# ANNUAL REPORT

of the

PRINCIPAL SCHOOL MEDICAL OFFICER

for the year

# Digitized by the Internet Archive in 2017 with funding from Wellcome Library

https://archive.org/details/b29185233

#### GENERAL STATISTICS

Number of Schools - Primary Secondary Nursery Special	151 21 3 3
Number of Pupils - Primary Secondary Nursery Special (a) From the County	27,370 19,119 193 204 23
Total Fumber of pupils attending special schools in other Authorities	46,909

## MEDICAL INSPECTIONS

The number of pupils who received a full medical examination was 7,391 compared with 8,012 in 1972. In addition 5,261 pupils were screened but not examined. The details relating to these examinations are shown in the tables on page 14,

#### General Condition

The assessment of the general condition of all children examined at routine medical inspections is based on the individual opinion of each doctor. Medical Officers record the general condition of the children when examined as either 'satisfactory' or 'unsatisfactory'. The results over the last ten years are shown in the following table:-

Year	No. of pupils inspected		No. found in "unsatisfactory" condition	Percentage
1964	8,724		3	0.03
1965	8,298		2 004,50	0.03
1966	8,693		5 100,50	0.06
1967	7,416		55,740 1	0.01
1968	8,126	404	3 700,00	0.03
1969	7,949		1 325,13	0.01
1.970	7,939		60,941 _ 140,00	0.00
1.971	7,789		- 245, 17	0.00
1972	8,012		67,261 -	0.00
1973	7,391		76,770 -	0.00
28.0	606, 34, 1272		80,610	

#### WORK OF SCHOOL NURSES

The school nurses carried out regular routine health surveys in schools and paid follow-up visits where necessary. Their work also included attendance at routine and special examinations in schools, minor ailment clinics and home visits when required.

The following tables show the total number of visits, the number of children examined, and the number found infested:-

Visits to schools:	1972	1973
Number of routine health survey examination sessions	566	578
Number of health survey examinations carried out	76,770	80,610
Number of children found infested	513	398
Number of follow-up visits	65	72
Visits to homes: Number of homes visited	725	703
Number of children seen for:-		
Uncleanliness	534	599
Minor ailments	88	77
General condition	4	5
Other reasons	294	
sold a botton and a sold of the sold of th	920	983

The following table gives particulars of cleanliness inspections carried out over the last ten years:-

Year	Number of examinations	Number of children infested	School population	Percentage of school population infested
1964 1965 1966 1967 1968 1969 1970 1970 1971 1972 1973	62,466 62,091 55,740 60,607 61,236 60,941 71,245 67,261 76,770 80,610	567 415 427 404 277 372 533 427 513 398	33,899 34,618 35,390 36,839 38,214 39,739 41,195 43,003 44,485 46,909	1.7 1.2 1.09 1.72 0.94 1.3 0.99 1.15 0.85

Refraction clinics continued to be held regularly at Anlaby, Beverley, Fulford, Howden, Pocklington and occasionally at Market Weighton. A further clinic was opened at Heasle Health Centre in October.

and Ecverley Clinics and a School Medical Officer who has been specially trained in refraction work, staffs the clinics in the Howdenshire area.

the total number of children seen at the clinics was 547, and the prescriptions issued totalled 229 of which 120 were for complete spectacles.

In those areas of the County where it has not been possible to hold clinics children have continued to be referred to hospital consultants through their family doctors.

## EAR, NOSE AND THROAT DEFECTS AND

#### DEFECTIVE HEARING

Forty-nine children were found at routine and special medical examinations to be in need of treatment for defects of the ear, nose and throat. In addition 694 children were referred for observation.

Special audiometric sessions were held throughout the County and 3,210 children were examined by means of the pure tone audiometer. Forty-six cases in which some degree of deafness was discovered were referred to ear, nose and throat consultants through the family doctor.

A part-time teacher of the deaf is employed by the Authority to visit hearing impaired children in their homes in order to carry out assessment when necessary. In addition, parents of these children are instructed by this teacher in the techniques necessary to help their children so that maximum use can be made of the evaluable hearing. Where a hearing aid has been provided parents are instructed in its acc.

# MINOR AILMENTS

Almor ailment sessions are conducted by the school nurses who refer any case of a more serious nature to the child's family doctor or to the school medical officer.

the table overleaf shows the number of children who attended the minor ailment clinics and the various types of defects which were treated together with the number of children who received home visits by the school nurses.

	1972		1973		
	No. of children		No. of children		
Defects	attend- ing clinics	receiving home visits	attend- ing clinics	receiving home visits	
Ringworm (head) Ringworm (body)		Lonal Hospital		integer and and a second	
Scabics Encetigo	20	- 4 8	4 2 16	- 4 11	
Coher skin diseases Minor eye defects	44	12 14	186 32	8 22	
Nimor car defects and doufness Nimor injuries		6	37	Lonen - Martin	
bruises etc	385	9	283	- 1	
Totals	712	53	560	45	

The number of attendances for treatment of minor ailments was 1,147 compared with the previous year's figure of 1,570. In addition, school nurses made 77 home visits.

## CHIROPODY

In the Beverley area a chiropody service was provided for school children in the form of a weekly foot clinic held by one of the Authority's full-time chiropodists to which some 271 children made 560 visits for treatment. The chiropodist's services were required mainly for the treatment of verrucae.

## B.C.G. VACCINATION

R.C.G. vaccination against tuberculosis is available to school children over the age of 13 years and in certain instances it may be offered to children over 10 years of age. It is also available to students at universities and training colleges.

Vaccination was offered to 4,032 children of whom 3,971 (i.e. 96.2%) accepted. A total of 3,902 children were skin tested and of these 3,491 (i.e. 89.4%) showed a magative result and, therefore, required vaccination. Arrangements were made as far as possible for all children who had a positive skin test to be x-rayed and for this facility to be extended to the members of their families.

The table overleaf gives the details of the B.C.G. vaccinations carried out during the last ten years.

	o. of School hildren skin tested	Positive reactors	Negative reactors	Number vaccinated
1964	2,276	368 (16.2%)	1,839	1,838
1965	2,272	490 (21.6%)	1,741	1,726
1966	2,705	488 (18.0%)	2,151	2,137
1967	1,874	260 (13.8%)	1,581	1,573
1968	2,891	308 (10.7%)	2,486	2,444
1969	1,831	86 (4.7%)	1,694	1,683
1970	2,119	258 (12.2%)	1,828	1,806
1971	1,642	339 (20.6%)	1,298	1,298
1972	5,114	814 (15.9%)	4,300	4,247
1973	3,902	411 (10.5%)	3,491	3,042

#### SPEECH THERAPY

The appointment of one part-time and two full-time speech therapists towards the end of the year completed the establishment. The additional staff enabled a service to be provided in all areas of the County and the number of children who received treatment is shown in the following table.

There was a noticeable increase in the number of children with language problems referred for speech therapy, and treatment of these cases exceeded the number of children who were treated for simple speech defects.

Type of Speech	No. of children receiving treatment at end of year			No. of children whose treatment was completed		
Defect	1971	1972	1973	1971	1972	1973
Articulation defects Delayed speech Dysphasia Voice disorder Cleft palate Cerebral palsy Stammer Other defects	56 73 9 1 6 - 13 7	120 106 8 - 3 4 14 -	171 129 8 1 3 6 26 1	120 83 2 3 2 3 22 9	149 147 5 3 2 - 28 16	151 107 3 2 1 3 18 16
Totals	165	255	345	244	350	301

## PROVISION . OF MILK AND MEALS

The number of children receiving free school milk was 8838 which was 94% of those eligible.

The School Meals Service continued to expand and at the end of 1973, 28,842 meals were being supplied to children, a percentage of 67.78 compared with 64.50 at the end of 1972.

## REPORT OF THE PRINCIPAL SCHOOL

#### DENTAL OFFICER

6 -

This is a year in which the Dental Service maintained its position. The staff, despite the uncertainties of the future reorganisation of the Health Service, have carried out a fair amount of work. The Health Centre in Beverley was due to be in operation in the early part of 1974, but delay was experienced with the Bridlington Health Centre and commencement of building was not likely until 1974. A visit from Mr. Potter of the Department of Education and Science proved to be of value. It may be appropriate to add that the dental problems raised at these meetings with Mr. Potter have invariably been clarified with resulting benefit to the service.

#### Dental Health

While visits to primary schools remain part of the yearly programme, more time was spent by the Hygienist on practical work. This work was aimed at the prevention of caries and involved the topical application of fluoride. A new technique involving a fissure sealant has been introduced and has been in regular use. The sealant protects the biting surfaces of the teeth and it is hoped that the benefits to be obtained from this method of prevention will be apparent.

#### Dental Inspection and Treatment

Compared with the returns for 1972, the number of pupils inspected dropped from 39,343 to 34,085 with a corresponding drop in the numbers requiring treatment. The percentage number of those requiring treatment remained very similar.

A slight reduction in the number of sessions worked because of staff changes has brought about a drop in the figures for the various items of treatment. The number of fillings has fallen but the number of extractions has remained the same. Under these conditions, it is unfortunate that a corresponding drop in the number of extractions was not recorded. It is sad to find an increase of 112 emergency patients A similar number of orthodontic cases was undertaken but 11 fewer crowns were placed in position. The Dental Officers administered an additional 21 general anaesthetics. It is interesting to find that despite the drop in the number of children inspected, approximately 750 more children completed a course of treatment.

As this is the last report to be prepared under the aegis of the local authority, a resume of developments during my ten years of office may be of interest.

Two clinics have been added to the original four and all have been modernly equipped. Two Health Centres have been completed with a third due for opening in 1974. The number of mobile dental clinics has been increased to seven and a more thorough coverage for dental treatment has, therefore, been achieved. A well staffed service has resulted in all school children being regularly inspected and any necessary treatment carried out.

The Dental Health Education programme has become established and recognised by head teachers as making a notable contribution to the dental health of children. It is to be hoped that there will be no deterioration in this aspect of the dental service under the reorganisation proposals but that a furtherance of the aims of prevention will be envisaged.

The development of the Service could not have been achieved without the continuous support of the Medical Officers of Health, the co-operation from head teachers and the Education Department, the ready help from the Surveyor's Department in conjunction with the Architect's Department in dealing with the requirements for mobile clinics, on all occasions. At a time when rewards in private practice have been high, much credit must be given to the dental staff for remaining with the Service and producing such excellent work throughout the years. During the year the long awaited appointment of Dr. Doughty, Consultant Child Psychiatrist, to the area increased the number of psychiatric sessions threefold. The additional time has been a great boon to the work of the clinic but, unfortunately the increased demand from referrals still leaves a waiting list, which grows rather than diminishes.

Miss P. C. West, a social worker, left during the year to take up an appointment with Dr. Barnardo's. It has not been possible to replace her.

Peripheral clinics have continued to operate, though it was necessary to close the Hessle Clinic, shortly after its inception, because of Miss West's departure.

Good relationships have been maintained with the hospital units for children and adolescents, and it is hoped that this can be used as a basis for continuing co-operation over the period of re-organisation.

A total of 213 cases were referred for child guidance, these being mainly from medical and educational sources. Four hundred and thirty-three clinic sessions were held. The Educational Psychologists and the Social Workers also made 583 visits to schools and 342 home visits. Of the 213 children referred 104 attended the various clinics regularly for treatment. One hundred and forty-four cases were closed, and a summary of these cases is given below. At the end of the year 48 children were attending clinics for treatment and 51 cases were on the waiting list.

The following table is a summary of the main types of cases examined by the clinic staff:-

Habit disorders	16
Nervous disorders	18
Behaviour disorders	172
Educational problems	7

Total ..... 213

Cases seen at the clinic for the first time were, after diagnosis, placed into the following broad categories according to the type of problem and further clinic work that they would require:-

Clinic	School	Home	Not
Advisory	Advisory	Advisory	followed up
130		10	33

## Summary of cases closed

Improved or completed (advice or treatment)	144
Placement (Special School, Children's Homes etc	4
Not followed up (lack of co-operation, parents refused treatment, etc.)	33
Transfer to other areas or agency	23
Total	204

## HANDICAPPED PUPILS

The total number of children ascertained as handicapped during 1973 was 86 and the following table shows the various categories in which they were placed together with the recommendations for their education:-

Category	Recommended for education in special schools	Recommended for education in prim./sec. schools
Blind Partially sighted Deaf	- 1 1	d melde - 13. for See
Partially Hearing Educationally Sub-normal Epileptic	39	23* 2
Maladjusted Physically Handicapped Delicate Speech	5 3 2 -	- 5 5 -
Totals	51	35

\*Included in this figure are 17 children who were recommended for admission to special classes for educationally sub-normal children.

## SPECIAL ASCERTAINMENT EXAMINATIONS

1.44

During the year 73 children were specially examined and results of these examinations are shown in the following table:-

Recommended for admission to a special school for		
educationally subnormal children	39	
Recommended for admission to day special classes	17	
Recommended to remain at ordinary school	6	
Recommended for remedial teaching	2	
Not educationally sub-normal	7

## PHYSICAL EDUCATION

In the past year several new primary schools were built and the standards of physical education improved due to the provision of indoor facilities. We have been fortunate in having a full complement of teachers. This has been especially beneficial in the secondary schools where teachers had to cope with the increased number of pupils caused by the raising of the school leaving age.

The facilities offered by the Haltemprice Sports Centre, the Bridlington U.D.C. Sports Hall and the Hornsea Sports Centre will help to widen the school programme in physical education and will also provide a long-felt need for youth clubs and the general public.

A new swimming pool was opened at Howden School and this provided excellent provision for school, youth and adult swimming. Late in the swimming season, Barlby School pool was also opened and Filey School has a covered pool in the process of building.

#### HYGIENE IN SCHOOL PREMISES

Fifty-nine reports on the sanitary conditions at schools have been made by the Medical Officers and any defects have been brought to the notice of the Chief Education Officer.

> MEDICAL EXAMINATION OF CANDIDATES FOR ADMISSION TO TRAINING COLLEGES, ETC.

A total of 382 candidates for admission to training colleges and 29 entrants to the teaching profession were examined by the medical staff of the School Health Service.

> CO-OPERATION WITH TEACHERS, SCHOOL WELFARE OFFICERS AND VOLUNTARY BODIES

As in past years, the co-operation of school staffs has been invaluable in dealing with the clerical work in connection with medical and dental inspections. For this assistance and for that given by the school welfare officers, I would like to record my appreciation.

# - 13 -CLINICS

At the end of the year the following clinics were being held :-

	Type of Clinic	Location	Frequency of sessions
A	Minor Ailment and other non-specialist examinations and treatment	Anlaby Clinic Beverley, Coltman Avenue Clinic Beverley School Clinic, Lord Roberts Road Beverley, Longcroft School Bridlington, Oxford Street Clinic Cottingham Clinic Etton Pasture (E.S.N.) School Hornsea School South Holderness School Thorngumbald Clinic Withernsea Clinic	Health Visitors use most of the premises mentioned in the previous column as their offices and they are available for about one hour each week-day for the treatment of minor ailments
