**THIS PHENOMENON IS
NOW EXHIBITING**

Each Day, from 11 till 1—2 till 5—and 7 till 9 o'Clock.

MRS.

ELIZABETH ARMITAGE

Of the Extraordinary Weight of

31 Stone 11 lbs.

OR, 445 POUNDS,

Height, Five Feet, Eight Inches.

Upper Part of Arm,	22 Inches.	Waist,	47 Inches.
Bust,	72 —	Calf,	22½ —
Ankle,	11½ —	Width of Foot,	2½ —
Round the Wrist,	7 —	Hips,	85 —

AGE, TWENTY-NINE YEARS.

The Faculty is particularly invited, as well as the scientific and curious, Mrs. Armitage having been visited by the most eminent of the medical profession of Edinburgh and other places, the size of the obesity, and by thousands of persons who have pronounced her to be the

Greatest Wonder of the Age!

It is universally admitted that she possesses all the cardinal beauties of her sex—viz., a remarkably handsome and expressive countenance, of the usual size, dimensions, and contour; proportionate hand and wrist, and remarkably small feet, combined with no ungainly appearance of figure and gait, but blended with that superior and by no means inolegant *test ensemble*, disseminated poorly.

MEDICAL OPINION.

I hereby certify that I have visited Mrs. ARMITAGE, and find that all is stated, as to her size, weight, and conformation, to be most perfectly correct. She enjoys good health in every respect. She will repay the gratification of a visit.—is more perfect than the celebrated Lambert, and I consider her an astonishing prodigy of development.

JOHN THATCHER, M.D., F.R.C.P., Lecturer on Midwifery, &c. &c.
Edinburgh, September 19, 1846.

OPINIONS OF THE PRESS.

A HEAVY WEIGHT.—On Tuesday evening last, the celebrated "stout lady," Mrs. Armitage, who had been for some time exhibiting here, was desirous to change her locality to Glasgow, and found her way for that purpose to the terminus at Hay Wagon; but none of the railway carriages were found sufficiently capacious to admit her great bulk; and after some consultation amongst the officials there, it was found necessary, as the only alternative left, to fit up a horse-box, for the conveyance of the 32 stone weight female, in which we understood she got safely and comfortably to the "city of the west."—*Edinburgh Mercury*. [She has since arrived in Glasgow, and is, indeed a thumper. Any person visiting her will be entitled to consider that he has acquired a very extensive acquaintance.]

LEISTE NATURE.—Our advertising columns announce the appearance for a short time in this city, of a lady who is, without question, what she is called, the greatest wonder of our age. Mrs. Armitage is represented as being 29 years of age, and no one who has studied Lavater could doubt the fact of her youth. Her countenance is decidedly handsome and prepossessing, and were it seen without the admirable bent upon which it rests, it would be looked on as one owned by rather a delicate young lady. Her hair, nearly jet black, hangs in graceful, and we were informed natural ringlets, over a most intelligent and expressive face; her hands and wrists are such as a painter would hold in just proportion with the face; while the feet are even smaller in proportion. But these lead to no idea of the magnitude of the lady. Without the slightest appearance of artificial or adventitious conformation, the body of the lady is without exception the most partly we have ever seen—she is in fact a female Daniel Lambert. Notwithstanding her size and weight—her height being 5 feet 8 inches, and her weight 445 lbs., or 31 stone 11 lbs.—she is as sprightly, communicative, and affable as any young Miss may be who feet figures in a ball room; and although we did not see her dance the polka, or waltz, we should have little doubt of her ability to do either. We most cordially recommend our friends, ladies and gentlemen, to pay a visit to this remarkable lady.—*Glasgow Constitution*, Sept. 22th, 1846.

Admission, — ONE SHILLING.

S. G. Fairbrother, Printer, 31, Bow Street, Covent Garden.
