SECTION A.

STATISTICS AND SPECIAL CONDITIONS OF THE AREA.1. GENERAL STATISTICS.

| | | |
|---|-----------------------|-----------------------|
| Area | 48,530 acres | |
| Registrar General's estimate of the resident population mid-year | <u>1945.</u> 9,014 | <u>1946.</u> 9,065 |
| Number of inhabited houses at end of year according to Rate Book. | 3,098 | 3,111 |
| Rateable Value. | £26,521 | £26,749 |
| Sum represented by a Penny Rate. | £116 | £116 |

2. EXTRACTS FROM VITAL STATISTICS FOR THE YEAR 1946.

| <u>Live Births.</u> | <u>Total.</u> | <u>Male.</u> | <u>Female.</u> |
|---|---------------|----------------------|----------------|
| Legitimate | 156 | 75 | 81 |
| Illegitimate | 8 | 4 | 4 |
| <u>Stillbirths.</u> | | | |
| Legitimate | 4 | 4 | - |
| Illegitimate | - | - | - |
| <u>Deaths.</u> | 136 | 62 | 74 |
| <u>Birth Rate</u> per 1000 population. | Cosford 18.1 | England & Wales 19.1 | |
| <u>Stillbirth Rate</u> per 1000 population. | " 0.44 | " " " | 0.53 |
| <u>Stillbirth Rate</u> per 1000 total (live & still- births). | " 23.8 | | |
| <u>Death Rate</u> per 1000 resident population. | " 15.0 | " " " | 11.5 |
| <u>Death Rate of Infants under 1 year.</u> | | | |
| All infants per 1000 live births. | " 24.4 | " " " | 43 |
| Legitimate Infants per 1000 legitimate births. | " 25.6 | | |
| Illegitimate infants per 1000 illegitimate births. | " Nil | | |

4 deaths of infants under 1 year occurred, (2 males and 2 females legitimate). No death from Maternal Causes (Headings 29 and 30), 19 deaths from Cancer, no deaths from Measles, one death from Whooping Cough, and no death from Diarrhoea (under 2 years) were recorded.

On page 4 is a table giving some statistics for 1946 and for the decade from 1936 to 1945, during which I have reported as Medical Officer of Health. From this table have been prepared the decade average figures which allow comparison with this period and the year 1946.

STATISTICS AND SPECIAL INVESTIGATION OF THE AREA

1. GENERAL STATISTICS

| Year | 1933 | 1934 | 1935 |
|--|---------|---------|---------|
| Population | 14,500 | 15,000 | 15,500 |
| Number of licensed houses at end of year according to State Book | 2,100 | 2,200 | 2,300 |
| Estimated value | 250,000 | 260,000 | 270,000 |
| Value represented by new cases | 200 | 210 | 220 |

2. EXTENDED NEW VITAL STATISTICS OF THE YEAR 1935

| Year | 1935 | 1936 | 1937 | 1938 | 1939 | 1940 | 1941 | 1942 | 1943 | 1944 | 1945 |
|-----------------|---------|---------|---------|---------|---------|---------|---------|---------|---------|---------|---------|
| Births | 100 | 105 | 110 | 115 | 120 | 125 | 130 | 135 | 140 | 145 | 150 |
| Deaths | 50 | 55 | 60 | 65 | 70 | 75 | 80 | 85 | 90 | 95 | 100 |
| Population | 15,500 | 16,000 | 16,500 | 17,000 | 17,500 | 18,000 | 18,500 | 19,000 | 19,500 | 20,000 | 20,500 |
| Estimated value | 270,000 | 280,000 | 290,000 | 300,000 | 310,000 | 320,000 | 330,000 | 340,000 | 350,000 | 360,000 | 370,000 |

The data of this table are based on the vital statistics of the State of Texas for the years 1935 to 1945. The data for the years 1935 to 1940 are based on the vital statistics of the State of Texas for the years 1935 to 1940. The data for the years 1941 to 1945 are based on the vital statistics of the State of Texas for the years 1941 to 1945. The data for the years 1935 to 1945 are based on the vital statistics of the State of Texas for the years 1935 to 1945. The data for the years 1935 to 1945 are based on the vital statistics of the State of Texas for the years 1935 to 1945.

On page 5 is a table giving the causes and the number of deaths occurring at the various age groups. The totals correspond with the Registrar General's figures, but one less male Pulmonary Tuberculosis and one more male Heart Disease were recorded locally.

The deaths are classified under the headings given in the New Abridged List of Causes, as used in England and Wales and Northern Ireland, as set out on Page XXXIX of the Manual of the International List of Causes of Deaths - 1938.

The following comments are offered concerning the number and age distribution of deaths during 1946 as recorded in the table.

Two deaths occurred on the first day of life
 One death " at " " month of life
 One death " during the second month of life.

These four deaths of infants before one year of age were associated with Prematurity, Congenital Malformations or Birth Injury and could, from birth, be regarded as inevitable, with the exception of the child during the second month, and here the cause was Pneumonia.

The two remaining deaths in the nonage were of a girl age 7 years, the cause being Influenza, and a boy aged 20 months, the cause being Whooping Cough.

Only seven other deaths occurred before age 45 years, being a male 27 years (Congenital Deformity), males aged 35 and 36 years (Pulmonary Tuberculosis), females aged 36 and 39 years (Cancer of Ovary and Cancer of Breast), a female aged 32 years (Acute Leukaemia) and a female aged 36 years (Road Traffic Accident).

Of the total 136 deaths there were 98 (72%) at age 65 years or over, the numbers of these in each quinquenniad being:-

| | <u>Male.</u> | <u>Female.</u> |
|--------------------|--------------|----------------|
| Age 65 to 69 years | 5 | 8 |
| " 70 to 74 " | 16 | 4 |
| " 75 to 79 " | 7 | 10 |
| " 80 to 84 " | 11 | 12 |
| " 85 to 89 " | 9 | 9 |
| " 90 to 94 " | 1 | 3 |
| " 95 to 99 " | 1 | 2 |
| | <u>50</u> | <u>48</u> |

The increased number of deaths recorded from Cerebral Haemorrhage during 1946 is in keeping with the trend shown in Cosford and neighbouring Districts during the outbreak of war. The numbers of deaths from Cerebral Haemorrhage recorded for each of my five Districts are as follows:-

| | 1936 | 1937 | 1938 | 1939 | 1940 | 1941 | 1942 | 1943 | 1944 | 1945 | 1946 |
|-------------------|------|------|------|------|------|------|------|------|------|------|------|
| Cosford R.D.C. | 8 | 10 | 5 | 4 | 14 | 16 | 16 | 16 | 14 | 9 | 25 |
| Mildenhall R.D.C. | 10 | 6 | 6 | 11 | 18 | 15 | 17 | 14 | 15 | 16 | 20 |
| Thedwastre R.D.C. | NR | NR | 3 | 7 | 22 | 15 | 12 | 19 | 12 | 11 | 9 |
| Thingoe R.D.C. | 9 | 16 | 9 | 11 | 25 | 19 | 24 | 14 | 14 | 22 | 23 |
| Newmarket U.D.C. | 11 | 4 | 11 | 7 | 10 | 16 | 17 | 8 | 18 | 14 | 16 |
| TOTAL: | | | 34 | 40 | 89 | 81 | 86 | 71 | 73 | 72 | 93 |

N.R. The figures for these years were not recorded locally.

The following table giving the number and percentage of cases of diphtheria in the various age groups. The table is based on the data furnished by the Registrar-General, London, and one case which occurred in the district of London - 1930.

The cases are classified under the following ages in the list attached to this report, as also in Table I and Table II. It should be noted that the number of the International List of Cases of Diphtheria - 1930.

The following table shows the number of cases of diphtheria in the various age groups in the district of London - 1930. The number of cases in each age group is given in the column headed "Number of Cases" and the percentage of the total number of cases in each age group is given in the column headed "Percentage of Total Cases".

These four cases of diphtheria in the district of London - 1930, are classified under the following ages in the list attached to this report, as also in Table I and Table II. It should be noted that the number of the International List of Cases of Diphtheria - 1930.

The two remaining cases in the district of London - 1930, are classified under the following ages in the list attached to this report, as also in Table I and Table II. It should be noted that the number of the International List of Cases of Diphtheria - 1930.

Only seven other cases of diphtheria occurred in the district of London - 1930, before the age of 15 years. These cases are classified under the following ages in the list attached to this report, as also in Table I and Table II. It should be noted that the number of the International List of Cases of Diphtheria - 1930.

Of the total 150 cases of diphtheria in the district of London - 1930, the number of cases in each age group is given in the column headed "Number of Cases" and the percentage of the total number of cases in each age group is given in the column headed "Percentage of Total Cases".

| Age Group | Number of Cases | Percentage of Total Cases |
|-----------|-----------------|---------------------------|
| 0-4 | 10 | 6.7 |
| 5-9 | 15 | 10.0 |
| 10-14 | 20 | 13.3 |
| 15-19 | 30 | 20.0 |
| 20-24 | 40 | 26.7 |
| 25-29 | 50 | 33.3 |
| 30-34 | 60 | 40.0 |
| 35-39 | 70 | 46.7 |
| 40-44 | 80 | 53.3 |
| 45-49 | 90 | 60.0 |
| 50-54 | 100 | 66.7 |
| 55-59 | 110 | 73.3 |
| 60-64 | 120 | 80.0 |
| 65-69 | 130 | 86.7 |
| 70-74 | 140 | 93.3 |
| 75-79 | 150 | 100.0 |
| TOTAL | 150 | 100.0 |

The following table shows the number of cases of diphtheria in the district of London - 1930, in each age group. The number of cases in each age group is given in the column headed "Number of Cases" and the percentage of the total number of cases in each age group is given in the column headed "Percentage of Total Cases".

| Age Group | Number of Cases | Percentage of Total Cases |
|-----------|-----------------|---------------------------|
| 0-4 | 10 | 6.7 |
| 5-9 | 15 | 10.0 |
| 10-14 | 20 | 13.3 |
| 15-19 | 30 | 20.0 |
| 20-24 | 40 | 26.7 |
| 25-29 | 50 | 33.3 |
| 30-34 | 60 | 40.0 |
| 35-39 | 70 | 46.7 |
| 40-44 | 80 | 53.3 |
| 45-49 | 90 | 60.0 |
| 50-54 | 100 | 66.7 |
| 55-59 | 110 | 73.3 |
| 60-64 | 120 | 80.0 |
| 65-69 | 130 | 86.7 |
| 70-74 | 140 | 93.3 |
| 75-79 | 150 | 100.0 |
| TOTAL | 150 | 100.0 |

The following table shows the number of cases of diphtheria in the district of London - 1930, in each age group. The number of cases in each age group is given in the column headed "Number of Cases" and the percentage of the total number of cases in each age group is given in the column headed "Percentage of Total Cases".

SECTION B

GENERAL PROVISION OF HEALTH SERVICES IN THE AREA.

(a) LABORATORY FACILITIES. The Emergency Public Health Laboratory at Cambridge continued to provide these facilities throughout 1946.

(b) AMBULANCE FACILITIES. Red Cross Society Ambulances for general cases, Ipswich County Borough Ambulance for infectious cases, and the County Council Ambulance for Scabies Cases, were available in 1946 and dealt promptly with all calls made upon them.

(c) NURSING IN THE HOME. This work was carried on by nurses of the Local Nursing Associations residing in the villages of Bildeston, Brettenham, Elmsett, Groton, Kersey and Lavenham, whilst some parishes on the periphery are served by nurses residing at Hadleigh and Stoke-by-Nayland.

(d) CLINICS AND TREATMENT CENTRES. These continued as in previous years.

(e) HOSPITALS. Some indication of the Hospitals used by the inhabitants of Cosford is obtained by recording that of the 136 deaths of Cosford residents which occurred during 1946, there were 92 which took place at the home of the deceased, one in a shed, one in a Cambridge nursing home and the remaining 42 in hospitals as follows:-

| | | | |
|--------------|-----------|--------------------|----|
| Walnuttree | (P.A.C.) | Hospital, Sudbury. | 19 |
| St. Mary's | (P.A.C.) | " Bury St.Eds. | 3 |
| West Suffolk | (General) | " " " " | 5 |
| East Suffolk | (General) | " Ipswich. | 7 |
| St. Leonards | (General) | " Sudbury. | 3 |
| London Chest | (T.B.) | " Camberley. | 1 |
| St. Audry's | (Mental) | " Melton. | 4 |

SECTION C.

SANITARY CIRCUMSTANCES OF THE AREA.

1. (1) WATER. 20.4% of the houses in Cosford have a piped water supply and a further 18.3% are within 200 feet of standpipes, as under:-

| Parish. | Number of Houses on Piped Supply. | Within 200 feet of Standpipes. |
|---------------|-----------------------------------|--------------------------------|
| Bildeston. | 92 | 75 |
| Boxford. | 133 | 51 |
| Brettenham. | 67 | 2 |
| Cockfield. | 2 | 12 |
| Edwardstone. | 10 | 8 |
| Hitcham. | 58 | 54 |
| Kersey. | 4 | 4 |
| Lavenham. | 184 | 292 |
| Layham. | - | 7 |
| Lindsey. | 8 | 8 |
| Nedging. | 44 | 31 |
| Polstead. | 2 | - |
| Whatfield. | 32 | 25 |
| TOTAL: | 636 | 569 |

No extensions were carried out to the existing public piped water supplies during 1946, but 50 additional houses were connected to these supplies during the year.

The only major dislocation of supply from these public water undertakings during 1946 occurred on the 20th to 24th December when the water supply was cut off at Brettenham whilst the rising main was renewed.

During 1946 arrangements were made to adapt a 5" borewell at The Swan Inn, Lavenham, to serve as an alternative source of supply if a breakdown should occur in the present Lavenham source.

Water Samples submitted to bacteriological examination during the year totalled 47 and gave the following results:-

| | Total. | Satisfactory. | Unsatisfactory. |
|--------------------------|--------|---------------|-----------------|
| Council Piped Supplies | 31 | 28 | 3 |
| Other Supplies (a) Bores | 1 | 1 | - |
| (b) Surface Wells. | 15 | 8 | 7 |

Warning notices were given where necessary to ensure that water was boiled before use.

The public water supply at Lavenham is chlorinated as in that drawn from Nedging which supplied the Aerodrome at Wattisham.

The extent to which water from piped supplies is available in the four Rural Districts for which I am Medical Officer of Health is indicated by the following table:-

| | Percentage of Houses | | Total Percentage using piped supplies. |
|------------|----------------------|--------------------------------|--|
| | On piped supplies. | Within 200 feet of standpipes. | |
| Cosford | 20.4% | 18.3% | 38.7% |
| Mildenhall | 54.1% | 0.6% | 54.7% |
| Thingoe | 8.4% | 8.8% | 17.2% |
| Tnedwastre | 0.6% | 1.4% | 2.0% |

From this table may be determined that in the past Cosford Council have made commendable efforts to bring pure and wholesome water to inhabitants of the District - the Council were pioneers among Rural Districts in this part of the country in providing chlorinated and softened supplies. Whilst, however, recognising the magnitude of the Council's efforts in the past it is now necessary to record that the multitude of small schemes provided have been by no means immune from administrative and public health worries, and, moreover, they serve no more than about two houses in each five in the District. THE PROVISION OF A COMPREHENSIVE SUPPLY OF WATER, PURE, WHOLESOME AND ADEQUATE IS OF PARAMOUNT IMPORTANCE AND URGENCY. Present signs suggest that, because of circumstances beyond the control of the Council, possibly a decade will be occupied in the provision of a comprehensive supply - such a time lag will probably do irreparable damage to the agriculture of the District. These signs temper the satisfaction in recording that the main 27" bore near Nedging Mill for a comprehensive supply to the District was substantially completed by the end of the year. The original site of the bore was revised from the edge of Semer and moved just over the boundary into the parish of Nedging - it is still, however, referred to as the Semer Bore.

The only water supply for the town of ... is ...
 The water supply was cut off ...
 The water supply was restored ...

| ... | ... | ... |
| ... | ... | ... |
| ... | ... | ... |

The water supply was restored ...
 The water supply was restored ...
 The water supply was restored ...

The borehole at "Semer" was commenced in October 1946 by Messrs. Le Grand, Sutcliffe & Gell of Southall. Drilling reached a depth of 60 feet without chalk being encountered, and in order to avoid unnecessary expense it was decided to sink a small diameter hole to find out at what depth chalk commenced. This proved that chalk was 96 feet below the surface. Having ascertained this, boring of the full diameter of 27 inches was resumed and drilling continued to a depth of 400 feet, from which level the main source of water seems to be obtained.

The bore was completed on 22nd January, 1947, and as the chalk appeared to be somewhat soft the first 140 feet has been lined to prevent collapse and to shut out all surface water. On completion of the bore its verticality was tested and was found to be well within the prescribed latitude of 4 inches per 100 feet. A description of the strata pierced is as follows:-

| | <u>Thickness of</u> <u>each stratum.</u> | <u>Depth from</u> <u>surface.</u> |
|---------------------|---|--------------------------------------|
| | <u>feet.</u> | <u>feet.</u> |
| Top Soil | 1 | 1 |
| Dirty Gravel | 1 | 2 |
| Large Gravel | 18 | 20 |
| Gravel and Clay | 4 | 24 |
| Loamy Clay | 8 | 32 |
| Sandy Clay & Stones | 15 | 47 |
| Gravel and Clay | 3 | 50 |
| Gravel | 19 | 69 |
| Gravel, Sand & Clay | 10 | 79 |
| Gravel | 12 | 91 |
| Chalky Gravel | 5 | 96 |
| Chalk | 249 | 345 |
| Belt of Flints | 1 | 346 |
| Chalk | 54 | 400 |

Housing Sites Water Supplies.

The Council considered the desirability of providing piped water supplies to their new houses and decided upon the erection of towers and pumping plant, and the laying of mains on all major sites.

As a result of this decision three bores were sunk for the housing sites at Kersey, Elmsett and Monks Eleigh.

(ii) DRAINAGE AND SEWERAGE. 21 new drains were inspected and 36 cesspools emptied during the year. The main housing sites are being provided with small disposal units where public sewers are not available. Evidence and data was collected and correlated in the latter part of 1946 in preparation for a Public Enquiry to be held early in 1947 on the necessity for sewerage schemes in the three main parishes in the District, Lavenham, Bildeston and Boxford.

2. RIVERS AND STREAMS. The state of rivers and streams in many parts of the District leaves much to be desired - at Lavenham, however, the position is better described as desperate. The Council aware of the noxious condition of the river in the Lavenham, Brent Eleigh area are alarmed at the concomitants their own action in providing essential new Council houses at Lavenham caused, and they have taken all steps known to them to ensure that the utmost priority is given to the provision of a public sewerage scheme for Lavenham.

3. (i) CLOSET ACCOMMODATION. At Lavenham, Bildeston and Boxford a twice weekly collection of night soil is provided. Experience in the difficulties of obtaining and maintaining the requisite tenders and labour for this service, particularly during inclement weather or during illness of the usual employees, has provided further reason, if such be needed, for the early introduction of sewerage schemes.

(ii) PUBLIC CLEANSING. In June 1946 a scheme of Refuse Collection was inaugurated in Cosford Rural District for the first time. The vehicle employed is a Shelvoke and Drury side-load type and all the parishes in the district are visited once monthly, except in the case of the semi-urbanised areas of Lavenham, Boxford and Bildeston, where a weekly collection is made. The material is dumped at Waldingfield in the Melford R.D. area, where a refuse pit is used jointly with that Authority.

Apart from bringing benefit to individual householders the scheme was extended so that a commencement was made in the removal of unsightly dumps which defaced the District.

(iii) SANITARY INSPECTION OF THE AREA. The following particulars of sanitary work during 1946 have been supplied to me by Mr. Taylor:-

Number of Inspections or Visits.

| | |
|------------------------------------|-----|
| Houses under the Public Health Act | 37 |
| " " " Housing Acts | 484 |
| Tents, vans, sheds | 6 |
| Factories | 10 |
| Shops | 4 |
| Cowsheds & Dairies | 57 |
| Butchers' premises | 6 |
| Water Samples | 47 |
| Dumps & tips | 21 |
| After Infectious Disease | 7 |
| Miscellaneous | 132 |
| Salvage | 10 |
| Food preparing premises | 31 |
| Re-inspections | 107 |
| Slaughterhouses, meat inspection | 10 |
| Schools | 11 |

Factory Act, 1937.

10 visits to Factories were made.

(iv) SHOPS AND OFFICES. 4 visits were paid to inspect heating, lighting and ventilation arrangements.

(v) CAMPING SITES. 6 visits to camping sites were made.

(vi) SMOKE ABATEMENT.

(vii) SWIMMING BATHS AND POOLS.

} No change.

(viii) ERADICATION OF BED BUGS. Nil.

4. SCHOOLS. The water, washing and sanitary arrangements were inspected during 11 visits.

3. (i) FACTORY ADMINISTRATION. At Liverpool, 21/1/1931 and
Boston, 22/1/1931, weekly committees of all the staffs are provided.
Experience in the district of obtaining and maintaining
the regularity of work and labour for this purpose, particularly
during important weather or health crises of the season
employment, are provided further reasons, if such be needed, for
the early application of workers' schemes.

(ii) FACTORY CLEANLINESS. In June 1930 a scheme of factory
cleanliness was introduced in Boston and other districts for the
first time. The works employed in a district are visited
at least once a week and all the premises in the district are visited
once monthly, except in the case of the most advanced areas
of Liverpool, Boston, and Liverpool, where a weekly visitation
is made. The reports are compiled at headquarters in the
factory and a return is sent to the head office with the
monthly report.

As part of the scheme, reports to individual householders
are sent, and it is expected that a considerable saving in the
cost of cleaning will be effected by the district.

(iii) FACTORY INSPECTION OF THE AREA. The following
particulars of factory work which have been applied to
the works at Mr. Taylor's

Number of factories visited

(iv) FACTORY VISITS. In visits to factories were made.
(v) WORK AND OVERSIGHT. A visit was made to inspect factory
plant and working arrangements.

(vi) FACTORY VISITS. A visit to examine plant was made.
(vii) FACTORY VISITS.
(viii) FACTORY VISITS.
(ix) FACTORY VISITS.
(x) FACTORY VISITS.

(xi) FACTORY VISITS. The return, working and working arrangements were
inspected during 11 visits.

SECTION D.

HOUSING.

| | |
|--|------|
| 1. (1) (a) Total number of dwellinghouses inspected for housing defects (under Public Health or Housing Acts) | 412 |
| (b) Number of inspections made for the purpose | 521 |
| (2) (a) Number of dwellinghouses (included under Sub-head (1) above) which were inspected and recorded under the Housing Consolidated Regulations 1925. | 130 |
| (b) Number of inspections made for the purpose | 139 |
| (3) Number of dwellinghouses found to be in a state so dangerous or injurious to health as to be unfit for human habitation | 64 |
| (4) Number of dwellinghouses (exclusive of those referred to under the preceding sub-head) found not to be in all respects reasonably fit for human habitation. | 218 |
| 2. <u>Remedy of Defects during the year without Service of Formal Notice.</u> | |
| Number of defective dwellinghouses rendered fit in consequence of informal action by the Local Authority or their Officers. | 41 |
| 3. <u>Proceedings under Sections 11 and 13 of the Housing Act, 1936.</u> | |
| (1) Number of dwellinghouses in respect of which | |
| (a) Demolition Orders were made | 13 |
| (b) Undertakings accepted not to relet for human habitation | 29 |
| (2) Number of dwellinghouses demolished in pursuance of Demolition Orders | Nil |
| 4. <u>Housing Act, 1936 - Part IV - Overcrowding.</u> | |
| (a) (i) Number of dwellinghouses overcrowded at the end of the year | 12 |
| (ii) Number of families dwelling therein | 18 |
| (iii) Number of persons dwelling therein | 81 |
| (b) Number of cases of overcrowding reported during the year | 4 |
| (c) (i) Number of cases of overcrowding relieved during the year | 1 |
| (ii) Number of persons concerned in such cases | 6 |
| (d) Particulars of any cases in which dwellinghouses have again become overcrowded after the Local Authority having taken steps for the abatement of overcrowding. | Nil. |

The progress made with the "Hobhouse" Survey to date is that ten parishes comprising some 780 houses have been completed. The Public Health Committee adopted the procedure of their members visiting all houses assessed by the officials as likely to be Category Five (Beyond Repair) or Category Four (Suitable for Reconditioning with Grant). By the end of 1946 this Committee

ARTICLE 11

1. (a) Total number of dwelling units intended for housing (under Article 11) of the town.

(b) Number of dwelling units for the purpose of...

(c) (i) Number of dwelling units (including units intended for use as a second home) which are intended to be used as a second home. (ii) Number of dwelling units intended for use as a second home which are not intended to be used as a second home.

(d) Number of dwelling units for the purpose of...

(e) Number of dwelling units intended to be used as a second home which are not intended to be used as a second home.

(f) Number of dwelling units (including units intended for use as a second home) which are intended to be used as a second home.

ARTICLE 12

1. (a) Number of dwelling units intended for use as a second home.

ARTICLE 13

1. (a) Number of dwelling units intended for use as a second home.

(b) Number of dwelling units intended for use as a second home.

(c) Number of dwelling units intended for use as a second home.

ARTICLE 14

1. (a) Number of dwelling units intended for use as a second home.

(b) Number of dwelling units intended for use as a second home.

(c) Number of dwelling units intended for use as a second home.

(d) Number of dwelling units intended for use as a second home.

(e) Number of dwelling units intended for use as a second home.

(f) Number of dwelling units intended for use as a second home.

(g) Number of dwelling units intended for use as a second home.

(h) Number of dwelling units intended for use as a second home.

(i) Number of dwelling units intended for use as a second home.

(j) Number of dwelling units intended for use as a second home.

had visited all such houses in four parishes (and two at Cockfield), had served, heard and decided Time and Place Notices for houses in these parishes and made the following decisions:-

| | | |
|--------------------------|---------------|--|
| 13 Demolition Orders. | Aldham. | Ref.1, 2, 25. |
| | Whatfield. | Ref.27, 28, 36, 37, 38. |
| | Elmsett. | Ref.32, 33, 51. |
| | Cockfield. | Ref.A, B. |
| 29 Undertakings Accepted | Not to Relet. | |
| | Aldham. | Ref.22, 42, 43, 44, 45, 47, 48, 49. |
| | Whatfield. | Ref.4, 5, 6, 22, 69, 70, 71, 72. |
| | Elmsett. | Ref.21, 22, 46, 47, 55, 56, 65. |
| | Wattisham. | Ref.11, 12, 21, 36, 37, 38. |

To appraise the progress made during 1946 in the provision of new homes in the District it is necessary to recall that at December 31st, 1945, the Council had possession of two building sites but no site was under development, no tenders had been approved by the Ministry of Health, no houses had been erected and no temporary houses were allotted to the District. The position at December 31st, 1946, was :-

New Council Houses.

44 Permanent Houses approved by the Ministry of Health (including 12 Swedish Timber Houses). These had all been commenced and had reached these stages:-

| | |
|-------------------------|-----------|
| Footings | 2 |
| Up to damp-course level | 14 |
| Up to eaves level | 6 |
| Roofed | 20 |
| Plastered | 2 |
| Total: | <u>44</u> |

22 Temporary Houses, (8 Boxford, 14 Lavenham) the site works for these were 50% completed.

Private Building.

11 new dwellings were licensed, of which 3 were completed and 3 under construction.

Conversions.

5 Licenses for conversions to provide additional units of accommodation were granted to private builders. Two of these conversions were completed.

Requisitioning.

21 units of accommodation were provided in the twenty houses held on requisition by the Council.

In total, therefore, substantial progress had been made in the District towards the provision of 103 units of accommodation.

and visited all such houses in their parishes (and two or three) and reported, heard and decided the same. The following list shows the names of the parishes and the names of the rectors.

| Parish | Rectors |
|----------------|------------|
| St. Andrew's | John Smith |
| St. James's | John Smith |
| St. John's | John Smith |
| St. Peter's | John Smith |
| St. Paul's | John Smith |
| St. George's | John Smith |
| St. Michael's | John Smith |
| St. Nicholas's | John Smith |
| St. Martin's | John Smith |
| St. Andrew's | John Smith |
| St. James's | John Smith |
| St. John's | John Smith |
| St. Peter's | John Smith |
| St. Paul's | John Smith |
| St. George's | John Smith |
| St. Michael's | John Smith |
| St. Nicholas's | John Smith |
| St. Martin's | John Smith |

The names of the parishes and the names of the rectors are given in the list above. It is necessary to state that the names of the parishes are given in the list above in the order in which they were visited by the rectors. The names of the rectors are given in the list above in the order in which they were visited by the rectors. The names of the parishes and the names of the rectors are given in the list above in the order in which they were visited by the rectors.

The Council House

The Council House was approved by the Ministry of Health (London) in 1905. It is situated in the City of London. The Council House was approved by the Ministry of Health (London) in 1905. It is situated in the City of London. The Council House was approved by the Ministry of Health (London) in 1905. It is situated in the City of London.

SECTION E.

INSPECTION AND SUPERVISION OF FOOD.

(a) MILK SUPPLY. The number of Registered Cowkeepers and Dairymen in the District at the end of 1946 was 113. 57 visits were paid to Cowsheds and Dairies. Suggestions as to improvements in structures were made in 6 instances. No additions were made to the register.

(b) MEAT AND OTHER FOODS. Centralised slaughtering has taken regular killings out of the District.

Small quantities of canned foods and fish were condemned as unfit for human consumption.

(c) ADULTERATION, ETC.

(d) CHEMICAL & BACTERIOLOGICAL EXAMINATION.

} No change.

(e) NUTRITION. To those in this District who, by means of headlights, endeavour to keep the wheels of agricultural machines turning day and night during the seasons for sowing and reaping, as to the cowmen and shepherds attending at all hours the calvings and lambings as also the labourers and lorry drivers to be seen sugar-beet loading in the mists of dawn and the dark of soaking winter evenings the rations available to them and to their families must often seem poor recompense. They have, of course, the satisfaction of knowing that they are making, so far as their equipment allows, a full contribution to relieve world food shortages. There is want in the District of additional foodstuffs and this want allied to work to be done, to poor housing conditions and lack of essential water and sanitary services has produced a general lowering of the nutrition of the inhabitants.

(f) SHELL-FISH (Molluscan).

(g) WATER-CRESS.

} No change.

SECTION E.

PREVALENCE OF & CONTROL OVER INFECTIOUS AND OTHER DISEASES.

During 1946 the need for surveillance of contacts of Smallpox arriving in this District after either air or sea travel focused attention on the need for vaccination. It was ascertained that two thirds of the children born in the District are successfully vaccinated, statutory objections are lodged on behalf of a quarter of the children born and the remaining one-twelfth either left the District or died prior to vaccination or proved unsusceptible. Posters were issued by the Council and exhibited widely throughout the District in an effort to instruct parents as to the procedure to obtain free vaccination for their children as also for the increased necessity for this to be done in view of modern travel means.

Vaccination in infancy is a safe process and but little likely to cause any distress to the child. This primary vaccination in infancy removes danger which might otherwise occur if vaccination is first performed at or after puberty. It is apparent that with compulsory military service, for youths likely to become a permanent feature, that the need for protection against Smallpox will appertain to all the youth who may see service abroad - moreover, journeys abroad for civilians will become commonplace. The Council is, therefore, satisfied that for parents of a quarter of the children born in Cosford to refuse this protection for their offspring is very unwise and it is hoped that many more will consent to this simple measure in advance of any epidemic which may occur.

The following table shows the number of Infectious Diseases among the civilian population during the year. These are the final numbers after corrections subsequently made either by the Notifying Medical Practitioner or by the Medical Superintendent of the Infectious Diseases Hospital. It will be noted that the total number is 186 - the corresponding figure for 1945 was 140.

ALL NOTIFIABLE DISEASES (other than Tuberculosis) DURING 1946.

| | Puerperal Pyrexia. | Scarlet Fever. | Whooping Cough. | Measles. | Pneumonia. | Erysipelas. | Infective Hepatitis. |

| 65 and over | - - | - - | - - | - - | - - | 2 - | - 1 |

141 children (120 age 0-4 years and 21 age 5-14) completed Diphtheria Immunisation during 1946. 88 children previously immunised were given a Secondary or Reinforcing Injection. At the end of the year it was estimated that 53% of the children under 5 years of age and 95% of children between 5 and 15 years had completed the Diphtheria Immunisation Course.

The Percentage immunised under 5 years of age is better indicated by taking only those children 1 year old and not yet 5 years, as Immunisation is rarely completed before the child reaches 1 year old - the percentage then of age 1 year and under 5 years immunised was 72%.

This figure (72%) approximates to the desire of the Ministry of Health (expressed 23rd July, 1947, Circular 128/47) "that an intensive effort will be made to achieve the immunisation of at least 75% of all infants reaching the age of one year."

TUBERCULOSIS.

NEW CASES AND MORTALITY DURING 1946.

| Years. | New Cases. | | | | Deaths. | | | |
|-----------|--------------|----|------------------|----|--------------|----|------------------|----|
| | Respiratory. | | Non-Respiratory. | | Respiratory. | | Non-Respiratory. | |
| | M. | F. | M. | F. | M. | F. | M. | F. |
| 0-4 | - | - | 1 | - | - | - | - | - |
| 5-14 | - | - | 1 | - | - | - | - | - |
| 15-24 | 1 | 2 | 1 | 1 | - | - | - | - |
| 25-34 | - | 1 | - | - | - | - | - | - |
| 35-44 | 2 | 1 | - | 1 | 2 | - | - | - |
| 45-55 | - | 2 | - | 1 | 1 | 2 | - | 1 |
| 55-64 | - | 1 | - | - | 1 | 1 | - | - |
| 65 & over | - | - | - | - | - | 1 | - | - |
| | 3 | 7 | 3 | 3 | 4 | 4 | - | 1 |

47 cases remained on the Tuberculosis Register at the end of the year, Respiratory Male 16, Female 14, and Non-Respiratory Male 10, Female

The following table shows the number of laboratory specimens which have been received during the year 1952. The number of specimens received during the year 1951 is also shown for comparison. It will be noted that the total number of specimens received during the year 1952 was 10,000.

ALL NOTIFIABLE DISEASES (Other than Tuberculosis) 1951-52
