Tuberculosis Dispensary.	Royal Infirmary Blackburn.	Thursday, 9-15 a.m. by appointment.	Manchester Regional Hospital Board.
Venereal Diseases	Royal Infirmary, Blackburn.	Males — Wednesday, 5 p.m. to 7 p.m. Thursday, 2 p.m. to 4 p.m. Females — Monday, 2 p.m. to 4 p.m. 5 p.m. to 7 p.m. By appointment.	Manchester Regional Hospital Board.
B.C.G. Vaccination Prevention of Tuberculosis.	Civic Health Centre.	By appointment.	Manchester Regional Hospital Board.

CIVIC HEALTH CENTRE,  
DARWEN.

June, 1957

TO THE CHAIRMAN AND MEMBERS OF THE PUBLIC HEALTH COMMITTEE.

LADIES AND GENTLEMEN,

I have pleasure in presenting to you the Annual Report of the Public Health Department for 1956.

The only point that seems to call for comment outside the main body of the report, is to observe that in seven of the last ten years, deaths have exceeded births in the town, and for this and other reasons, the population is estimated to have dropped over 800 persons since the census of 1951. The proportion of older people in the community must necessarily tend to rise. However rosy our plans may be for the future of the community, however elaborate our schemes for the care of the aged, they are valueless without an adequate number of young, active members of the community to operate these future projects.

The low incidence of infectious disease, other than mild whooping cough, the low infant mortality, the absence of maternal mortality and a satisfactorily low still birth rate, are all pleasing features.

I thank all members of the staff for their zeal and efficiency, and the Committee for their unfailing interest and support.

I am, Ladies and Gentlemen,

Your obedient Servant,

R. C. WEBSTER,

MEDICAL OFFICER OF HEALTH.

1956

## GENERAL INFORMATION.

Geographical Position ... Lat. 53° 41' 25" N. Lon. 2° 28' 32" W.	
Elevation above sea level .....	500 ft. to over 800 ft.
Geological formation...Boulder clay and sand, over coal measures.	
Area (in acres) .....	5,959
Population—Census, 1951 .....	30,827
Population — Registrar-General's Mid-year Estimate for 1956 .....	29,990
Number of Inhabited Houses—Census, 1951 .....	10,634
Number of Inhabited Houses at end of 1956 .....	10,762
Number of families or separate occupiers at Census, 1951 .....	10,797
Rateable Value .....	£260,398
Sum represented by a Penny Rate .....	£752

The inhabitants are mainly of the artisan, or working class, and the principal industries are cotton weaving, paper making and staining, plastic and paint manufacturing and engineering trades.

Of a total of 14,211 insured adult persons, the average per cent. unemployed was .85. The corresponding figures for 1955 were:— Insured adult persons, 14,211; Average per cent. unemployed was 1.28.

## SUMMARY OF VITAL STATISTICS.

	Males.	Females.	Total.	
LIVE BIRTHS.	Legitimate .....	194 ... 190 ...	384	Birth-rate per 1,000
	Illegitimate .....	10 ... 11 ...	21	Estimated home
				population mid-1956:
	Total .....	204 ... 201 ...	405	Crude ..... 13.5
				Adjusted... 14.7
STILLBIRTHS:	Legitimate .....	2 ... 5 ...	7	
	Illegitimate .....	Nil ... 1 ...	1	Rate per 1,000 total
				Births ..... 19
	Total .....	2 ... 6 ...	8	
DEATHS:				Death-rate per 1,000
				estimated home
				population mid-1956:
				Crude ..... 15.4
				Adjusted.... 15.2
MORTALITY RATES PER 1,000 EST. POPULATION.	Respiratory T.B. ....			0.07
	Malignant Neoplasms, etc .....			2.80
MATERNAL MORTALITY.	Deaths from Pregnancy, Childbirth and Abortion .....			Nil
	Mortality Rate per 1,000 total Births .....			Nil

# **INFANTILE MORTALITY.**

(Infants under the age of 1 year.)

	Males.	Females.	Total.	Rate per 1,000 Live Births.
Legitimate Infants ...	6	3	9	—
Illegitimate Infants ...	2	Nil	2	—
Total Deaths .....	8	3	11	27

## **INFANTILE MORTALITY RATES.**

Year.	Darwen.	England and Wales.
1947	39	41
1948	31	34
1949	29	32
1950	36	29.8
1951	24	29.6
1952	34	27.6
1953	24	26.8
1954	28	25.5
1955	23	24.9
1956	27	23.8

# **OTHER INFANT DEATHS.**

	Total.	Rate per 1,000 population.
Deaths from Measles (at all ages) .....	Nil	0.000
Deaths from Whooping Cough (at all ages) .....	Nil	0.000
Deaths from Diarrhoea (under 2 years) .....	Nil	0.000

(One child was officially recorded as having died from Diarrhoea at one year of age, but there was in fact a congenital abnormality of the intestine which was more probably the basic cause of this death).

# **NEO-NATAL MORTALITY.**

Deaths of Infants under four weeks of age .....	7
Mortality Rate per 1,000 Live Births .....	17

**Births.** The number of live births registered during the year was 405, giving a birth-rate adjusted by comparison with the estimated home population of 14.7 per 1,000. The trend of this rate over the past ten years, in comparison with the rate for England and Wales is shown in the following table—

Year.	DARWEN.			Rate per 1,000	ENGLAND AND WALES.
	No. of Births.				Rate per 1,000
	Male.	Female.	Total.		
1947	303	274	577	19.0	20.5
1948	257	244	501	16.2	17.9
1949	213	238	451	14.6	16.7
1950	220	194	414	14.1	15.8
1951	235	214	449	15.5	15.5
1952	221	190	411	14.2	15.3
1953	223	240	463	16.1	15.5
1954	212	188	400	14.4	15.2
1955	211	222	433	15.6	15.0
1956	204	201	405	14.7	15.7

**Illegitimate Births.**—The following table shows the number of illegitimate births and deaths for the past ten years:—

Year.	No. of Births.	Rate per cent. of Live Births.	No. of Deaths under 1 year.	Death Rate per 1,000 Illegitimate Live Births.
1947	21	3.64	Nil	Nil
1948	15	3.00	1	66
1949	18	3.99	Nil	Nil
1950	19	4.58	Nil	Nil
1951	17	3.76	1	58
1952	17	4.13	Nil	Nil
1953	16	3.45	Nil	Nil
1954	12	3.00	Nil	Nil
1955	18	4.15	Nil	Nil
1956	21	5.18	2	95

**Stillbirths.**—The table given below sets out details relating to stillbirths for the past ten years:—

Year.	No. of Stillbirths.			Rate per 1,000 Births.	Rate per 1,000 Population.	
	Legitimate.	Illegitimate.	Total.		DARWEN.	ENGLAND AND WALES.
1947	14	2	16	27	0.53	0.50
1948	12	Nil	12	24	0.39	0.42
1949	14	Nil	14	30	0.45	0.39
1950	17	Nil	17	39	0.54	0.37
1951	12	1	13	28	0.40	0.36
1952	11	3	14	33	0.45	0.35
1953	16	1	17	35	0.55	0.35
1954	13	Nil	13	31	0.42	0.36
1955	3	Nil	3	7	0.09	0.35
1956	7	1	8	19	0.26	0.37

**Deaths.**—The number of deaths of Darwen residents which occurred during the year was 462, representing an adjusted death-rate per 1,000 of the population of 15.2.

The trend of the death-rate of the Borough for the past ten years is shown below in comparison with the rate for England and Wales:—

Year.	DARWEN.		ENGLAND AND WALES. Rate per 1,000.
	Total Deaths.	Rate per 1,000.	
1947	486	16.0	12.0
1948	461	14.9	10.8
1949	525	14.6	11.7
1950	489	13.91	11.6
1951	571	16.4	12.5
1952	473	13.6	11.3
1953	438	12.7	11.4
1954	493	14.8	11.3
1955	464	14.0	11.7
1956	462	15.2	11.7

The following is a copy of the information supplied by the Registrar-General of the causes and sex distribution of deaths of Darwen residents. The information does not include non-civilian deaths:—

Cause of Death.	Males.	Females.	Total.
Tuberculosis, respiratory .....	2	—	2
Tuberculosis, other .....	—	—	—
Syphilitic disease .....	1	—	1
Diphtheria .....	—	—	—

## General Provisions of Health Services.

---

A comprehensive range of services is maintained by the Local Health Authority, Lancashire County Council, including Ante-Natal Clinics, Child Welfare Clinics, Ultra-Violet Light Clinics, Speech Therapy Clinics and other School Health Services.—Medical and Dental.

Ambulance service is provided by Lancashire County Council.

Hospital services are provided by Manchester Regional Hospital Board, including general hospital facilities in Blackburn and a Maternity Home in the former Darwen Infectious Diseases Hospital at Bull Hill.

### **LABORATORY FACILITIES.**

The Pathological and Bacteriological Department of the Blackburn and East Lancashire Royal Infirmary undertake all Public Health laboratory work for the Borough of Darwen, in accordance with the Government scheme now being officially carried out in this area by the Manchester Regional Hospital Board.

# Prevalence and Control of Infectious Diseases.

The numerical and age incidence of infectious diseases, other than tuberculosis, is shown in the following table, which includes particulars of Darwen cases notified and accepted, cases removed to hospital, and deaths from infectious diseases. The so-called minor infectious diseases, other than measles and whooping cough, are not included in the table, as they are not notifiable in Darwen and, therefore, statistics as to their incidence are not reliable.

Disease.	Cases Notified and Accepted										Hospital.		
	Total Cases at all Ages.	Years.									Total Deaths	Total Cases removed to Hospital from district	Deaths in Hospital of persons belonging to district
		Un- der 1	1	3	5	10	15	25	45	65 and over

Totals .....	681	371	950	1007	227

# **TUBERCULOSIS.**

Cases of Tuberculosis were admitted to various Sanatoria under the Regional Hospital Board.

The Tuberculosis Scheme is administered by the Lancashire County Council and Regional Hospital Board, but the Area Tuberculosis Officer and Nurse maintain close co-operation with the Public Health Department, furnishing particulars about housing conditions, and environment generally. The necessary disinfection is carried out by the Public Health Department.

The following table shows the age group incidence of new cases of tuberculosis notified, and the deaths from the disease, during 1956:—

Age Periods.	NEW CASES.				DEATHS.

# Sanitary Circumstances of the Area.

## WATER.

**Reservoirs.**—Water is supplied on the constant system from the following reservoirs Sunnyhurst Hey, Earnsdale and Bull Hill, of which the first two are open, and the last closed. All the water is from moorland gathering grounds. Water in the Bull Hill Reservoir is supplied from Bolton. Two supplementary water supplies are also available when required from a borehole in the centre of the town and a mineshaft at Eccleshill piped to Sunnyhurst Reservoir.

**Purification.**—All water is sandfiltered and chlorinated.

**Supply.**—The approximate number of dwelling-houses supplied direct is 10,317.

## SAMPLING.

**Chemical.** Sixteen samples of water from public supplies and one sample from a private supply were submitted for analysis during the year. Five of these samples were submitted for special fluoride and mineral analysis. The amount of fluorides found was of no significance. All were satisfactorily reported upon.

**Bacteriological.** Six samples of drinking water from four private supplies were submitted for bacteriological examination.

Four samples were satisfactorily reported upon, whilst two samples were unsatisfactorily reported upon.

Further samples of these supplies are being taken periodically. Users are advised on precautionary measures.

## SEWERAGE, DRAINAGE AND CLOSET ACCOMMODA- TION.

The table below gives the closet accommodation in the Borough:—

Pails .....	134
Water Closets .....	12,313
Waste Water Closets .....	1,193
Cesspools .....	1
<b>Total</b> .....	<b>13,641</b>

### Conversions and Installations during 1956:—

New Water Closets fixed .....	273
Waste Water Closets converted to Water Closets, ..	81
Latrine Closets converted to Water Closets .....	—
Pail Closets converted to Water Closets .....	2
Baths installed during the year .....	190
Urinals installed during the year .....	—
Waste Water Closets dismantled .....	1

Routine testing, inspection, repair and renewal of existing drains and sewers continued within the limits of availability of staff, material and labour.

It is hoped that closet conversions, will gradually result in the total abolition of the 1,193 waste water closets, though at the present rate of progress this will take another twenty years.

#### **RIVERS AND STREAMS.**

The river is still somewhat polluted by industrial waste effluents, though rather less than in previous years. In addition there is a certain amount of material dumped in the river by children and careless householders.

The river is frequently inspected and every effort made to prevent pollution wherever the sources are discoverable.

#### **SANITARY INSPECTION OF THE AREA.**

Number of houses visited .....	726
Number of houses visited (Housing Consolidated Regulations, 1925 to 1932) .....	201
Number of inspections of Schools .....	5
Number of inspections of Factories and Workplaces .....	30
Number of inspections of Municipal Hostel .....	52
Number of inspections of Bakehouses .....	4
Number of inspections of Dairies and Cowsheds .....	1
Number of inspections of Refuse Tips .....	99
Complaints received and investigated .....	420
Number of re-inspections made .....	1949
Visits paid to houses (re cases of Infectious Diseases) ...	57
Number of rooms disinfected .....	85
Number of smoke observations taken .....	21
Number of drains, etc., tested .....	236
Total number of defects discovered .....	1303
Informal notices served .....	1303
Statutory Notices served .....	28
Number of nuisances abated, including outstanding nuisances from previous year .....	1115

#### **LIST OF NUISANCES DISCOVERED.**

Defective drains .....	82
Choked and Defective Sewers .....	4
Defective soilpipes and water closets .....	23
Defective downspouts, easing troughs, roofs and external walls .....	51
Defective plastering .....	161
Defective Roofs and Damp Walls .....	147
Dirty houses and Premises .....	0
Dangerous Buildings .....	0
Dirty and dilapidated closets .....	42
Accumulations of Refuse .....	0
Defective or uneven gullies .....	16
Insanitary sinks .....	7
Defective fire ranges .....	26
Broken slop pipes .....	5

Defective Flushing Cisterns .....	0
Defective tippers of waste water closets .....	0
Choked waste water closets .....	39
Choked water closets .....	24
Insanitary yards .....	13
Defective internal floors .....	39
Insufficient ventilation .....	91
Burst water pipes .....	8
Defective wash boilers .....	8
*Miscellaneous nuisances .....	451

\* The Miscellaneous Nuisances include such items as defective pointing, defective woodwork of doors, defective pointing and putty around windows, etc.

#### **SHOPS.**

Routine inspections are made and special inspections as occasion requires, but pressure of other work especially housing has limited visitation far below the level regarded as desirable.

#### **SMOKE ABATEMENT.**

Twenty-one smoke observations were taken during the year, and advice and instructions to stokers on firing and use of fuel, to secure as far as possible the prevention of black or heavy smoking, were given. One of the main difficulties encountered in efforts towards smoke abatement is the variable quality and grade of the fuel supplied to manufacturers, who have little or no choice in particular supplies.

#### **DISINFESTATION.**

During the year sixty-three houses were found to be infested with vermin other than bugs. All of these had been disinfested by the end of the year, gaseous fumigation and spraying being the methods employed.

#### **OFFENSIVE TRADES.**

The following are established in the district:—Two tripe boilers, one fat extractor, and one fat melter.

#### **MUNICIPAL HOSTEL.**

This is the only common lodging house in the town and is municipally owned and managed. The average daily number of lodgers for the year was—Males, 109.78; Females, 12.20.

#### **FACTORIES.**

Thirty-one routine and special visits were paid to factories with and without mechanical power during the year for purposes of the provisions as to health. Defects found (chiefly in connection with sanitary conveniences) were notified to occupiers and by the end of the year were either completed or in hand. Pressure of other work still reduces routine visiting far below the level considered desirable.

As previously, the fullest co-operation was maintained between the Department and H.M. Inspector of Factories.

**CHIEF  
SANITARY  
REQUIREMENTS  
OF THE  
DISTRICT.**

The chief sanitary requirements of the district are:—

- The conversion of pail and waste water closets;
- The paving, culverting, embanking and, as far as possible, purification of the river;
- The clearance of derelict and neglected sites;
- The paving of back streets and unmade roads;
- The reduction of the number of private water supplies and the purification and protection of the remainder;
- The conversion of latrine closets at factories.

**PUBLIC CLEANSING.**

The whole of this important sanitary service is under the control of the Public Health Department. It comprises the collection and disposal of household and trade refuse and the cleansing of streets.

**VEHICLES.**

The refuse collection and disposal service is completely mechanised, the tractor-drawn trailer tank for nightsoil collection being now in use for one day per week.

**REFUSE  
COLLECTION.**

Reference was made in a recent Annual Report to the great difficulties experienced by the Department in keeping the refuse collection frequency at a reasonable level during the winter months. Full particulars were given there of the various factors which have arisen during the past 20 years which affect the position. These factors do not change with the passage of time and the Cleansing Committee has the service continually under review so that no expedient to improve the frequency may go untried. All the four districts into which the town is divided for refuse collection purposes are now serviced by vehicles which have maximum capacity consistent with manoeuvrability in the narrower streets. These vehicles are of the "fore-and-aft" tipping type and are proving very successful.

**REFUSE  
DISPOSAL.**

The system of controlled tipping continues to be operated at the Corporation-owned Bull Hill Tip — the only one now in use. It is situated near the Southern boundary of the Borough which makes the length of haul from the Northern half somewhat excessive. It is hoped to find a suitable tip-site nearer the centre of the town in order to lessen this.

## SALVAGE.

The pre-separation of salvable material from household refuse is still conscientiously carried out by the bulk of householders.

The following is a summary of the materials sold during the year:—

	Tons.	Cwts.
Clean Waste Papers .....	436	8½
Ferrous Metals—Baled Tins .....	Nil	Nil
„ „ Black Scrap .....	28	17½
Non-Ferrous Metals .....	0	5
Textiles—Rags, Carpets .....	13	2
Waste Foods—Pigswill (after boiling) .....	164	18
„ „ Household Bones .....	1	—
Total .....	644	11½

The total value of the salvaged materials sold was £3,967.

The price of waste paper and container waste dropped slightly again during the year, but so far there has been no difficulty in disposal. The former salvage depot in the old destructor works yard has now been closed, apart from the waste food plant, and a large Nissen type hut sited at Bull Hill Tip has replaced it.

## SUMMARY.

The following is a summary of the work done during 1956. It should be noted that the weights given below are estimated.

	Tons.	Cwts.	Qrs.
House refuse to Tip (4.438 loads) .....	7100	16	0
Market and Trade Refuse to Tip (344 loads) ...	516	0	0
Receptacles Emptied (House Refuse) .....	370258		
Receptacles Emptied (Trade Refuse) .....	22368		
Excreta .....	109	Loads	
Excreta Pails Emptied .....	2911		
Sludge from Street Gullies .....	283	Loads	
Street Gullies Emptied .....	17740		
Sweepings: Bins from Street Orderly Trucks .....	2552		
Sweepings: Manulectric Trucks .....	643	Loads	
Dust Bins added during the year .....	121		
Number of Portable Refuse Receptacles .....	12767		
Length of Streets swept by Mechanical Sweeper ...	2825	Miles	
Length of Streets swept by Manulectric Trucks...	1710	Miles	

# HOUSING.

The table below gives particulars of action taken specifically under the provisions of the Housing Acts in contradistinction to action under the Public Health Acts.

## STATISTICS.

Number of new houses erected during the year—

(a) Total (including numbers given separately under (b) ) .....	107
(i) By Local Authority .....	100
(ii) By other Local Authorities .....	0
(iii) By other bodies or persons .....	7
(b) With State assistance under the Housing Acts—	
(i) By the local authority (included under (a) (i) above) .....	100
(ii) By other bodies (included under (a) (iii) above) .....	0
1. Inspection of dwelling-houses during the year—	
(1) (a) Total number of dwelling-houses inspected for housing defects (under Public Health or Housing Acts) .....	201
(b) Number of inspections made for the purpose,..	819
(2) (a) Number of dwelling-houses (included under sub-head (1) above) which were inspected and recorded under the Housing Consolidated Regulations 1925 to 1932 .....	201
(b) Number of inspections made for the purpose ...	267
(3) Number of dwelling-houses found to be in a state so dangerous or injurious to health as to be unfit for human habitation .....	0
(4) Number of dwelling-houses (exclusive of those referred to under the preceding sub-head) found not to be in all respects reasonably fit for human habitation .....	61
2 Remedy of defects during the year without service of formal notices—	
Number of defective dwelling-houses rendered fit in consequence of informal action by the local authority or their Officers .....	14

**STATISTICS**  
(continued).

3. Action under statutory powers during the year—	
(a) Proceedings under Sections 9, 10 and 16 of the Housing Act, 1936—	
(1) Number of dwelling-houses in respect of which notices were served requiring repairs .....	10
(2) Number of dwelling-houses which were rendered fit after service of formal notices—	
(a) By owners .....	5
(b) By local authority in default of owners ...	7
(b) Proceedings under Public Health Acts—	
(1) Number of dwelling-houses in respect of which notices were served requiring defects to be remedied .....	0
(2) Number of dwelling-houses in which defects were remedied after service of formal notices—	
(a) By owners .....	0
(b) By local authority in default of owners ...	0
(c) Proceedings under Sections 11 and 13 of the Housing Act, 1936, and Sections 10 (1) and 11 (2) of the Local Government (Miscellaneous Provisions) Act, 1953.	
(1) Number of dwelling-houses in respect of which Demolition Orders were made .....	0
* (2) Number of dwelling-houses demolished in pursuance of Demolition Orders .....	2
*One of these houses was demolished by the owner in consequence of a Sect. 53 Order, and one was demolished informally by the owner.	
* (3) Number of dwelling-houses closed as a result of Closing Orders made under Sections 10 (1) and 11 (2) of the Local Government (Miscellaneous Provisions) Act, 1953 .....	32
*Fifteen of these houses had been virtually "closed" under Section 53 of the Over Darwen Improvement Act, 1879. (See note on page 27) Since then Orders under Section 11 of the Housing Act 1936 and Section 10 of the Local Government (Miscellaneous Provisions) Act 1953 have been applied to the premises.	
(d) Proceedings under Section 12 of the Housing Act, 1936—	
(1) Number of separate tenements or underground rooms in respect of which Closing Orders were made .....	0

# **STATISTICS** (continued).

(2) Number of separate tenements or underground rooms in respect of which Closing Orders were determined, the tenement or room having been rendered fit .....	0
(e) Houses closed informally by owners .....	0
(f) Proceedings under Sections 25 and 29 of the Housing Act, 1936—	
(1) Number of dwelling-houses demolished as a result of Clearance or Compulsory Purchase Orders .....	5
4. Housing Act, 1936.—Part IV.—Overcrowding—	
(a) (i) Number of dwellings overcrowded at the end of the year .....	0
(ii) Number of families dwelling therein .....	0
(iii) Number of persons dwelling therein .....	0
(b) Number of new cases of overcrowding reported during the year .....	0
(c) (i) Number of cases of overcrowding relieved during the year .....	0
(ii) Number of persons concerned in such cases ...	0
5. Housing Act, 1949-54.	
(a) (i) Number of schemes submitted—	
(a) By private individuals to Local Authority	36
(b) By Local Authority to Ministry .....	0
(ii) Number of dwelling-houses affected .....	36
(b) (i) Number of schemes approved—	
(a) Of private individuals .....	35
(b) Of the Local Authority .....	0
(ii) Number of dwelling-houses affected .....	35
(iii) Number of additional separate dwellings provided .....	0

## **OVERCROWDING.**

“Overcrowding” as to mixed sexes in families, not involving legal overcrowding is fairly common in two-bedroomed houses, but is gradually being reduced.

## **OVER DARWEN IMPROVEMENT ACT, 1879.**

Orders under Section 53 of the Over Darwen Improvement Act, 1879 had been previously made against fifteen houses considered to be unfit for human habitation, attaching a penalty to their continued letting. (See note under (c) (3) on page 26).

## **GENERAL OBSERVATIONS.**

The chief difficulty in housing work is the inability to secure extensive repairs by informal action with the result that statutory procedure has to be invoked with all the additional work and time involved.

It is perhaps worthy of note here that since the last Report the Corporation have taken over another 5 houses at the request of owners, in discharge of debt for default repair works or in

**GENERAL  
OBSERVATIONS  
(continued)**

anticipation of the service of notice therefor, under Section 9 of the Housing Act, making a total of 33 houses so far taken over. Four of these houses are included in Housing or Industrial Redevelopment Areas contemplated during the next five years.

In addition a further 15 houses of varying types and sizes have been acquired by the Corporation at the instance of, and by agreement with, the owners, making a total of 103 houses so far taken over of which 18 are in Housing or Industrial Redevelopment Schemes. They have all been or are to be repaired, the 18 patch-repaired, the remaining 85 fully repaired.

Inspection, survey and repair proceeded steadily throughout the year.

# Inspection and Supervision of Food.

## **SAMPLING MILK.**

**Biological.** Thirty-one samples were submitted for guinea pig inoculation. Thirty were reported as negative, but one was reported as positive.

Suitable action was taken by the Ministry of Agriculture, Fisheries and Food, and information was received that clinical examination had been carried out and one animal removed for slaughter.

**Bacteriological.**—Thirty-three samples were examined during the year. Twenty-four were satisfactorily reported upon, and nine were unsatisfactorily reported upon. The reports were passed on for appropriate action to the County Agricultural Officer.

**CHEMICAL ANALYSIS OF MILK—See Tables I and II below.**

## **MEAT AND OTHER FOODS.**

The Public Abattoir was closed in June, 1942, in pursuance of a Ministry of Food Scheme for further centralising slaughtering.

Butchers' and other food shops, stalls and vehicles, and premises used for the preparation of human food are regularly inspected.

The amount of food examined, certified unfit, and either destroyed or utilised after sterilisation for animal feeding-stuffs, was as shown in Table III on Page 31.

No legal proceedings were necessary in respect of unsound food during the year.

## **FOOD AND DRUGS SAMPLING**

The Local Authority, by direction of the Minister, is the Food and Drugs Authority for the Borough.

Close co-operation is maintained with the Public Analyst whose advice and help are always available and much valued.

The quality of the food sold in the district is generally good.

**CHEMICAL ANALYSIS OF OTHER FOODS—See Table I.**

**TABLE 1—SAMPLES REPORTED GENUINE**

No. of Samples.	Description.	Formal.	Informal.
52	Milk .....	52	...
1	Beef Sausage .....	1	...
3	Gin .....	3	...
3	Whisky .....	3	...
3	Brandy .....	3	...
3	Rum .....	3	...
1	Sweet Vermouth .....	1	...
1	Pure Lemon Milk Flavouring .....	...	1
1	Strawberry Milk Flavouring..	...	1
1	Pineapple Milk Flavouring...	...	1
1	Ground Almonds .....	...	1
1	Christmas Pudding .....	...	1
1	Chicken Breasts in Chicken Jelly .....	...	1
1	Party Cake .....	...	1
1	Breakfast Tongues .....	...	1

**TABLE II—SAMPLES REPORTED NOT GENUINE**

Cons. No.	No. of Samples.	Description.	Formal.	Informal.	Result.	Action taken.
1	1	Milk	x	—	Deficient 11.6% fat and slightly low in solids-not-fat	Follow-up samples taken and found to be genuine. Vendor cautioned.
2	1	Pork Sausage	x	—	Meat content 64%	Vendor notified of deficiency.

**TABLE III—SHOWING AMOUNT AND NATURE OF FOOD  
CONDEMNED DURING 1956.**

Amount.	Nature of Food.	Amount.	Nature of Food.	Amount.	Nature of Food.
58 tins	Assorted Fruit.	2 tins	Cream	1 jar	Marmalade
17 tins	Ox Tongues	4 tins	Stewed Steak	3 jars	Fruit Salad
22 tins	Luncheon Meat	2 tins	Chicken	1 jar	Cream
17 tins	Corned Beef	2 tins	Baked Beans	1 pkt	Cheese
1 tin	Ham	1 tin	Cereal	6-lbs.	Corned Beef
53 tins	Fish	2 tins	Crabmeat	70-lbs.	Chilled Beef
13 tins	Assorted	1 tin	Irish Stew	14-lbs.	Ox Tongue
	Vegetables	1 tin	Strained Egg/ Custard	38-lbs.	Ox Liver
9 tins	Tomatoes	4 tins	Creamed Rice	1½ stones	Kippers
20 tins	Soups	1 jar	Mincemeat		
35 tins	Milk				

### RATS AND MICE DESTRUCTION

Investigation and disinfection proceeded steadily throughout the year, and it has become increasingly obvious that the initial survey and co-ordinated treatments, and especially the comprehensive and radical treatment of the sewers, have reduced to a low level the degree of infestation in the town. This has been maintained now for ten years, and it is expected that regular re-survey, sewer maintenance treatment and block control, will keep it there or still further reduce it.

The following table gives a summary of the work done throughout the year—

No. of premises inspected.	No. of premises found infested.	No. of treatments carried out.	Estimated kill of rats.	Cumulative total of rats killed since inception of service.
	Killed	prior to January, 1956		17,958
480 (including 64 Hen Pens.)	141	Full Test 134      58	1749	19,707

### SEWER TREATMENTS.

Date	No. of manholes treated.	Estimated kill.
May	371	601
November	412	830
