Councillor	Dight

BOROUGH OF DEVIZES

PUBLIC HEALTH DEPARTMENT,
NORTHGATE HOUSE,
DEVIZES,
WILTSHIRE

To The Mayor, Aldermen and Councillors of the Borough of Devizes.

In presenting my report on the health of the Borough for 1967, my first full calendar year in the post of Medical Officer of Health, I wish to impress upon you that the major changes occurred relative to property more than to persons.

It is satisfying to say that what major changes as have occurred during the year were for the better and in that connection, I refer particularly to new housing.

I wish to thank the Public Health Inspector and the other members of the staff of the Health Department for the help they have given to me in my work and for what they in their different roles, have done for the Borough.

To the Public Health Inspector my thanks are due for his contribution to this report.

In conclusion, I would like to offer my thanks to the Chairman and Members of the Health and Housing Committee for their co-operation, and record with pleasure the cordial relations which have existed between them and the Health Department throughout the period under review.

P.C. BARRY.

Medical Officer of Health

GENERAL STATISTICS

Area in Acres	1,419.87
Population (Registrar General's Estimate)		9,000
Number of inhabited houses at 1.4.67.		3,010
Rateable Value at 1.4.67.		£381,738
Estimated Product of 1d rate at 1.4.67.		£1,520

VITAL STATISTICS

Birth and Death Rates compared with other
areas (Births and Deaths per 1,000 population)
Standardised*

	<u>Birth Rate</u>		<u>Death Rate</u>	
	<u>1966</u>	<u>1967</u>	<u>1966</u>	<u>1967</u>
Devizes Borough	18.4	15.3	9.8	8.7
England and Wales	17.7	17.2	11.7	11.2
Wiltshire	19.6	17.8	10.4	10.2

* Comparability figures are supplied to each District by the Registrar General. These take into account the varying age/sex distribution of the population in different parts of the country. When applied to the local rates they allow a more accurate comparison to be made between different areas.

Vital Statistics (Contd.)MOTHERS AND INFANTS

		<u>1967</u>	<u>1966</u>
<u>Live Births</u>			
Number	138	164
Rate per 1000 population	15.3	18.4
<u>Illegitimate Live Births</u> (per cent of total live births)		10.1	10.4
<u>Stillbirths</u>			
Number	-	4
Rate per 1000 total live and still births		-	23.8
<u>Total Live and Still Births</u>	138	168
<u>Infant Deaths</u> (deaths under one year)	1	3
<u>Infant Mortality Rates</u>			
Total Infant Deaths per 1000 total live births		7	18.3
Legitimate infant deaths per 1000 legitimate live births		8	20.4
Illegitimate infant deaths per 1000 illegitimate live births	-	-
<u>Neo-natal Mortality Rate</u> (deaths under four weeks per 1000 total live births)	7	18.3
<u>Early Neo-natal Mortality Rate</u> (deaths under one week per 1000 total live births)	7	18.3
<u>Perinatal Mortality Rate</u> (stillbirths and deaths under one week combined per 1000 total live and still births)	7	41.6
<u>Maternal Mortality</u> (including abortion)			
Number of deaths	-	-
Rate per 1000 total live and still births		-	-

Birth and Death Rates, Devizes Borough, 1957-67
(per 1,000 population.)

From the accompanying figures & graph, it can be seen that, compared to 1966, there is a decrease in both the number of births recorded as well as in the birth rate. The same applies to deaths and the death rate.

CAUSES OF DEATH DURING 1967

The figures given below are taken from the Registrar General's Annual Report :-

	Male	<u>1967</u> Female	Total	<u>1966</u> Total
1. Tuberculosis, respiratory	0	1	1	0
10. Malignant neoplasm stomach	2	0	2	2
11. Malignant neoplasm, lung, bronchus	6	2	8	3
12. Malignant neoplasm, breast	0	3	3	0
13. Malignant neoplasm, uterus	0	1	1	0
14. Other malignant and lymphatic neoplasms	6	6	12	9
15. Leukaemia, aleukaemia	0	0	0	1
16. Diabetes	1	0	1	1
17. Vascular lesions of nervous system	3	17	20	13
18. Coronary disease, angina	20	9	29	50
19. Hypertension with heart disease	1	0	1	1
20. Other heart disease	3	2	5	10
21. Other circulatory disease	3	1	4	1
23. Pneumonia	10	4	14	8
24. Bronchitis	0	0	0	4
25. Other diseases of respiratory system	1	1	2	0
26. Ulcer of stomach and duodenum	1	1	2	2
27. Gastritis, enteritis and diarrhoea	1	0	1	1
28. Nephritis and nephrosis	0	0	0	1
29. Hyperplasia of prostate	0	0	0	2
32. Other defined and ill-defined diseases	5	10	15	24
33. Motor vehicle accidents	1	0	1	4
34. All other accidents	0	2	2	3
35. Suicide	0	1	1	2
<u>Total all causes</u>	64	61	125	142

It is observed that in 1967, 71% of deaths occurring were attributed to four major causes i.e. malignancy, pneumonia, coronary disease and vascular lesions of the nervous system, whilst in 1966 the same diseases accounted for no more than 54% of the deaths.

IMMUNISATION AND VACCINATION

COMMUNICABLE DISEASE

The following tables give details of the cases notified during the past six years, together with age incidence in cases in 1967 :-

Disease	1962	1963	1964	1965	1966	1967
Measles	3	26	155	147	88	92
Whooping Cough	-	1	3	-	-	6
Scarlet Fever	29	20	6	11	11	11
Tuberculosis	3	2	2	3	3	1
Food Poisoning	-	-	-	-	-	2
Erysipelas	-	-	1	-	5	2
Meningococcal Infection	-	-	-	-	1	-

Disease	Age Groups					Age not known	All Ages
	0-4	5-14	15-44	45-64	65-74		
Scarlet Fever	3	8	-	-	-	-	11
Measles	45	46	1	-	-	-	92

TOTALS	-	-	-	-	175	-	164

HOUSING

During the year a numerical improvement of 136 units of housing occurred as a result of the construction by the Council of 54 flats, whilst private enterprise produced a total of 90 dwellings. A small offset of 8 resulted from closure or demolition of unfit houses.

A report upon the survey of Hare and Hounds Street proposed redevelopment area was completed, and considered by the Devizes Borough Council. It was subsequently submitted to the Ministry of Housing and Local Government whose recommendation is awaited.

There is a growing tendency for people of modest means to become owner/occupiers of old properties with the idea of improving them. In consequence such owners and prospective buyers are naturally concerned, and often seek information from the Department about the future of such properties in order to avoid waste of money and effort. It is, therefore, of particular value to obtain a full appraisal of the conditions of dwellings in the Borough and a detailed inspection of pre-war houses (about 400) is now in progress with the purpose of satisfying enquiries on the life of old property, also to encourage owners generally to take advantage of grant aid to carry out improvements by the installation of at least all basic amenities, in addition to repair work, to bring them up to a statutory fitness standard, thereby offsetting the high cost of Council house replacements.

In addition to the Hare and Hounds Street scheme it is considered that there are about 60 houses in the Borough which are ripe for statutory action. Some of these e.g. St. John's Court and Long Street, are of historical or architectural interest. Others could be made fit but at an unreasonable expense, whilst in the case of the remainder, closure or, where practicable, demolition may be the solution.

Common Lodging Houses

There are no common lodging houses in the Borough.

Housing (Contd.)

Progress Returns forwarded to the Ministry of Housing and Local Government

A. Houses demolished during the Year

In or adjoining Clearance Areas	0
Not in or adjoining Clearance Areas	7

B. Unfit Houses Closed During the Year 1

C. Number of persons displaced during the year .. 2

D. Number of families displaced during the year 2

E. Unfit houses made fit -

By Owner	1
By Local Authority	0

F. Houses in which defects were remedied -

After formal notice under Public Health Acts 10

G. Unfit houses in temporary use 0

H. Purchase of houses by agreement 0

Improvement Grants

Discretionary Grants

	<u>Owner/Occupied</u>	<u>Tenanted</u>
Number of applications received	1	3
Number of dwellings improved	0	0
Amount paid in grants during the year	0	0
Average grant per house	0	0

WATER SUPPLY

An adequate supply of water is provided to the Borough by the North Wilts Water Board who obtain their supplies from various sources mainly in the northern portion of Wiltshire.

It can be seen from the accompanying figures that samples of the water are taken from various points in the Borough periodically by officials of the Water Authority and the Public Health Inspector to the Borough. It can be further seen that, in general, the samples of the water supply are found to be satisfactory bacteriologically on analysis.

The only criticism of the water that is occasionally made by members of the public is that of spasmodic "over-chlorination". This, whilst distasteful to the consumer, is a fault on the right side from the health point of view.

My only criticism of the water is in respect of its fluoride content and that it has not been "fluoridated". This omission is, in my view, unfortunate and it is to be hoped that it will be put right in the not too distant future.

	<u>Satisfactory</u>	<u>Unsatisfactory</u>
Number of samples taken by the North Wilts Water Board	46	0
Number of samples taken by the Public Health Inspector	13	1
The unsatisfactory sample was shown to be polluted with non-faecal type coliform organisms only.		
Number of dwelling houses supplied from Public water mains	3,004	
Number of population supplied from Public water mains	8,992	
Number of population supplied by means of stand pipes	8	
Fluoride content of water supplied from Bourton and Shepherds Shore to Borough		less than 0.1

SEWERAGE

The two existing plants continue to deal satisfactorily with the increasing volume of sewage from the Borough. The effectiveness of the sewage treatment is gauged by the quality of the resultant effluent from the plants.

Samples of effluent are taken periodically by the Bristol Avon River Authority who are concerned with the prevention of pollution to water courses within their areas.

MILK

There are eight licensed milk dealers in the Borough. These dealers operate four dairies and three shops in addition to two milk vending-machines.

Milk sold in the Borough is in the main pasteurised but in this connection it is mentioned with regret that the law of the land being such as it is, raw milk can still be offered for sale. It is estimated that approximately 80 gallons of the latter is sold weekly for human consumption in Devizes.

One of the great advantages of pasteurised over raw milk is that, in the former, the risk of infection with Undulant fever is eliminated. Such a risk is always present if milk from a cow infected with Brucellosis is consumed unpasteurised.

The Table below gives details of the results of cleanliness tests carried out on samples of milk taken throughout the year. It is noticeable that the failures were numerous and were confined to samples of raw milk.

	<u>Pass</u>	<u>Fail</u>
Raw milk	22	10
Pasteurised milk	56	0
	<u>78</u>	<u>10</u>

Fifteen samples of raw milk were examined for brucellosis and tuberculosis with negative results.

Examination of bottles prepared for filling were carried out with satisfactory results.

PET MEAT

Meat intended for consumption by "pets" is sold in the Borough by mobile traders whose home base is elsewhere.

The Meat (Staining and Sterilization) Regulations 1960 require that all knackers' meat must be either sterilized or stained, if raw. Sterilized meat is safe, but there is a danger of raw pet meat causing food poisoning in human beings. Purchasers of raw pet meat who are not aware of this risk, should take every care to keep it away from the family food, utensils and equipment, and to remember that infection is transmissible to human beings by contaminated hands.

Also, there is the possibility that raw pet meat is not always stained or only partially stained before leaving the knackers' yard, consequently, some of the meat may be consumed by humans. Having regard to this health hazard, all meat intended for pet food should be sterilized before leaving the knackers' yard and the law should be amended without delay to this end in the interest of public health.

THE LIQUID EGG (PASTEURISATION) REGULATIONS 1963

There are no egg pasteurisation plants in the Borough.

POULTRY INSPECTION

There are no poultry processing premises within the Borough.

INSPECTION OF UNSOUND FOOD

During the year certificates were issued in respect of unsound food, consisting of :-

		<u>Frozen Food</u>	
Meat at Retail Shops	205 lbs	Vegetables	45 pkts.
Poultry at Retail Shops	7 hens	Fish	7 pkts.
Canned meat	56 tins	Meat	18 pkts.
Canned fruit	774 tins	Chicken(joints)	3
Canned vegetables	139 tins	Chicken (whole)	1
Canned fish	151 tins	Dairy Cream Sponge	1
Miscellaneous	155 tins		

Food Hygiene (General) Regulations 1960

The following premises are subject to these Regulations :-

	No. of Premises	Number of Premises equipped with:-		
		Wash-hand basin to comply with Regn. 16.	Sink to which Regn. 19 applies	Hot water over sink to comply with Regn. 19.
Dairies	4	4	4	4
Fish Shops (Wet)	1	1	0	0
Fish Shops (Fried)	5	5	5	5
Restaurants, Cafes etc.	11	11	11	11
Hospitals, Institutions	4	4	4	4
School Canteens	8	8	8	8
Licensed Premises	20	20	20	20
Mobile Vans	5	5	0	0
Confectionery	9	9	9	9

Public Buildings	2	2	2	2
Guest Houses	1	1	1	1
Grocers	19	19	19	19
Butchers	5	5	5	5
Greengrocers	5	5	5	5
Multiple Stores	3	3	3	3
Bakeries	4	4	4	4
Miscellaneous (Canteens in Factories etc.)	11	11	11	11
TOTALS	137	137	131	131

These figures do not include food rooms which are used in social activities in connection with Places of Worship although they have been visited and are up to the required standard.

Food Hygiene (General) Regulations 1960

Food premises were inspected at regular intervals and informal notices sent and follow-up visits made. Remedial action was taken in respect of the following deficiencies found:-

Defective window	1
" roof	2
" walls	8
" ceilings	3
" floor/coverings	9
" yard paving	2
Choked drains	1
Faulty hot water supply to wash-hand basin	2
Clothes in food rooms	6
Untidiness (yard/food rooms)	10
Animals in food/preparation rooms	3
Waste bins unsatisfactory	3
Faulty food equipment	8
Dirty food equipment	2
Shabby decoration of food rooms	10
Dirty sanitary conveniences	9
Dirty food rooms	5
Absence of nailbrush	4
Defaced hand-washing notices	4
Absence of soap	3
Dirty towels	2
Cracked crockery	2
Dirty cellars	1
Food exposed to possible risk of contamination	9
Unsatisfactory storage of wrapping paper	3
Dirty refrigerator	1
Dirty overclothing	2
Water closet lobby used as food store	2
Potatoes prepared in kitchen	2
Cleansing materials and equipment stored in food preparation rooms	2

Food Hygiene (Markets, Stalls and Delivery
Vehicles) Regulations 1966 and (Amendment) Regulations
1966.

The above-mentioned Regulations became operative on 1st January 1967 and superseded corresponding provisions contained in the Food Hygiene (General) Regulations 1960 embodying several important changes concerning food businesses in covered and uncovered markets, delivery vehicles (excluding bread vans), mobile shops and stalls.

The Council considered a report on the new Regulations and arranged for food traders to be grouped together in the top half of the covered market after structural works of improvement and additional washing facilities had been completed.

It was considered that the extra washing facilities to be provided in The Shambles and those existing in the nearby public conveniences were reasonably accessible and adequate for food traders in the open market.

Open market stall-holders were required to provide their own protective coverings top, back, and sides.

RODENT CONTROL

The Devizes Borough Council continue to share satisfactorily the services of the Rodent Operative with the Devizes Rural District Council on alternate weeks.

Sewer treatments have been carried out periodically and moderate infestations were found in New Park Street, Northgate Street, The Market Place, Castle Lane, The Brittox, Long Street, Morris Lane and Commercial Road. Regular visits are made to the refuse tip to keep infestation within satisfactory limits.

	Type of Property	
	Non-Agricultural	Agricultural
<u>PROPERTY OTHER THAN SEWERS</u>		
1. Number of properties in district	3,961	12
2. (a) Total number of properties (including nearby premises) inspected following notification	66
