URBAN DISTRICT COUNCIL OF FAREHAM

TELEPHONE :
Fareham 2431

Public Health Department,
130 West Street,
Fareham, Hants.

June, 1972

TO THE CHAIRMAN AND COUNCILLORS OF THE URBAN DISTRICT COUNCIL
OF FAREHAM

Mr. Chairman, Ladies and Gentlemen,

I have the honour to submit the Annual Report of the Public Health Department for 1971.

The upward trend in population continued and the Registrar General's estimated population 83,570 showed an increase of 1,570. The Census taken in April, 1971 gave a figure of 80,296 which showed an increase of 21,988 since 1961. The natural increase or excess of births over deaths for 1971 was 645. The number of births registered 1,359 gave a birth rate of 16.3 per 1,000 population and was higher than that of 16.0 per 1,000 for England and Wales.

The crude death rate of 8.5 per 1,000 population was a remarkably low one and compared very favourably with that of 11.6 per 1,000 population for England and Wales. The infant mortality rate of 13.0 per 1,000 live births was lower than the figure of 18.0 per 1,000 live births for England and Wales. Diseases of the heart and blood vessels were responsible for 372 deaths and 174 were due to coronary disease, malignant diseases caused 162 deaths which include the unnecessarily large number of 44 deaths from cancer of the lung and bronchus.

We live in an era of change and in 1971 we saw the creation of a County Department of Social Services. This new department took over the administration of the former Welfare, Mental Health, Home Help and the Children's Department Services. Still greater changes will come in 1974 with the Reform of both the Local Government and the National Health Services. More centralisation will inevitably result and the services provided will become more impersonal.

Owing to the drainage difficulties the ban on housing development continues throughout the whole district. This has led to an increased demand for any available accommodation in Fareham. Housing the older citizens has been helped by the construction of council flats for them and the appointment of a warden for every group of thirty six flats is a welcome move.

Control of infectious diseases is an important part of the Health Departments work. The incidence of cholera in Spain during the Summer led to our interviewing the people who had been on holiday there. Persons who did not possess valid international certificates of vaccination against cholera required surveillance. In all 54 people were involved but none developed cholera.

Inspection of the sanitation in Schools which had been carried out in 1968 was repeated during the Autumn of 1971. The increase in school population and the addition of temporary classrooms without the provision of extra toilets and washing facilities gave rise to another unsatisfactory report. Unless good personal hygiene can be practised in schools, health education in later life becomes increasingly difficult.

I should like to express my gratitude to Mr. D.E.C. Hayward, Chief Public Health Inspector, both for the details of the work carried out by the Public Health Inspectors and for his very valuable assistance at all times.

In conclusion, I wish to thank the members of the Council, in particular the Chairman and members of the Health Committee, for their keen interest in the Department, the Chief Officers for their co-operation, and all the staff of this Department for their high standard of work throughout the year.

I have the honour to be,

Mr. Chairman, Ladies and Gentlemen,

Your obedient servant,

M. Browley
Medical Officer of Health

PUBLIC HEALTH OFFICERS OF THE AUTHORITY

Medical Officer of Health:

M. CROWLEY, M.B., B.Ch., B.A.O., D.P.H.

Chief Public Health Inspector:

*D.E.C. HAYWARD, M.A.P.H.I., D.S.A.A.

Additional Public Health Inspectors:

*W.B. FORD, M.R.S.H.

STATISTICS AND SOCIAL CONDITIONS OF THE AREA

Area of District - 18,352 acres.

Population -

Registrar-General's estimate of population for 1971 - 83,570

Number of Inhabited Houses at 31st December, 1971 - 26,900

Rateable Value at 1st April, 1971 - £3,381,835

Sum Represented by a Penny Rate (1971-72) - £33,700 (approx)

SUMMARY OF VITAL STATISTICS FOR THE YEAR

(1) LIVE AND STILL BIRTHS, Etc.

Total Deaths from Special Causes, 1971

					Male	Female	Total
					----	-----	-----
					----	-----	-----
LIVE BIRTHS:							
Total registered	674	685	1,359
Legitimate	623	648	1,271
Illegitimate	51	37	88
STILL BIRTHS:							
Total registered	8	8	16
Legitimate	8	7	15
Illegitimate	---	1	1
Total Live and Still Births	682	693	1,375
DEATHS:							
Total registered	366	348	714
Infants under 1 year (total)	7	10	17
Infants under 1 year (legitimate)	7	9	16
Infants under 1 year (illegitimate)	---	1	1
Neonatal deaths - under 4 weeks							
(legitimate)					5	5	10
Neonatal deaths - under 4 weeks							
(illegitimate)					---	1	1
Early Neonatal deaths - under 1 week							
(legitimate)					5	4	9
Early Neonatal deaths - under 1 week							
(illegitimate)					---	1	1
MATERNAL MORTALITY:							
Pregnancy, childbirth and abortion	...				---	---	---
DEATHS FROM SPECIAL CAUSES:							
Pulmonary Tuberculosis	1	---	1
Other forms of Tuberculosis	---	---	---
Malignant Neoplasms	90	72	162
Pneumonia	17	16	33
Whooping Cough	---	---	---
Measles	---	---	---
Diphtheria	---	---	---
Poliomyelitis	---	---	---

Section II

GENERAL PROVISIONS OF HEALTH SERVICES

IN THE AREA

(a) Laboratory Facilities

Full facilities are available through the Public Health Laboratory Service for the bacteriological examination of water supplies and other investigations. Chemical examinations are done by arrangement with the Public Analyst, Portsmouth.

(b) Ambulance Facilities

Requests for ambulance transport in the area are dealt with by the Central Ambulance Control, Winchester. (Telephone Winchester 61644).

The County Council has an agreement with the City of Portsmouth whereby all calls for the removal of infectious cases are passed to the latter authority's ambulance service for attention.

(c) Clinics

The following services in connection with tuberculosis, maternity and child welfare, orthopaedics, etc., are provided by the County Council and the Regional Hospital Board at clinics and treatment centres in the area:

(1) Tuberculosis

Clinics are held at Queen Alexandra Hospital, Cosham, Portsmouth. Telephone Cosham 79451.

(2) Venereal Disease

PORTSMOUTH

St. Mary's Hospital,
(Special Clinic),
Milton Road,
Portsmouth.
(Tel. Portsmouth 22331)

Monday	2.00 p.m. to 7.00 p.m.
Tuesday	9.30 a.m. to 12 noon. 4.30 p.m. to 7.00 p.m.
Wednesday	2.00 p.m. to 7.00 p.m.
Thursday	9.30 a.m. to 12 noon. 4.30 p.m. to 7.00 p.m.
Friday	9.30 a.m. to 12 noon. 2.00 p.m. to 7.00 p.m.

SOUTHAMPTON

Special Treatment Centre, Opposite Chest Clinic, Royal South Hants Hospital, 44 & 46 Bullar Street, Southampton. (Tel. Southampton 23021)	Monday to Friday	10.00 a.m. to 7.00 p.m.
--	---------------------	-------------------------

(3) Maternity and Child Welfare

County Council Health Clinic, off West Street, Fareham.	Friday	10.00 a.m. to 12 noon. 2.00 p.m. to 4.00 p.m.
--	--------	--

Hill Park Clinic, 45 Highlands Road, Fareham.	Tuesday and Thursday	10.00 a.m. to 12 noon. 2.00 p.m. to 4.00 p.m.
--	-------------------------	--

West End Gospel Hall, St. Anne's Grove, Fareham.	Monday	2.00 p.m. to 4.00 p.m.
---	--------	------------------------

Community Centre, Locks Heath.	Second and Fourth Tuesday	2.00 p.m. to 4.00 p.m.
-----------------------------------	------------------------------	------------------------

British Legion Hall, Park Gate.	Thursday	2.00 p.m. to 4.00 p.m.
------------------------------------	----------	------------------------

Ellen Newbury Hall, Chapel Lane, Sarisbury.	Second and Fourth Monday	2.00 p.m. to 4.00 p.m.
--	-----------------------------	------------------------

Methodist Church Hall, Castle Street, Portchester.	Thursday	10.00 a.m. to 12 noon. 2.00 p.m. to 4.00 p.m.
---	----------	--

Hammond Hall, Bells Lane, Stubbington.	Thursday	10.00 a.m. to 12 noon. 2.00 p.m. to 4.00 p.m.
---	----------	--

Community Centre, Titchfield.	First and Third Monday	2.00 p.m. to 4.00 p.m.
----------------------------------	---------------------------	------------------------

Victory Hall, Warsash.	First and Third Monday	2.00 p.m. to 4.00 p.m.
---------------------------	---------------------------	------------------------

(4) Ante-Natal Relaxation and Mothercraft Classes

County Council Health Clinic,
off West Street, Fareham. Monday 2.00 p.m.

Hill Park Clinic,
45 Highlands Road, Fareham. Monday 2.00 p.m.

Methodist Church Hall,
Castle Street, Portchester. Tuesday 2.00 p.m.

Community Centre,
Locks Heath. Wednesday 2.00 p.m.

Assembly Hall,
off West Street, Fareham. Thursday 2.00 p.m.

Hammond Hall,
Bells Lane, Stubbington. Friday 2.00 p.m.

Ellen Newbury Hall,
Chapel Lane, Sarisbury. Friday 2.00 p.m.

Application made usually through Midwife or Health Visitor attached to
General Practitioner.

Institutional Provisions for Mothers and Children
(Provided by Regional Hospital Board):

Blake Maternity Home, Gosport
Blackbrook House, Fareham
Saint Mary's Hospital, Portsmouth

(5) School Clinics

County Council Health Clinic,
off West Street, Fareham. First and Third Friday mornings
Medical examination, by appointment

(6) Child Guidance

The Gables, Spring Garden Lane,
Gosport. Attendance by appointment only

(7) Dental Clinic

County Council Health Clinic,
off West Street, Fareham. Attendance by appointment from
County Dental Officer

(8) Eye Clinic

St. Christopher's Hospital,
Wickham Road, Fareham. Tuesday and Thursday afternoons,
by appointment

(9) Physiotherapy

St. Christopher's Hospital,
Wickham Road, Fareham. Every day

(10) Skin Clinic

St. Christopher's Hospital,
Wickham Road, Fareham.

Alternate Saturday mornings

(11) Physical Medicine Clinic

St. Christopher's Hospital,
Wickham Road, Fareham.

Monday afternoons

(12) Speech Therapy

County Council Health Clinic,
off West Street, Fareham.

Monday mornings
Thursday all day

(d) Vaccination

Vaccination against Smallpox is carried out by General Medical Practitioners and at some Child Welfare Clinics free of charge under the National Health Services Act, 1946.

NOTE: Parents are advised to have their children vaccinated preferably in the second year of life.

(e) Hospitals

Apart from the Geriatric Unit at St. Christopher's Hospital, there are no general hospitals in the Urban District. At present, hospital services are available at Portsmouth, Southampton and Winchester; the nearest is at Cosham five miles away. Infectious disease cases are sent to hospitals for infectious diseases at Portsmouth and Southampton. Most of the cases requiring hospital confinements are sent to Blackbrook Maternity Home, Fareham, but quite a number from the district are admitted to Saint Mary's Hospital, Portsmouth.

Special hospital facilities are provided for Smallpox.

Treatment for Tuberculosis is available at Bishopstoke and Southampton Chest Hospital.

(f) Homes for the Aged

The Hampshire County Council provide residential accommodation for 48 aged persons at Uplands, Park Lane, Fareham.

Section 111

SANITARY CONDITIONS OF THE AREA

1. Water Supply

The Urban District is supplied by two large water companies - the Portsmouth Water Company and the Southampton Waterworks. The number of houses and the approximate number of persons supplied in the different Wards are as follows:-

- (a) Portsmouth Water Company - supplying Crofton
3,137 houses - 9,065 population
- (b) Portsmouth Water Company - supplying Fareham
12,195 houses - 36,822 population
- (c) Portsmouth Water Company - supplying Portchester
4,680 houses - 14,149 population
- (d) Southampton Waterworks - supplying Locks Heath,
Sarisbury, Titchfield and Warsash
6,132 houses - 24,528 population

The Portsmouth Water Company take frequent water samples for both bacteriological and chemical analysis at their laboratory, and this Department also takes regular weekly samples of water for bacteriological examination. The Laboratory reports show that a very high standard of bacteriological purity in the water is maintained.

2. Drainage and Sewerage

The very unsatisfactory conditions at the Sewerage Works were reported on in last years Annual Report and the restrictions on new buildings continue. The Consulting Engineers are preparing a scheme which it is hoped will deal with all the problems. The blood from Funtley Abattoir which formerly went to Farehams sewers damaging both the sewers and the sewerage works is now treated in a blood dewatering plant at the Abattoir and several tons of a very useful product are salvaged each week.

3. Refuse Collection

The refuse collection service provided is very satisfactory.

Modern, high-capacity, compression type collection vehicles are used which are almost dustless in operation.

4. Sanitary Inspections of the Urban District

Table (1) - Inspections for all Purposes and Notices served

6. SHOPS ACT, 1950

Ten visits were made to new shops or to premises where a change of occupier had occurred. Stocks of the relevant notices are retained in the Department for sale to shop occupiers.

7. OFFICES, SHOPS AND RAILWAY PREMISES ACT, 1963

REGISTRATIONS :-

There were 51 new registrations during the year making the total number of premises registered under the Act 592 of which 464 were inspected. A survey of all premises in the district would be necessary to bring the register up to date and this would not be possible without additional staff.

NOTIFICATIONS :-

There were twelve notified accidents during the year affecting eight men and four women. The majority of them were caused by the handling of goods or by falls. One man was hurt by a broom being wielded by a workmate and another unfortunate man reversed an electric hand trolley onto his own feet.

8. CARAVAN SITES AND CONTROL OF DEVELOPMENT ACT, 1960

Seven licences were in operation during the year in respect of sites in the area, permitting the siting of 132 residential caravans and 244 holiday caravans.

Twenty-two individual site licences are in operation. There are, in addition, a number of caravans in the area which are, by virtue of exemptions provided in the Act, not subject to planning permission or site licence.

Dibles Road, Warsash. Progress on policy in connection with the provision of a Council Caravan Site permitted work to start. Some progress was made toward the provision of standings for 40 residential caravans. The site will also cater for a maximum of 22 touring caravans and should be in use during the latter half of 1972.

9. PET ANIMALS ACT, 1951 AND ANIMAL BOARDING ESTABLISHMENTS ACT, 1963

During the year six licences were issued under the Pet Animals Act. Nine licences were renewed under the Animal Boarding Establishments Act.

10. RIDING ESTABLISHMENTS ACT, 1964

One establishment was licensed under this Act during the year.

Section IV

HOUSING

Inspections of Houses during the year:-

Number inspected under Public Health Acts and Housing Acts for defects including drainage.

Initial Inspections	993
Re-inspections	1,060

Action under Statutory Powers:-

(1) Public Health Acts

- (a) Number of Houses in respect of which action was taken to secure cleansing and/or repair of drainage systems.

Informal	270
Statutory	8

(2) Housing Acts

- (a) Number of Houses in respect of which notices were served requiring repairs.

Informal	23
Statutory	1

- (b) Number of Houses rendered fit after service of notice 18

(3) (a) Number of Houses made subject to Closing Orders 10

No. of Closing Orders determined 6

No. of Persons displaced 17

No. of Families displaced 7

- (b) No. of Houses made subject to Demolition Orders 3

No. of Demolition Orders revoked --

No. of Persons displaced 13

No. of Families displaced 4

No. of Houses demolished 10

(c) No. of Houses in Clearance Areas declared	--
No. of Houses in Clearance Areas confirmed	11
No. of Houses affected by modification to or exclusion from Clearance Orders	9
No. of Persons displaced	27
No. of Families displaced	17
No. of Houses demolished	10

Housing Act, 1969

Certain provisions of the Housing Act, 1969 relate to the change from controlled to regulated tenancies of rented private dwellings. The procedure calls for the issue by the Local Authority of Qualification Certificates, making necessary physical inspections to determine the existence of standard amenities and fitness of the property for human habitation.

In this connection 260 initial visits and 162 re-inspections were made.

Rent Act, 1957

One Certificate of Disrepair was cancelled on the application of the owner.

Overcrowding

Four cases of overcrowding were dealt with during the year.

9 families comprising 30 persons were involved.

In a fifth case the circumstances were resolved by voluntary removal.

HOUSING PROGRESS TO 31st DECEMBER, 1971

The number of private houses completed in 1971 was 478.

Section V

INSPECTION AND SUPERVISION OF FOOD

(1) MILK SUPPLY

MILK (Special Designation) REGULATIONS, 1963

The following licences were in operation during the year :-

Dealers' (Pasteurisers') Licences	1
Dealers' (Pre-packed Milk) Licences	47

SAMPLING

Samples were taken regularly from milk dealers and the one dairy to ensure that the milk was satisfactory, as follows :-

Pasteurised Milk	73
Sterilised Milk	--
Untreated Milk	18
Ultra Heat treated Milk	4

Two samples of Untreated Milk failed the methylene blue test.

ANTIBIOTIC TESTING

Six samples submitted for examination were negative.

BIOLOGICAL TESTING

One Biological test was positive, *Brucella Abortus* being isolated. As a result of this test the sale of Untreated milk ceased.

BRUCELLOSIS

Samples were taken from a farmer's herd and were examined for Brucellosis. 18 negative and 36 positive cultures were obtained and the affected animals were slaughtered.

LIQUID EGG (Pasteurisation) REGULATIONS, 1963

There are no egg pasteurising plants within the Urban District and no samples were taken. Liquid egg from the two egg-packing stations are used for animal feeding only.

(2) FOOD AND DRUGS ACT, 1955

Sections 2 and 6 and the Labelling of Food Order, 1963

The following samples were submitted for analysis :-

FOODS:

Alcoholic Beverages	1
Cereal and Starch Products	2
Cheese and Cheese Products	1
Fat and Oils	1
Fish and Fish Products	7
Flavourings and Colourings	1
Flour and Flour Confectionery	5
Fruit	6
Meat and Meat Products	23
Milk and Milk Products	10
Non Alcoholic Beverages	8
Nut and Nut Products	1
Preserves	1
Slimming, Remedial, Diabetic Foods	3
Soups	2
Spices, Herbs, Condiments	2
Sugar and Sugar Confectionery	2
Vegetables	6
Total				82

DRUGS:

Medicine and Drugs	...	8
Total	...	8

MILK:

Channel Island	...	26
Ordinary	...	54
Total	...	80

The Public Analyst criticised samples of biscuits and fruit drinks under the Labelling of Food Orders and some lengthy correspondence and interviews took place with the manufacturers. Understandably a manufacturer is wary of altering his label unless he can be certain that a different interpretation of the Labelling Order is not going to be made by another authority. In each case mentioned an agreement was reached to alter the labels on reprinting. Criticism of the claim that barley wine was "as strong as a double scotch" was not acceptable to the manufacturers, and the Public Analyst is consulting other expert opinion before a serious challenge of the validity of the claim is made.

Foreign bodies in various foods and mouldy foodstuffs were the cause of many complaints. One case in which the complainant damaged a tooth on a stone in a malt loaf was successfully prosecuted.

A well known brand of indigestion powder was deficient of sodium bicarbonate to the astonishment of the manufacturers. The discrepancy had been caused by a new vacuum filling process which had separated the ingredients after they had been mixed. The fault was remedied by an adjustment of the filling rate. A sample of crabmeat containing excess of zinc caused considerable concern to the importers and samples of crabs were flown from the country of origin for analysis. A full report has been prepared and the Ministry have been consulted. The outcome of a very prolonged and detailed investigation has yet to be finalised.

These two latter cases illustrate the value of routine sampling and the willingness of reputable traders to comply with the law.

SECTION 9

The following visits were made for the purpose of examining food :-

Butchers	2
Fishmongers	8
Grocers	70
Others	18
			<u>98</u>

and the undermentioned quantities of food were condemned :-

	tons.	cwts.	qtrs.	lb.	ozs.
Canned Fish	10	7
Canned Fruit	2	1
Canned Meat	3	3
Canned Vegetables	2	1
Cheese	9	0
Dried Fruit	2	1

Frozen Foods	2	1
Fruit	27	0
Meat	7	3
Mixed Sweets	1	17
	1	17	1	14	8
	2	19	0	21	11

Cordial 650 Fluid Ozs.

SECTION 16 - REGISTERED PREMISES

ICE CREAM :-

Nine applications were made during the year for registration of premises for the sale and storage of ice cream. The total number of premises registered is 208.

Forty-two visits were made for sampling purposes and one hundred and four samples obtained with the following results :-

Grade 1	67
Grade 11	13
Grade 111	15
Grade 1V	9

Grades 1 and 11 are satisfactory results. The retailers of the Grades 111 and 1V samples were advised on handling and storage and the registration authorities notified.

(3) EDUCATIONAL ACTIVITY

Talks on food hygiene and allied subjects were given during the year and the annual invitation by the Council to young voters provided the opportunity to display the work of the department in a small exhibition.

MEAT INSPECTION

The Senior Meat Inspector reports as follows :-

The number of animals slaughtered at Funtley Abattoir during 1971 again showed a substantial increase, mainly due to a rise in the number of sheep slaughtered. As in previous years one hundred per cent inspection has been carried out.

Charges for meat inspection services were increased by approximately forty per cent in October. Charges had not been changed since 1963.

The slaughterhouse was granted its licence to export to some of the Common Market Countries, but only after major structural alterations to the slaughtering lines, and the provision of a small casualty slaughterhouse for animals suspected of being diseased. Improvements to changing rooms and showers were necessary, and additional foot operated wash basins were provided. Further work on the pig slaughtering area remained outstanding at the end of the year.

Alterations to the dressing lines have resulted in a faster and bigger throughput, but the premises frequently become overloaded resulting in finished carcasses being left overnight outside the chillers. Chilling and hanging facilities have been inadequate for a number of years, and with the present large throughput consideration should be given to providing additional chilling arrangements and hanging space.

Facilities are provided for the jointing of pig carcasses in a suitable cutting room, but no provision has been made for the breaking down of beef carcasses. The existing practice of preparing and jointing beef carcasses in the main passage-way and on the loading bay is far from satisfactory, as these areas are in constant use for other purposes. The management has been informed of the unsatisfactory arrangements prevailing in the cutting of beef, but no improvements have been made.

Student Public Health Inspectors from other authorities continue to use the facilities available for training in meat inspection, and colleges and schools regularly collect specimens from the abattoir.

1971		96,499	337,334	433,833

(5) FOOD POISONING

Twelve cases of food poisoning and suspected food poisoning were discovered during the year. Salmonellae were isolated from ten of the patients. An outbreak which was due to Salmonellae enteritidis and which led to six cases being ascertained probably originated at a wedding reception.

Section VI.- PREVALENCE AND CONTROL OF INFECTIOUS AND OTHER DISEASES

1. Notification of Infectious Diseases

The distribution, by season and locality, of notifiable diseases is given in the following table

Disease	MONTHS												WARDS							
	January	February	March	April	May	June	July	August	September	October	November	December	Crofton	Fareham	Locks Heath	Portchester	Salisbury	Titchfield	Warsash	Total

Totals	29	72	131	282	20	12	11	3	4	554

2. DIPHTHERIA IMMUNISATION

No confirmed case of Diphtheria was notified here in 1971. The antigen against Diphtheria is combined with that against Whooping Cough and Tetanus and the age recommended for immunisation is six months. Parents are invited to take their children to their nearest clinic or, if they prefer, to their family doctor. In both cases the service can be carried out free of charge under the National Health Service.

Immunisation was carried out during 1971 at the Child Welfare Clinics at Fareham, Hill Park, Locks Heath, Portchester, Sarisbury, Stubbington and Warsash. Immunisation clinics giving reinoculations were also held at eight local authority schools.

In all, 3,619 children were immunised during the year, as follows:

Revaccinations	-	-	-	-	-	78	186	264

Total Vaccinations - 845

5. MEASLES VACCINATION

During the year 744 children were immunised against Measles, also 469 children were immunised against Rubella. Four clinics were held in schools in the District, for Rubella.

6. INFLUENZA

The Council Staff were offered vaccination against Influenza and Eighty Nine were vaccinated.

7. Dysentery

An outbreak of sonne dysentery occurred at an Infant School early in the year. In all, thirty six children were affected and twenty five were shown to have sonne dysentery. Testing of seventy five family contacts gave a further thirteen positive results. While the patients who had recovered clinically were allowed to return to school, faecal specimens were taken from them until they produced negative results. No further cases occurred after the summer holiday. Special attention to personal hygiene and the cleanliness of toilets helped to control the outbreak.

7. Disinfection

Investigations were made by the staff into cases of infectious diseases and reports were made dealing with the possible sources of infection, the supervision of contacts and the disinfection of premises:

Number of visits made during the year ... 243

Section V11

NATIONAL ASSISTANCE ACTS, 1948 and 1951

Section 47

No statutory action was necessary under the above Acts during the year.

Section V111

PREVENTION OF DAMAGE BY PESTS ACT, 1949

Sewer Maintenance

Testing of the public sewers in the Crofton, Fareham and Portchester Wards was carried out between the 3rd and 27th May, 1971. Three hundred and twenty-one manholes were tested, twelve with positive results.

These positive areas were treated in May and were again baited in October with negative results.

The following table shows the work done (other than sewer maintenance) by the
Rodent Operatives during the year

	Non Agricultural		Agricultural		Totals
	Initial	Revisits	Initial	Revisits
