Borough of Dunstable.

Report

ON THE

Health of Dunstable for the year 1953

BY

H. A. A. PARGETER, M.A., M.B., D.P.H.

Medical Officer of Health

Together with the Report of

A. BISHOP, Cert. R.S.I.

Senior Sanitary Inspector

Digitized by the Internet Archive in 2017 with funding from Wellcome Library

REPORT

OF THE

MEDICAL OFFICER OF HEALTH FOR 1953

Public Health Department,

Municipal Offices,

Dunstable.

November, 1954.

To His Worship the Mayor, Aldermen and Councillors of the Borough of Dunstable.

GENTLEMEN,

I have pleasure in submitting my Annual Report for the year 1953.

From a Public Health point of view it is very satisfactory to note that an efficient Sewage Works will now be soon under construction and will be large enough to deal with the imminent increase in numbers of houses and factories.

Dunstable still remains a place of health and happiness. The statistics of this Report show that the health through 1953 was good, but there is no doubt that the happiness of the Town would be greater if we could moderate the river of traffic passing through along the Watling Street. This is not only a danger to life and limb, but there is also for most of the hours of the day continual noise and continual fumes which make the High Streets the very opposite of a pedestrian's paradise.

In conclusion I wish to express to the Town Clerk and the Sanitary Inspectors my thanks for the help they have always given in my work.

I have the honour to be,

Your obedient servant,

H. A. A. PARGETER,

Medical Officer of Health.

PUBLIC HEALTH STAFF.

(a) Medical Officer of Health (part-time).H. A. A. Pargeter, M.A., M.B., D.P.H.

(b) Senior Sanitary Inspector.

A. Bishop. Certificate Royal Sanitary Institute as Sanitary Inspector.

Certificate Royal Sanitary Institute as Inspector of Meat and Other Foods.

(d) Chief Clerk/Shorthand Typist. Mrs. D. F. Wordsworth.

(e) Junior Clerk.

Miss R. A. Fensome (to September, 1953).

SECTION A:-

STATISTICS AND SOCIAL CONDITIONS.

Vital Statistics.

| Area of Borough, 2,028 acres. | |
|---|--------|
| Population as estimated by Registrar-General | 17,270 |
| Number of inhabited houses according to Rate Book as at | |
| 31st December, 1953 | 5,331 |
| | |
| Sum produced by a penny rate taken at 31st March, 1953 | £362 |
| Number of new houses erected: | |
| (a) Council: Permanent | |
| (b) Private Enterprise | 43 |

EXTRACTS FROM VITAL STATISTICS FOR THE YEAR 1953.

The following tables give extracts from the Vital Statistics for the year 1953 as furnished by the Registrar-General:—

| | Total | | M. | F. | | |
|--------------|-------|-----|-----|-----|----------------------|----|
| Live Births | | 242 | 125 | 117 | | |
| Legitimate | | 229 | 121 | 108 | Birth rate per 1,000 | of |
| Illegitimate | | 13 | 4 | 9 | population, 14.0. | |

| Still Births | 7 | 3 | 4) |
|--------------|---------|----|---|
| Legitimate | 7 | 3 | 4 Rate per 1,000 (live and |
| Illegitimate | | | — still) Births, 28.2. |
| Deaths | 153 | 74 | 79 Death rate per 1,000 of population, 8.9. |

There were no deaths from diseases or accidents of pregnancy and childbirth.

In order that the birth and death rates may be more properly compared with those of other districts, it is necessary for them to be multiplied by comparability factors. These factors are supplied by the Registrar-General.

Thus the adjusted rates for Dunstable are as follows :-Birth Rate, 14.0, comparability factor, .94, adjusted birth rate, 13.2 Death Rate, 8.9, comparability factor, 1.06, adjusted death rate, 9.4 Deaths of Infants under one year of age :-7. Rate per 1,000 live births 32.3 Legitimate 7. Rate per 1,000 legitimate live births ... 33.9 Illegitimate —. Rate per 1,000 illegitimate live births Deaths from Measles (all ages) ... Deaths from Whooping Cough (all ages) ... Deaths from Diarrhoea (under 2 years of age) ... Deaths from Cancer (all ages) 20

Population.

The population figures as supplied by the Registrar-General since 1933, when the Borough was extended to its present area, are as follows:—

| 1933 | (mid-year) | | | | | 10,293 |
|------|------------|---------|-------|-------|---------|--------|
| 1934 | | | | | | 10,520 |
| 1935 | | | | | | 11,330 |
| 1936 | | | | | | 12,800 |
| 1937 | | | | | | 13,450 |
| 1938 | | | | | | 13,760 |
| 1939 | " | | | | | 14,720 |
| 1940 | " | | | | | 15,730 |
| 1941 | ,, | | | | | 18,040 |
| 1942 | ,, | | ••• | | | 17,130 |
| 1943 | ,, | | | | | 16,450 |
| 1944 | ,, | | | | | |
| 1945 | ,, | • • • • | | | | 16,160 |
| 1946 | ,, | | | | | 15,680 |
| 1947 | ,, | | | | | 16,010 |
| 1948 | ,, | | | | *** | 16,490 |
| 1949 | ,, | • • • • | | | • • • • | 16,990 |
| 1950 | ,, | | | | | 17,110 |
| | ,, | • • • • | | | • • • • | 17,260 |
| 1951 | ,, | | | • • • | | 17,070 |
| 1952 | ,, | | • • • | | | 17,090 |
| 1953 | " | | | | | 17,270 |

The natural increase in the population or difference between the birth and death rates are as follows:—

| 1942 | | | | 6.1 |
|------|------|------|------|------|
| 1943 | | | | 7.2 |
| 1944 | | | | 8.4 |
| 1945 | | | | 8.2 |
| 1946 | | | | 9.3 |
| 1947 | | | | 15.9 |
| 1948 | | | | 11.1 |
| 1949 | | | | 5.5 |
| 1950 | | | | 5.7 |
| 1951 | | | | 2.4 |
| 1952 | | | | 1.5 |
| 1953 | | | | 5.1 |

Causes of Death.

The following table shows the causes of death as given in the Registrar-General's statistics:—

| U. | Cau | ses of L | Death | | Males | Females |
|-----|--|----------|---------|----|--------|---------|
| | All causes | | | | 74 | 79 |

REPORT

of the

SENIOR SANITARY INSPECTOR FOR THE YEAR 1953.

Public Health Department,

Municipal Offices,

DUNSTABLE.

11th August, 1954.

To His Worship the Mayor, Aldermen and Councillors of the Borough of Dunstable.

GENTLEMEN,

I beg to submit my Report for the year 1953.

The Report deals with the action taken in connection with the various duties with which the Sanitary Inspector is concerned including that dealing with collection and disposal of house and trade refuse.

Progress has now been made in connection with the unsatisfactory condition at the Sewage Works to the extent that the con-

truction of the new works will commence early in 1955.

The coming into force of the Housing, Repairs and Rents Act, 1954, will undoubtedly mean additional work both in connection with the submission of proposals to the Minister of Health in relation to the demolition, closure or repair of unfit houses and in dealing with certificates relating to rent increases in respect of repairs.

While the survey to enable the proposals to be submitted to the Minister is being completed, unfit properties are wherever it is possible being closed and demolished and steps are being taken to

deal with one proposed Clearance Area.

While the introduction of further Legislation in connection with food should give added power and incentive to raise the standard of Food Hygiene I am sure that we must continue to have more regard

to the personal attitude towards this matter.

My thanks are again extended to the Public Health Committee and the Council for the consideration and support given to me at all times; to the Medical Officer of Health for his help and guidance and to the members of my staff and colleagues for the assistance which they have always given to me.

Yours obediently,

A. BISHOP,

Senior Sanitary Inspector.

SECTION C :-

SANITARY CIRCUMSTANCES OF THE AREA.

1. Water Supply.

The following information as to the water supply and works in connection therewith has been supplied by the Manager and Engineer of the Dunstable District of the Eastern Gas Board.

The general position relating to the sources of supply remained

unchanged during 1953.

The larger quantity was pumped from Wells within the Borough owned by the National Gas Board with an additional supply from the mains of the Luton Water Company.

(a) Quantity and Quality.

The quantities pumped and purchased during 1953 were:—
Pumped from Wells in the Borough ... 284,777,000 galls.
Purchased from Luton Water Company 95,407,000 galls.
The total quantity was therefore 380,184,000 gallons giving an average of 1,042,000 gallons per day.

As from 1st April, 1954, the water from Luton was from the New Friars Wash Pumping Station of the joint Luton and Dunstable scheme and not from the Luton Water Company as hitherto. The quantity being received from this source at the end of July, 1954, was in the order of 400,000 gallons per day.

There was no shortage of water during 1953.

(b) New Works.

A new booster pump was installed to increase pressures in West Street/Tring Road area. This difficulty will be overcome when the laying of about \(\frac{3}{4}\) mile of 8" main in the Bull Pond Lane Area which is now in progress is completed. Normal extensions of mains to deal with the building development has also been undertaken.

(c) Risk of Contamination.

Although all water is treated by chlorination there is very little risk of contamination from any cause.

(d) Number of Dwelling Houses Supplied.

There are very few houses in the Borough without a separate pumped water supply.

Results of the Examination of Water Samples.

Bacteriological Samples.

A total of thirty-five samples were submitted for examination during the year, twenty-one samples being taken from points within the Borough, and fourteen from the point at which the water purchased from the Luton Water Company enters the Borough. The samples as a whole proved satisfactory, a typical report being as follows:—

"This is a very satisfactory sample. It is clear and bright in appearance and is of the highest bacterial purity consistent with a wholesome water suitable for drinking and domestic purposes."

The only variants were samples submitted on the 27th and 30th July and taken from a point within the Borough. They were

reported on as follows :-

"This sample is clear and bright in appearance and of satisfactory bacterial purity consistent with a wholesome water suitable for drinking and domestic purposes. The sample shows, however, slight abnormality since organisms of the coli-aerogenes group are present in small number. Bact. coli are absent and no direct evidence of dangerous contamination is therefore shown."

The slight abnormality was found to be due to a new length of water main which had been insufficiently flushed before use. When this condition was rectified further samples showed a return to normal.

Chemical Samples.

Two samples only were submitted for chemical analysis.

They were reported on as follows :-

"This sample is clear and bright in appearance, neutral in reaction and free from metals. The water is hard in character, but its hardness and its content of mineral and saline constituents in solution are not excessive. The organic quality is of a high standard."

These results are consistent with a water which, from the aspect of chemical analysis, is pure and wholesome in

character and suitable for public supply purposes."

2. Drainage and Sewerage.

(a) Sewage Disposal.

There is no change in the condition at the Sewage Works.

The Ministry of Housing and Local Government has now given approval in principal to the Council's proposals for the first stage development of a new Sewage Works on the present site at an estimated cost of £173,530 and at his request the Council has suggested 1st March, 1955, as the starting date.

The first stage development provides for a population of 30,000.

(b) New Sewers and Sewerage.

The condition of the sewers is in the main satisfactory. The amount of trouble experienced as a result of obstructions is small and is confined to those instances where a very small number of properties is involved.

Work has not yet commenced in the laying of storm water

sewers in the northern portion of the town.

Considerable extension to the storm water sewers in the Downs Road area to provide for existing streets and the new Downside Estate and for the considerable industrial extension in the Luton Road area and other development which has been and is still being carried out.

No major alteration of existing sewers has been necessary although there have been considerable extensions to provide for new building development.

(c) Closet Accommodation.

The number of houses in the Borough without separate closet accommodation or with closet accommodation without flushing apparatus is very small and will shortly be almost, if not altogether, eliminated as a result of Clearance or other action under the Housing Acts.

3. Rivers and Streams.

There are no rivers or streams in the Borough.

4. Public Cleansing.

(a) Refuse Collection and Disposal.

The Refuse Collection Service was fairly well maintained throughout the year notwithstanding the shortage of the right type of labour. This is only possible by the continual payment of overtime.

Conditions at the Refuse Tip were satisfactory throughout the whole period. No trouble was experienced from rats, due to a large extent, to the care taken by the tip attendant both in the covering of the refuse and careful baiting.

Negotiations are now being undertaken with a view to the purchase of a site in Church Street for the erection of a new depot for housing of vehicles, etc., to replace the very unsatisfactory premises in West Street.

(b) Salvage.

The collection of kitchen waste continued throughout the year on the basis of a twice weekly collection from household bins and from the reduced number of street bins. As a result of the removal of Control of Animal Feeding Stuffs and the fact that the Luton Corporation decided to close down their concentrator plant, due to the decline in the demand for waste food concentrate the Council, after giving careful consideration to the whole matter, decided to discontinue the salvage of kitchen waste in February. 1954.

Every endeavour was made, with some degree of success, to transfer certain of the large producers of kitchen waste to private collectors and as a result little inconvenience was caused.

A large number of the waste food containers have already been

sold.

Waste paper collection was maintained throughout the year. Prices obtained did not fluctuate to any extent as in previous years. Reference to the table shows that although the amount of waste paper collected exceeded the previous year by about 6 tons and kitchen waste by about 27 tons the total revenue for the year was reduced by about £1,820 due almost entirely to the reduction in the price of waste paper.

The following table shows the amount and value of salvage collected during 1953 and a comparison with 1952 :—

| | Material | | | | | | 1952 | | 1 | Year | 195 | 3 |
|--------|----------|--------|--------|------|------|------|-------|------|------|------|-----|----|
| | | tons | crots. | qrs. | lbs. | tons | cwts. | qrs. | lbs. | | | |
| Paper | | | | | 202 | 12 | _ | | 208 | 9 | 2 | |
| Heavy | Iron | | | | 11 | 13 | - | _ | 8 | 12 | _ | |
| Rags | | | | | 6 | 5 | 2 | _ | 4 | 11 | 2 | |
| Brass, | lead, al | uminiu | m, cop | per | - | 15 | _ | 3 | | 13 | 3 | 1 |
| Tins | - *** | *** | | | 13 | 8 | 3 | _ | 14 | _ | 3 | 21 |
| Waste | Food | | *** | | 385 | 2 | 2 | _ | 412 | 16 | 1 | _ |
| | VALU | JE | | | £5, | 011 | 19 | 3 | £3, | 191 | 4 | 9 |

(c) Cleansing of Cesspools.

Although the number of cesspools in the Borough has been increased as the result of the erection of houses close to the boundary in the Tring Road area the problem of emptying has not been increased to any extent.

This work is still undertaken by the Luton Rural District Council on payment. The number of cesspools in the Borough does

not justify the provision of separate plant by the Council.

5. Sanitary Inspection of the Area.

The following schedules give details and number of inspections made and the results of the notices served :—

Offensive Trades: - Section 107 Public Health Act, 1936.

There is no change in the circumstances. There are three premises involved in the collection of rags, two of them on a very small scale.

Section 86 of the Public Health Acts (Amendment) Act, 1907 requiring the registration of Marine Store Dealers' premises and for the keeping of records is in force in the Borough.

Factories Act, 1937.

Information as to the number of inspections made, notices served and work carried out under the provisions of the above Act are set out below:—

(1) Inspections for Purposes of Provisions as to Health.

| | | Number | | Number of | |
|-----|---|----------------|-------------|--------------------|-------------------------|
| | Premises | on Register | Inspections | Written Notices | Occupiers Prosecuted |
| (i) | Factories in which Sections 1, 2, 3, 4 and 6 are to be enforced by Local Authorities | 14 | 17 | 1 | _ |
| | Factories not included in (i) above in which Section 7 is enforced by the Local Authority | 99 | 70 | 17 | |
| | Other Premises in which Section 7 is enforced by the Local Authority (excluding outworkers' premises) | 4 | 3 | _ | _ |
| | TOTAL | 117 | 90 | 18 | _ |

(2) Cases in which Defects were Found.

| | Number | Number of | | | |
|---|--------|-----------|------------------------------|----------------------|---|

| TOTAL | - 53 | _ | _ | _ | _ | |

6. Moveable Dwellings.

Twelve applications for licences to station caravans on land and two applications for licences in respect of land to be used for the same purpose were received.

Five licences, for periods up to six months, were granted to station caravans on sites and seven were refused. The two applications in respect of land were also refused.

7. Smoke Abatement.

It was found necessary on one occasion to call attention of the occupiers of one factory to the emission of black smoke. In another instance some annoyance was caused to residents in the Capron Road area as a result of deposits from a chimney used in connection with a small smelting furnace at a nearby foundry.

In both cases advice was obtained and every endeavour made to overcome the difficulty.

8. Swimming Pools.

Seven samples of water were submitted for bacteriological examination. In two cases the result was unsatisfactory but in both instances the chlorine content was low. Repeat samples proved satisfactory.

9. Eradication of Bed Bugs.

Particulars of the action taken for the eradication of bed bugs is set out below :-

| | | | | 1953 |
|------------------------------|----|-------------|------|----------|
| (a) Number of Council Houses | 1. | Infested | | 1 |
| (1) 37 | 2. | Disinfested | | 1 |
| (b) Number of Other Houses | 1. | Infested | | nil |
| | 2. | Disinfested | | nil. |

10. Rodent Control.

During the year the requirements of the Ministry of Agriculture and Fisheries were fulfilled so as to qualify for grant aid. A total of 496 visits were made in the course of inspections and treatments for the destruction of the common rat and the house mouse. Some 133 properties were involved and of these 97 were found to be infested. All treatments were carried out by the staff of the department.

A large scale treatment at the sewage works seemed to be very successful. The numbers were not great but the infestation was

widely scattered.

The Corporation Refuse Tip was also treated to deal with

recurring infestations.

Treatment of the sewers began with a maintenance treatment made to complete the required activity within the financial year 1952-53. The Annual Test bait was carried out later in the year and this was successfully combined with another treatment. Infestations, however, were not heavy and the number of takes were comparatively small.

SECTION D :-

HOUSING.

(a) Unfit Properties and Repairs.

A considerable number of visits have now been made to the older properties in the town with a view to the preparation of the Proposals for dealing with unfit houses which are to be submitted to the Minister of Housing and Local Government before the end of August, 1955, as a result of the coming into force of the Housing, Repairs and Rents Act, 1954.

Since the last Report the twenty families who were housed in the Army Hutments at First Avenue which were regarded as unfit for habitation have been moved to other accommodation and the

Huts demolished.

Other unfit properties have been dealt with under the provisions of the Housing Act, 1936, and the Local Government (Miscellaneous Provisions) Act, 1953, resulting in the service of one Demolition Order and four Closing Orders. These Orders will remain in force until such time as it becomes possible to demolish the houses without injury to adjoining property or until adjoining houses can also be dealt with in a similar manner. One undertaking to recondition a house was accepted and the work has since been carried out. Notice of intention to consider Closing Orders or the future user of six other houses have also been served on interested persons.

Consideration is now being given to the best procedure to be adopted to deal with the unfit properties in the Chapel Walk and St. Mary's Street area immediately adjoining Ashton Street. Every endeavour is being made to commence procedure for clearance irrespective of the proposals mentioned above.

Suggestions for the improvement of the Ashton Street/West Street and Chews Almhouses have been submitted to the persons in charge. In the case of Chews Almshouses proposals have been submitted to the Charity Commissioners while the Trustees of the Ashton Almshouses Charity are endeavouring to obtain the release of the necessary Capital to carry out the work.

A small number of applications for Improvement Grants under the Housing Act, 1949, have been received but it is hoped that this provision may be used to a greater extent in dealing with some of the older type of property in the Borough.

(b) New Housing.

The number of new houses completed during 1953 was :-

(a) By the Council 138 (b) By Private Enterprise 43

The Council is now completing the development of the Brewers Hill Estate and has commenced the erection of houses on the Downside Estate. There is also much activity by private developers.

(c) Overcrowding and Re-housing.

While there are still a number of cases of overcrowding in the Borough there are not many of the really serious kind when judged on the Housing Acts standards. The kind of overcrowding now met is confined more to overcrowding in bedrooms rather than in houses themselves or as a result of the inconvenience due to occupation of houses by more than one family even though the number of inmates may be reasonably small.

The number of applicants on the Council Waiting List at the end of June, 1954, was :—

| Live List | | | | 280 |
|---------------|-----------|------|---|---------|
| Deferred List | | | * | 205 |
| Aged Persons | Dwellings | | | 91 |
| Total | | | | 576 |

SECTION E :-

INSPECTION AND SUPERVISION OF FOOD.

1. Milk Supply.

(a) Registration under Milk and Dairies Regulations, 1949.

The state of the registers at the end of the year was as follows :-

| Distribut | ors of | Milk | | 48 |
|-----------|--------|------|------|----|
| Dairies | | | | 9 |

Dealers' Licences authorising use of Special Designation :-

| (i.) | Pasteurised | | 11 |
|--------|----------------|-----|--------|
| (ii.) | Sterilised | | 31 |
| (iii.) | Tuberculin Tes | ted | 11 |

Supplementary Licences authorising use of Special Designations:—

| (i.) | Pasteurised | | 5 |
|--------|-----------------|-----|-------|
| (ii.) | Sterilised | | 1 |
| (iii.) | Tuberculin Test | ted | 3 |

(b) Inspections.

Ninety-one visits were made in connection with the inspection of dairies and thirty-eight were made in connection with sampling.

(c) Prosecutions.

One dairyman was prosecuted for unclean conditions in a dairy and for unsatisfactory storage of milk bottle caps and fines amounting to £10 were imposed.

(d) Sampling.

Thirty-six samples were submitted for examination. Eight samples failed to comply with the prescribed tests. The one sample so examined showed no evidence of tuberculosis or brucella abortus.

RECORD OF MILK SAMPLES TAKEN DURING 1953.

Ice-Cream Sampling.

Twenty-one samples were submitted for examination. Nine were graded as Grade I.; five as Grade II.; six as Grade III. and one as Grade IV.

Fourteen of the samples were submitted wrapped for sale. It is of interest to note that of these only four were graded as Grade I. and five as Grade II. while five of them fell into Grades III. and IV.

The suggested standard is that 50% of the samples for each individual manufacturer or retailer should fall into Grade I.; 80% into Grade II.; not more than 20% into Grade III. and none into Grade IV.

In each case where an unsatisfactory result was obtained repeat samples were taken and reference to the table (i.e., serial letter H) will show how a Grade III. result was followed by three Grade I. results from the same producer.

| C.1 | 7 | Present | Absent | _ |
| C.2 | 5 | Present | Absent | _ |

(e) Ice-Cream (Heat Treatment) Regulations, 1947/1952.

There are six registered manufacturers. A complete cold mix is used in every case.

2. Meat and Other Foods.

(a) Slaughterhouse.

The only Slaughterhouse in the Borough, which is privately owned, is of fairly modern construction and has been used to capacity by the Ministry of Food during the whole period of Meat Control.

With the removal of control early in July, 1954, consultations took place between Council Officials, Butchers and other interested persons to make arrangements to ensure that sufficient and suitable accommodation was available to meet local needs.

The present slaughterhouse was considered to be adequate. No difficulty has been experienced and it is being used by butchers

from outside as well as those inside the Borough.

The following table shows the number of animals killed and the percentage either wholly or partly condemned or some part of which was condemned.

The number of animals slaughtered increased from 6,738 in 1952 to 7,375 in 1953.

The number of cows slaughtered, compared with other cattle, dropped from 8.2% in 1952 to 6.1% in 1953 and it is interesting to note that the percentage of animals slaughtered and found to be affected with tuberculosis was lower in each class.

CARCASES INSPECTED AND CONDEMNED.

| | Cattle ex- cluding Cows | Corvs | Calves | Sheep and Lambs | Pigs |
|---|----------------------------------|----------------------|--------|-----------------------|-------|
| Number killed and inspected | 2,189 | 135 | 309 | 3,292 | 1,450 |
| All diseases except Tuberculosis Whole carcases condemned | 3 | beni vla vol. jak | | | 3 |
| Carcases of which some part or organ was condemned | 682 | 36 | | 78 | 96 |
| Percentage of the number in- spected affected with dis- ease other than Tuber- culosis | 31,29 | 26.66 | | 2,36 | 6,82 |
| Tuberculosis only Whole carcases condemned | 12 | 3 | 1 | _ | - yai |
| Carcases of which some part or organ was condemned | 177 | 25 | | 1 | 41 |

Tuberculosis in Calves.

One calf was discovered to be affected with congenital tuberculosis. Information was passed to the Animal Health Division of the Ministry of Agriculture and Fisheries.

Cysticercus Bovis.

No cases were discovered during the year.

Table showing monthly totals of animals slaughtered and inspected during 1953.

| Month | Cattle ex- cluding Cows | Cows | Calves | Sheep and Lambs | Pigs | Total |
|-----------|----------------------------------|------|--------|-----------------------|-------|-------|
| January | 109 | 7 | 27 | 135 | 69 | 347 |

Slaughter of Animals Act, 1933.

All licences to act as slaughtermen issued by the Council expired on the 31st December, 1953. Of the eight persons so licensed only five applied to have their licences renewed. There was also one application for a new licence.

The six slaughtermen now licensed operate within the Borough.

(b) Meat and Food other than in Slaughterhouse.

The number of visits paid to premises where food is prepared, stored or offered for sale was 865.

The following table shows the amount and variety of foodstuffs voluntarily surrendered by the owners and destroyed, or utilised for animal feeding stuffs, as being unfit for human consumption.

| A | rticle | | Tins, Packets or Jars | lbs. |

- (c) Prosecutions—Food not of the Nature, Substance or Quality Demanded.
 - (i.) Proceedings were instituted against a butcher under Section 3 of the Food and Drugs Act, 1938, in respect of the sale of a sausage containing tobacco and cigarette paper. A fine of £10 was imposed.
 - (ii.) A baker was prosecuted under Section 3 of the Food and Drugs Act, 1938, for selling an eccles cake containing a cigarette end. The Justices found the case against the baker proved, and gave him a conditional discharge, on payment of costs.

(d) Food Premises Generally.

(i.) The number and type of food premises in the Borough at the end of the year was:—

| Bakehouses | | | | | | 10 |
|---------------|---------|----------|--------|---------|----|----|
| Pastry Cooks | | | | | | 13 |
| Butchers | | | | | | 21 |
| Confectioners | 3 | | | | | 13 |
| Fish-shops (v | vet and | l fried) | | | | 10 |
| Greengrocers | | | | | | 14 |
| Grocers and | | al Provi | sion M | erchan | ts | 48 |
| Wholesale Gr | rocers | | | | | 1 |
| Hotels | | | | | | 5 |
| Public House | s | | | | | 29 |
| Restaurants, | Cafes a | and Fac | tory C | anteens | 3 | 29 |
| School Cante | | | | | | 7 |
| Slaughterhou | ses | | | | | 1 |

Reference to the Schedule of Work Done during the year will show that steady progress is still being maintained in improving the standard of food premises.

(ii.) Proceedings-Section 13 Food and Drugs Act, 1938.

Proceedings were instituted before the Justices against the Proprietress of a cafe and an employee as under :—

| Section | Offence | Result | | |
|------------|--|----------|-----------------------|--|
| 13 (1) (h) | Failure to observe cleanline room, utensils, etc | ess— | Employee fined £2 | |
| 13 (2) (b) | Permitting the above | | Proprietress fined £5 | |
| 13 (1) (g) | Failure to cleanse floor | | Proprietress fined £5 | |

(e) Byelaws-Handling, Wrapping and Delivery of Food.

Proceedings were instituted against a cafe proprietress and fines imposed as under.

| Byelaw | Offence | Result |
|--------|---|----------|
| 4 (a) | Failure to protect food against dust, dirt and | |
| | rodents | Fined £2 |
| 4 (c) | Failure to cleanse shelves, cupboards, in kitchen | Fined £2 |

(f) Registration Section 14, Food and Drugs Act, 1938.

The number and kind of food premises registered at the end of the year was :—

| Preparation of fried fish | | | 8 |
|-------------------------------|-------|------|----|
| Manufacture of sausages | | | 17 |
| Preparation of cooked meat | | | 9 |
| Manufacture of meat pies | | | 3 |
| Sale and manufacture of ice-o | cream | | 6 |
| Sale of ice-cream | | | 58 |

Three hundred and fifty-six visits were made in connection with these premises.

(g) Adulteration of Food.

No samples were submitted. The adulteration and standards provisions of the Food and Drugs, 1938, are administered by the Bedfordshire County Council.

- (h) Chemical and Bacteriological Examination of Food. No samples were submitted.
- (i) Food poisoning.

One case of food poisoning was reported during the year.

Rainfall.

The following figures of rainfall in the Borough over the last ten years are included in the Report for record purposes.

| Year | | | Inches |
|------|------|------|--------|
| 1944 | | | 20.68 |
| 1945 | | | 21.28 |
| 1946 | | | 27.99 |
| 1947 | | | 20.21 |
| 1948 | | | 25.60 |
| 1949 | | | 21.47 |
| 1950 | | | 30.63 |
| 1951 | | | 31.99 |
| 1952 | | | 27.39 |
| 1953 | | | 20.61 |
