DOVER PORT HEALTH AUTHORITY

ANNUAL REPORT

of the

MEDICAL OFFICER OF HEALTH

for the Year 1963

C.F. LYNCH, M.B., B.Ch., B.A.O., D.P.H.,

Medical Officer of Health

Health Department,
Brook House,
Dover.

Health Department,
Brook House,
Dover.

To: The Mayor, Aldermen and Councillors of the Borough of
Dover acting as the Port Health Authority of the Port
of Dover:

Ladies and Gentlemen,

I have the honour to present the Annual Report on the
work of the Port Health Authority for the year 1963.

The Report is prepared in modified form on the lines
indicated by the Ministry of Health.

Over $7\frac{1}{2}$ million tons of shipping entered the Port during
the year, a considerable increase on the figure for the previous
year.

Passenger traffic likewise continued to increase, the
total number of passengers using the Port being not far short
of $3\frac{1}{2}$ million.

Over 400,000 Aliens and some 78,000 Commonwealth Citizens
arrived. Details of those medically examined in both groups
are shown in the appropriate sections of the Report.

Among cases of illness landed from vessels during the
year were fifty-one of infectious or notifiable disease though
none of the quarantinable diseases occurred.

Ship inspections showed no defects of hygiene requiring
the service of notices, 182 such inspections being carried out
during the year.

Over 1,000 cargoes or more than 61,000 tons of imported
foodstuffs were landed of which 105 tons. 9 cwts. of fruit and
vegetables were condemned owing to spoilage and were destroyed.

On behalf of the Port Health Authority I have to thank H.M.
Customs and Immigration Officers and members of all other
Departments associated with the work of the Port Health Authority
for their helpful co-operation throughout the year.

I have the honour to be,

Mr. Mayor, Ladies and Gentlemen,

Your obedient Servant,

C.F. LYNCH

Medical Officer of Health.

SECTION V - WATER SUPPLY

NO CHANGE

31 samples were submitted by the Department during the year for bacteriological examination, 2 from hydrants, 1 from the dock area and 28 from ships. Those from the hydrants and the dock area were all reported to be highly satisfactory. Of the twenty-eight samples submitted from vessels seven were reported to be unsatisfactory although in the case of two the contamination present was of no special significance. As in previous years careful watch was kept on supplies taken on abroad and ship owners were generally advised to adopt sterilisation as a routine measure.

The British Railways cross-channel vessels were regularly checked by the Railway Medical Authorities and results communicated to the Medical Officer of Health: in the case of adverse reports, the assistance of this Department in the matter of advice and check sampling was readily available.

*The notifications of suspected food poisoning were in respect of twelve members of a party of students disembarking from the 4.30 a.m. Ostend boat arrival on 9th August, with signs and symptoms suggestive of food poisoning following a meal in Cologne the previous day. Two affected members of the party were admitted to hospital; the remainder proceeded to their own homes, the Health Authority being advised in each case.

SECTION X - OBSERVATIONS ON THE OCCURRENCE
OF MALARIA IN SHIPS

No case of malaria was reported during the year.

SECTION XI - MEASURES TAKEN AGAINST
SHIPS INFECTED WITH OR SUSPECTED FOR
PLAGUE

No measures were necessary during 1963.

In the event of finding plague-infected rats, vessels would be boomed off and fumigation of all compartments carried out with H.C.N.

SECTION XII - MEASURES AGAINST RODENTS IN SHIPS FROM FOREIGN PORTS1. Procedure for inspection of ships for rats:

Trade of port consists chiefly of cross-channel traffic, vessels of which are subjected to half-yearly routine inspections in connection with the issue of the necessary certificates under Regulation 19 of the Public Health (Ships) Regulations, 1952.

Additionally, any evidence of the presence of rodents on board occurring in the interval would be immediately reported by the British Railways Authority.

Other vessels entering the port are subjected to routine inspection by the Port Health Inspectors.

Port of Dover approved and designated for the issue of both Deratting and Deratting Exemption Certificates under Regulation 19 of the Public Health (Ships) Regulations, 1952.

2. Arrangements for the bacteriological or pathological examination of rodents, with special reference to rodent plague, including the number of rodents sent for examination during the year:

Although no action was necessary during 1963, any rats found on ships would be sent for necessary examination to the Public Health Laboratory at Maidstone.

3. Arrangements in the district for - deratting ships, the methods used, and, if done by a commercial contractor, the name of the contractor:

Deratting carried out by contractor, viz. Fumigation Services, Limited, Barking, Essex, using Hydrogen Cyanide gas under direction of Port Health Inspectors.

Minor infestations are dealt with by the Local Authority's Rodent Operator using Warfarin mainly.

4. Progress in the rat-proofing of ships:

No active measures requested during 1963. With regard to the cross-channel vessels, rat proofing of store-rooms effectively maintained. Any deficiencies found in these or other vessels would be brought to the attention of masters and owners.

Foodstuffs condemned during the year amounted to over 105 tons compared with the 2½ tons condemned in 1962. Refrigeration system break-downs during voyage were the main cause of such large condemnations, although in the case of one cargo of grapes spoilage of part of the cargo was occasioned by diesel contamination resulting from a broken oil pipe. The condemned foodstuffs were disposed of by burial under supervision at the Corporation Refuse Tip.

These samples comprised canned soups and sauces (5), butter(1), macaroni(2), canned fruit (6), drink liquore(5), chocolate confectionery(8), crystallised fruits(2), almonds(1), boxed fruits(2), dried fruit(1), tomato paste(1) and tomato powder(1). All were satisfactory regarding composition, preservative content, colouring matter and toxic metals. Two minor labelling infringements were reported and these were pursued with the appropriate Authority at the place of destination of the goods with a view to the necessary remediable action.

The Public Analyst also drew attention to slight rusting on the interior surfaces of the containers in the canned fruit samples. This matter was pursued in view of the probable adverse effect on the shelf life of the goods and proper lacquering of the internal surfaces of containers advised to the canners and tin-plate manufacturers.
