Rural District Council of Dartford

ANNUAL REPORT

OF THE

Medical Officer of Health

FOR THE YEAR 1948

PRINCIPLES OF THE WORLD HEALTH ORGANISATION.

Health is a state of complete physical, mental and social well-being and not merely the absence of disease or infirmity.

The enjoyment of the highest attainable standard of health is one of the fundamental rights of every human being without distinction of race, religion, political belief or economic or social condition.

The health of all peoples is fundamental to the attainment of peace and security and is dependent upon the fullest co-operation of individuals and States.

The achievement of any State in the promotion and protection of health is of value to all.

Unequal development in different countries in the promotion of health and control of disease, especially communicable disease, is a common danger.

Healthy development of the child is of basic importance; the ability to live harmoniously in a changing total environment is essential to such development.

The extension to all peoples of the benefits of medical, psychological and related knowledge is essential to the fullest attainment of health.

Informed opinion and active co-operation on the part of the public are of the utmost importance in the improvement of the health of the people.

Governments have a responsibility for the health of their peoples which can be fulfilled only by the provision of adequate health and social measures.

RURAL DISTRICT COUNCIL OF DARTFORD

Annual Report for 1948 of the Medical Officer of Health

PUBLIC HEALTH DEPARTMENT,
RURAL DISTRICT COUNCIL OFFICES,
DARTFORD.

October, 1949.

TO THE CHAIRMAN AND MEMBERS,

DARTFORD RURAL DISTRICT COUNCIL.

SIR, LADIES AND GENTLEMEN,

I have the honour to submit the fiftieth Annual Report in conjunction with the Chief Sanitary Inspector on the public health and sanitary conditions in the Dartford Rural District.

I hope to be allowed to discuss the report with you at a meeting of the Public Health Committee.

On behalf of the staff and myself I wish to thank you for your support and encouragement during the year under review.

I am, Sir, Ladies and Gentlemen,
Your obedient Servant,
J. H. HUDSON,
Medical Officer of Health.

STATISTICS AND SOCIAL CONDITIONS OF THE AREA.

Area in acres					 34,113
Population (Census 1931)					 31,253
Population mid 1948 (Registra	ar-Ge	eneral's	Estin	nate)	 36,150
Number of inhabited houses			***		 10,125
Rateable Value					 £300,576
Sum represented by penny rat	e				 £1,583

The estimated distribution of the estimated population is as follows:-

	Par	ish		Population	Acres
Sutton-at-Hone				 8,100	3,625
Stone				 6,360	3,009
Darenth				 4,450	2,223
Wilmington				 3,560	1,718
Eynsford				 2,560	3,544
Horton Kirby				 2,340	2,841
Farningham				 1,950	2,739
West Kingsdov	vn		***	 1,740	3,476
Southfleet				 1,330	2,409
Hartley				 1,150	1,211
Longfield			-	 1,120	605
Ash				 920	3,124
Fawkham				 380	1,198
Lullingstone				 120	1,557
Ridley				 70	834
			Totals	 36,150	34,113

The following institutions contain over 100 resident population:-

Darenth Park Hospital	 		 1,800
Stone House Hospital	 		 540
*Southern Hospital	 		 415
South Darenth Home for Boys	 		 214
White Oak Hospital	 		 153
*Parkwood Convalescent Home	 		 120
Hextable Home for Boys	 		 104
*Kettlewell Hospital	 		 104
	7	Cotal	 3,450

^{*} Patients not included in population figure

Apart from the obvious facts the following account is based on impressions only. The centre of the district is 18 miles from Westminster. It is mostly rural but there is an urban area in Stone, while Wilmington and Swanley Junction are suburban. The rural population is gathered into villages each dignified by a church, served by a village hall and cheered by a tavern.

The industries are agriculture and dairy farming; making of cement, bricks, paper and engineering products; quarrying of chalk, clay and gravel. Some of the people have work in nearby boroughs, and conversely people from the latter come here for seasonal farming. A number, who prefer the pen to the plough, or the typewriter to the tractor, travel to and fro daily in crowded transport to Central London.

There are 19 primary schools and 2 secondary schools. Intelligent adults who can neither read nor write are scarce. In each village the local pastor and his wife maintain their influence for the well-being of the people of their parish.

There is practically no unemployment, but the family budget causes numerous mothers to find permanent work outside the home. Except for cases of neglect there is no lack of clothing and a reasonable diet is available for all. Housing accommodation is gravely inadequate.

Problem families are not uncommon but are few enough to be known individually in their parish. In 1948, 59 cases, involving 163 children, were dealt with by the National Society for the Prevention of Cruelty to Children.

In urban areas tribal customs fail to ensure personal cleanliness. Native habits consist of tobacco smoking, beer sipping, ice cream licking and sweet sucking. A few women paint their finger nails for adornment; some bite their nails to the quick with perplexion.

The bulk of the leisure of the community is spent on watching ball games, football pools and, near the towns, cinema-going. A fraction is spent on intellectual pursuits, public affairs, voluntary welfare work and the pursuilt of a ball of some shape or other. Displays of garden produce and Beauty Queens gladden the village Summer.

Of those who have lapsed from health some find comfort in the ritual of the coloured concoction consumed thrice daily; others, carry on without the effective treatment that is available.

Amongst those in moveable dwellings a trace show the tawny skin, brown eyes and dark hair of the Romany; conversely in the settled villages there is a suggestion of increased incidence of children with fair skin and flaxen hair.

Long distance traffic traverses the district by two trunk roads. Driven with exhibitation or fogged by fatigue some vehicles cause apprehension as they go; some motor coach parties, conversely, cause complaint when they stop.

The climate is dry and in the Parish of Stone and beyond a chalky clay dust from the cement industry penalises the housewife who opens her windows. The district is potentially malarious but since 1919, when notification began, all malaria cases appear to have been relapses of infections contracted elsewhere. There are 6 public water pumping stations which obtain their supplies from the chalk beneath.

The history can be revealed by dissection. Tear off the electric pylons, the trunk roads, the air-liner above and the modern houses, and there remains a fair sized built-up district with factories, railways and housing built before Rural District Councils were created. Remove these and there are defined the villages, some of whose cottages are Tudor and some of whose churches are Norman. Excise these and there is revealed an embryonic layer of Saxon remains and Roman Villas.

A fragment of the future is created by the Greater London Plan which in practice will limit the further increase in the population to 17,000.

CENERAL PROVISION OF HEALTH SERVICES FOR THE AREA.

There were no changes or developments in the Laboratory facilities. The following specimens from this office were examined at the County Laboratory:—

Water for bacte	eriological ar	alysis		 	 	20
Water for chemi	cal analysis			 	 	9
Milk (Special D	esignations)			 	 	72
Blood (from ant	e-natal clinic	s up to	5.7.48	 	 	37
Urine				 	 	1
Throat swabs				 	 	4

On July 5th the administrative changes of the National Health Service Act resulted in all Ambulance and Home Nursing Services becoming a responsibility of the County Council. By the same Act the responsibility for Treatment Centres and Hospitals was transferred to the newly created South East Regional Hospital Board. This resulted in two former L.C.C. General Hospitals being made available to patients from this district; these were:—

Joyce Green Hospital. Staffed accommodation 300, unstaffed accommodation 800 Southern Hospital. " " " 260, " " 1,400

The Ambulance Services in 1948 were adequate.

Staffed hospital accommodation for cases of tuberculosis and for the aged sick were inadequate.

MATERNITY AND CHILD WELFARE.

On July 5th the responsibility for Riseley Maternity Home was transferred to the South East Regional Hospital Board and that of the remainder of the Maternity and Child Welfare Services was transferred to the Kent County Council.

Ante-natal Clinics.

One Clinic was held each week at Riseley, the remaining Clinics were held fortnightly. In January arrangements were made for the Stone Clinic to be conducted by the midwife and myself instead of by the midwife alone as formerly.

The following were the attendances up to 5th July, 1948:-

Riseley		 114
Stone		 119
Swanley		 111
Southfleet		 6
	Total	 350

In January the County Pathologist kindly agreed to examine blood specimens submitted to him from our Clinics. This is the last opportunity of recording these results and I am therefore taking the liberty of reporting them up to date:—

Rh. Type	No. exam	ined P	ositive	1	Vegative
Expectant women	100		83		23
Husbands of Rh. negative ex-					
pectant women	. 18		12		6
Anti-Rh. agglutinins present	t in one R	th. neg	ative i	mothe	er.
A.B.O. Group No. 6					0
Expectant women	106	45	11	3	47
Husbands of Rh. negative					
expectant women	18	6	2	0	10

Haemoglobin percentage Haden scale 100% = 15.6 grammes per 100cc. blood.

No. expectant women	Haemoglobin % age							
examined	50-59	-69		-89	99			
105	5	15	56	27	2			

Wasserman reactions and Kahn tests were carried out on all specimens sent for blood grouping; with the exception of 2 doubtful Kahn tests all were negative.

Infant Weifare Centres.

One additional Clinic was opened at Saxon Place, Horton Kirby, on the 14th June, 1948. Attendances up to the 5th July, 1948 for all Clinics were:—

				Nu	mber of	Average
	CI	inic		Cli	nics Held	Attendances
Ash			 		12	10
Bean			 		11	10
Crockenhill			 		13	36
Darenth			 		14	38
Eynsford			 		13	27
Farningham			 		13	17
Fawkham			 		13	7
Hartley			 		13	17
Hextable			 		13	42
Horton Kirby			 		13	57
Kingsdown			 		12	34
Longfield			 		12	29
Saxon Place			 		2	4
Southfleet			 		13	22
Stone			 		26	33
Swanley			 		13	53
Upper Wilming			 		13	25
Wilmington			 		13	36

Home Helps.

Two Home Helps were engaged at the beginning of the year and a third in June.

Home Visits by Health Visitors.

Visits to expectant mothers, 1st visits 116	; Total	visits	130
Visits to children under 1 year, 1st visits 31	3; Total	visits	2,033
Visits to children 1-5 years			2,474
Visits re still-births			5
Visits re infant deaths			6
Visits re Infant Life Protection			57
Day Nurseries		1	
Institutional Provision for Mothers or Children			Records transferred
Child Life Protection		+	to County Council
Premature Infants			on 5th July, 1948.
Arrangements for Dental and Orthopaedic Cases			

SANITARY CIRCUMSTANCES OF THE AREA.

Water.

Extension of the main for 361 yards along Clement Street to one nursery and its dwelling house was carried out by the Metropolitan Water Board at a cost of £681. Structural alterations were carried out to one domestic well.

Samples sent to the County Laboratory have been as follows:-

	B	acteriological	Chemical				
	No.	Results	No.	Results			
Raw Water	. 12	4 Satisfactory	8	7 Satisfactory			
		8 Unsatisfactory		1 Unsatisfactory			
Treated Water	. 8	8 Satisfactory	1	1 Satisfactory			

In addition results of 10 bacteriological analysis of water from Trosley Pumping Station (Mid Kent Water Co.) were received—all were satisfactory.

There is no plumbo solvency. Typical hardness figures are:-

Total Temporary Permanent 310 230 80 pts. per million

At the end of 1948 the position was as follows:-

- 9,984 houses supplied by Metropolitan Water Board or Mid-Kent Water Co., of which 38 were supplied by stand-pipe. Quantity and quality satisfactory.
 - 65 houses supplied by piped supply from well in Lullingstone Park—Parish of Lullingstone. Quantity and quality satisfactory.
 - 24 houses supplied by piped supply from well at Court Lodge Farm—Parish of Horton Kirby. Quantity and quality doubtful.
 - 9 houses supplied by piped supply from one well at Sutton House, Clement Street, Swanley Bottom. Quantity satisfactory quality doubtful.
 - 17 houses supplied by pump or bucket from adjacent wells. Quantity and quality mostly unsatisfactory.
 - 26 houses supplied by rain water.

10,125 Total.

Drainage and Sewerage,

The Council's Engineer has supplied the following information:-

The Darenth Village scheme was completed during the year, 652 yards of sewer were laid and connected to the Darenth Valley Main Sewer; 10 houses were connected.

Work on the Bean sewerage scheme in the Parish of Stone was begun in December.

At Franks Lane, in the Parish of Horton Kirby, the existing sewer was extended by 80 yards and 2 cottages were connected thereto.

Birchwood Road scheme for the laying of 1,322 yards of sewer was approved by the Ministry of Health.

Small sewerage disposal units were constructed at Merton Avenue, Hartley, and Fawkham Road, Longfield, to serve the new Housing sites there.

During the year 102 premises were connected to the sewer.

At the Council's outfall works at Stone new pumping apparatus was installed in the Autumn, thereby enabling the treatment of sewage to be continuous with the production of a better effluent. Also the old timber outfall weirs were replaced by concrete. The following are the results of effluent analysis by the County analyst:-

	Parts	per 10	00,000		
			5.2.48	26.7.48	27.10.48
			9.0	6.25	8.0
			118.	133.	111.

			_	-	Absent
	hr. at	hr. at 26.7°c.	hr. at 26.7°c ed 5 days	9.0 118. 22.8	

On the 26th July, 1948, the Port of London Authority took a sample of the effluent which was examined on the 27th July, 1948. It was found unsatisfactory due to albuminoid ammonia and impurity figures being more than 0.70 and 70. respectively, the presence of H₂S and its offensive odour. The condition of this effluent was due to cesspool emptying vehicles discharging their contents into the sewer.

Closet Accommodation.

4 Closets were converted from conservancy to water carriage systems during the year.

At the end of the year the accommodation was as follows:-

W.C.'s discharging into drainage syste	m	***		 7,711
W.C.'s discharging into cesspools				 2,139
Dwellings provided with privies, etc.				 195
Dwellings provided with pail closets				 80
			Total	 10,125

The occupants of dwellings with pail closets have to empty these themselves.

Rivers and Streams.

No cases of pollution occurred.

Swimming Baths and Pools.

There were two privately owned pools open to the public, one at West Kingsdown and the other at Woodlands Holiday Camp. The West Kingsdown pool is chlorinated by mechanical means. Water sent from the latter for bacteriological analysis gave a satisfactory result.

Smoke Abatement.

The inquiries of the Investigation Committee on dust from cement works continued.

Schools.

No change occurred in the sanitary conditions and water supply of schools.

No serious outbreak of infectious diseaes occurred in the schools during the year.

HOUSING.

The last housing survey was completed in 1938 since when changes, mostly for the worse, have been extensive so that it is no longer possible to give figures for overcrowding and houses unfit for human habitation. As is well known the need for more housing accommodation is urgent.

The work done by the Council's Sanitary Inspectors to obtain the repair and improvement of existing property is given below in the report of the Chief Sanitary Inspector.

The number of houses completed by the Council in 1948 was 125 and by private enterprise, including conversions and War Damage rebuilds, 43.

The Housing Welfare Officer has kindly submitted the following report:-

"The acute housing position in the Dartford Rural District did, I think, reach its climax during the early months of 1948, the effect of the Council's steadily increasing building schemes not having as yet been felt amongst the families without separate homes of their own, who were awaiting rehousing.

The number of housing applicants registered for rehousing during the period 1st April, 1948, to December, 1948, numbered 1,370, the "live" waiting list at the end of the year being 1,232.

During the year 1948, 157 families were rehoused by the Council and a very small number of applications were cancelled.

Amongst the families rehoused were two aged pensioners who moved into two of the first of the specially designed aged persons' bungalows to be completed. The provision of this type of bungalow is a prominent feature of the Council's post war building programme. The weekly rental of these bungalows is 7s. 6d. rent—3s. 1d. rates and water rate.

Many exchanges between Council tenants took place where their existing accommodation was too large or too small for their families. Approximately 50 Council tenants were moved from their homes to houses more suitable to their needs. By this method also, applicants whose financial means were limited were more satisfactorily housed on the pre-war Estates, at a lower rental.

In many instances where householders living in unsatisfactory conditions were rehoused, the Council were met with a marked degree of co-operation by private landlords, who in most cases accepted as their new tenants, cases recommended by the Council.

An increasing number of evictions took place during the year, a high percentage being from tied cottages. Where possible the Council endeavoured to meet the difficulties of the families concerned with emergency accommodation or in some instances, with permanent rehousing.

Nine families were rehoused from property certified as unfit for human habitation.

In addition to the Council's building programme, 16 Army huts at Valley Place, Wilmington, were converted for housing purposes. It is the Council's policy to maintain movement of families from this site to permanent houses.

Twenty-eight houses were held under Requisition at the end of the year, affording 56 units of accommodation.

During the year, endeavours were made to carry out welfare visiting amongst that small proportion of the Council's tenants who are "problem families". Time alone will show whether the improvement effected in the homes is of a lasting nature.

The following is an example of the problems so frequently faced by the Housing Selection Committee:—

A husband, wife and nine children were awaiting eviction from their home, the order for possession being granted as the father was no longer employed by the owners of the property. The eldest child was 18 years old and the youngest 1 year. No suitable emergency accommodation existed.

The solution to this problem was found in the conversion of a pair of partially built semi-detached 3 bedroomed houses, of non-traditional design, into a 6 bedroomed house and an aged person's unit, consisting of a living room, bedroom kitchen, bathroom, etc., each family with an entirely separate home.

The owners postponed the actual eviction of this family until completion of their new home."

HEALTH EDUCATION.

In March arrangements were made with the Central Council for Health Education for a lecture to food handlers at Swanley Junction, and those engaged in the trade were personally invited to attend. The audience who turned up numbered a score, but of these only 4 were spontaneous.

In June, Messrs. Vickers Armstrong Ltd., of Wilmington, kindly agreed to allow their canteen staff to attend, during working hours, a series of three lectures for food handlers. The lectures were again provided by the Central Council for Health Education, the cost being borne by this Council. The number attending each lecture was 25.

At Stone in May, the Child Welfare Film "Your Children and You," with a supporting programme was shown by arrangement with the Central Office of Information. The number who attended was about a score.

The Editor of the Dartford Rural District Bulletin accepted an article on "Cleanliness in the communal kitchen."

SECTION 47, NATIONAL ASSISTANCE ACT.

Two cases were investigated in each of which the person was aged, infirm, living in insanitary conditions and not receiving proper care and attention. Before these cases could be brought before the Committee, one was removed to hospital under the Lunacy Act and the other died.

PREVALENCE OF, AND CONTROL OVER, INFECTIOUS AND OTHER DISEASES.

Notifiable diseases (other than tuberculosis) during the year 1948.

Acute Poliomyelitis.

The case of poliomyelitis was diagnosed in early January. The patient's home was in Crockenhill.

Two cases occurring in Autumn 1947 became known too late for the annual report of that year. Their homes were in Beechenlea Lane and Lime Road, Swanley.

Food Poisoning.

An outbreak of diarrhœa and bellyache occurred amongst the staff of a canteen in January. About a dozen cases occurred but the severe phase of the illness was short lived, no medical practitioner was called in attendance and consequently no notifications were received. Meat was the suspected source of infection.

Diphtheria Immunisation.

Up to the 5th July, 1948, the following numbers of children were immunised at the various clinics and schools—:

				Primary	Supplementar
Ash Clinic		 		1	1
Bean Clinic		 		5	5
Crockenhill Clinic		 		10	0
Darenth Clinic		 		11	5
Eynsford Clinic		 		8	6
Farningham Clinic		 		8	1
Fawkham Clinic		 		2	0
Hartley Clinic		 		8	27
Hextable Clinic		 		23	7
Horton Kirby Clinic		 		28	12
Kingsdown Clinic		 		15	50
Longfield Clinic		 		14	2
Southfleet Clinic		 		12	2
Stone Clinic		 		21	5
Swanley Clinic		 		26	12
Upper Wilmington Clinic		 	***	7	0
Wilmington Clinic		 		18	4
Boys' Homes, Farninghar	n	 		1	0
Horton Kirby School		 		19	0
Sutton-at-Hone School		 		43	0
Motele					120
Totals		 200		280	139

Whooping Cough Immunisation.

Up to the 5th July, 1948, the following numbers of children were immunised at the clinics:—

					Primary	Supplementary
Ash Clinic					 1	0
Bean Clinic					 1	0
Crockenhill Clinic					 10	0
Darenth Clinic					 9	0
Eynsford Clinic					 7	2
Farningham Clinic					 8	0
Fawkham Clinic					 4	0
Hartley Clinic					 8	0
Hextable Clinic					 17	0
Horton Kirby Clin	ic				 20	0
Kingsdown Clinic					 15	0
Longfield Clinic					 11	1
Southfleet Clinic		***			 8	0
Stone Clinic					 15	0
Swanley Clinic					 24	10
Upper Wilmington	Clin	ic			 7	0
Wilmington Clinic			***	***	 16	0
						_
Totals					 181	13
					_	

The vaccine in most use at the clinics was a combined one containing diphtheria alum-precipated toxoid and pertussis alum-precipitated vaccine.

The County Medical Officer has supplied the following data for this district of diphtheria immunisations and and vaccinations up to the 31st December, 1948:—

Dartford Rural	Under 1 1948	1 1947	2 1946	3 1945	4 1944	5—9 -1939-43	20—14 19 3 4-38	Total Under 15
Immunised	25	356	345	310	283	1867	2752	5752
Child Population 30/6/48								7897
Vaccination with effect from 5/7/48	89		1082		Over 15 10			

Treatment of Scabies and Headlice.

During the year 48 persons were treated for scabies and 11 persons treated for headlice at the cleansing station. Two treatments are normally given, "Ascabiol" being used in both infections. If possible, every person in an infected house is taken to the cleansing station for treatment. There is a decrease of 67 scabies and an increase of 5 headlice treatments compared with last year's figures.

Chief Sanitary Inspector's Report

MR. CHAIRMAN, LADIES AND GENTLEMEN,

I beg to present herewith my report for the year 1948.

I am,

SIR, LADIES AND GENTLEMEN,

Your obedient servant,

F. SUTCH,

Chief Sanitary Inspector.

It was a matter of regret that Mr. S. Giles decided to relinquish the post of Sanitary Foreman at our Button Street Depot in August last, and I would like to pay tribute to his good work, as a first class mechanic in maintaining the Council's fleet of vehicles over many years, and generally assisting in organising the work of refuse collection and cesspool emptying. His leaving the service necessitated the re-organisation of the Cleansing Department, and it was found to be more practical to appoint Mr. E. Mills to be Maintenance Engineer and be responsible for the roadworthiness of all Council vehicles, and promote Mr. C. Golding, a lorry driver, to the post of Foreman in charge of the refuse collection and cesspool emptying personnel, and be generally responsible for the efficient performance of duty by the refuse collection and cesspool emptying units.

Satisfactory progress is being made to fill in the old gravel pit at Longfield with house refuse by controlled tipping. This site should serve as a refuse tip for a further twelve months.

Trailers have been provided to assist in salvage collection, and have proved to be successful inasmuch as all salvage can be kept separate from house refuse.

The following is a summary of salvage collections for the year:-

2031 tons of salvage disposed of amounting to £1,255 15s. 2d.

4161 tons of kitchen waste collected by local pig breeders.

681 tons of salvage collected by voluntary bodies.

3331 tons of screened ashes removed by brickmakers, they finding all labour and taking the ashes without further cost.

The following is a summary of collections of Salvage 1940 to 1948:

Year			Tons	Cwts.	Qrs.	£	s.	d.
1940		 	 250	12	0	832	8	6
1941		 	 218	10	0	714	15	10
1942		 	 443	10	0	2,084	8	2
1943	***	 	 239	15	0	1,289	16	6
1944		 	 175	12	1	1,005	0	0

Eradication of Bugs.

The following is a summary of work carried out during the year by the Sanitary Inspectors in destroying pests and vermin:—

Number of cases dealt with	 	 65
Number of Council houses disinfested of bed bugs	 	 12
Number of private houses disinfested of bed bugs	 	 46
Number of houses treated for wood worm	 	 3
Number of houses treated for swarms of flies	 	 2
Number of houses treated for wasp nests	 	 2

It is now possible to obtain Zaldecide containing D.D.T. direct from the manufacturers; this preparation has been used with satisfactory results. Walls are stripped of paper, skirting boards, mouldings, etc., and all surfaces sprayed.

Follow up visits are made and instructions given to occupiers of premises with a view of preventing re-infestation.

Total number	of	defects remedied	 	 	1,084
Total number	of	visits made for this purpose	 	 	4,275

INSPECTION AND SUPERVISION OF FOOD.

Milk Supply.

There are 44 Registered dairy farms in the Rural District.

The following producers are licensed by the Kent County Council:-

T. E. Spooner, Chimhams Farm, Farningham	 Tuberculin	Tested
E. E. Taylor, Beesfield Farm, Farningham	 ,,	"
E. E. Taylor, Maplescombe Farm, Farningham	 ,,	"
W. Alexander, Manor Farm, Farningham	 "	"
W. Alexander, Home Farm, Eynsford	 ,,	"
W. Alexander, New Barn Farm, Eynsford	 ,,	"
Houlding Bros., Speedgate Farm, Fawkham	 "	"
W. C. R. Stoneham, Pettings Court Farm, Ash	 "	"
J. & B. Martin, Pinden End Farm, Pinden	 "	"
G. F. Stowers, Wilmington Hall Farm, Wilmington	 Accredit	ed
J. B. Pallent, Meadowcroft Farm, Green-Street-Green	 ,,	
Miss M. I. Sturgeon, The Roost, Fawkham	 ,,	
M. T. Fulford, North Ash Farm, Ash	 "	
Mrs. E. Hills, Hook Green Farm, Wilmington (18.3.48)	 ,,	

The milk from these farms is sampled under the direction of the County Medical Officer.

One dairy farm has a pasteurisation plant, Messrs. E. Widdows & Sons, Homefield Farm, Sutton-at-Hone.

Informal Notices were served on 25 occasions during the year, to cleanse walls, floors and ceilings of cowsheds or dairies; the work was carried out in reasonable time.

In March, Mrs. E. Hills, of Hook Green Farm, Wilmington, obtained an "Accredited License" from the Kent County Council.

New dairy farms have been established at Blackdale Farm, Darenth, Darenth Grange Darenth, and Upper Austin Lodge, Eynsford.

The	number	of	registered	retail	producers	is	 	 11

All above samples reported as 'Genuine' with the exception of the following:-

Follow up samples were taken and found to be ... 8.3% deficient in fat Milk genuine. No further action was taken.

water

T.T. Milk... Contained 4.5% extraneous Follow up samples were taken and found to be genuine. The extraneous water amounted to only approximately 6 fluid ounces per gallon and was probably due to improper draining of one of the utensils. No further action was taken.

3.3% deficient in fat ... No further action was taken, Milk

Luncheon

Further sample was taken and found to be Inferior. Meat content 28% Sausage ... genuine.

Meat and Other Foods.

The following carcases were examined during the year:-

Cows 14 Pigs 142 Sheep 101 Calves 2

Goats 2

The following items were surrendered as unfit for human food:-

125 lbs. cow beef affected with bone taint.

67 lbs. cow liver affected with abscess.

10 lbs. cow liver affected with hydatid cysts.

28 lbs. pigs' heads affected with tuberculosis,

161 lbs. pigs' liver affected with cirrhosis.

10 lbs. sheep carcase emaciated.

30 lbs. sheep carcase decomposed.

The following foodstuffs were surrendered from food shops and canteens:-

1 cwt, 6 lbs. English Beef. 7 lbs. Corned Beef. 47% lbs. Pork. 21 lbs. Offal. 13 x 14 oz. tins Evaporated Milk. 9 Geese, 107 lbs. Decomposed. 13 Ducks, 45 lbs. Decomposed. 1 x 16 oz. Condensed Full Cream Milk, 1 x 12 oz. tin Spam. 1 x 12 oz. tin Meat and Vegetables. 1 x 1 lb. 12 oz. tin Evaporated Milk. 2 x 16 oz, tins Pork Sausage. 20½ stone Cod, whole fish. 11 stone Cod Fillets. 10 stone Hake. 10½ stone Dog Fish. 6 stone Plaice. 5 stone Fresh Herrings. 6 stone Haddocks, 124 stone Kippers. 21 lbs. Soft Roes. 4 x 16 oz. tins Stewed Steak. 1 x 16 oz. tin Pilchards. 5 x 12 oz. tins Beef Loaf. 1 x 15 oz. tin Herrings. 1 x 8 oz. tin Snoek. 2 x 16 oz. tins Salmon. 1 x 8 oz. tin Crab. 154 lbs. Oranges. 1 x 2 lb, tin Jam. 130 lbs. Oatmeal. 1 x 2 lb, tin Peach Jam. 12 lbs. Cheddar Cheese. 4 x 12 oz. tins Pears. 2 cwt. Dried Milk Powder. 4 x 29 oz. tins Plums. 180 lbs, cooked Beef. 2 x 21 lb. tins Peaches. 23½ lbs. Bacon. 1 x 11 lb. bottle of Plums. 1 x 11 lb. tin Peas. 3 x 28 lb. tins Carrots. 1 x 16 oz. tin Green Pea Soup. 2 x 16 oz. tins Heinz Beans. 1 x 16 oz. tin Beans in Tomato. 1 x 1½ oz. tin Fish Paste.

Shop-keepers have maintained their co-operation during the year in notifying the Sanitary Officers of any foodstuffs suspected as unfit for human food. The Public Health Department greatly appreciate the loyal support of these shop-keepers.

SHOPS ACT, 1934.

There are 251 shops in the Rural area; with the exception of one wet fish shop the shops have properly glazed shop fronts.

During the year one case was dealt with; owing to change of staff it became necessary to provide additional sanitary accommodation separate for the sexes. The work was carried out in good time and in a satisfactory manner.

No case of excessive hours worked by juvenile employees has been noted or reported during the year.

RODENT CONTROL.

There has been no major infestation of rats found by the Council's Rodent Officer or reported by the public.

Survey of areas where rats were found resulted in the location of minor infestations in adjoining properties.

Sewers were treated in March, June, September and December. No evidence of rats were founds during these tests.

Close co-operation is maintained with the Chief Sanitary Inspectors of Bexley and Dartford Borough Councils in joint survey of contiguous areas.

The following is a summary of work during the year:-

Nature of Premis	es.						Estin	nated Kill.

Outworkers.

There are 11 persons registered as Outworkers, making wearing apparel in their own home:—Conditions are satisfactory.

CEMENT DUST EMISSION.

During the year an Investigation Committee was formed from representatives of the Local Authorities affected by dust emissions from cement manufacturing works within the Thameside Area.

One of the objects of the Committee was to collect data as to the amount of dust being deposited within the area.

Working in conjunction with the Sanitary Officers of the Thurrock Urban District Council, samples of dust were collected in standard size Petri Dishes and submitted to the County Analyst who weighed the contents of each dish and estimated their calcium content.

In all there were sixty sites selected to obtain this evidence, twenty of which were situated on the North side of the Thames and forty on the South side. Those under the control of the Dartford Rural District Sanitary Officers covered an area from the Parish of Stone to Gravesend inclusive.

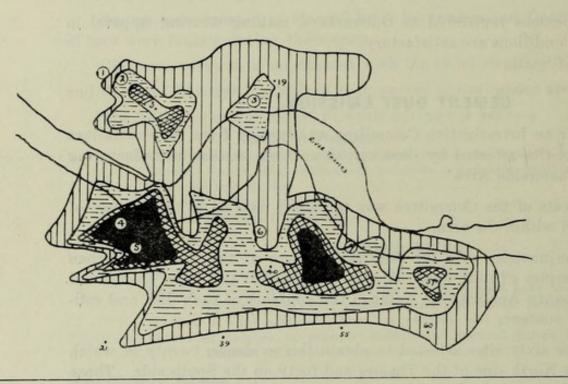

The responsibility for computing the amount of dust polluting the atmosphere, the preparation of maps showing the areas affected and the work of collating all the technical data was carried out by Mr. J. Martindale, the Sanitary Officer in whose district the cement works of Dartford Rural District are situated.

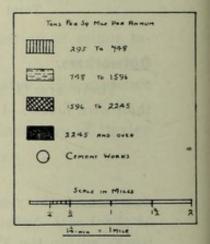

There were ten surveys made, eight of which were carried out between the months of April and August, 1948. An example of one of the results is to be found in the map at the end of this report.
