Public Health Department, Yorkshire Penny Bank Buildings, Market Square, Retford.

August, 1949

To The Mayor, Aldermen and Councillors of The Borough of East Retford

LADIES AND GENTLEMEN,

I beg to present my report for the year 1948, on the Health Services and Health of the Borough.

The Registrar General's estimated population shows an increase of 420 on the 1947 figure.

Live Births show a decrease of 23 on the 1947 figure, this being a drop in the legitimate birth rate to 285 from the previous year's figure of 308, the number of illegitimate births remaining at 17.

The Stillbirth Rate for 1948 is half that for 1947, and the rate per thousand population is not markedly greater than that for England and Wales.

It is most gratifying to note that again there were no maternal deaths during the year.

The Infantile Mortality Rate for the year shows a great increase — the figure being 49.66 as compared to 33.84 for 1947. This great increase per thousand live births is accounted for by there having been 6 deaths due to prematurity, and it is not due to preventable infantile disease.

There has been an increase in the number of deaths from 183 to 203, and the death rate of 12.62 per thousand population is slightly above the average for England and Wales.

Deaths from Pulmonary Tuberculosis remain the same as in 1947, and deaths from other forms of Tuberculosis show a decrease from 4 to 2.

Deaths from Cancer show an increase from 29 to 35, and from heart disease from 32 to 44.

Deaths from Nephritis showed a considerable drop from 12 in 1947 to 2 in the year under review.

There were no cases of Diphtheria during the year, but one carrier was discovered and treated.

Immunisation against diphtheria is carried out at special sessions at the Maternity and Child Welfare Centre, and by General Practioners in the Borough. During the year 216 children were immunised including 36 children notified as being immunised by General Practitioners. In addition, 27 children have received boosting doses.

Since July 5th, 1948, diphtheria immunisation has been continued under Section 26 of the National Health Service Act, 1946, under the jurisdiction of the Nottinghamshire County Council.

The percentage of children immunised in the Borough under the age of 5 years was 47.56 and the percentage of children between the age of 5 and 15 years who were immunised was 100%.

The percentage of those immunised under the age of 5 years shows a considerable drop on last year. This may be due in part to busy practitioners failing to forward completed record cards to me, but the response of mothers to the continuing campaign for immunisation is poor and disquieting.

Diphtheria is a disease which can be stamped out in the community, but only if parents co-operate.

An outbreak of food poisoning due to Salmonella Typhimurium occurred in June/July. This was caused by the consumption of infected potted meat supplied by a manufacturing butcher. In the vast majority of cases, the infected material was consumed at a garden fete in the Rural District. The meat was infected by an employee who had himself suffered from diarrhoea. He had had it for some days prior to the outbreak but had not reported this to his employer, and had continued at work.

This outbreak stresses the importance of scrupulous cleanliness and particular attention to handwashing after attendance to toilet. It is most desirable that all employees in food-handling premises suffering from diarrhoea should report this to their employer immediately, and the diarrhoea should be investigated and treated before they again handle food for public consumption.

During the spring and summer of the year, there was a mild epidemic of Whooping Cough, rising to a peak in June, when 30 notifications were received followed by 20 in July, and 14 in August. Thereafter the outbreak practically ceased. Concurrently in the months of July and August, there was a marked increase in the number of cases of Measles in the Borough, but in September notifications were again low.

GENERAL PROVISION OF PUBLIC HEALTH SERVICES

Ambulance Services.

Until July 5th, 1948, infectious disease cases were admitted to the Isolation Hospital at North Carlton, whence they were transported by one of the ambulances maintained by the North Notts. Joint Hospital Board, at that Institution. Accident and illness cases, other than infectious diseases, were conveyed to hospital by ambulances maintained by the Retford and District Ambulance Association, or in the event of these not being available, by the ambulance maintained by the Borough Council.

Since the National Health Service Act was put into operation, however, the Notts. County Council have taken over the ambulance services, and they have appointed the Retford and District Ambulance Committee to act as agents in Retford.

Laboratory Service.

Specimens of milk, throat swabs, etc., and also samples of ice cream were sent for examination either to the City Laboratory, Nottingham, the Public Health Laboratory Service, Lincoln, the Ministry of Agriculture and Fisheries National Milk Testing Advisory Scheme, County Offices, Lincoln, or to the Public Analyst at Sheffield.

At the introduction of the National Health Service, the Laboratory Service at the City General Hospital, Sheffield, became available, and supplies of Vaccine Lymph and Diphtheria Prohphylactic, etc., are supplied from there on request.

Hospital and Nursing Services.

Until July 5th, 1948, Home Nursing was provided by the District Nurses maintained by the Retford Nursing Association, which relied for its existence on public subscription. As from this date, however, the service continued to operate under the jurisdiction of the Notts. County Council.

Tuberculosis.

The diagnosis, treatment, and after-care of cases of tuberculosis in the Borough is one of the public health services provided by the Notts. County Council. Tuberculosis Clinics are held at the Retford and District Hospital, every Tuesday between 2 p.m. and 4 p.m.

Venereal Disease.

The treatment of Venereal Disease was the responsibility of the Notts. County Council until the commencement of the National Health Service Act, 1946, when the service was handed over to the Sheffield Regional Hospital Board. Clinics are held as hereunder :—

V	Vest	Hill Drive
Tuesday		10.0 a.m. to 12.0 noon
Thursday		6.0 p.m. to 8 p.m.

Women . . Tuesday, Thursday, 4.0 p.m. to 6.0 p.m.

Scabies Order, 1941.

The above Order ceased to operate from the 31st December, 1947. Treatment has, however, been requested and carried out on forty patients during 1948. These patients are treated at the Cleansing Station, Brewery Lane, Retford.

MATERNITY AND CHILD WELFARE SERVICES

The Borough continued to act as the Welfare Authority until the 5th July, 1948, when the Maternity and Child Welfare Services were transferred to the Notts. County Council — the Clinic being then transferred to the Old Day Nursery, Market Square, Retford. Until that date, clinics were held as follows at the Wharf Road Centre :—

Mondays	Babies up to 2 years of age
TUESDAYS	Ante-natal and Post-natal cases
WEDNESDAYS	Babies up to 2 years of age
THURSDAYS	Children 2 to 5 years

The following summarises the work done at the Clinic during the period 1st January to 5th July, 1948 :---

Number of sessions held dur	ing the period und	ler review	N	102
Number of sessions attended	l by Medical Offic	er		41
Number of examinations ma	de (children)			157
Number of examinations ma	de (mothers)			258
Average number of childre	n and mothers e	xamined	per	
session				11
Number of visits paid by ch		:		
Under 1 year	2748			
1 to 5 years	3087	Total		5835

Number of individual Ante-natal cases who attended	 138
Number of individual Post-natal cases who attended	 1

Infant Foods and Vitamin Products were available for purchasing at cost price, and dental treatment for expectant and nursing mothers was also provided.

The Retford and District Cripples Guild Clinic held at the Retford and District Hospital, North Road, Retford, each Monday and Wednesday afternoon between 2 p.m. and 4 p.m., was available to children requiring Orthopaedic treatment, and the following are particulars of children who attended the clinic during 1948 :—

Number of children referred for t	reatmen	nt	 	. 28
Number of attendances made			 	272

Provision was also made for children under 5 years and expectant and nursing mothers to receive Ultra-Violet Ray treatment, and during the period under review, 4 children received treatment.

One Ophthalmic case was seen by the specialist at Sheffield.

One child was found to be suffering from enlarged Tonsils and Adenoids and was operated upon on the 6th November, 1948.

No cases were seen by the Obstetrical Specialist at Sheffield during this period.

Mothers who can, and wish to be confined at home, are attended by the County Midwives of which there are three resident in the Borough as follows :—

NURSE A. E. HARDY AND NURSE F. E. HARDY,

"Widdicombe," Welham Road, Retford.

'Phone Retford 51.

NURSE M. I. WHITTINGTON,

"Netherwood," Devonshire Road, Retford.

'Phone Retford 530.

Miss Watson continued during the year to fulfil the duties of Clinic Nurse and Health Visitor, and on the appointed day was transferred to the County Council staff.

During the period under review, she paid 720 visits to children under one year, and 857 visits to children between the age of 1 and 5 years, giving a total of 1577.

Home and Domestic Help Schemes.

Up to the 5th July, 1948, when the Notts. County Council took over this service, this matter was left in abeyance as no helpers could be found.

Care of Premature Infants' Scheme.

This scheme continued to function during the period under review, and 3 infants and mothers were admitted to the Kilton Hill Hospital, Worksop, for special care. On 3 occasions during the year the draughtproof cot and other special equipment which are available under the scheme, were in use in the Borough.

Care of Illegitimate Children Scheme.

During the period January 1st to July 5th, 1948, the home conditions of 4 cases in which Adoption Orders had been applied for, were investigated, and in all cases the order was granted. The Health Visitor carried out the necessary supervision of four children in Retford coming under the requirements of the Public Health Act, regarding Child Life Protection. On the 5th July, 1948, this service was also taken over by the Notts. County Council.

SCHOOL MEDICAL SERVICES

The Notts. County Council, being the Local Education Authority, are responsible for providing this service.

School Clinics are held in Chancery Lane on Monday, 9.30 a.m. to 12 noon, when a Medical Officer attached to the County School Medical Staff attends, and on Thursday from 9.30 a.m. to 12 noon.

Dental Clinics are held in the same building on Fridays from 9.30 a.m. to 12 noon, and from 2.0 p.m. to 4.30 p.m. also at other times when necessary.

SANITARY CIRCUMSTANCES OF THE AREA PUBLIC WATER SUPPLY

Retford Borough obtains its water from deep wells situated on land adjacent to Ordsall, Retford. No surface storage is available and continuous pumping is necessary.

Within the Borough, there are 6 houses which are not supplied with piped water, but which have stand-pipes. There is one farm drawing water from a private well, which source is not altogether satisfactory.

In all, 105 samples of water were sent for bacteriological examination during the year. Samples taken from private premises have shown unsatisfactory results from time to time which have, after further examination, proved to be caused by defective sanitary arrangements.

Particulars of samples taken are given hereunder :--

Corporation Swimming Bath.

During 1948, a sample of the Corporation Swimming Bath water was sent for bacteriological examination. This proved to be satisfactory.

The Sanitary Inspector submitted to me the following report for the year :---

BOROUGH OF EAST RETFORD

Report of the Sanitary Inspector for year 1948

To The Medical Officer of Health for the Borough of East Retford

Sir,

I have much pleasure in presenting to you my report upon the work done during 1948.

During the whole of the year I was without an assistant, but I did receive material assistance at the slaughterhouse from the Sanitary Inspector and the Assistant Sanitary Inspector of the East Retford Rural District Council.

111 Complaints were received and the premises visited, nuisances being found in 105 cases.

189 Informal notices requiring the abatement of nuisances were served and 32 statutory notices were served under the Public Health Act, 1936. In no case were legal proceedings instituted in order to enforce the conditions of the notice.

The number of defects which were remedied during the year as a result of notices served from this department was 378 and a summary giving full details of this will be found at the end of my report.

During 1948, the pressure upon builders had relaxed somewhat, and it was much easier to get building repairs carried out. Unfortunately, the cost of these repairs showed no sign of becoming less, and owing to the fixed rents, owners of properties which required considerable repair had difficulty in making their property a paying proposition. The demand for housing accommodation is as great as ever, and there is still some overcrowding in the town. 139 New houses were completed during 1948, 133 by the Corporation and 6 private houses, but in spite of this, the number of applicants for houses on the Corporation list at the end of the year was 659.

Vermin.

79 Houses in the Borough were disinfested with insecticides, after being found to be infested with various types of insects, principally beetles and ants. The insecticides used were D.D.T. and Gammexane in serveral proprietory forms, and the results obtained were excellent. In seven cases only were bugs found, and a thorough treatment with D.D.T. cleared up the trouble in every case.

The refuse tip was treated with Gammexane to reduce fly breeding, and D.D.T. was sprayed in solution on the walls and windows of premises to combat flies, after requests to do so had been received. If the public will co-operate by reporting insects pests to the department, I see no reason why certain household pests should not be exterminated entirely.

Common Lodging House.

There is one house with accommodation for 41 people registered in the town. 41 visits were made in 1948, and 2 notices were served for defects. The house was sprayed throughout three times in the summer against insect pests. The keeper reports to me when any inmate is found to be verminous, and he or she is de-loused at our cleansing station.

Rodent Control.

A Rodent Operative was empoyed on this work throughout the year on a part-time basis, the remainder of his time being occupied with other public health duties. A survey of the town was completed and rat infestation dealt with on an area basis. Individual complaints were also dealt with as received, and these methods appear to have been effective in keeping down the rat population.

FOOD INSPECTIONS

Meat.

During the year, the Ministry of Food was still responsible for the slaughter of all animals whose flesh is to be sold for human consumption. Two slaughterhouses are in regular use, one in Grove Lane and the other at the Cattle Market, Ordsall.

Figures comparing the number of animals slaughtered during the past seven years are as follows :—

	Cattle	Calves	Sheep	Pigs
1948	 2,738	1,333	6,938	182
1947	 2,896	805	8,458	91
1946	 3,395	1,209	11,198	180
1945	 3,503	759	10,152	335
1944	 3,132	718	11,628	369
1943	 2,905	559	16,431	385
1942	 3,038	593	13,794	343

All carcases and organs were inspected before removal, and I made 424 visits to the slaughterhouses for this purpose. The percentages of animals in which visible tuberculosis lesions were found remains very much the same as in the past, figures being :- 1941 1942 1943 1944 1945 1946 1947 1948 31.1 32.8 27.0 25.8 30.52 29.15 22.5 23.4 Cattle 8.06 11.1 8.8 13.23 Pigs 11.9 17.4 16.1 8.8 1.7 1.5 1.0 2.34 1.2 1.0 1.3 1.0 Calves

The total weight of meat regarded as unfit for human consumption in the past seven years is as follows :---

erre pere	 	
1948	 	 120,719 lbs.
1947	 	 126,317 lbs.
1946	 	 132,871 lbs.
1945	 	 119,110 lbs.
1944	 	 139,145 lbs.
1943	 	 165,120 lbs.
1942	 	 118,609 lbs.

Other Foods Condemned.

During 1948, 447 visits were made to markets and food shops, and I append below a list of foods condemned, mostly from decomposition, during the year :---

from decomposition	, during the	ycai	a lo vers
Imported beef	498 lbs.	Eggs	 442
Jam	37½ lbs.	Fish	 164 lbs
Farinoca		Bottled fruits	 2
Dried Egg		Processed Meats	 250 lbs
Mixed tin food	= 00	Meat pies	 80
Cheese		Sausages	 74 lbs
Marmite	4 11	Brawn	 6 lbs
	6 doz.	Bacon	 3 lbs
Corned Beef (6lb tin		Chocolate	 42 lbs
Barley	2 11-2	Beef	 72 lbs
Butter	4 1 11	Galantine of beef	 45 lbs
Tomatoes		Oats	 2 lbs
Sausage Meat		Cake	 3 ³ / ₄ lbs
Pickles			×
I TURICO	Juio		

Casi Relford Borough LIBRARY

The Secretary,

Ministry of Health,

Whitehall,

LONDON, S.W. 1.

26th October, 1949.

Dear Sir,

Ref. JT/II.

Annual Report for 1948

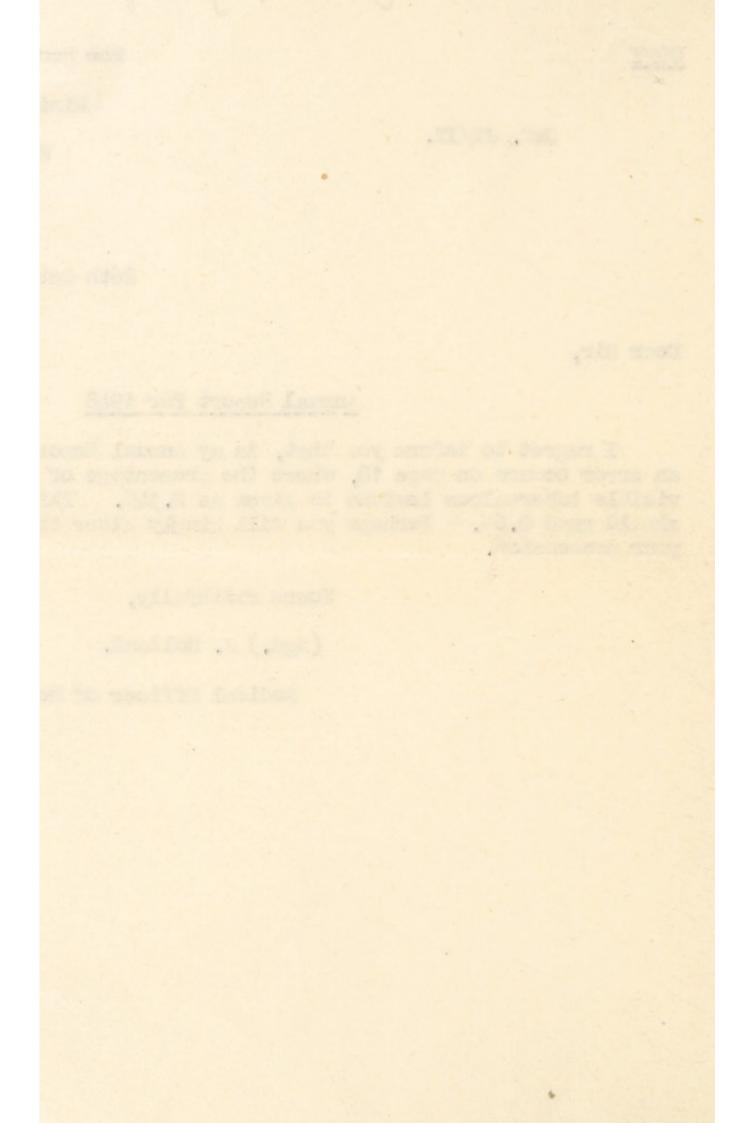

I regret to inform you that, in my Annual Report for 1948, an error occurs on mage 18, where the precentage of Calves with visible tuberculous lesions is given as 2.34%. This figure should read 0.6%. Perhaps you will kingly alter the copies in your possession.

Yours faithfully,

(Sgd.) J. Holland.

Medical Officer of Health.

COPY

As it is necessary for the Grocer to obtain my certificate in order to recover the points value of condemned goods, it may be taken that this list shows the exact amount of foods which were unfit for consumption.

During 1948, 10 notices were served upon the occupiers of food premises requiring alterations in order to make their premises comply with Sections 13 and 14 of the Food and Drugs Act. The food traders, taken as a whole, are keen to keep their premises in proper condition, and no serious difficulties arose during the course of the year.

Milk.

During the year, 163 visits were paid to cowsheds and dairies in the town. 4 notices were served for contraventions of the Milk Regulations, and these were remedied.

Registered Cowkeepers and Dairymen. 31 12 48 1 1 48 Premises in the Borough Cowkeeper retailers ... 10 10 . . 12 12 * Cowkeeper wholesalers . . 4 4 Retailers only . . No Premises in the Borough Retailers only 9 . .

* During the year, the use of one cowshed was discontinued, and one additional cowshed was registered.

The Borough Council issues a licence for the pasteurisation of milk, and also a licence for the bottling and sale of T.T. pasteurised milk. Samples of these milks were taken regularly throughout the year in order to be sure that they complied with the terms of the licence. 59 Samples of pasteurised milk, and 46 of T.T. pasteurised milk were taken during 1948. 3 Samples of pasteurised and 2 of T.T. pasteurised milk were found not to comply with the conditions of the licences. This matter was taken up immediately with the firm concerned, with satisfactory results. The percentage of milk which is sold loose from cans is now very small, and it is to be hoped that this unsatisfactory method of milk delivery will soon be a thing of the past. During the year, 33 samples of non-graded milk were taken by me and sent for the Resazurin Test. All were satisfactory.

Ice Cream.

During 1948 there were four firms manufacturing ice cream and ten premises where ice cream was sold. In all cases where ice cream was sold from shops, it was sold wrapped as received from the manufacturers. 26 Samples of ice cream were obtained and sent to the Public Analyst for examination. It is interesting to note the results obtained from the examination of ice cream samples during the past three years, which are as follows :—

Satisfactory Unsatisfactory	•••	1946 12 10	1947 14 9	1948 19 7
Totals		22	23	26

Bakehouses.

There are 9 bakehouses in the Borough, and 35 visits were paid to them during the year. In 3 cases notices were served requiring the remedy of defects. One building was regarded as generally below a satisfactory standard, and the occupant was asked to provide new premises. Negotiations for the new building were in progress at the end of the year.

F. R. SMITH,

Sanitary Inspector

HOUSING STATISTICS

Insp	pectio	on of dwelling-houses during the year :	
1.	(a)	Total number of dwelling-houses inspected for housing defects under the Public Health or Housing Acts	319
	(b)	Number of inspections made for the purpose	380
2.	(a)	Number of dwelling-houses (included under sub-head 1 above) which were inspected and recorded under the Housing Consolidated Regulations, 1925	3
	(b)	Number of inspections made for the purpose	7
3.	so c	mber of dwelling-houses found to be in a state langerous or injurious to health as to be unfit human habitation	3
4.	refe not	mber of dwelling-houses (exclusive of those rred to under the preceding sub-head) found to be in all respects reasonably for human hab-	180
	itati	on	100

2. Remedy of defects during the year without service of a formal notice :--Number of defective dwelling-houses rendered fit in consequence of informal action by the Local 169 Authority or their Officers 3. Action under Statutory Powers during the year :---(a) Proceedings under Sections 9, 10 and 16 of the Housing Act, 1936 :---(1) Number of dwelling-houses in respect of which notices were served requiring repairs ... Nil (2) Number of dwelling-houses which were rendered fit after service of formal notice . . Nil (i) by owners (ii) by Local Authority in default of owners ... 4 (b) Proceedings under the Public Health Acts :---(1) Number of dwellinghouses in respect of which notices were served requiring defects to be 29 remedied (2) Number of dwellinghouses in which defects were remedied after service of formal notice 53 (i) by owners ... (ii) by Local Authority in default of owners ... Nil (c) Proceedings under Sections 11 and 13 of the Housing Act, 1936 :--(1) Number of dwellinghouses in respect of which Demolition Orders were made Nil . . (2) Number of dwellinghouses demolished in

- pursuance of Demolition Orders ... Nil
 (d) Proceedings under Section 12 of the Housing Act, 1936 :--
 - (1) Number of separate tenements or underground rooms in respect of which Closing Orders were made Nil
 - (2) Number of separate tenements or underground rooms in respect of which Closing Orders were determined the tenement or room having been rendered fit Nil

At the end of this report are given tables showing the "Prevalence and Control over Infectious Diseases," "Infectious Diseases according to Age," "Infectious Diseases Notified Month by Month" and "Tuberculosis."

In conclusion, I wish to express my deep appreciation of the co-operation which I have received from other departments of the Corporation and to express my thanks to the members of the various Committees with whom I come into contact, for their help during the year. I wish particularly to say how greatly I have appreciated the assistance which I have obtained most freely from Mr. Smith, Sanitary Inspector, and to express my thanks to Miss Watson and the office staff for their co-operation and loyalty during the year.

I am,

Your obedient servant,

JOHN TOLLAND, Medical Officer of Health
