Civic Health Centre,  
Darwen.

August, 1961.

To the Chairman and Members of the  
Public Health Committee.

Ladies and Gentlemen

I have pleasure in presenting to you the Annual Report of the  
Public Health Department for 1960.

The year was in the main uneventful, but I note with regret no  
less than twelve deaths from road accidents and sixteen deaths  
from other accidents. Thus accidents have moved in to fill the  
place once taken by infectious diseases. Measles made its  
expected two yearly return but was mild.

I thank the Committee and all my colleagues for another year  
of pleasant and well supported work.

I am, Ladies and Gentlemen,

Your obedient Servant,

R. C. WEBSTER,

MEDICAL OFFICER OF HEALTH.

P A R T    1.

R. C. WEBSTER, B.Sc., M.D., D.P.H., D.C.H.

MEDICAL OFFICER OF HEALTH.

# SUMMARY of STATISTICS and SOCIAL CONDITIONS, 1960.

=====

## GENERAL

Geographical Position..... Lat. 53<sup>0</sup> 41'25" N  
Lon. 2<sup>0</sup> 28'32" W

## INFORMATION

Elevation above sea level.. 500 ft. to over 800 ft.

Geological formation..... Boulder clay and sand,  
over coal measures.

Area (in acres).....5,959

Population - Census, 1961 .....29,452

Population - Registrar-General's Mid-year  
Estimate for 1960..... 29,370

Number of Inhabited Houses - Census 1961..... 10,532

Number of Inhabited Houses at end of 1960..... 10,517

Number of families or separate occupiers  
at Census, 1961..... 10,532

Rateable Value.....£300,479

Sum represented by a Penny Rate.....£ 1,124

The inhabitants are mainly of the artisan, or working class, and the principal industries are cotton weaving, paper making and staining, plastic and paint manufacturing and engineering trades.

Of a total of 13,254 insured adult persons, the average per cent unemployed was 2.3. The corresponding figures for 1959 were :-  
Insured adult persons, 13,915; Average per cent unemployed was 2.4.

# SUMMARY OF VITAL STATISTICS

		<u>Males</u>	<u>Females</u>	<u>Total</u>

1960	30.6	21.7

## OTHER INFANT DEATHS

Total Rate per 1,000  
population

Deaths from Measles (at all ages)...	nil	0.000
Deaths from Whooping Cough (at all ages)...	nil	0.000
Deaths from Diarrhoea (under 2 years)...	nil	0.000

NEO-NATAL Deaths of Infants under 4 weeks of age.....10  
MORTALITY Mortality Rate per 1,000 Live Births.....21.9

EARLY  
NEO-NATAL Mortality Rate per 1,000 Live Births.....15.3  
MORTALITY

PERINATAL Mortality Rate per 1,000 Total Births.....48.6  
MORTALITY

Please Note :- "Perinatal Mortality" shows the  
total number of stillbirths and  
total number of Infant Deaths  
during the first week of age."

BIRTHS. The number of live births registered during the year was 457, giving a birth-rate adjusted by comparison with the estimated home population of 16.8 per 1,000. The trend of this rate over the past ten years in comparison with the rate for England and Wales is shown in the following table -

YEAR	DARWEN				ENGLAND AND WALES
	NUMBER OF BIRTHS			RATE PER	RATE PER 1,000
	MALE	FEMALE	TOTAL	1,000	
1951	235	214	449	15.5	15.5
1952	221	190	411	14.2	15.3
1953	223	240	463	16.1	15.5
1954	212	188	400	14.4	15.2
1955	211	222	433	15.6	15.0
1956	204	201	405	14.7	15.7
1957	224	207	431	15.6	16.1
1958	228	219	447	16.3	16.4
1959	238	220	458	16.8	16.5
1960	235	222	457	16.8	17.1

ILLEGITIMATE BIRTHS - The following table shows the number of illegitimate births and deaths for the past ten years :-

YEAR	Number of Births	Rate per cent of Live Births	No. of Deaths under 1 year	Death Rate per 1,000 Illegitimate Live Births
1951	17	3.76	1	58
1952	17	4.13	nil	nil
1953	16	3.45	nil	nil
1954	12	3.00	nil	nil
1955	18	4.15	nil	nil
1956	21	5.18	2	95
1957	29	6.72	nil	nil
1958	26	5.45	nil	nil
1959	18	3.93	nil	nil
1960	19	4.15	nil	nil

STILLBIRTHS - The table given below sets out details relating to stillbirths for the past ten years :-

YEAR	No. of Stillbirths			Rate per 1,000 Births	Rate per 1,000 Population	
	Legitimate	Illegitimate	Total		Darwen	England & Wales
1951	12	1	13	28	0.40	0.36
1952	11	3	14	33	0.45	0.35
1953	16	1	17	35	0.55	0.35
1954	13	nil	13	31	0.42	0.36
1955	3	nil	3	7	0.09	0.35
1956	7	1	8	19	0.26	0.37
1957	12	nil	12	27	0.40	0.37
1958	10	nil	10	21.9	0.33	0.36
1959	14	nil	14	29.7	0.47	0.35
1960	16	nil	16	33.8	0.54	0.34

DEATHS -The number of deaths of Darwen residents which occurred during the year was 430, representing an adjusted death-rate per 1,000 of the population of 14.3.

The trend of the death-rate of the Borough for the past ten years is shown below in comparison with the rate for England and Wales :-

YEAR	DARWEN		ENGLAND AND WALES
	TOTAL DEATHS	RATE PER 1,000	RATE PER 1,000
1951	571	16.4	12.5
1952	473	13.6	11.3
1953	438	12.7	11.4
1954	493	14.8	11.3
1955	464	14.0	11.7
1956	462	15.2	11.7
1957	436	14.4	11.5
1958	507	16.7	11.7
1959	472	15.7	11.6
1960	430	14.3	11.5

The following is a copy of the information supplied by the Registrar-General of the causes and sex distribution of deaths of Darwin residents. The information does not include non-civilian deaths :-

## GENERAL PROVISIONS OF HEALTH SERVICES

=====

A comprehensive range of services is maintained by the Local Health Authority, Lancashire County Council, including Ante-Natal Clinics, Child Welfare Clinics, Ultra-Violet Light Clinics, Speech Therapy Clinics and other School Health Services - Medical and Dental.

Ambulance service is provided by Lancashire County Council.

Hospital services are provided by Manchester Regional Hospital Board, including general hospital facilities in Blackburn and a Maternity Home in the former Darwen Infectious Diseases Hospital at Bull Hill.

### LABORATORY FACILITIES

The Pathological and Bacteriological Department of the Blackburn and East Lancashire Royal Infirmary undertake all Public Health Laboratory work for the Borough of Darwen, in accordance with the Government scheme now being officially carried out in this area by the Manchester Regional Hospital Board.

The numerical and age incidence of infectious diseases, other than tuberculosis, is shown in the following table, which includes particulars of Darwen cases notified and accepted, cases removed to hospital, and deaths from infectious diseases. The so-called minor infectious diseases, other than measles and whooping cough, are not included in the table, as they are not notifiable in Darwen and, therefore, statistics as to their incidence are not reliable.

TOTALS :-	227	539	352	259	1063

**TUBERCULOSIS** Cases of Tuberculosis were admitted to various Sanatoria under the Regional Hospital Board.

The Tuberculosis Scheme is administered by the Lancashire County Council and Regional Hospital Board, but the Area Tuberculosis Officer and Nurse maintain close co-operation with the Public Health Department, furnishing particulars about housing conditions and environment generally. The necessary disinfection is carried out by the Public Health Department.

The following table shows the age group incidence of new cases of tuberculosis notified, and the deaths from the disease, during 1960 :-

AGE PERIODS	NEW CASES				DEATHS			
	Respiratory		non-Respiratory		Respiratory		non-Respiratory	
	M	F	M	F	M	F	M	F
Years								
0 - 1 .....	-	1	-	-	-	-	-	-

## SANITARY CIRCUMSTANCES OF THE AREA

=====

### WATER

RESERVOIRS - Water is supplied on the constant system from the following reservoirs - Sunnyhurst Hey, Earnsdale and Bull Hill, of which the first two are open, and the last closed. All the water is from moorland gathering grounds. Water in the Bull Hill Reservoir is supplied from Bolton. Two supplementary water supplies are also available when required from a borehole in the centre of the town and a mineshaft at Eccleshill piped to Sunnyhurst Reservoir.

PURIFICATION - All water is sandfiltered and chlorinated.

SUPPLY - The approximate number of dwelling houses supplied direct is 11,124.

### SAMPLING

CHEMICAL - Nine samples of water from public supplies were submitted for analysis during the year. Eight were satisfactorily reported upon and one was unsatisfactorily reported upon.

BACTERIOLOGICAL - Fourteen samples of drinking water from Public Supplies and two samples of drinking water from two private supplies were submitted for bacteriological examination. Eleven samples from the Public Supplies were satisfactorily reported upon, three samples were unsatisfactorily reported upon.

One sample from the Private Supplies was satisfactorily reported upon, whilst one sample was unsatisfactorily reported upon.

Further samples of these supplies are being taken periodically. Users are advised on precautionary measures.

ACCOMMOD-  
ATION.

The table below gives the closet accommodation in the Borough :

Pails.....	127
Water Closets.....	13,065
Waste Water Closets.....	812
Cesspools.....	0
Total.....	14,004
	=====

Conversions and Installations during 1960:-

New Water Closets fixed.....	274
Waste Water Closets converted to Water Closets.	68
Latrine Closets converted to Water Closets.....	0
Pail Closets converted to Water Closets.....	3
Baths installed during the year.....	119
Showers installed during the year.....	1
Urinals installed during the year.....	0
Waste Water Closets dismantled.....	0
Water Closets dismantled.....	0

Routing testing, inspection, repair and renewal of existing drains and sewers continued within the limits of availability of staff, material and labour.

It is hoped that closet conversions will gradually result in the total abolition of the 812 waste water closets, and if the present rate of progress continues, this will take only another six years.

RIVERS  
and  
STREAMS

The river is still somewhat polluted by industrial waste effluents, though rather less than in previous years. In addition there is a certain amount of material dumped in the river by children and careless householders.

The river is frequently inspected and every effort made to prevent pollution wherever the sources are discoverable.

SANITARY INSPECTION OF THE AREA	Number of houses visited.....	418
	Number of houses visited (Housing Consolidated Regulations, 1925 to 1932)....	97
	Number of inspections of schools.....	0
	Number of inspections of factories and workplaces.....	201
	Number of inspections of Municipal Hostel..	52
	Number of inspections of bakehouses.....	1
	Number of inspections of dairies & cowsheds	0
	Number of inspections of refuse tips.....	200
	Complaints received and investigated.....	366
	Number of re-inspections made.....	3,212
	Visits paid to houses (re cases of Infectious Diseases).....	45
	Number of rooms disinfected.....	28
	Number of smoke observations taken.....	13
	Number of drains, etc., tested.....	197
	Total number of defects discovered.....	737
	Informal Notices served.....	737
	Statutory Notices served.....	30
	Number of nuisances abated, including outstanding nuisances from previous year...	887

LIST OF NUISANCES DISCOVERED	Defective drains.....	90
	Choked and defective sewers.....	63
	Defective soil pipes and water closets.....	1
	Defective downspouts, easing troughs, roofs and external walls.....	43
	Defective plastering.....	74
	Defective roofs and damp walls.....	56
	Dirty houses and premises.....	1
	Dangerous buildings.....	3
	Dirty and dilapidated closet buildings.....	40
	Accumulations of refuse.....	25
	Defective or uneven gullies.....	15
	Insanitary sinks.....	5
	Defective fire-ranges.....	17
	Broken slop pipes.....	6
	Defective flushing cisterns.....	3
	Choked waste water closets.....	26
	Choked water closets.....	15
	Insanitary yards.....	11
	Defective internal floors.....	25
	Insufficient ventilation.....	48

... continued ...

..continued..

Burst water pipes.....0  
Defective wash boilers..... 0  
\* Miscellaneous nuisances.....188

\* The miscellaneous nuisances include such items as defective pointing, defective woodwork of doors, defective pointing and putty around windows, etc.

#### SHOPS: FOOD

2,791 routine and special inspections were made of meat, fish and other food shops and market stalls under the Food Hygiene Regulations. Advice was given as necessary, and various works of improvement initiated. These consisted principally of the installation of requisite washing facilities, and of counter and shelf fittings designed to prevent contamination of food.

#### INSPECTIONS UNDER SHOPS ACT, 1950

Routine inspections are made and special inspections as occasion requires, but pressure of other work, especially housing, has limited visitation somewhat.

#### SMOKE ABATEMENT.

Thirteen smoke observations were taken during the year, and advice and instructions to stokers on firing and use of fuel, to secure as far as possible the prevention of black or heavy smoking, were given. There is a gradual but noticeable reduction of smoke taking place from factory chimneys and factory owners now seem to be fully alerted to the necessity of preventing smoke emission.

#### DISINFEST- ATION

During the year seventy houses were found to be infested with vermin. All of these had been disinfested by the end of the year, gaseous fumigation and spraying being the methods employed.

#### OFFENSIVE TRADES

The following are established in the district :- Two tripe boilers, one fat extractor and one fat melter.

MUNICIPAL  
HOSTEL

This is the only common lodging house in the town and is municipally owned and managed. The average daily number of lodgers for the year was :-

Males.....	124.54
Females.....	12.77

FACTORIES

Two hundred and one routine and special visits were paid to factories with and without mechanical power during the year for purposes of the provisions as to health. Defects found (chiefly in connection with sanitary conveniences) were notified to occupiers and by the end of the year, were either completed or in hand. Routine visiting of factories has been stepped up considerably since the last report.

As previously, the fullest co-operation was maintained between the Department and H.M. Inspector of Factories.

CHIEF  
SANITARY  
REQUIREMENTS  
OF THE  
DISTRICT

The chief sanitary requirements of the district are :-

The conversion of pail and waste water closets;

The paving, culverting, embanking and, as far as possible, purification of the river;

The clearance of derelict and neglected sites;

The paving of back streets and unmade roads;

The reduction of the number of private water supplies and the purification and protection of the remainder.

## PUBLIC CLEANSING

=====

The whole of this important sanitary service is under the control of the Public Health Department. It comprises the collection and disposal of household and trade refuse and the cleansing of streets.

### VEHICLES

The refuse collection and disposal service is completely mechanised. The tractor-drawn trailer tank for nightsoil collection is now in use for one day per week only.

### REFUSE COLLECTION

Reference was made in a recent Annual Report to the great difficulties experienced by the Department in keeping the refuse collection frequency at a reasonable level during the winter months. Full particulars were given there of the various factors which have arisen during the past 20 years which affect the position. These factors do not change with the passage of time and the Cleansing Committee has the service continually under review so that no expedient to improve the frequency may go untried. All the four districts into which the town is divided for refuse collection purposes are now serviced by vehicles which have maximum capacity consistent with manoeuvrability in the narrower streets. These vehicles are of the "fore-and-aft" tipping type and are proving very successful.

### REFUSE DISPOSAL

The system of controlled tipping continues to be operated at the Corporation-owned Bull Hill Tip - the only one now in use. It is situated near the Southern boundary of the Borough which makes the length of haul from the Northern half somewhat excessive.

## SALVAGE

The pre-separation of salvable material from household refuse is still conscientiously carried out by the bulk of householders.

The following is a summary of the materials sold during the year :-

	<u>Tons</u>	<u>Cwts.</u>
Clean Waste Papers.....	498	11
Ferrous Metals - Baled Tins...	nil	nil
Ferrous Metals - Black Scrap..	36	4
Non-Ferrous Metals.....	1	11
Textiles - Rags, Carpets.....	<u>6</u>	<u>14</u>
Total.....	<u>543</u>	<u>0</u>

The total value of the salvaged materials sold was.....£3,807.

The price of waste paper was steady at £7 per ton, keeping it level with container waste.

A large Nissen type hut sited at Bull Hill Tip is used for sorting and baling waste paper and rags, and separating metals for disposal. Paper and container waste are mechanically baled.

As from October, 1959, the Corporation ceased to process waste food and rented the buildings and plant to a local pig-keeper, whom they licensed and to whom they continue to deliver the waste food collected by them.

# SUMMARY

The following is a summary of the work done during 1960. It should be noted that the weights given below are estimated.

	<u>Tons</u>	<u>Cwts.</u>	<u>Qrs.</u>
House Refuse to Tip (3739 loads).....	5,982	8	0
Market and Trade Refuse to Tip (376 loads).....	564	0	0
Receptacles emptied (House refuse).....	370,356		
Receptacles emptied (Trade refuse).....	24,353		
Excreta.....		100	loads
Excreta pails emptied.....	2,451		
Sludge from street gullies		288	loads
Street gullies emptied....	15,649		
Sweepings: Bins from street orderly trucks.....	3,162		
Sweepings : Manulectric trucks.....	858	loads	
Number of portable refuse receptacles.....	12,680		
Length of streets swept by Mechanical sweeper.....	1,668	miles	
Length of streets swept by Manulectric trucks.....	2,176	miles	

# H O U S I N G

=====

The table below gives particulars of action taken specifically under the provisions of the Housing Acts in contradistinction to action under the Public Health Acts.

## STATISTICS

Number of new houses erected during the year -

(a)	Total (including numbers given separately under (b)).....	123
(i)	By Local Authority.....	76
(ii)	By other Local Authorities.....	4
(iii)	By other bodies or persons.....	43
(b)	With State assistance under the Housing Acts -	
(i)	By the Local Authority (included under (a)(i) above).....	76
(ii)	By other bodies (included under (a)(iii) above).....	4

## I

Inspection of dwelling-houses during the year -

(1)(a)	Total number of dwelling-houses inspected for housing defects (under Public Health or Housing Acts).....	97
(b)	Number of inspections made for the purpose.....	485
(2)(a)	Number of dwelling-houses (included under sub-head (1) above which were inspected and recorded under the Housing Consolidated Regulations 1925 to 1932).....	81
(b)	Number of inspections made for the purpose.....	81
(3)	Number of dwelling-houses found to be in a state so dangerous or injurious to health as to be unfit for human habitation.....	46

... continued...

STATISTICS  
(continued)

I	(4)	Number of dwelling-houses (exclusive of those referred to under the preceding sub-head) found not to be in all respects reasonably fit for human habitation.....	35
II		Remedy of defects during the year without service of formal notices -	
		Number of defective dwelling-houses rendered fit in consequence of informal action by the Local Authority or their Officers.....	3
III		Action under statutory powers during the year -	
	(1)	Proceedings under Sections 9, 10 and 12 of the Housing Act, 1957	
	(a)	Number of dwelling-houses in respect of which notices were served requiring repairs -	
		Preliminary.....	25
		Statutory.....	7
	(b)	Number of dwelling-houses which were rendered fit after service of formal notices -	
	(i)	By owners.....	1

	(2)	Proceedings under Public Health Acts -	
	(a)	Number of dwelling-houses in respect of which notices were served requiring defects to be remedied...	0
	(b)	Number of dwelling-houses in which defects were remedied after service of formal notices -	
	(i)	By owners.....	0
	(ii)	By Local Authority in default of owners.....	0

...continued...

STATISTICS  
(continued)

III	(3)	Proceedings under Sections 16 and 17 of the Housing Act, 1957.	
	(a)	(i)	Number of dwelling-houses in respect of which Demolition Orders were made...51
		(ii)	Number of dwelling-houses in ownership of Local Authority dealt with in accordance with Section 3 (3a) of the Housing Subsidies Act 1956, as directed in Appendix II of Circular 33/56 with a view to demolition..... 0
	(b)		Number of dwelling-houses demolished in pursuance of Demolition Orders.....36
			(This figure includes five houses demolished informally by owners upon vacation by tenants.)
	(c)		Number of houses demolished where action has been taken under Section 53 of the Over Darwen Improvement Act, 1879..... 0
	(d)		Number of dwelling-houses closed as a result of Closing Orders made under Section 16 and 17 of the Housing Act, 1957.....12
(4)			Proceedings under Section 18 of the Housing Act, 1957.
	(a)		Number of separate tenements or underground rooms in respect of which Closing Orders were made..... 0
	(b)		Number of separate tenements or underground rooms in respect of which Closing Orders were determined, the tenement or room having been rendered fit..... 0
(5)			Houses closed informally by owners..... 0

... continued...

STATISTICS  
(continued)

III	(6)	Proceedings under Sections 42 and 43 of the Housing Act, 1957	
		Number of dwelling-houses demolished as a result of Clearance or Compulsory Purchase Orders.....	15
IV		Housing Act, 1957 Part IV - Overcrowding -	
	(1)	(a) Number of dwellings overcrowded at the end of the year.....	0
		(b) Number of families dwelling therein....	0
		(c) Number of persons dwelling therein.....	0
	(2)	Number of new cases of overcrowding reported during the year.....	0
	(3)	(a) Number of cases of overcrowding relieved during the year.....	0
		(b) Number of persons concerned in such cases.....	0
V		Housing Acts, 1949 - 1954	
	(1)	(a) Number of schemes submitted -	
		(i) By private individuals to Local Authority.....	10
		(ii) By Local Authority to Ministry.....	0
		(b) Number of dwelling-houses affected.....	10
	(2)	(a) Number of schemes approved -	
		(i) Of private individuals.....	10
		(ii) Of the Local Authority.....	0
		(b) Number of dwelling-houses affected.....	9
		(c) Number of additional separate dwellings provided.....	0

## OVERCROWDING

"Overcrowding" as to mixed sexes in families, not involving legal overcrowding has been fairly common in two-bedroomed houses, but is gradually being reduced.

## GENERAL OBSERVATIONS

The chief difficulty in housing work is the inability to secure extensive repairs by informal action, with the result that statutory procedure has to be invoked, with all the additional work and time involved.

It is, perhaps, worthy of note here, that since the last Report the Corporation have taken over 1 house at the request of the owners in discharge of debt for default repair works, making a total of 43 houses so far taken over.

In addition, a further 36 houses of varying types and sizes have been acquired by the Corporation at the instance of, and by agreement with, the owners, making a total of 180 houses so far taken over, of which 12 were in Housing Clearance or Redevelopment Schemes. Those not in such Schemes have been, or are to be, repaired. Some of the others have been patch-repaired for temporary occupancy pending final clearance.

Inspection, survey and repair proceeded steadily throughout the year.

# INSPECTION AND SUPERVISION OF FOOD

=====

## SAMPLING

### MILK

BIOLOGICAL. 114 samples were submitted for guinea pig inoculation. 101 were reported as negative and 13 guinea pigs died of an intercurrent infection too early for diagnosis of tuberculosis. In these latter cases repeat samples were taken.

BACTERIOLOGICAL. 130 samples were examined during the year. 106 were satisfactorily reported upon, 24 were unsatisfactorily reported upon. The reports were passed on for appropriate action to the Divisional Milk Officer.

CHEMICAL ANALYSIS OF MILK - See Tables I and II below.

### MEAT AND OTHER FOODS

The Public Abattoir was closed in June 1941, in pursuance of a Ministry of Food Scheme for further centralising slaughtering.

Butchers' and other food shops, stalls and vehicles, and premises used for the preparation of human food are regularly inspected.

The amount of food examined, certified unfit, and either destroyed or utilised, after sterilisation, for animal feeding-stuffs, was as shown in Table III on Page 36.

No legal proceedings were necessary in respect of unsound food during the year.

### FOOD AND DRUGS

The Local Authority, by direction of the Minister, is the Food and Drugs Authority for the Borough.

Close co-operation is maintained with the Public Analyst, whose advice and help are always available and much valued.

The quality of the food sold in the district is generally good.

CHEMICAL ANALYSIS OF OTHER FOODS -

See Table I

1	Continental Slice	9	Wholemeal Biscuits Chocolate Biscuits

# RATS AND MICE DESTRUCTION

=====

Investigation and disinfection proceeded steadily throughout the year, and it has become increasingly obvious that the initial survey and co-ordinated treatments, and especially the comprehensive and radical treatment of the sewers, have reduced to a low level the degree of infestation in the town. This has been maintained now for fourteen years, and it is expected that regular re-survey, sewer maintenance treatment and block control, will keep it there or still further reduce it.

The following table gives a summary of the work done throughout the year :-

No. of Premises Inspected	No. of Premises found Infested	No. of Treatments carried out		Estimated kill of rats	Cum. total of rats killed since inception of service
		<u>Full</u>	<u>Test</u>		
390 (including 32 hen-pens)	137	121	84	881	33,371
