AIDS

IS EVERYONE'S PROBLEM

1991

400 DEATHS A MONTH
1/4 MILLION INFECTED

WHAT YOU CAN DO

- Get the facts and share them with your family and friends
- Know your sex partners
- Ask questions about past sexual history and drug use
- Be honest about your past

If in doubt use a condom (sheath) for sexual intercourse. The AIDS virus cannot get through a condom if it is properly used and does not break. Never share drug needles.
