Annual
 Report
 of the
 Medical Officer
 of Health
 and the
 Sanitary Inspector

For the Year Ending December, 1939

JOHN BENTLEY, LTD., PRINTERS, FAVERSHAM.

ANNUAL REPORT
 OF THE
MEDICAL OFFICER OF HEALTH
 for the Urban District of Felixstowe for the year 1939
 with which is incorporated the Sanitary Inspector's Report

MR. CHAIRMAN, MADAM AND GENTLEMEN,

I have the honour to present my Annual Report for the year ending December 31st, 1939.

Particulars required by the Ministry of Health:—

Medical Officer of Health: G. J. Conford, M.A., D.M. OXON.

Sanitary Inspector: Robert Greenwood, C.R.S.I., M.S.I.A.

Area of District in acres	4281
Resident population at the middle of 1939			12600
Average population for calculation of			
Death rate	12600
Number of inhabited houses at end of 1939			3563
Live births	180
Birth rate	14.2	per thousand	
Deaths	175
Death rate	13.8	per thousand	
Deaths from puerperal causes		...	Nil
Deaths of infants under 1 year of age		...	6
Death rate of infants per 1000 births registered			33
Deaths from Cancer	27
" " Measles	Nil
" " Whooping cough	Nil
" " Diarrhœa (under 2 years of age)	Nil

ANNUAL REPORT
OF THE
COMMISSIONER OF HEALTH
FOR THE YEAR 1900

THE COMMISSIONER OF HEALTH AND CHARITIES
 HAS THE HONOR TO ANNOUNCE THAT THE
 ANNUAL REPORT OF THE COMMISSIONER OF HEALTH
 FOR THE YEAR 1900 IS NOW READY FOR
 DISTRIBUTION TO THE MEMBERS OF THE
 LEGISLATURE AND TO THE PUBLIC.
 THE REPORT IS PRINTED BY THE
 STATE PRINTING OFFICE, ALBANY, N. Y.
 AND IS AVAILABLE FOR SALE AT THE
 STATE BOOKSTORE, ALBANY, N. Y.

VITAL STATISTICS

I have taken the figure 12600 as a basis for estimating the birth and death rates, this representing the Registrar General's estimate for 1938, plus the average annual increase for the last few years. When I receive the Registrar General's figures they will be printed separately and added to this report with any necessary corrections as to the birth and death rate, etc.

BIRTH RATE. 180 births were registered in the district, 89 males and 91 females. On the estimate of the population given above, this gives a rate of 14.2 per thousand. The returns as to inward and outward transfers, legitimacy or illegitimacy, have not yet been received.

DEATH RATE. 164 deaths were registered in the district, with 3 outward and 14 inward transfers, giving 175 as properly belonging to this district. The death rate is thus 13.8 per thousand. In 1938 the birth rate was 11.5 per thousand, and the death rate 12.7 per thousand. Both have increased but the proportion this year is in favour of the birth rate.

INFANTILE MORTALITY. There were 5 deaths of infants under 1 year of age, with one inward transfer, a total of 6. The rate is thus 33 per thousand births registered.

There was only one death from pulmonary tuberculosis and two from other tuberculous diseases, so that the death rate is only .23 per thousand.

Details as to the prevalence of tuberculosis are given in the accompanying table.

CANCER. The incidence of cancer and the death rate from this cause are about the same as last year. Full details are given in the accompanying table. There were 27 deaths including 3 inward and 1 outward transfer.

INFECTIOUS DISEASE. Patients suffering from notifiable infectious diseases are sent to the Isolation hospital, Ipswich, and disinfection of premises and clothing is done by the employees of the Felixstowe Urban District Council.

The accompanying table gives all the details and the statement of the expenses of treatment and prevention, has been supplied by Mr. Tuddenham, the Accountant.

The account is for the period March 31st, 1938, to March 31st, 1939.

VITAL STATISTICS

I have taken the year 1918 as a basis for comparing the birth and death rates with those of the previous years. The statistics for 1918 show the average annual increase for the two last years. When I compare the statistics for 1918 with those of 1917 and 1916, the figures are as follows: Births, 1918, 14,100; 1917, 13,800; 1916, 13,500. Deaths, 1918, 14,100; 1917, 13,800; 1916, 13,500.

DEATHS - The number of deaths in 1918 was 14,100, or 1.1 per cent more than in 1917, and 1.5 per cent more than in 1916. The increase in 1918 was due to an increase in the number of deaths from all causes, but particularly from the increase in the number of deaths from pneumonia and influenza.

DEATHS FROM PNEUMONIA AND INFLUENZA - The number of deaths from pneumonia and influenza in 1918 was 14,100, or 1.1 per cent more than in 1917, and 1.5 per cent more than in 1916. The increase in 1918 was due to an increase in the number of deaths from all causes, but particularly from the increase in the number of deaths from pneumonia and influenza.

DEATHS FROM ALL CAUSES - The number of deaths from all causes in 1918 was 14,100, or 1.1 per cent more than in 1917, and 1.5 per cent more than in 1916. The increase in 1918 was due to an increase in the number of deaths from all causes, but particularly from the increase in the number of deaths from pneumonia and influenza.

DEATHS FROM PNEUMONIA AND INFLUENZA - The number of deaths from pneumonia and influenza in 1918 was 14,100, or 1.1 per cent more than in 1917, and 1.5 per cent more than in 1916. The increase in 1918 was due to an increase in the number of deaths from all causes, but particularly from the increase in the number of deaths from pneumonia and influenza.

DEATHS FROM ALL CAUSES - The number of deaths from all causes in 1918 was 14,100, or 1.1 per cent more than in 1917, and 1.5 per cent more than in 1916. The increase in 1918 was due to an increase in the number of deaths from all causes, but particularly from the increase in the number of deaths from pneumonia and influenza.

DEATHS FROM PNEUMONIA AND INFLUENZA - The number of deaths from pneumonia and influenza in 1918 was 14,100, or 1.1 per cent more than in 1917, and 1.5 per cent more than in 1916. The increase in 1918 was due to an increase in the number of deaths from all causes, but particularly from the increase in the number of deaths from pneumonia and influenza.

DEATHS FROM ALL CAUSES - The number of deaths from all causes in 1918 was 14,100, or 1.1 per cent more than in 1917, and 1.5 per cent more than in 1916. The increase in 1918 was due to an increase in the number of deaths from all causes, but particularly from the increase in the number of deaths from pneumonia and influenza.

DEATHS FROM PNEUMONIA AND INFLUENZA - The number of deaths from pneumonia and influenza in 1918 was 14,100, or 1.1 per cent more than in 1917, and 1.5 per cent more than in 1916. The increase in 1918 was due to an increase in the number of deaths from all causes, but particularly from the increase in the number of deaths from pneumonia and influenza.

DEATHS FROM ALL CAUSES - The number of deaths from all causes in 1918 was 14,100, or 1.1 per cent more than in 1917, and 1.5 per cent more than in 1916. The increase in 1918 was due to an increase in the number of deaths from all causes, but particularly from the increase in the number of deaths from pneumonia and influenza.

TABLE of INFECTIOUS DISEASES for 1939

Disease	Age Periods						Total	Treated in Hosp.	Deaths
	4-5	5-10	10-15	15-20	20-35	35-45			
Scarlet fever ...	2		4	1	1	1	9	7	Nil
Diphtheria ...					1		1	1	"
Anterior Poliomyelitis			1				1	1	"
Totals	2		5	1	2	1	11	9	"

The above table shews that the incidence of infectious disease has been very light. All of the patients except three were inhabitants of the district. The case of diphtheria was a soldier at Landguard fort, the case of anterior poliomyelitis was a child sent into the district from London under the Government evacuation scheme and one of the scarlet fever cases was an inhabitant of Ipswich staying at the Bartlet Convalescent Home.

The expense of removing patients to the Ipswich Isolation Hospital and of their treatment is paid by this district. Disinfection is done by the staff of this Council.

LABORATORY FACILITIES. The County pathologist examines sputum, blood, etc. for diagnostic purposes in cases of tuberculosis, syphilis, diphtheria, typhoid or other diseases.

The pathologist to the East Suffolk Hospital carries out similar examinations and has a supply of blood for transfusions if required.

Water and milk are analysed by the County analyst.

AMBULANCE FACILITIES. The Council's ambulance kept in a building adjoining the Fire station is used for the transport of patients to and from hospital, accidents, etc. Infectious cases are conveyed by the ambulance sent from the Isolation Hospital, Ipswich.

HOSPITALS. The Felixstowe Cottage Hospital has 34 beds all of which are available if necessary for the reception of Air raid casualties. 278 Evacuees and others were treated in hospital between September 1st, and the end of the year, 16 as in-patients and 262 as out-patients, the hospital is still being used for this purpose. The Suffolk Convalescent Home has sixty beds and is supported by voluntary contributions. At the outbreak of war, however, the patients were sent away and accommodation provided for 40 sick children. This measure was considered necessary in consequence of the Government evacuation scheme, many children having been received into this and the adjoining Deben Rural district.

The following statement gives details as to the use which has been made of the accommodation.

LABORATORY FACILITIES. The County pathologist examines sputum, blood and for diagnostic purposes in cases of tuberculosis, syphilis, diabetes, typhoid or other diseases. The pathologist at the East Suffolk Hospital carries out special examinations and has a supply of blood for transfusions.

WATER AND MILK are supplied by the County engineer. AMBULANCE FACILITIES. The County ambulance kept in a building adjoining the Fire station is used for the transport of patients to and from hospital, accidents, etc. Ambulance cases are covered by the ambulance and from the London Hospital.

HOSPITALS. The Portsmouth Cottage Hospital has 24 beds all of which are available for the reception of all cases. The Eastern Ambulance and Hospital is in a building between the road and the sea, and is used for the reception of all cases. The hospital is well equipped for the purpose. The British Cancer and Home has very few beds but is supported by voluntary contributions. At the outbreak of war, however, the patients were sent away and accommodation provided for 50 extra patients. The hospital was considered necessary in consequence of the Government evacuation scheme, many children having been received into the and the adjacent Island (Hull) district.

The following statement gives details as to the work which has been done at the ambulance.

Average stay	20 days

The Bartlet Convalescent Home was emptied of its patients soon after the outbreak of war and reserved for the reception of Air raid casualties for which it will be used if necessary.

The Herman de Stearn Home, for the reception of patients from the London Hospital, was also vacated for the reception of possible Air raid casualties or sick women and children among the Evacuees.

At the outbreak of war it was found that many of the children sent into the district were suffering from contagious skin diseases and as it was undesirable to billet them with clean children, a hut belonging to the sea scouts was taken and several children were sent to it, under the charge of Nurse Sparkes, the former matron of our Isolation Hospital. After three weeks it was decided to use the Suffolk Convalescent Home for this purpose.

Disorganisation of public work, hardship, discomfort and inconvenience to individual householders, have naturally resulted from the Evacuation scheme, but that every effort has been made to cope with difficulties, is obvious from the admirable report of Mr. Greenwood, the Sanitary Inspector, which I insert verbatim.

Tonsillitis	1
Abscess of Axilla	1

The further Convalescent Home was emptied of its patients soon after the outbreak of war and reserved for the reception of Air raid casualties for which it will be used if necessary.

The Home de Sirens House, for the reception of patients from the London Hospital, was also reserved for the reception of possible Air raid casualties on both women and children among the Evacuees.

At the outbreak of war it was found that many of the children sent into the district were suffering from contagious skin diseases and as it was undesirable to bring them with clean children, a hot department in the war section was taken and several children were sent to it under the charge of Nurse Spiller, the former matron of our London Hospital. After three weeks it was decided to use the Sirens Convalescent Home for this purpose.

Disorganization of public work, hardship, discomfort and inconvenience to individual households, have naturally resulted from the Evacuation scheme, but that every effort has been made to cope with difficulties, is obvious from the admirable report of Mr. Greenwood, the Sanitary Inspector, which I insert verbatim.

Sanitary Inspector's Office,
South Beach Mansion,
Felixstowe.

12th March, 1940.

Dear Dr. Conford,

I have made these notes on the Evacuation Scheme which you wished to include in your report.

Early in the year I was instructed to carry out the survey of accommodation which the Government required to be made in all reception areas and a great deal of time was spent on this and other work of preparing for a possible evacuation.

Helped by the willing service of local people, our plans for detrainning, distributing and billeting evacuees worked admirably when war broke out and the evacuees actually arrived, but the last minute change in the Government's plans and, in particular, their decision to send several thousand mothers and children by boat produced problems which we had never contemplated nor prepared ourselves to meet.

The task set us at a few days notice was to provide 1,800 additional permanent billets and to receive by boat 8,500 mothers and children during 3 consecutive days. No one knew at what hour of the day they would arrive and we were faced at 48 hours notice with the task of providing sleeping accommodation and food for these successive waves of evacuees and passing them on to other districts as soon as transport and accommodation could be found. In effect, this meant that 12,000 additional persons had to be found some kind of shelter and food unless we could quickly disperse the boat party to other parts of the County.

The numbers actually received were, providentially for us, very much below those we were told to expect and much better arrangements could have been made had we known this, even a few hours in advance, and not had to modify or improvise our arrangements after the actual arrival. The reception was spread over 3 days and the actual total numbers received were:—

By Boat—5,862 By Train—2,673 Total—8,535

Sanitary Inspector's Office,
South Beach Station,
Baltimore,
11th March 1941.

Dear Mr. Lusk,

I have made three copies of the Inspection Report which
you wish to include in your report.

Early in the year I was instructed to carry out the survey
of accommodations which the Government required to be made
in all recreation areas and a great deal of time was spent on
this and other work of preparing for a possible evacuation.

It has been a very busy year for local people and districts
concerned with the evacuation of people from the continent
and the Government has been very busy in the preparation
of the evacuation plan. It has been a very busy year for
the Government and the people of the continent and the
Government has been very busy in the preparation of the
evacuation plan. It has been a very busy year for the
Government and the people of the continent and the
Government has been very busy in the preparation of the
evacuation plan.

The total cost of the evacuation plan was £1,000,000
and the Government has been very busy in the preparation
of the evacuation plan. It has been a very busy year for
the Government and the people of the continent and the
Government has been very busy in the preparation of the
evacuation plan. It has been a very busy year for the
Government and the people of the continent and the
Government has been very busy in the preparation of the
evacuation plan.

The evacuation plan has been very successful and the
Government has been very busy in the preparation of the
evacuation plan. It has been a very busy year for the
Government and the people of the continent and the
Government has been very busy in the preparation of the
evacuation plan.

Yours faithfully,
[Signature]

11th March 1941

All the train party and 360 members of the boat party were found permanent billets in Felixstowe on the day of arrival. The remaining members of the boat party were slept in empty houses, halls, etc., fed and despatched to other parts of East Suffolk to make room for the next batch. The boat party were distributed to the following county districts:—

Woodbridge	585	Aldeburgh	311	Deben	2,400
Blyth	1,176	Samford	860	Felixstowe	360

All this very trying and strenuous work was carried out with the willing help of all kinds of local people, amongst whom it would be invidious to mention names. The response made to our appeals for workers and the number who offered themselves in any capacity without any thought of reward or even of thanks is beyond all praise. If mistakes were made it should be remembered that the whole scheme, as it affected Felixstowe, became at the last moment a vast improvisation only carried through to success by dint of much cheerful team work.

R. GREENWOOD.

The Maternity and Child Welfare Clinics have been held as usual every Thursday at the Salvation Army Hall, Walton, from 2—5 p.m. The attendances have totalled 1961.

The visits paid have been as follows:—

General nursing	3986
Surgical	366
Casual cases	496
Miscarriages	42
Midwifery	447
Maternity	1131
Health Visits	1117
Ante-natal	323
Pulmonary tuberculosis	36

The evacuation has added considerably to the work, 57 attendances having been made by expectant mothers among the evacuees in addition to the 144 by those who are resident in the district.

I am, Gentlemen,

Your obedient servant,

G. J. CONFORD, D.M., M.O.H.

All the train party and 300 members of the host party were found convenient tickets in Fallowfield on the day of arrival. The remaining members of the host party were left in empty houses and the host party was requested to order parts of host tickets to make good for the next dates. The host party was distributed in the following county districts:-

Walsley 327, Aldbourgh 311, Dagen 2,400
Dixie 1,178, Ganton 500, Fallowfield 300

All the very young and strenuous work was carried out with the willing help of all kinds of local people, amongst whom it would be useless to mention names. The response made in our appeals for workers and the number who offered themselves in any capacity without any thought of reward or even of trouble is beyond all praise. It is to be regretted that the whole scheme was not carried out in the same spirit of cooperation as it was in the past. The result of our appeal was only carried through in some cases in which it was not.

H. G. GARDNER

The Meeting and Club - Walsley (Lodge) has been held at Great West Tower at the Salvation Army Hall, Walsley from 2-5 p.m. The attendance has totaled 1301.

The right had been as follows:-

General meeting	398
Sunday	355
County cases	400
Ministry	12
Ministry	287
Ministry	1131
Health visits	1117
Anti-rabies	353
Fallowfield tuberculosis	30

The committee has added considerably to the work, 37 attendances having been made by expectant mothers among the women in addition to the 144 by those who are resident in the district.

I am, Gentlemen,

Your obedient servant,

G. J. CONNOR, D.M., M.O.H.

SANITARY INSPECTOR'S REPORT

MR. CHARLES W. MASON AND COMPANY

I have pleasure in presenting a short Annual Report for the year ending 31st December, 1919.

WATER SUPPLY

Particulars of the work done during the year are given in the report. Supplies of the water supply were taken on the 1st January, 1919, and the 31st December 1919, and the total supply for the year was 1,000,000 gallons. A supply was taken from the 1st January, 1919, to the 31st December, 1919, of 1,000,000 gallons. The total supply for the year was 1,000,000 gallons.

Copy of Certificate of Analysis of Water taken from the 1st January 1919, to the 31st December, 1919.

Analysis of Samples

Element	Quantity	Percentage
Total Dissolved Solids	200	20%
Free Ammonia	0.05	0.05%

Nitrogen	0.01	0.01%
Oxygen	0.01	0.01%
Hydrogen	0.01	0.01%
Carbon	0.01	0.01%

The total amount of water supplied during the year was 1,000,000 gallons.

SANITARY INSPECTOR'S REPORT.

MR. CHAIRMAN, MADAM AND GENTLEMEN,

I have pleasure in presenting a short Annual Report for the year ending 31st December, 1939.

WATER SUPPLY.

Particulars of the new supply were given in last year's report. Samples of the town supply were taken on the 10th January (before the Mill River water was added to the town supply) and on the 9th February (after the mixing). A sample was taken from the Mill River, Bucklesham, at the intake of the new water works on the 14th April for comparison with the treated water.

Copy of Certificate of Analysis of Water taken from tap at the Town Hall, Felixstowe, on the 9th February, 1939.

Result of Analysis.

Physical characteristics :	...	Clear.	No odour.
Reaction :	pH. 7.3
			Parts per 100,000
Free Ammonia	0.004
Albuminoid Ammonia	0.002

20th April, 1919.

WELLS.

A sample of water from the shallow well supplying Ferry Lane School and the adjoining Cottage was taken on the 31st January and reported as showing no evidence of harmful pollution.

RIVERS and STREAMS.

No action has been necessary during the year to check the pollution of rivers and streams.

CLOSET ACCOMMODATION.

Particulars of sanitary accommodation are as follows:

Houses with water closets connected to sewers	3541
Houses with water closets draining direct to sea	9
Houses with pail closets	110
Houses with privies	6
Houses drained to cesspools or septic tanks	83
			<hr/>
			3749
			<hr/>

104 new dwellings were erected during the year.

No conversions of pails to the water carriage system were carried out.

PUBLIC CLEANSING.

Refuse collection is under the control of the Surveyor. Particulars of the service given have been included in previous reports.

SANITARY INSPECTION OF THE AREA.

Complaints received	122
Number of houses inspected under the Public Health Act and Housing Acts.	48
Number of houses inspected and recorded under the Housing Act.	13
			<hr/>

SHOPS ACT, 1934.

The number of inspections made under this Act during the year was 7
No certificates of exemption were issued.

CAMPING SITES.

Number of sites licensed by the Council for camping 3
Applications refused 3
Efforts were made to improve the conditions under which camping is done in the Urban District. The greatest obstacle to such improvements is the exemption of 42 days from the necessity of holding a licence from the Local Authority. This period well covers the peak of the season and robs the Local Authority of effective control just when they most need it.

SMOKE ABATEMENT.

The district is free from industrial smoke.

HOUSING.

Number of houses inspected under the Public Health and Housing Acts 48
Number of inspections made for the purpose 185
Number of houses recorded under the Housing Regulations 13
Informal notices served Public Health Act 92
Informal notices served Housing Act ... 25
Statutory notices served Public Health Act 1
Statutory notices served Housing Act 4
One house was reported as being unfit for human habitation and not repairable at reasonable expense. No undertaking was given by the owner to repair or close the house and the matter is in abeyance.

INSPECTION AND SUPERVISION OF FOOD.

MILK SUPPLY.

Two new cowsheds were registered during the year one a conversion of an old shed and one an entirely new building.

There are now in the district:—

9 registered cowsheds.

7 registered dairies.

8 persons registered as purveyors of milk in sealed bottles or cartons only.

SHOPS ACT, 1948
 The number of inspections made under this Act during the year was ...
 No certificates of inspection were issued.

CAMPING SITES
 Number of sites licensed by the Council for camping ...
 Arrangements were made to improve the conditions under which camping is done in the Urban District. The greatest obstacle to such improvements is the restriction of 12 days from the necessity of holding a licence from the Local Authority. This period will cover the peak of the season and the Local Authority is effective control just when they most need it.

SMOKE ABATEMENT
 The Council has been long interested in smoke

HOUSING
 Number of houses reported under the Public Health and Housing Act ...
 Number of inspections made for the purpose ...
 Number of houses reported under the Housing Act ...
 Licences ...
 Licences issued under Public Health Act ...
 Licences issued under Housing Act ...
 Licences issued under Public Health Act ...
 Licences issued under Housing Act ...
 One house was reported as being unfit for human habitation and not reported as defective under the Housing Act for the reason that it was not a house and the matter is in abeyance.

INSPECTION AND SUPERVISION OF FOOD
 MILK SUPPLY
 Two new cowsheds were erected during the year and a conversion of an old shed on an existing site building.
 There are now in the district:-
 9 registered cowsheds,
 7 registered dairies,
 8 persons registered as suppliers of milk in sealed bottles or cans only.

Dairymen holding special licences from the Council under the Milk (Special Designations) Order, 1936, are as follows:—

Bottlers of T.T. Milk	...	1
Dealers in T.T. Milk	...	2
Dealers in T.T. Milk (Certified)		1
Licensed Pasteurisers	...	1
Bottlers of Accredited Milk	..	2
Dealers in Accredited Milk	..	1
Dealers in Pasteurised Milk	...	2
		—
		10
		—

A sample of a cowshed water supply was taken and found to be free from all harmful pollution.

28 inspections of cowsheds were made during the year.

EXAMINATION OF MILK FOR CLEANLINESS.

31 samples of graded and "ordinary" milks were submitted to the County Laboratory, Ipswich, for bacteriological examination:—

T.T. Milk	6
Accredited	8
Pasteurised	11
Ungraded	6
			—
			31
			—

MILK FAILING TO COMPLY.

6 samples of graded milks (3 Pasteurised and 3 Accredited) failed to comply with the required standards of bacterial purity. The Accredited milk was produced in East Suffolk and investigations were made by the County Sanitary Inspector. The unsatisfactory Pasteurised milk was from a supply pasteurised outside the district.

There were also two samples of ordinary milk of unsatisfactory standard.

MEAT INSPECTION.

There are 2 licensed and 3 registered slaughterhouses in the district.

There were no other special inspections from the Council under the Milk Inspection Ordinance, 1916, as follows:

1	Inspection of T.T. Milk
1	Inspection of T.T. Milk
1	Inspection of T.T. Milk (Carriage)
1	Inspection of Pasturized Milk
1	Inspection of Sterilized Milk
1	Inspection of Sterilized Milk
1	Inspection of Sterilized Milk
1	Inspection of Sterilized Milk
10	

A sample of a cowshed water supply was taken and found to be free from all bacterial pollution. 18 inspections of cowsheds were made during the year.

EXAMINATION OF MILK FOR CLEANLINESS

11 samples of graded and "ordinary" milk were submitted to the County Laboratory, Ipswich, for bacteriological examination:

6	T.T. Milk
4	Asteroidal
11	Pasturized
6	Ungraded
27	

MILK FAILING TO COMPLY

5 samples of graded milk (3 Pasturized and 2 Asteroidal) failed to comply with the relevant standards of bacterial purity. The Asteroidal milk was produced in East Suffolk and investigation was made by the County Sanitary Inspector. The bacteriological examination was from a supply purchased outside the district. There were also two samples of ordinary milk of no bacteriological standard.

MEAT INSPECTION

There are 2 licensed and 3 registered slaughterhouses in the district.

798 visits of inspection to slaughterhouses during slaughtering hours were made during the year and 75 to butchers' shops. These inspections were suspended for a period, and thereafter much reduced, by the work of receiving the evacuees which arrived here on the outbreak of war.

DETAILS OF CARCASSES INSPECTED.

4	parts of livers
10	parts of intestines

Approximate total weight of meat condemned—1894 lbs.
 All condemned meat is destroyed at the Council's expense.
 No coals, hulls or hearts were destroyed during the year. The butchers sell only good class material.
 It was necessary to seize and have formally condemned by a magistrate a quantity of mutton which was found deposited for preparation for sale at a fish shop. Legal proceedings were not instituted.

HUMANE SLAUGHTERING.

The use of the humane killer is compulsory on all classes of animals and the law requiring its use is well observed.

MEAT REGULATIONS (ILLEGAL SLAUGHTERING).

One case of slaughtering without notice was reported during the year and the butcher received a warning.

RATS AND MICE (DESTRUCTION) ACT, 1919.

The District Council took over these duties in 1939. 48 inspections were made during the year and 10 notices given.

During March a "Rat Week" was held and 2d. offered for every rat brought to the Council Depot. The result was disappointing, only 186 rats being brought in.

THE GOVERNMENT EVACUATION SCHEME.

A great part of the work of this department during the year has been concerned with the Evacuation Scheme. Full arrangements were made for the reception of evacuees at distributing centres and all things considered the arrangements worked well when they had to be put into operation in September. From that date to the end of the year evacuation matters necessarily became my chief concern.

Complaints of nuisances and insanitary conditions have been attended to and such other public health duties as it is imperative to carry out, but the number and variety of questions arising out of the presence of the evacuees has left no time for routine sanitary inspections as understood in normal peace time conditions.

I would like to express my appreciation of the help and advice given me by Dr. Conford in coping with the many unusual problems arising out of the evacuation scheme and also to record the very valuable assistance given me in the same work by my clerk, Mr. W. Hubbard.

I am, Mr. Chairman, Madam and Gentlemen,

Your obedient servant,

ROBERT GREENWOOD, C.R.S.I., M.S.I.A.

March, 1940.

Sanitary Inspector.

HUMANE SLAUGHTERING.

The use of the humane killer is compulsory on all classes of animals and the law regarding its use is well observed.

MEAT REGULATIONS (LIVERED SLAUGHTERING).

One case of slaughtering without notice was reported during the year and the butcher received a warning.

RATS AND MICE (DESTRUCTION) ACT, 1912.

The District Council took over these duties in 1912. 43 inspections were made during the year and 10 notices given.

During March a "Rat Week" was held and 24 officers for every rat brought to the Council Depot. The result was disappointing, only 100 rats being brought in.

THE GOVERNMENT EVALUATION SCHEME.

A great part of the work of this department during the year has been connected with the evaluation scheme. Full arrangements were made for the purpose of evaluation at districting centres and all things connected with arrangements worked well when they had to be put into operation in September. From that date to the end of the year evaluation notices necessarily became very plentiful.

Complaints of nuisances and insanitary conditions have been attended to and such other public health duties as it is imperative to carry out but the number and variety of questions arising out of the presence of the evocates has left no time for routine sanitary inspections as understood in normal peace time conditions.

I would like to express my appreciation of the help and advice given me by Dr. Casland in regard with the many unusual problems arising out of the evocation scheme and also to record the very valuable assistance given me in the same work by my clerk, Mr. W. Hubbard.

I am, Mr. Chairman, Members and Gentlemen,

Your obedient servant,

ROBERT GREENWOOD, C.E.A., M.B.E.

Sanitary Inspector.

March, 1916.
