FAREHAM URBAN DISTRICT COUNCIL.
R E P O R T
of the
M E D I C A L O F F I C E R O F
H E A L T H.
1945.

-----000-----

URBAN DISTRICT COUNCIL OF FAREHAM.

To

The Chairman and Members of the
Fareham Urban District Council.

Ladies and Gentlemen,

I have the honour to submit the Annual Report upon the health of the District, and the work of the Public Health Department for the year 1945.

The Registrar General's estimate of the population is 36,940.

The Birth Rate is 19.9 per 1,000 compared with 16.1 for England and Wales.

The Death Rate is 11.5 per 1,000 compared with 11.4 for England and Wales.

The Birth Rate continues to be higher than the General Rate for England and Wales. The Death Rate is slightly higher, this is due largely to an increase in death from Tuberculosis and Cancer.

The Infant Mortality Rate is 33.8 per 1,000 live births compared with 46.0 for England and Wales.

The general health of the district is satisfactory.

I have the honour to be
Ladies and Gentlemen,

Your obedient Servant,

G. HARLEY ROSS.

Medical Officer of Health.

SECTION B. - GENERAL PROVISIONS OF HEALTH SERVICES FOR THE AREA.

Public Health Officers:-

G. Harley Ross. M.B., Ch.B., B.A.O., B.A., Medical Officer of Health.
R.J. Baker, M.R. SAN. I., Sanitary Inspector.
Miss J.A. Reid, Clerk, and Miss B. Wallbridge, Typist.

Laboratory Facilities.- The Hampshire County Council provide full facilities for Chemical and Bacteriological Examinations. Also the services of the Public Health Emergency Laboratory are available for Bacteriological Examinations.

Ambulance Facilities.

General and Accident Cases:- During the year, the Council took over the control and direction of the Ambulance Service. New headquarters are being prepared at The Tannery, Fareham. It is a twenty four hour service. Four full time drivers and two attendants are employed. The two Ambulances are on loan from the Order of St. John and the British Red Cross Society. There is also a car for sitting cases.

Telephone 2884 (Police). Arrangements are being made for direct connection to the Tannery. Telephone 2170.

Infectious Diseases.- The Fareham Urban District Council provide an Ambulance for removal of Infectious cases.

Nursing in the Home. - Training and provision of District Nurses and Midwives is supervised by the Hampshire County Nursing Association, 81, North Wall, Winchester, Telephone. Winchester 1502.

HOSPITALS.

Infectious Diseases.

Infectious Diseases Hospital is situated in the Fareham West Ward and is the property of the Council. Cases are received from Fareham and part of Drexford Rural District. As there is limited accommodation arrangements are made as required for treating surgical and other cases at other infectious diseases hospitals.

Tuberculosis.- Sanatorium treatment is provided by the County Council at Chandlers Ford and Bishopstoke.

Small Pox. - Accommodation for these cases is provided by the County Council.

General Hospitals. - There are none within the boundaries of the Urban District. The hospitals at Southampton, Portsmouth and Winchester are available. Necessitous cases are accommodated through the Public Assistance Committee.

Maternity.- At present, patients requiring hospital treatment go to St. Mary's Hospital, Portsmouth.

SECTION C. - SANITARY CIRCUMSTANCES OF THE AREA.

WATER SUPPLY.

- (1) The Water Supply of the area has been satisfactory.
(a) in quality, and (b) in quantity.

The District is supplied with water from the following sources:-

1.	Fareham Waterworks.	-	Houses supplied	4,719
2.	Portsmouth Water Co.	-	" "	2,821
3.	Southampton Corporation.	-	" "	1,953
4.	Gosport Water Co.	-	" "	760
				<u>10,253</u>

Fareham Waterworks are the property of the Fareham Urban District Council, and supply all the properties in the East and West Wards, except for a few houses, which are, for convenience, supplied by the Gosport Water Company. The water is chlorinated. Chlorine (parts per 100,000) varies from 1.2 to 2.6. Monthly Chemical and Bacteriological reports have been received, no coliform bacilli are present in the water. These reports refer to water going into supply. The raw water has been analysed and found to be satisfactory. There are a few cases where one stand pipe is common to a number of houses. The approximate number of stand pipes is 6. This water is not liable to have plumbo - solvent action. The population supplied is approximately 16,500.

Portsmouth Water Company supply water to the Portchester Ward. The supply is satisfactory both in quality and in quantity. Practically all houses have a piped supply except in the case of a few isolated premises. There are no stand - pipes for the supply of houses in Portchester. Treatment of the water consists of (a) Simple chlorination at the source. (b) Slow sand filtration prior to entering main Reservoirs. (c) Re-chlorination on leaving the Reservoirs when ammonia is added in order to ensure a free chlorine reaction throughout the distribution system.

Bacteriological examinations are made at fortnightly intervals, both with raw water and with the water as distributed. All reports of analysis have been satisfactory during the year.

The water is not liable to Plumbo - solvent action, the population supplied is approximately 10,000.

Gosport Waterworks Company supply the Crofton Ward. Periodical samples are taken of raw water, particularly following heavy rainfall. The water is chlorinated continuously at all pumping stations, and hourly residual tests made and recorded. All reports of analysis have been satisfactory during the year.

Chemical analysis shows the water neutral on reactions, and free from metals. The water is hard in character though not to an abnormal degree, it contains no excess of saline or mineral matter in solution. B. Coli is present in the raw water but none are found in distributed water. There is no plumbo - solvent action. The population supplied is approximately 2,000. No houses are supplied by stand pipes.

The Journal of the American Medical Association is published weekly, except on Sundays and public holidays, and is sent to subscribers by mail. It is published by the American Medical Association, 535 North Dearborn Street, Chicago, Ill. 60610.

Southampton Corporation Waterworks supply Sarisbury, Titchfield and Warsash Wards. The Supply has been satisfactory in quantity and in quality. Bacteriological examinations are made of raw water every fortnight, and of treated water every week. No faecal organisms were present in the sample of treated water examined.

All the water supplied in Fareham Urban District is sterilized by means of the "Chloramine" treatment (Chlorine and Ammonia) before distribution, and the water supplied from the River Itchen is subjected to a process of sedimentation followed by filtration through rapid gravity sand filters. Chemical analysis show the water neutral in reaction and free from metals. The water is hard but not abnormally so. No excess of saline or mineral matter in solution, absence of nitrites. Free chlorine 0.035 to Nil (in parts per 100,000). These results were obtained from samples which had already been treated by the addition of ammonia and chlorine. The water is free from Plumbo - solvent action, none of the houses are supplied from stand - pipes. The population supplied is approximately 7,000.

Some houses in the Sarisbury, Titchfield and Warsash Wards have not yet been connected to the Southampton Corporation mains. There are still a number of shallow wells in use in these Wards. Samples are taken from all shallow wells and where found necessary appropriate action is taken under the Public Health Act, to provide water from the mains. A scheme has been approved by the Council for the extension of mains in those roads where shallow wells are in use.

Hook Village. This small community of 10 houses has not yet been connected to the Southampton water main. It is supplied from a spring close to the Village by pipes to a covered tank with a pump. At present this water is satisfactory. Regular bacteriological examinations of this water are made.

The Warsash Church of England School has no proper water supply. The water required by the school is drawn from a neighbouring well. This state of affairs is unsatisfactory. An offer to the Controlling Authority by the Fareham Urban District Council of 50% of the cost of extending the water main to this school has been made, but no reply has been received. Hook Village and the Warsash Church of England School are included in the scheme for extension of water mains.

DRAINAGE AND SEWERAGE.

Fareham.- The Sewage Disposal works appeared to be working satisfactory - no complaints re any nuisances were received during the year.

Practically the whole of the Fareham East and West Wards are sewered.

Crofton and Portchester.- A large amount of sewers were laid in these wards just prior to the outbreak of hostilities. There are still some portions which require sewers, and the Council's consulting engineer's have prepared a scheme for the laying of additional sewers.

The sewage from these two wards, to-gether with that from Titchfield is pumped to the main disposal works at Fareham for treatment.

Efforts are being made to eliminate cesspools where sewers are available.

Salisbury, Warsash and part of Titchfield Wards.- These are at present without any main drainage system. Instructions have been given to the Council's consulting Engineers to prepare a report upon the drainage of these areas. The preliminary surveys have been made.

Public Cleansing.- In the Fareham and Crofton wards, the work is done by direct labour, two S. D. Freighters being employed and lorries for any additional collections.

This system appears to be working satisfactorily, very few complaints being received.

In the other wards the work is done by contract.

The Council should now consider obtaining additional S. D. Freighters so that all refuse collection in the district can be carried out by the Council.

Cesspit Emptying.- This work is done by direct labour - three S. D. Freighters being employed.

It was found extremely difficult to deal adequately with the number of cesspits owing to breakdown of vehicles and sickness amongst the men - consequently complaints were made of non-emptying of cesspits.

From time to time Contractors were engaged to assist with the work. At times during the year, especially after considerable rainfall, conditions for cleansing cesspits are not satisfactory. It would appear that additional freighters are required during these periods.

Section 1. The Bureau of the Army is established by the President of the United States, and shall be composed of the following members:

Section 2. The Bureau of the Army shall be organized and its duties shall be defined by the President of the United States.

INSPECTION OF FOOD:-

The following are details of foodstuffs examined and condemned during the year.

MEAT.

Tins.	112
Sauce Powders.	10 pkts.
Oxo Cubes.	116
Meat Pies.	26
Sausage Meat.	220 lbs.
Beef Suet.	84 lbs.
Bacon.	30 lbs.
Beef. English.	160 lbs.
Beef. Imported.	389½ lbs.

FISH.

Tins.	301
Fish Paste.	36 jars.
Fish.	2 stone.
Bream Filletts.	6 stone.
Cod Filletts.	3½ stone.
Skate.	2½ stone.

PRESERVES.

Jam. Tins.	28
Syrup. Tins.	6
Sultanas.	43¾ lbs.
Dates.	68½ lbs.
Dried Peaches.	12 lbs.
Dried Fruit.	8 lbs.
Apple Rings.	14 lbs.
Sugar.	2 cwt. 79 lbs.
Pickles.	2¾ galls.
Pickles.	6 x 12 ozs.

MILKS, etc.

Tins.	385
Butter.	33 lbs.
Margarine.	20 lbs.
Lard.	56 lbs.
Cheese.	38 lbs.
Semolina.	73 lbs. 38 pkts.

CEREALS.

Pearl Barley.	103 lbs.
Rolled Oats.	22 cwt. 59 lbs.
Quaker Wheat Flakes	13 pkts.
Rice and Oats.	10 lbs.
Rice.	95 lbs.
Flour.	175 lbs.
Soya Flour.	15 lbs.

OTHER FOODS.

Cake.	63 lbs.
Tea.	13½ lbs.
Chocolate & Cream	
Rolls.	1 pkt of 2 doz.
Cheese and Biscuits	12 cartons.
Biscuits.	11 lbs. 70 tins.
Iron Rations.	624 x 6 oz pkts.
Mustard.	25 lbs.

RATS & MICE DESTRUCTION ACT. 1919. THE INFESTATION ORDER. 1943.

The work during the year has been very satisfactory. The following is a summary of work done:-

Inspections.

Primary.	971
Re-inspections	365
Visits for poisoning.	323
Total Inspections.	1,659

Infestations Found.

Major.	26
Minor.	251
Total Infestations.	277

Disinfestations carried out.

By Rodent Officer.	
By Occupiers.	
Other Authorities.

R.J.Baker, Cert.S.I., M.R., San.I.,

Chief Sanitary Inspector.

Report re Factories and Workshops.

1. Inspections for purposes of provisions as to health including inspections made by Sanitary Inspector.

Premises. (1)	Inspections. (2)	Written Notices. (3)
Factories with mechanical power.	33	5
Factories without mechanical power.	24	3
	57	8

2. Defects Found.

Particulars. (1)	Number of Defects.	
	Found. (2)	Remedied. (3)
Want of Cleanliness (S.1.)	1	1
Overcrowding. (S.2.)	-	-
Unreasonable temperature (S.3.)	-	-
Inadequate ventilation (S.4.)	-	-
Ineffective drainage of floors (S.6.)	-	-
Sanitary Conveniences (S.7.)		
Insufficient.	2	1
Unsuitable or defective.	2	2
Not separate for sexes.	1	1
Other offences.	2	2
	8	7

Smoke Abatement.

Two complaints of nuisance arising from smoke were received during the year. Investigations were made and the conditions were attributed to the quality of fuel used. Efforts were made for a better quality coal to be supplied without success.

Swimming Baths and Pools.

There are no such Baths open to the public within the area.

Eradication of Bed Bugs.

Methods employed for freeing infested houses from bed bugs -
Zaldecide Spray. No action was found necessary to deal with verminous belongings.

Schools. No change.

SECTION D. - HOUSING.

Housing Statistics (Public Health).

1. Inspection of Dwelling-houses during the year.
 - (1) (a) Total number of dwelling-houses inspected for housing defects (under Public Health or Housing Acts.) 534
 - (b) Number of inspections made for the purpose. 927
2. Remedy of Defects during the year without service of formal notices.

Number of defective dwelling-houses rendered fit in consequence of informal action by the Local Authority or their officers. 238
3. Action under Statutory Powers during the year.
 - A. Proceedings under Sections 9, 10, and 16 of the Housing Act, 1936. Nil
 - B. Proceedings under Public Health Acts:
 - (1) Number of dwelling-houses in respect of which notices were served requiring defects to be remedied. 23
 - (2) Number of dwelling-houses in which defects were remedied after service of formal notices.
 - (a) By Owners. 17
 - (b) By Local Authority in default of owners. 0
 - C. Proceedings under Sections 11 and 13 of the Housing Act, 1936. Nil
 - D. Proceedings under Section 12 of the Housing Act, 1936. Nil

Housing Act, 1936 - Part IV - Overcrowding.

Overcrowding unavoidably exists, but under existing circumstances no statutory action is taken. Cases of overcrowding are referred to The Clerk to the Council.

General Remarks.

No change from 1944.

SECTION E. - INSPECTION AND SUPERVISION OF FOOD.

Milk Supply.- There are 44 dairy farms, and 9 milk shops and stores in the District, also 13 retail purveyors of milk, 3 of whom supply milk from premises outside the District. The majority of the cowsheds are satisfactory.

Milk (Special Designation) Order, 1936.

The following Licences were issued during the year:-

Pasteurizers Licence.	2.
Supplementary Licences.	
Tuberculin Tested.	5.
Pasteurised.	2.

ARTICLE I. - GENERAL PRINCIPLES

1. The purpose of this Act is to provide for the establishment of a system of public health services in the State of New York.

2. The scope of this Act shall be limited to the establishment of a system of public health services in the State of New York.

3. The system of public health services shall be established in accordance with the provisions of this Act.

4. The system of public health services shall be established in accordance with the provisions of this Act.

5. The system of public health services shall be established in accordance with the provisions of this Act.

6. The system of public health services shall be established in accordance with the provisions of this Act.

7. The system of public health services shall be established in accordance with the provisions of this Act.

8. The system of public health services shall be established in accordance with the provisions of this Act.

9. The system of public health services shall be established in accordance with the provisions of this Act.

10. The system of public health services shall be established in accordance with the provisions of this Act.

11. The system of public health services shall be established in accordance with the provisions of this Act.

12. The system of public health services shall be established in accordance with the provisions of this Act.

13. The system of public health services shall be established in accordance with the provisions of this Act.

Milk (Special Designation) Regulation, 1941.

169 samples of Pasteurised and Heat Treated Milk were taken during the year. 9 samples were unsatisfactory.

Samples of milk were also taken from retailers supplying milk from outside the district, also clean bottles were obtained and tested for efficiency of sterilization. All samples were satisfactory.

Meat and other Foods.- Shops were visited as required.

Bakehouses.- Bakehouses continue to be kept in a clean and satisfactory condition.

SECTION F. - PREVALENCE OF AND CONTROL OVER INFECTIOUS AND OTHER DISEASES.

Diphtheria.- Two cases occurred during the year. One aged 5, and the other 20. Neither had been immunised. Both recovered. The boy aged 5 had only recently come into this district.

Scarlet Fever.- There were 79 cases. No deaths.

Corobro Spinal Meningitis.- One case was notified and died in hospital.

Malaria.- 3 cases were notified. All the cases were returned service men.

Measles.- 534 cases were notified. One death.

Whooping Cough.- 100 cases were notified. One death.

Scabies.- These cases continue to occur. Domicillary visits are made when cases are reported. The method of treatment by the issue of Lotion appears to be satisfactory. Lotion (cost price 1/3) is issued by the Public Health Department, 19, Portland Chambers, Fareham, and by Councillor Brown, 106, Edward Grove, Portchester. The number of bottles of Lotion issued during 1945 was 256 compared with 233 for 1944. Lotion is issued free of charge in necessitous cases.

Immunisation against Diphtheria.- Monthly clinics have been held in Fareham, Portchester, Crofton, Titchfield, Sarisbury and Warsash.

Parents are becoming more willing to submit their children to immunisation, the numbers have increased during the year. This no doubt, is in part due to the publicity measures taken in the district.

The material used for Immunisation is Alum Precipitated Toxoid (Burroughs Wellcome & Co.), obtained free of charge from the Emergency Laboratory, Winchester. Two doses are given by injections at an interval of one month between doses. Re-inoculation five years after immunisation is advisable.

There were no deaths through diphtheria in the district. The district is well protected by immunisation.

Publicity - by advertisement in local press and by Posters issued by the Central Council for Health Education, - and by Health Visitors who issue special Diphtheria Cards to parents of young children, and also special Diphtheria Birthday cards to mothers of children under 1 year.

Clinic in Fareham.

At present the Methodist Hall is used when available. This Hall is in constant use for Medical and Surgical Clinics. There is need in Fareham for a building for these clinics.
