Cockermouth Urban District Council

To the Chairman and Members of the
Cockermouth Urban District Council.

Mr. Chairman and Gentlemen,

I have the honour to submit my eleventh Annual Report as Medical Officer of Health to the Cockermouth Urban District Council.

The number of births and deaths remain at average levels for the past few years.

There have been no material deaths, due to pregnancy and childbirth, but two deaths of infants inside one week from birth. These were due to prematurity and congenital defects.

Apart from these there were 5 deaths under 45 years of age. One due to Cancer, one to Coronary Thrombosis and three due to motor vehicle accidents.

Although the figures are too few to be statistically significant, deaths from alimentary cancer which always have been the highest for this type of disease, are now this year on the same level as those from cancer of the lung.

Infectious disease was not a severe problem during the year and it is gratifying to see the reduction in cases of dysentery from the previous year.

The second part of this report has been prepared by Mr. Pattison, and shows the work undertaken and efficiently carried out by his department during the year.

I would record my appreciation of the co-operation and help which I have received from him at all times and would express my thanks for the help given me by the Clerk and his staff and the continued kindness and helpfulness of the members of the Council.

I am,

Mr. Chairman and Gentlemen,

Your obedient servant,

JOHN PATTERSON,

Medical Officer of Health.

PUBLIC HEALTH STAFF.

MEDICAL OFFICER OF HEALTH :

J. PATTERSON, M.B., B.Ch., B.A.O., D.P.H.

PUBLIC HEALTH INSPECTOR :

J. J. PATTISON, M.R.S.H., M.A.P.H.I., Cert. S.I.B.

COCKERMOUTH URBAN DISTRICT COUNCIL.

ANNUAL REPORT OF THE MEDICAL OFFICER OF HEALTH

For the Year 1964.

GENERAL STATISTICS.

Area: Acres	2,040
Registrar General's estimate of resident population (mid 1964)	6,030
Number of inhabited houses (end 1964) according to Rate Books	2,233
Rateable Value	£179,536
Sum represented by Penny Rate (approx.)	£710

RAINFALL.

Records at 250 feet above sea level:—

1964.	inches of rain.
January	1.44
February	.36
March	1.05
April	2.73
May	2.48
June	2.66
July	1.87
August	2.77
September	3.58
October	3.39
November	2.59
December	4.97
TOTAL	29.89

POPULATION.

The population figure of 6,030 is given for the year 1964 by the Registrar General and called by him the "Home Population". On this figure the birth and death rates and the incidence of notifiable diseases are based.

The population figure for 1963 was 5,950.

CHIEF OCCUPATIONS OF THE INHABITANTS.

Cockermouth is an old market town (its Royal Charter having been granted in the year 1221). For many years Saw-Mills, Building Contractors, a Brewery and the Railway have employed a considerable number of persons (mainly male) and since 1939 five new works of employment were commenced; one of these, a Blood Manure factory, has ceased; the other four are made up of a Shoe and Slipper factory, a Clothing factory, a light Engineering works and a Precast Concrete works, employing altogether over 1,100 persons including a large number of female labour, particularly at the two first-named which also have workers from outside the Urban area. There are as well, of course, those individuals absorbed by the usual businesses and trades of a small country town. A few find employment about the large cattle Mart, whilst a few are engaged in agriculture, and in coal mines, quarries and steelworks outside the district.

STATISTICS.

The Tables of vital statistics are set out below showing birth rates, and rates for maternal and infantile mortality.

Crude birth and death rates are corrected by means of an Area Comparability Factor supplied each year by the Registrar General. They allow for varying age and sex distribution of the population in different areas and enable comparisons to be made with figures for other areas.

This year the factor for births is 1.0 and for deaths 1.09.

The total live births was 94. This gives a birth rate of 15.6 per thousand of the population (15.6 corrected), compared with 92 (15.5 per thousand of the population, 15.5 corrected) in 1963.

There were 2 still births during the year, and 2 deaths amongst infants under one year of age.

The number of deaths at all ages was 77, giving a death rate of 12.8 (13.9 corrected) per thousand of population compared with 11.7 (12.7 corrected) for 1963.

There were no maternal deaths during the year, nor any deaths from tuberculosis.

Cancer deaths at 12 remained at much the same level, three being due to cancer of the lung, and none due to leukaemia.

Vital Statistics

Population of the Urban District is 6,030.

LIVE BIRTHS :—

Year		Males	Females	Total	Grand Total	Rate per 1000 pop. Uncor.	Rate per 1000 pop. Cor.
1959	Legitimate	43	43	86

Years.			
Between 40—50	0	1	1
50—60	0	0	0
60—70	2	2	4
70—80	2	1	3
80—90	2	2	4
	6	6	12
Totals	6	6	12

CANCER DEATH RATE per 1,000 population 1.9 (1963—1.5 per 1,000 of population).

Approximately one death in six was due to Cancer.

INFECTIOUS DISEASE.

The total number of cases of Infectious Disease notified in 1964 was 24.

There were no notifications or deaths from Diphtheria, Poliomyelitis, Typhoid or Puerperal Pyrexia.

There were 4 notifications of Dysentery. This is a welcome decrease in the number of cases of Dysentery compared with previous years.

There were no deaths from Tuberculosis, but 3 new Pulmonary cases were notified.

CASES ON THE TUBERCULOSIS REGISTER.

	Males.	Females.	Totals.
Pulmonary	6	2	8
Non Pulmonary	12	1	13
	18	3	21
Totals	18	3	21

In 1962 this total was 24, and in 1961 it was 28, and in 1960 was 36. Last year it was 25.

IMMUNISATION.

SMALLPOX.

Age when vaccinated or re-vaccinated	Number Vaccinated	Number Re-vaccinated
Under 1	6	—
1	14	—
2—4	5	1
5—14	—	2
15 or over	1	—
	26	3

Statistics relating to smallpox vaccination complications have shown that the safest age at which to perform this process is around two years. Consequently there will be a time lag when figures are small, until the relevant age groups involved reach 18 months to 2 years.

DIPHTHERIA.

The figures in the table show the number of diphtheria immunisations performed during the year, both primary courses and booster doses.

In all, 72 children completed a primary course and 121 had booster doses.

The majority of these primary injections also include immunisation against whooping cough in the pre-five year olds, and against tetanus at all ages.

POLIOMYELITIS.

The figures show those having had two injections of Salk vaccine, those having completed a course of three, and a selected age group of all children thought to be at special risk between the ages of 6 and 12 years.

B.C.G. TUBERCULOSIS.

Mantoux Testing and B.C.G. vaccination was continued in 1964, the age groups concerned being those born in 1950 and 1951.

Of 361 children attending schools in Cockermouth who were tested 54 proved to be positive reactors. Although this gives a figure of 15 per cent. positives, examination of the results shows that at least 25 per cent. of these had previously been vaccinated at the Chest Centre or been investigated as contacts of cases. This makes the figure of positive reactors more comparable with the average for the County and the Nation.

All of these positive reactors had an X-ray of chest and all were found to be satisfactory.

POLIOMYELITIS VACCINATION.

Year of Birth	Pre	1948	1949	1950	1951	1952	1953	1954	1955	1956	1957	1958	1959	1960	1961	1962	1963	1964.	Total

ANNUAL REPORT

OF THE PUBLIC HEALTH INSPECTOR AND SURVEYOR,

J. J. PATTISON, M.R.S.H., M.A.P.H.I., CERT.S.I.B.

For the Year 1964.

**To the Chairman and Members of the
COCKERMOUTH URBAN DISTRICT COUNCIL.**

Mr. Chairman and Gentlemen,

I have pleasure in submitting my seventh Annual Report to the Council, for the year 1964.

Time does not permit a lengthy or greatly detailed account of the activities of the year but much important work has been done in the spheres of housing, street lighting and road works, apart from normal day to day matters. A great deal of time has now to be spent on meat inspection work.

Finally I express my appreciation of the ready co-operation and encouragement given to me at all times by Dr. Patterson, the Clerk and his Staff, and the valuable assistance rendered by my part-time clerical assistant, Mrs. K. Nairn, and the Works Foreman, Mr. C. Wilson.

I am,

Your Obedient Servant,

J. J. PATTISON,

Public Health Inspector and Surveyor.

WATER SUPPLY

The method of obtaining water by bulk supply from the trunk main from Crummock continued as before, the water undertaking being the property of the West Cumberland Water Board. The total amount abstracted during the year into the Moor reservoir was 114,549,000 gallons, equivalent to an average daily consumption per head of 52 gallons. This figure includes trade supplies which account for approximately 10 per cent. of the consumption. Treatment of the lake water continued as set out in the 1955 report. The Water Board continued sampling for bacteriological analysis and received consistently good reports from the Cumberland Pathological Laboratory. The amount supplied to the high level areas of the town via the Sunscals reservoir averaged 115,000 gallons per day, which was 37 per cent. of the total consumption.

Only 3 properties in the area have private water supplies.

DRAINAGE AND SEWERAGE

The sewage disposal works continued to function satisfactorily. Re-building and redraining of the sludge drying beds is being carried out.

With the exception of 42 houses and a caravan site, which have private sewage disposal works, all properties in the district are connected to public sewers.

REFUSE REMOVAL

There is a weekly collection of refuse in all parts of the town. Trade refuse is also collected. Refuse is disposed of by controlled tipping at the Lorton Road refuse tip where, despite a shortage of covering materials at times, the refuse has been mostly kept covered. Unauthorised scrap metal seekers were troublesome during the year.

FACTORIES ACTS, 1937 to 1961.

There are 54 factories in the area as follows:—

Business	Powered	Non-Powered
Engineering	1	
Shoe Manufacturing	2	
Clothing Manufacturing	1	
Baking	4	4
Joinery	5	
Joinery and Sawmilling	4	
Concrete Products	1	
Printing	2	
Gas Storage	1	
Brewing	1	
Motor Vehicle Repairs	11	1
Agricultural Machinery Repairs	3	
Panel Beating	1	
Slaughterhouses	1	1
Building Sites	4	
Water Filtration	1	
Monumental Masons	1	
Knackers Yard		1
Dressmaking	1	
Grist Crushing	1	
Egg Grading	1	

The following table shows the position under the Factories Acts, 1937 to 1961, in this district at the end of 1964:—

Premises (1)	Number on Register (2)	Inspections (3)	Number of Written notices (4)	Occupiers prosecuted (5)
(i) Factories in which Sections 1, 2, 3, 4 and 6 are to be enforced by Local Authorities	7	67	1	—
(ii) Factories not included in (i) in which Section 7 is enforced by the Local Authority	43	85	3	—
(iii) Other Premises in which Section 7 is enforced by the Local Authority (excluding out-workers' premises)	4	45	—	—
Total	54	197	4	—

Particulars	Number of cases in which defects were found				Number of cases in which prosecutions were instituted
	Found	Remedied	Referred		
			To H.M. Inspector	By H.M. Inspector	
(1)	(2)	(3)	(4)	(5)	(6)
Want of cleanliness (S.1)	3	3	—	1	—
Overcrowding (S.2)	—	—	—	—	—
Unreasonable temperature (S.3)	—	—	—	—	—
Inadequate ventilation (S.4)	—	—	—	—	—
Ineffective drainage of floors (S.6)	—	—	—	—	—
Sanitary Conveniences (S.7)					
(a) Insufficient					—
(b) Unsuitable or defective	1	1	—	1	—
(c) Not separate for sexes	—	—	—	—	—
Other offences against the Act (not including offences relating to Outwork)	—	—	—	—	—
Total	4	4	—	2	—

(NOTE—Section 1 refers to cleanliness; 2 to overcrowding; 3 to temperature; 4 to ventilation; 6 to drainage of floors; 7 to sanitary conveniences).

OFFENSIVE TRADES.

The firm of fellmongers continued to trade in the Urban area. The premises were found to be clean and well maintained during each of the 12 inspections made.

PREVENTION OF DAMAGE BY PESTS ACT, 1949.

626 visits were made and 43 premises were treated for rats and mice infestations, 3 of the properties being business premises. The techniques of the Ministry of Agriculture, Fisheries and Food were adopted and the poisons employed were zinc phosphide and Warfarin.

FOOD.

Apart from Slaughterhouses, 172 visits were made to various food premises.

Inspection of foodstuffs resulted in the following foods being condemned as unfit for human consumption:—

- 1—13½oz. Can Strawberries.
- 1—3oz. Can Tuna Fish.
- 3—3lb. Cans Tomatoes.
- 2—7oz. Cans Tomatoes.

SLAUGHTERHOUSES.

The one private licensed slaughterhouse in the district, used solely for pigs, and the public abattoir completed by Mitchell's Auction Company Limited continued to operate satisfactorily.

The abattoir was constructed in an existing building and the accommodation, machinery and equipment is all of modern design.

The abattoir is situated on Lorton Street conveniently placed in close proximity to the existing Auction Mart Premises of the Company.

The general accommodation comprises two large off loading bays for the delivery of animals, Lairage, Slaughterhall, Cooling and Hanging Hall, Suspect Holding Bay, Hide and Skin Room, Gut Room, Mess Room, Wash Room with W.C., shower and changing facilities, Office, and two separate out loading bays, one for fresh meat and one for hides, skins and waste products.

The present Hanging and Cooling Hall will at this stage accommodate thirty-three cattle units but the building has been planned so that a further twenty-seven units could be accommodated at a later date. Provision has also been made at this stage for the future installation of a pig dehairing machine and a refrigerated Cold Room of approximately 1,500 cu. feet capacity.

409 Visits were made to the Slaughterhouses for meat inspection purposes.

SUMMARY OF SLAUGHTERING, 1964.

	Bulls	Bullocks	Cows	Heifers	Calves	Sheep	Pigs
Total number inspected	1	489	10	390	2	2561	958

Four Slaughtermen are licensed in the district.

HOUSING.

The 24 flats at Croftside and 12 flats and 11 houses at St. Helen's Street were completed during the year by the Council and 49 were erected by private owners. The building of 21 aged persons flatlets, 36 flats, 12 maisonettes and 3 bungalows was commenced by the Council at the Goat before the end of the year.

During the past 20 years 462 Council and 316 private houses have been built in the district.

A great deal of work was done to increase slum clearance and representations of unfitness were made in regard to 25 houses in High Sand Lane and Waterloo Street, resulting in 22 Closing Orders being made.

Two buildings were converted into four flats during the year.

HOUSING APPENDIX.

STATISTICS.

1. Inspection of Dwellinghouses during the year:—
 - (1) (a) Total number of dwelling-houses inspected for housing defects (under Public Health and Housing Acts) 125
