent Act 1957

One application was received for a certificate of disrepair and the owner's undertaking to carry out the necessary works was accepted.

#### Housing Act 1969

The Housing Act 1969 amended the law with regard to rents payable for certain dwellings in good repair and provided with certain amenities or improved with the assistance of improvement grants.

Three certificates of provisional approval were issued in respect of three combined applications for qualification certificates and improvement grants.

#### Overcrowding

No action was necessary during the year.

#### Public Health (Recurring) Nuisances Act 1968

This Act provides Local Authorities with more effective powers to deal with statutory nuisances which although abated are likely to recur on the same premises. A prohibition notice may be served whether or not an abatement notice has been served under Section 93 of the Public Health Act, 1936.

### Housing Statistics

#### Houses erected during the year

|                             |     |
|-----------------------------|-----|
| By local authority .....    | 55  |
| By private enterprise ..... | 73  |
| Total                       | 128 |

#### 1. Inspection of dwelling houses during the year

Total number of dwellinghouses inspected for housing defects (under Public Health and Housing Acts) .... 131

Number of inspections made for this purpose ..... 372

Number of dwellings (included under the above sub-heading) which were inspected and recorded under the Housing Consolidated Regulations, 1925 and 1932 ..... 32

Number of dwellings found to be in a state so dangerous or injurious to health as to be unfit for human habitation ... 9

Number of dwellings (exclusive of those referred to under the preceding sub-heading) found not to be in all respects reasonably fit for human habitation ..... 53  
(Rendered fit by informal action)

#### 2. Action under Statutory powers during the year:

##### (i) Repairs

No statutory action under either the Housing Act, 1957 or the Public Health Act, 1936, was necessary to secure the repair of unfit houses.

(ii) Clearance Areas - Housing Act, 1957

Number of dwelling houses unfit for human  
habitation demolished under Section 43 (1)  
Housing Act, 1957 ..... 7

(iii) Demolition and Closing Orders - Housing Act 1957

- (a) Number of unfit houses demolished  
as a result of formal or informal  
procedure under Section 17(1) .... 1
- (b) Number of local authority-owned  
houses (unfit) closed ..... 7
- (c) Number of unfit houses closed  
under Sections 16(4), 17(1) and 35(1) 9
- (d) Number of unfit houses closed  
under Section 17(3) and 26 ..... -
- (e) Parts of houses closed under  
Section 18 ..... -
- (f) Number of houses reconditioned  
and undertakings cancelled  
(Section 16) ..... 5

3. Remedy of defects during the year  
without service of formal notices

Number of dwelling houses rendered fit in consequence  
of informal action by the Local Authority or their  
Officers under the Public Health and Housing Acts .... 95

Food and Drugs Act, 1955The Food Hygiene (General) Regulations, 1960The Food Hygiene (Markets, Stalls and Delivery Vehicles) Regulations 1966

Whilst food premises are improving with new methods of packaging and temperature controlled cabinets, the old-fashioned virtues of clean handling by assistants, and clean premises must remain as priority requirements. The work involved in keeping the preparation rooms, kitchen and store rooms clean is not easy, and shopkeepers find these tasks are avoided by some shop and cafe workers. In the larger stores especially, this can be a problem. In some cases a member of the staff has to be detailed to do this work in addition to his normal employment. In others it has been found a good idea to enlist the aid of an active old age pensioner who will spend a few hours each day collecting up discarded boxes, and generally helping to keep the premises clean and tidy. If a certain amount of pride can be engendered in the right person, the transformation at the rear of premises can be remarkable. Complaints of unclean premises become rare, and the threat of rodent and fly infestation dramatically reduced when waste is speedily removed and stored in proper containers.

At the height of the season, problems of fly and wasp infestation occur. The staff in food shops are more than usually busy and tend to overlook the odd fly or wasp. If they do take notice the first reaction is to reach for an aerosol fly spray, which if used in the vicinity of open food can cause contamination. This method of dealing with flying insects is to be deprecated and any of the apparatus used in shops which emit sprays and vapours is not encouraged by this department. Although there is to my knowledge no evidence of harmful effects to human beings inhaling these chemicals, on aesthetic grounds alone, their use is objectionable.

There is now on the market a method of controlling flying insects incorporating an electrified grid onto which the flying marauders are attracted and suffer electrocution. This seems to be a far better way of dealing with this problem, than by sprays and vapours.

Thirty complaints regarding food or food premises were received and dealt with. Thirteen referred to the following complaints.

| <u>Complaint</u>                  | <u>Action Taken/Remarks</u>                                                                                                                                                                                                                                                                                                               |
|-----------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. Mouse droppings in bread roll  | Dough found contaminated by mouse droppings early morning, by the baker, had been withdrawn from production and disposed of. Inspection confirmed presence of mice in the flour loft. Bait and traps laid caught 5 mice. Infestation cleared and measures taken to mouse-proof the store as far as practicable to prevent re-infestation. |
| 2. Bad Fish (Slaith or Coal fish) | Shop visited, no other fish affected. Fish disposed of. Slight decomposition. Customer refunded.                                                                                                                                                                                                                                          |
| 3. Mouldy meat pies               | Manager of the food concern interviewed. Found that meat pies in stock were 8 days old. Manager reprimanded by Company and instructed on proper stock rotation.                                                                                                                                                                           |
| 4. Mouldy chocolate eclairs       | Bakery owner admitted eclairs were affected. He withdrew 8 doz. from sale after noticing eclairs made the previous day were mouldy as a result of storage in a hot damp atmosphere. New storage arrangements made to prevent a recurrence.                                                                                                |

| <u>Complaint</u>                                      | <u>Action Taken/Remarks</u>                                                                                                                                                                                                                                          |
|-------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 5. Sediment deposited under lid of canned Ginger Beer | Chief Chemist of Company concerned visited, inspected the can. Sediment found to be normal food constituent, i.e. ginger.                                                                                                                                            |
| 6. Unsound minced steak pie                           | Investigation revealed that pie had been delivered to the shop 6 days before sale. Shelf life two days. Correspondence between the department and multiple store concerned, resulted in a refrigerated cabinet being provided. Instructions given on stock rotation. |
| 7. Unsound frozen chicken                             | Inspected and found to be fit for human consumption. Complainant notified.                                                                                                                                                                                           |
| 8. Unsound tin of Grapefruit segments                 | On inspection found to be fit for human consumption. Complainant notified.                                                                                                                                                                                           |
| 9. Purple colour of potato crisps                     | Natural discoloration due to "Record" potatoes. Not detrimental to health. Affected crisps are usually removed at factory, because of consumer resistance.                                                                                                           |
| 10. Brown loaf containing grey material               | Owner of bakery interviewed and asked to exercise greater care in the future. Foreign matter found to be white dough from moulding machine.                                                                                                                          |
| 11. Sliced loaf covered by pink mould                 | "Monilia sitophila" mould. Slicing machine blades treated with methyl alcohol to obviate future occurrence.                                                                                                                                                          |
| 12. Dirty milk bottle                                 | Dairy management informed; employees informed. Greater vigilance to be exercised to endeavour to avoid recurrence.                                                                                                                                                   |
| 13. Fly alleged present in ice-cream sundae           | Cafe inspected and ice-cream factory informed. Both take steps to combat flies, and have hygienic premises. Greater vigilance to be exercised in the future.                                                                                                         |

#### Mobile Food Shops

There are four known ice-cream vans operating in the City which were inspected.

#### Registered food premises

##### (a) Under Section 92, Chichester Corporation Act, 1938

|                                                                          |    |
|--------------------------------------------------------------------------|----|
| Preparation or manufacture of sausages, preserved potted etc. meat ..... | 23 |
| Sale and storage of ice-cream .....                                      | 77 |

##### (b) Under Section 8, Milk and Dairies Regulations, 1949

|                                            |   |
|--------------------------------------------|---|
| Dairies .....                              | 3 |
| Distributors (1 wholesale, 4 retail) ..... | 5 |

Inspections of registered food premises were carried out during the year as under:-

|                                                         |    |
|---------------------------------------------------------|----|
| Manufacture of sausages, potted or preserved food ..... | 28 |
| Dairies .....                                           | 20 |

Regulations 16 and 19 of the Food Hygiene (General) Regulations, 1960

relating to the provision of wash-hand basins and sinks applies as follows:-

| Type of Premises                                                                      | No. | No.of premises fitted to comply with Reg.16 | No.of premises to which Reg. 19 applies | No.of premises fitted to comply with Reg.19 |
|---------------------------------------------------------------------------------------|-----|---------------------------------------------|-----------------------------------------|---------------------------------------------|
| Bakehouses and Confectioners                                                          | 33  | 33                                          | 30                                      | 30                                          |
| Butchers                                                                              | 18  | 18                                          | 18                                      | 18                                          |
| Cafes and restaurants (excluding public houses and hotels with restaurant facilities) | 30  | 30                                          | 30                                      | 30                                          |
| Dairies                                                                               | 3   | 3                                           | 3                                       | 3                                           |

| Food factories                                                                        | 4   | 4                                           | 4                                       | 4                                           |
| TOTAL:                                                                                | 257 | 257                                         | 252                                     | 252                                         |

### Milk supply

U.H.T. milk is sold in the City, in addition to pasteurised, homogenised, sterilised, farm bottled, Channel Islands and South Devon milk. This is milk which has been subjected to ultra heat treatment (270°F) for a least one second. It is homogenised and will keep unopened without refrigeration in aluminium packs for up to five months.

There is one pasteurising plant in the City, the output being 10,000 gallons per day rising to 15,000 gallons per day during the summer months. Skimmed milk is also pasteurised and concentrated 32.5%. Cottage cheese is produced, and yoghurt output is 100,000 cartons per week. Surplus skimmed milk is powdered and goes for manufacture of baby foods, chocolate, etc.

Dealers' licences under the Milk (Special Designation) Regulations 1960, are issued by the West Sussex County Council, as the Food and Drugs authority and operate for a five year period from the date of issue.

### Brucella Abortus

No samples of raw milk were examined during the year. All locally produced supplies are sent for pasteurisation.

### The Liquid Egg (Pasteurisation) Regulations, 1963

There are no processing plants of this type in the City.

### Poultry Inspection

#### Slaughter of Poultry Act, 1967

The Chief Public Health Inspector and the Deputy Chief Public Health Inspector were appointed the authorised officers of the City Council to enter premises to ensure compliance with the Act. There are, however no poultry processing establishments in the City.

### The Meat (Sterilization) Regulations, 1969

These regulations state that all meat found unfit for human consumption and all knacker meat has to be sterilised before it is sold.

The most common causes of complaint were:-

Motor vehicle repair works  
Road breakers  
Traffic noise  
Factory noises  
Computer extract fan and humidifier  
Building Contractor's machinery  
Refrigerator motors.

#### Noise Abatement

Noise affects communities everywhere and as an unfortunate by-product of civilisation it is increasing at a tremendous rate with the growth of industry and road traffic.

There has been no lessening in the frequency of complaints and fortunately it has been possible, in all cases, to eliminate or reduce noise levels to acceptable standards. There is, however, an outstanding complaint of noise emanating from premises outside the City, from racing or sports cars being tested on a former motor racing circuit. The noise being experienced is intermittent, occurs at infrequent and sometimes lengthy intervals and mostly ends by mid-afternoon. The background noise level, in the area from which the complaints arise, is below 40 dBA and as the average noise level when cars are speeding around the circuit is around 60 dBA with peaks in excess of this figure it is not surprising that residents feel aggrieved.

A meeting with the operators of the circuit has been held. They are aware of the inconvenience to residents that could be caused by, and alive to the implications that might result from excessive use of the track and have therefore limited its use to what they consider to be essential testing, ceasing by 5.00 p.m.

The same residents also complain of the noise from light aircraft using grass runways inside the same perimeter track but of course the Noise Abatement Act excludes from its provisions the noise or vibrations from aircraft.

For several years a small dry cleaning factory in a residential area of the City, had been a source of complaints in regard to noise and fumes from the operation of a steam generator used in connection with the steam presses. The building was of poor construction and a schedule of necessary works submitted to the owners was so extensive that it was suggested to them that it might be advantageous for the operations to be transferred to their main factory outside the City. This was eventually agreed and during 1969 the premises ceased to be used for their original purpose to the great satisfaction of all concerned. It is now hoped that the future use of the buildings will accord more with predominantly residential nature of the area.

Maximum permitted noise levels continue to be attached, where appropriate to planning consents, where factories are to be established, extended or change of use granted in or adjacent to residential areas. This is proving to be the most hopeful development to date, and one that should eventually result in far reaching improvement in environmental conditions.

### Plans

Plans for new buildings or improvements and alterations to existing ones are referred to this department by the City Surveyor where they relate to food premises, factories or offices and shops. Inspections and recommendations are then made to ensure that any necessary alterations are incorporated in the plans to comply with the Food Hygiene (General) Regulations 1960, the Factories Act, 1961 and the Offices, Shops and Railway Premises Act, 1963.

### Clean Air Act 1956

Ten complaints dealt with were concerned with burning of rubbish at the rear of factories, and bonfires.

Section 3 of the Act, requires that new furnaces shall be, so far as practicable, smokeless, and that proposals to install such furnaces shall be given to the Local Authority. No such proposals were received during the year.

No smoke control areas exist in the City at the present time.

### Chimney Heights

Information on chimney heights applicable to one proposed factory site was given to a developer during the year.

It was necessary to investigate complaints concerning oil fumes from a furnace chimney, as a consequence of which a truncated cone was fitted with the object of increasing the efflux velocity to assist in the more efficient dispersal of gases.

### Pigeon Control

#### Public Health Act, 1961 - Section 74

Pigeons continue to foul and deface buildings in the City. Pigeons can carry a variety of diseases and create conditions which encourage mites, flies, carpet beetles and other pests.

For these reasons, trapping was continued and approximately 200 feral pigeons were accounted for in the City centre. During the past five years some 450 pigeons have been caught.

As pigeons congregate in different areas, fresh trapping sites have to be found to deal with them. The siting of the traps is decided after careful survey of the area. No other species of bird is caught. Small birds undoubtedly frequent the sites, but are free to walk in and out of the traps at will.

The practice of coating ledges etc., with jelly-like compounds to discourage pigeons roosting appears to me to be of doubtful value. It is expensive, effective for a limited period only and does nothing to reduce the pigeon population which moves to adjacent unprotected buildings that have hitherto been free.

#### Camping Sites and moveable dwellings

There are no licensed sites in the City. One showman's site is in use, mainly in the winter months.

#### Offensive Trades

No nuisances were reported during the year from offensive trades.

#### Shops Act 1950

Inspections are carried out periodically and when inspections are made in connection with the Offices, Shops and Railway Premises Act, 1963 and the Food Hygiene (General) Regulations, 1960 guidance is given to shopkeepers and queries answered on problems arising on the administration of this Act.

THE OFFICES, SHOPS AND RAILWAY PREMISES ACT, 1963

During the year inspections of premises continued. Details of the work, together with particulars of registrations, accidents reported and investigated, are listed below.

(A) REGISTRATION AND GENERAL INSPECTION

| Class of Premises                                     | Number of premises registered during the year | Number of registered premises at end of year | Number of registered premises receiving a general inspection during the year |
|-------------------------------------------------------|-----------------------------------------------|----------------------------------------------|------------------------------------------------------------------------------|
| Offices                                               | 4                                             | 172                                          | 62                                                                           |
| Retail shops                                          | 6                                             | 237                                          | 39                                                                           |
| Wholesale shops, warehouses                           | 2                                             | 18                                           | 6                                                                            |
| Catering, establishments open to the public, canteens | -                                             | 40                                           | 22                                                                           |
| Fuel Storage depots                                   | -                                             | 1                                            | 1                                                                            |
| TOTALS:                                               | 12                                            | 468                                          | 130                                                                          |

(B) TOTAL NUMBER OF VISITS OF ALL KINDS BY INSPECTORS TO REGISTERED PREMISES UNDER THE ACT .....160

THE OFFICES, SHOPS AND RAILWAY PREMISES (HOISTS AND LIFTS) REGULATIONS 1968

Came into operation on the 28th May 1969.

These regulations provide the same safeguards for lifts in offices, shops and railway premises as are provided for lifts in factories.

(C) ANALYSIS OF PERSONS EMPLOYED IN REGISTERED PREMISES BY WORKPLACE

| Class of workplace                         | Number of persons employed |
|--------------------------------------------|----------------------------|
| (1)                                        | (2)                        |
| Offices                                    | 1,401                      |
| Retail shops                               | 1,802                      |
| Wholesale departments, warehouses          | 163                        |
| Catering establishments open to the public | 285                        |
| Canteens                                   | 24                         |
| Fuel storage depots                        | 1                          |
| Total                                      | 3,676                      |
| Total Males                                | 1,497                      |
| Total Females                              | 2,179                      |

(D) EXEMPTIONS Number of applications received .....Nil

## No fatalities were reported

### NOTIFIABLE ACCIDENTS

An accident is notifiable if all the following conditions are fulfilled:

1. it occurs in premises to which the Act applies;
2. it is not reportable under any other enactment;
3. the injured person is employed to work in the premises; and
4. it causes death to the injured person, or disables him for more than three days from doing his usual work.

## GENERAL

1 establishment in the City used solely for the boarding of cats is inspected and licensed.

Prescribed Particulars on the Administration  
of the Factories Act, 1961. Section 153(1)

Part 1 of the Act

When visits of inspection are made to factories under the provisions of the Factories Act, opportunity is taken to inspect also for nuisances, pests and vermin, noise and clean air requirements. Where factories provide canteens, these are inspected at the same time to ensure compliance with food hygiene regulations.

1. INSPECTIONS for the purpose of provisions as to health (including inspections made by the Public Health Inspector)
