WATER SUPPLY.

Practically the whole of the dwelling houses in the Borough are supplied from the Council's public mains, the figures being as follows:-

Laid on direct to house.	1,762
Water fetched from distant standpipe.	<u>1</u>
	1,763
Houses (including isolated farms) relying on a private well supply.	<u>3</u>
	<u>1,766</u>

Sufficiency. During June and July it was necessary to impose an intermittent supply, turning off the supply from 10.p.m. until 6.a.m. for approximately one month. An emergency pumping plant and rising main was installed to take water from the River Brue to augment the supply during the months of July and August.

Quality. The supply is hard. Galvanised iron, Polythene and Copper service pipes are used and no difficulty is experienced due to plumbo-solvent action. Permanent Chlorination Plants (Chloramine Process) are in continuous operation.

WATER SUPPLY. (Continued).

The results of samples taken for Bacteriological examination during the year were as follows:-

Section 47. Removal to suitable premises of persons in need of care and attention.

No action was taken under this section during the year.

HOME NURSING.

It should be noted that the provision of Home Nursing is the responsibility of the County Council and not of the Local Authority in this Area.

Two full-time and one part-time Nurses are responsible for the nursing in the area and in addition for the nursing of two neighbouring Villages, in general, their work consists principally of:-

1. Visiting the sick of all ages in their homes and giving such general attention and especial treatments as are required.
2. Ante-Natal care of Midwifery and the conduct of domiciliary midwifery with and without a doctor.
3. Work in conjunction with the School Medical Schemes.
4. Infant Welfare Work and routine visits to children of pre-school age.
5. Domiciliary visits for the purpose of giving insulin, liver extract, and other injections.
6. Routine visits to elderly house bound people.

The principle increase in work has occurred in Ante-Natal, Midwifery and Infant Welfare Departments and it is not found that the giving of routine or other injections is a heavy call.

HEALTH CHILDREN.

There is an Infant Welfare Clinic which is held on the first and third Wednesdays in the month, the Medical Officer of Health attending at all sessions.

A voluntary "Moral Welfare Society" operates in the area and pays particular attention to cases where there is a threatened break-up in the family or children are in need of supervision, and their parents advice. No Scheme is administered by the Local Authority.

REPORT ON THE PROGRESS OF THE WORK DURING THE YEAR 1948
