RURAL DISTRICT COUNCIL OF GLOUCESTER

ANNUAL REPORT

of the

MEDICAL OFFICER OF HEALTH

To the Chairman and Members of the  
Rural District Council of Gloucester.

Mr. Chairman, Ladies and Gentlemen,

I beg to present the Annual Report for 1967 on the health, environmental hygiene and sanitary circumstances of the Rural District. The report is prepared as required by the Public Health Officers Regulations 1955, and Circular 1/1968 of the Ministry of Health.

I am indebted to other officers for many particulars and especially to the Engineer and Surveyor, Mr. J. S. Hopkins and the Chief Public Health Inspector, Mr. S. W. D. Harris for the sections contributed by them.

Boundary changes in the Rural District took place during the year and in the calculation of the Health Statistics regard has been had to this factor.

In general the averages for Births, Deaths, and Infantile Mortality compare favourably with the corresponding averages for the country as a whole.

Measles was the only infectious disease which occurred to any extent. The low incidence of infectious diseases is due, in large measure, to the ready acceptance of the immunisation procedures available.

Regular visits are made to food premises. Food inspection is supported by appropriate health education. These measures together with the willing co-operation of food traders and food handlers have done much to prevent outbreaks of food poisoning.

The problem of dealing effectively with complaints arising from intensive farming activities becomes more and more difficult. Statutory action was taken in one instance and in others the informal action in support of the Planning Authority was sufficient to prevent nuisance arising.

Because of the national economic situation only limited progress was possible in implementing the sewerage schemes so urgently needed in various parishes.

I am glad to be able to take this opportunity of thanking members of the Council for their support and my colleagues for their help throughout the year.

I am, Mr. Chairman, Ladies and Gentlemen,

Your Obedient Servant,

STEPHEN KNIGHT,

Medical Officer of Health.

PUBLIC HEALTH COMMITTEE (31.12.67)

Chairman: F. J. CHAMBERLAYNE

Vice-Chairman: E. J. PENNELS

S. G. BRIDGES	C. G. MAYO

PUBLIC HEALTH DEPARTMENT STAFF

STEPHEN KNIGHT, M.B., B.S. (LOND.), M.R.C.S., L.R.C.P., D.P.H.,  
Medical Officer of Health to the Tewkesbury Borough, Charlton Kings  
Urban District, Gloucester and Cheltenham Rural Districts and County  
Divisional Medical Officer of Health for the North Gloucestershire  
Divisional Area.

S. W. D. HARRIS, C.S.I.B., M.A.P.H.I., M.R.S.H., Chief Public Health  
Inspector and Petroleum Officer.

G. G. VIGGERS, C.S.I.B., M.A.P.H.I., A.I.H.E., Deputy Chief Public Health  
Inspector.

P. M. JONES, C.S.I.B., M.A.P.H.I., M.R.S.H., A.I.H.E., District Public  
Health Inspector.

L. S. SCOURFIELD, C.S.I.B., M.A.P.H.I., M.R.S.H., District Public Health  
Inspector.

N. J. DAVIS, C.S.I.B., M.A.P.H.I., M.R.S.H., Additional Public Health  
Inspector.

N. J. BILLINGTON, C.S.I.B., M.A.P.H.I., M.R.S.H., Additional Public  
Health Inspector.

D. J. ROGERS, C.S.I.B., M.A.P.H.I., M.R.S.H., Additional Public Health  
Inspector.

P. J. C. WALKER, Student Public Health Inspector.

MISS J. E. C. MORGAN, Administrative Assistant.

MISS B. COX, Shorthand Typist/General Assistant.

F. GREENWOOD, Senior General Assistant.

W. B. NEWMAN, Rodent Operator.

## STATISTICS AND SOCIAL CONDITIONS OF THE DISTRICT

Area (in acres): 67,830

Population (Registrar General's Estimated Home Population mid 1967): 37,660  
(This figure includes members of the Armed Forces stationed in the District). As there was a change of boundary during the year the statistics represent the events assigned to the area within the boundaries as they existed at the date of registration of each event. To allow calculation of valid Birth and Death rates, the figure 41,870 is a weighted average of the mid year population of the area as constituted before and after the change.

Number of Inhabited Houses (December 31st, 1967) according to rate books:  
11,697

Rateable Value (December 31st, 1967): £1,381,951    Os.    Od.

Estimated product of a penny rate (March, 1967): £5,461

General Rate 1967 - 68: 11/8d. (County Precept 9/7d.)

Less	(a)	for Domestic Hereditaments	5d. in £1
	(b)	for Mixed	"    2d. in £1
	(c)	for Commercial	"    -

### ADOPTIVE PUBLIC HEALTH LEGISLATION IN FORCE IN THE DISTRICT

1. New Streets (adopted 1st April, 1937).
2. Tents, Vans, Sheds and similar structures (adopted 1st September, 1938).
3. Handling, Wrapping and Delivery of Food and Sale of Food in Open Air (adopted 28th August, 1950).
4. Gloucestershire County Council Act, 1956, Section 141, Water Supplies to occupied houses (adopted 1st January, 1957).
5. Gloucestershire County Council Act, 1956, Section 166, Registration of Hairdressers and Barbers (adopted 1st October, 1965).
6. The Building Regulations 1965, (adopted 1st February, 1966).
7. Gloucestershire County Council Act, 1956, Section 154, Registration of Hawkers of Food and their premises (adopted 1st July, 1967).

### VITAL STATISTICS

These statistics give particulars as to the births and deaths in the District, together with certain rates which are compared, where possible, with those for England and Wales, and the County of Gloucester.

A detailed list of the causes of death will be found in Table 4 (p.8).

TABLE 1

								Male	Female	Totals
Live Births:										
Legitimate	..	..	..	..	..	..	..	372	338	710
Illegitimate	..	..	..	..	..	..	..	26	29	55
Total	..	..	..	..	..	..	..	398	367	765
Live Birth Rate per 1000 population										
Area Comparability factor (births)	..	..	..	..	..	..	..	..	..	18.3
Rates of local adjusted Birth Rate to National Rate	..	..	..	..	..	..	..	..	..	1.03
Illegitimate Live Births per cent of total live births	..	..	..	..	..	..	..	..	..	1.10
										7.2

								Male	Female	Totals
Still Births:										
Legitimate	..	..	..	..	..	..	..	4	1	5
Illegitimate	..	..	..	..	..	..	..	4	-	4
Total	..	..	..	..	..	..	..	8	1	9
Still Birth Rate per 1000 total (live and still) births										
Total live and still births	..	..	..	..	..	..	..	..	..	12.0
										774

								Male	Female	Totals
Infant Deaths:										
(Deaths of infants under 1 year of age)										
Legitimate	..	..	..	..	..	..	..	8	5	13
Illegitimate	..	..	..	..	..	..	..	1	-	1
Total	..	..	..	..	..	..	..	9	5	14

Neo-natal Deaths:										
(Deaths of infants under 4 weeks of age)										
Legitimate	..	..	..	..	..	..	..	5	4	9
Illegitimate	..	..	..	..	..	..	..	1	-	1
Total	..	..	..	..	..	..	..	6	4	10

Early Neo-natal Deaths:										
(Deaths of infants under 1 week of age)										
Legitimate	..	..	..	..	..	..	..	5	3	8
Illegitimate	..	..	..	..	..	..	..	1	-	1
Total	..	..	..	..	..	..	..	6	3	9

## INFANT MORTALITY RATES

Total infant deaths per 1000 total live births	.. .. .	18.0
Legitimate infant deaths per 1000 legitimate live births	.. .. .	18.0
Illegitimate infant deaths per 1000 illegitimate live births	.. .. .	18.0
Neo-natal mortality rate -		
Deaths under 4 weeks per 1000 total live births	.. .. .	13.0
Early neo-natal mortality rate -		
Deaths under 1 week per 1000 total live births	.. .. .	12.0
Perinatal mortality rate -		
Stillbirth and deaths under 1 week combined per 1000 total live and still births	.. .. .	23.0

## MATERNAL MORTALITY (including abortion)

Number of deaths	.. .. .	Nil
Rate per 1000 total live and still births	.. .. .	Nil

## DEATHS

	Male	Female	Totals
	257	200	457
Death Rate per 1000 population	.. .. .	.. .. .	10.9
Area Comparability Factors (Deaths)	.. .. .	.. .. .	1.02
Rates of local adjusted Death Rate to national rate	.. .. .	.. .. .	0.99

## POPULATION

The Registrar General's estimate of the population at mid-year 1967 is 37,660 as compared with 53,610 for the previous year, a decrease of 15,950 due to the loss of territory under the boundary revision.

## BIRTH RATE

There were 765 births making the Birth Rate 18.3 per 1000 population, which again compares favourably with the national average 17.2, although it is below that for the previous year. The fall is in keeping with that noted at National and County levels.

## DEATH RATE

457 people died during the year; the Death Rate being 10.9 per 1000 population, somewhat below the national average 11.2.

## INFANTILE MORTALITY

Fourteen infants under one year of age died during the year giving an Infant Mortality of 18.0 such deaths per 1000 total live births. This rate is much the same as the national average 18.3. It will be noted that ten of the babies died in the neo-natal period, that is within one month of birth. Prematurity and congenital deformities are given as the most frequent causes of death.

## MATERNAL MORTALITY

There were no maternal deaths.

## PERINATAL MORTALITY

Still births combined with deaths in the early neo-natal period give the perinatal mortality, valuable for purposes of comparison. The local average 23.0 compares with 22.0 for the County and 25.4 for the Country as a whole.

TABLE 2. Birth, Death and Infantile Mortality Rates in the District for the last five years

	1963	1964	1965	1966	1967
Birth Rate (per 1000 population) .. ..	19.7	20.2	20.4	19.4	18.3
Death Rate (per 1000 population) .. ..	12.0	10.0	10.1	10.3	10.9
Infantile Mortality Rate (per 1000 live births) (deaths of infants under 1 year)	20.4	17.5	19.5	18.2	18.0
Neo-natal Mortality Rate (per 1000 live births) (deaths of infants under 1 month)	18.3	12.6	8.9	12.4	13.0

TABLE 3. For Comparison, the Birth, Death and Infantile Mortality Rates for England and Wales etc. are given below

	England and Wales	County of Gloucester	Gloucester Rural District
Live Births .. .. .	17.2	18.2	18.3
Still Births (per 1000 total, live and still births) .. .. .	14.7	12.0	12.0
Infantile Mortality Rate, per 1000 live births (deaths of infants under 1 year) .. .. .	18.3	15.0	18.0
Neo-natal Mortality Rate, per 1000 live births (deaths of infants under 1 month) .. .. .	12.5	11.0	13.0
Perinatal Mortality Rate (stillbirths and deaths of infants under 1 week)	25.4	22.0	23.0
Death Rate (per 1000 population) ..	11.2	10.1	10.9

# CAUSES OF DEATH IN THE DISTRICT IN 1967

Table 4 gives the causes of death in the District in accordance with the abbreviated list of 36 groups of the World Health Organisation Nomenclature Regulations, 1948.

TABLE 4.

Causes of Death							Male	Female
1.	Tuberculosis, respiratory	..	..	..	..	..	2	-
2.	Tuberculosis, other	..	..	..	..	..	-	-

35.	Suicide	..	..	..	..	..	3	-
36.	Homicide and operations of war	..	..	..	..	..	1	2
TOTAL							257	200

Explanatory Note.

\* Neoplasm = Cancer

## Cancer

TABLE 5. Death Rates from Cancer per 1000 population

	England and Wales		Gloucester Rural District	
	M	F	M	F
Cancer of the Lung ..	0.999	0.189	0.808	Nil
Other Cancer .. ..	1.531	1.842	1.4	1.7

Seventeen persons died from cancer of the lung, all of them were men. However there was no undue mortality from this cause; the local rates for all forms of cancer, being below the national average.

## GENERAL PROVISION OF HEALTH SERVICES IN THE DISTRICT

### Laboratory Facilities

The examination of pathological specimens, and the bacteriological analyses of water, milk and ice-cream samples, etc., are carried out by the Public Health Laboratory Service at the Gloucester Royal Hospital. (There is no charge for this work).

Chemical analyses of samples of food, water and sewage taken by this department, are examined by the City and County Analyst, Bristol.

### Hospitals

Infectious disease cases are admitted to the Isolation Hospital at Over, which is administered by the Gloucester, Stroud and Forest Management Committee.

### Child Welfare Centres

These Centres are under the general administration of the North Gloucestershire Area Health Sub-Committee of the County Council.

Meetings of Child Welfare Centres are held at Brockworth, Churchdown, Eastington, Frampton-on-Severn, Hucclecote and Barnwood, Innsworth, Longlevens Norton, Quedgeley, Upton-St-Leonards, Newnham & Westbury-on-Severn. There is also a Mobile Child Welfare Centre which serves the Tirley and Maisemore areas.

These centres are most useful, nearly all mothers with babies attend. The bulk of the work falls upon the ladies of the Voluntary Committees. The community is much indebted to them for their devotion to this service.

### Home Help Service

This service is organised by the County Council and is provided where the need for domestic help is supported by the family doctor. Appeals for help should be made to Mrs. P. Allen, Assistant Home Help Organiser, telephone Gloucester 21444.

Part time home helps are at work in the district.

### National Assistance Acts, 1948 and 1951

Under these Acts the Council have authorised the Medical Officer of Health to apply, when necessary, to the Courts for an Order for the compulsory removal, to a hospital or residential home, of aged and sick persons, living in insanitary conditions and unable to provide for themselves and who are not receiving proper care and attention.

No application was made to the Court for an Order to remove any person to hospital during the year under review.

The Home Help Service is invaluable in enabling elderly people to carry on in their own homes.

### Meals on Wheels

The Women's Royal Voluntary Service act as the agent of the County Welfare Department for a meals-on-wheels service in the Rural District. The financial deficit on the service is made up by equal contributions from the County Council and District Council. At present the whole of the Rural District is not covered by the service but is expected to be provided wherever there is a need.

A local voluntary organiser is responsible for each scheme. Mrs. D. Stone, W.R.V.S., Rose Cottage, Amberley, undertakes the promotion of the service as a whole.

TABLE 6. Notification of Infectious Diseases in 1967 by Age Groups

Disease	0 +	1 +	3 +	5 +	10 +	25 +	45 +	65 +	Age N.K.	Total

Totals .. ..	34	125	152	156	19	8	3	6	-	503

### Immunisation against Diphtheria

The following table shows the number of children immunised against diphtheria during 1967.

TABLE 7.

Age at 31.12.67 i.e. born in year	Under 1 1967	1 1966	2-4 1965-63	5-14 1962-53	Under 15 Total
Primary Immunisation	131	330	42	52	555

Table of comparison showing the number of children immunised against diphtheria in 1964, 1965, 1966 and 1967 and the number of births in 1967.

TABLE 8.

No. of live births 1967	Primary Immunisation				Re-inforcing Injection			
	1964	1965	1966	1967	1964	1965	1966	1967
765	1084	973	865	555	1708	2369	1511	1079

### Vaccination against Whooping Cough

The following table shows the number of children vaccinated against whooping cough. A triple vaccine (Diphtheria, whooping cough, tetanus) is used in Child Welfare Centres as a routine.

TABLE 9.

	Under 1 yr.	1 yrs.	2-4 yrs.	5-14 yrs.	Under 15
	1967	1966	1965-63	1962-53	Total
Primary vaccination	129	323	39	1	492

### Immunisation against Tetanus

The numbers of children immunised against tetanus approximates to those for diphtheria and whooping cough.

## Vaccination against Poliomyelitis

Freedom from cases of poliomyelitis in the district is due to the success of vaccination against this disease. The efforts of all concerned need to be sustained in order to maintain a high percentage of immunised persons.

### Scarlet Fever

Fifty-five cases of scarlet fever were notified; twelve more than in the previous year, but the disease remained mild in character.

### Whooping Cough

Only eleven cases were notified; a decrease of twenty from the previous year. The incidence of whooping cough is very low due to the general acceptance of vaccination against the disease.

### Measles

Four hundred and thirteen cases were notified as compared with 390 in the previous year. There were no deaths.

### Diphtheria

There has been no case of diphtheria in the District since 1951. This is undoubtedly due to the continued success of the campaign for immunisation against the disease.

### Acute Poliomyelitis

No cases occurred in the District.

### Dysentery

No case was notified during the year.

### Food Poisoning

#### Annual Return of Incidents and Cases

General Outbreak	-	Nil
Family	"	- Nil
Sporadic Cases	-	Nil

## Vaccination against Smallpox

Persons vaccinated in year ended 31st December, 1967

TABLE 10.

Under 1 yr.		1 yr.		2 - 4 yrs.		5-14 yrs.		Total	
Vac.	Revac.	Vac.	Revac.	Vac.	Revac.	Vac.	Revac.	Vac.	Revac.
19	-	238	-	69	2	8	13	334	15

The number of vaccinations against Smallpox represents about 50% of the number of births.

## Tuberculosis

TABLE 11. This Table shows the new cases, in-transfers and deaths for Tuberculosis, for the past 21 years.

Year	Pop. of District	New & I. T. Cases	Per 1000 Pop.	Deaths	Per 1000 Pop.	Number on Register	Per 1000 Pop.
1946	31,550	53	1.7	17	0.54	176	5.6
1947	31,960	63	1.9	15	0.45	205	6.4
1948	33,540	54	1.6	21	0.62	201	6.0

Modern treatment of Tuberculosis is most successful as is shown by the declining death rate from this disease. However fourteen new cases occurred, evidence of many sources of infection. Keen investigation is made in each case to find the source of infection, and to trace contacts in order to prevent spread. It is by such means, together with the ready acceptance of B.C.G. vaccination and use of the Mass Radiography service, that Tuberculosis can be eradicated.

#### Families at Risk

The scheme agreed between the County Council and District Council for the rehabilitation of problem families living in Council houses continued to operate during the year. Where arrears of rent are such as to render the family liable to eviction the case is referred to the County Social Welfare Officer and if it is accepted the County Council guarantee 75% of the rent arrears.

One hundred and thirty-six families were investigated under the Rent Guarantee Scheme.

When family circumstances of this nature become a matter of concern, the Divisional Medical Officer of Health calls a meeting of representatives of the various social agencies so that a common effort may be made to sustain the family.

#### Public Health (Aircraft) Regulations, 1952-62

##### Staverton Airport

In connection with the on-call customs facilities granted to Staverton Airport, the Council made arrangements for Health Control at the Airport.

Dr. H. G. Dowler, Dr. C. H. Drake, Dr. J. S. Prior and Dr. S. Knight, are appointed to act as authorized officers under Regulation 5 (a) of these Regulations.

## Danger to Bathers - River Severn

Regular visits continued to be made by Officers of this Department to places along the River Severn where bathing may take place in order to ensure that warning notices and life-buoys erected in conjunction with the Parish Councils, were in good repair.

It is regretted that owing to vandalism constant vigilance is necessary to ensure prompt replacement of life-saving equipment.

## REPORT OF THE ENGINEER AND SURVEYOR

Mr. J.S. Hopkins, C.Eng., A.M.I.Mun.E., M.R.S.H.

### Sewerage and Sewage Disposal

The Whitminster Sewerage Scheme has been completed and the design of a larger works at Frampton-on-Severn, to deal with the sewage from Whitminster, has been investigated by the Ministry of Housing and Local Government.

The Hardwicke and Quedgeley Sewerage and Sewage Disposal Scheme and the Scheme at Tirley have also been investigated by the Ministry's Inspector. Considerable pressure has been put upon the Minister to release these schemes for construction and it is hoped that they will be released early in 1968.

The Longford re-drainage scheme, part of which is now included within the City boundaries, has been deferred by the Ministry due to the present economic situation. The list of Sewerage Schemes now under consideration has increased and the Department has been under pressure both with these and with the result that matters of sewerage are constantly under attention.

The design of the next extension to the Longford Main Drainage Works has been programmed and should be submitted to the Ministry early in 1968. Good relations have continued with the Severn River Authority both with regard to pollution and to the problems which will arise from storm water in the area.

### Refuse Collection

Although the change in boundaries took place in April, the City requested that refuse collection in those areas taken over be continued by the Rural District until the City were in a position to be capable of making a collection themselves. This continued until August.

The establishment has now been reduced and re-organised to provide the usual weekly service in the District.

J. S. HOPKINS

Engineer and Surveyor

REPORT OF THE CHIEF PUBLIC HEALTH INSPECTOR

Mr. S. W. D. Harris, C.S.I.B., M.A.P.H.I., M.R.S.H.,

The work of the Department is mainly concerned with maintaining and, where possible, improving the living conditions of the public. For this purpose Local Authorities are required to administer comprehensive legislation embracing housing, the hygienic condition, preparation and sale of food, air pollution, noise control, caravan sites, pest control, etc. and the working conditions of persons employed in factories and offices.

The extent to which the continuing demand for a higher environmental standard can be met depends not only upon the Council's capacity to execute the various schemes, but also upon the availability of adequate finance during a period of financial restraint. In spite of this, however, some progress was made, and in September, Ministry Inquiries were held into the Hardwicke and Quedgeley and Tirley drainage schemes, the outcome of which was anticipated early in the New Year.

Difficulties continue to be experienced in relation to intensive farming units and in an attempt to minimise the effect on nearby residents, closer liaison is being sought with the Planning Authority. It is inevitable that food production must keep pace with the needs of a rapidly increasing population, but this should not be allowed to prejudice the health and comfort of the indigenous community. One wonders for how much longer local authorities can continue to safeguard the health of their ratepayers having regard to the shortcomings of legislation enacted over 30 years ago.

Visits and inspections carried out and general statistical information relating to the Department is presented in tabular form and matters of particular interest are amplified in the accompanying text.

I am indebted to the Council and my colleagues in other Departments, also the Gloucester Public Health Laboratory and the Public Analyst in Bristol, for their support and co-operation during the year.

A list of legislation, official circulars and reports affecting the work of the Department, which were issued during the year is given overleaf.

S. W. D. HARRIS  
Chief Public Health Inspector

The increase in the number of visits carried out during the year was due mainly to the pilot survey of housing, which was carried out in accordance with the procedure recommended by the Ministry of Housing and Local Government. This is now being followed by the survey proper, which, is, of course, a more detailed examination, and which, of necessity, will be somewhat protracted.

The number of notices served fell sharply, and it was particularly pleasing to note the improvement in so far as food premises and petroleum installations were concerned. Wherever possible results are achieved by persuasion and personal contact rather than by enforcement, and in this the Council's officers follow the generally accepted national pattern in public health. Only in intractable cases, or where the statute or urgency require it, is formal action normally recommended.

## WATER SUPPLIES

### Public Health Acts, 1936 and 1961

### Rural Water Supplies and Sewerage Acts, 1944 - 1961

### Water Act, 1945

### Water Resources Act, 1963

On 1st April, 1965, the North-West Gloucestershire Water Board assumed responsibility for the supply of water throughout the Council's District. Regular consultations take place between officers of the Board and this Department on matters of mutual concern and in particular the provision of mains water to the remaining parts of the District which are supplied by wells.

In addition, Gloucestershire County Council, Frocester Court Estate and Haresfield Estate operated local systems for the supply and distribution of water to small areas of the District. Concern was expressed in the previous report as to the quantity and quality of water from the Frocester Court Estate supply and it will be noted from the next Table that the scheme for supplying mains water to the village was completed during 1967.

Complaints regarding discolouration of mains water continue to be received, particularly during the summer months. The Water Board do their best to ameliorate this condition by flushing the affected mains, but it is inevitable that complaints will continue until the long-term remedial measures are completed.

The following details which have been supplied by the North-West Gloucestershire Water Board show how effectively the Rural District Council have discharged their statutory responsibility for securing a wholesome water supply for their District.

## Well Water Supplies

Although the percentage of properties in the District which are not provided with a mains water supply continues to decrease, it was still found necessary to submit twenty samples of well-water for analysis. Of these, sixteen were found to be unfit for human consumption, and appropriate steps were taken to ensure that the persons affected were given suitable advice.

It is interesting to note that prejudice against mains supplies still exists, and that in many parts of the District, even where the main is available, individuals are to be found who forcibly defend their preference for their own well-water supply.

## RURAL SANITATION

### Cleansing of Cesspools

Once again it is gratifying to report that this service has functioned satisfactorily during the year. The Council's Contractors have been most co-operative, and in view of the number of vehicles at their disposal it has been possible to maintain a prompt and efficient service.

Under the terms of the Contract the Contractors have to arrange for the emptying of tanks and also the ultimate disposal of their contents. In adverse weather conditions, it has been difficult on occasions to find suitable disposal points locally, and this has necessitated very long hauls for the vehicles. In spite of this difficulty the service has run smoothly and very few complaints have been received, in spite of the fact that the number of loads which were required to be removed increased to almost two thousand.

## ATMOSPHERIC POLLUTION

### Clean Air Act, 1956

Even apparently trivial complaints of atmospheric pollution frequently require many visits before problems are settled, and in no case is this more evident than that of the garden bonfire. There is no doubt that considerably discomfort and distress are caused to neighbours, quite unintentionally and unwittingly, by otherwise model citizens who see no harm in indulging in this time-honoured practice. The greatest tact and patience are required of the public health inspectors in this field and this is manifested by the comparison between the number of visits made and the number of notices served.

The Council have powers under Section 16 of the Clean Air Act, 1956, to deal with nuisance from bonfires, and at the times of the year when they are most prevalent, it has become the Council's normal practice to draw the public's attention to this by the insertion of a Public Notice in the local press.

## NOISE ABATEMENT

### Noise Abatement Act, 1960

During the year forty-three visits were made by public health inspectors following complaints from residents.

Although most of the complaints which were received had as their source either industrial or commercial activities it has been suggested that, in the home itself, noise generated by modern domestic aids such as vacuum cleaners, dish washers, washing machines, ventilator fans etc., may have an adverse effect upon the family's health, and in particular, that of the housewife.

For many years acoustical engineers have been engaged in noise reduction programmes and research in factories and offices, and, more topically in relation to traffic noise. In domestic kitchens however, modern hygienic practice, manifested by the growing predominance of stainless steel and smooth plastic surfaces results in the magnification of noise rather than in its suppression. The non-absorbent materials used, so effective in improving hygiene, have a contrary effect in regard to noise. It remains to be seen whether the large commercial undertakings, in whose hands the practical solutions ultimately lie, will consider a research programme justifiable in terms of expenditure and return.

Traffic noise has been a constantly growing problem and legislation is likely to be enacted to take effect some time in 1968.

It is expected that there will be some modifications to the recommendations made in the 1963 report of the Wilson Committee on the Problem of Noise, and that the permitted maximum noise limits will be up to 90 decibels for motor cycles, depending upon their size, 92 decibels for heavy vehicles, 87 decibels for passenger cars, and 88 decibels for light goods vehicles.

The following table, reprinted from the DAWE Digest, published by DAWE Instruments Limited, gives an indication of comparative noise from various sources. While the table is extremely useful as a guide, it must be realised that only rarely do the complex conditions found in practice allow straightforward comparisons to be made.

Noise	Decibels	Sound Pressure Dyne/Cm <sup>2</sup>	Typical Examples
Painful	120	200	
Deafening	110		Jet aircraft at 500 ft. Inside boiler making factory Near pneumatic drill Motor horn at 20 ft.
	100	20	
Very loud	90		Inside tube train Busy street Workshop Small car at 24 ft.
	80	2	
Loud	70		Noisy office Inside small car Large shop Radio set - full volume
	60	0.2	
Moderate	50		Normal conversation at 3 ft. Urban house Quiet office Rural house
	40	0.02	
Faint	30		Public library Quiet conversation Rustle of paper Whisper
	20	0.002	
Very faint	10		Quiet church Still night in the country Sound-proof room Threshold of hearing
	1	0.0002	

## CARAVAN SITES

### Caravan Sites and Control of Development Act, 1960

The phased "run-down" of a large caravan site in the District continued during the year. It had been expected that the number of caravan dwellers being displaced might impose a serious strain upon the Council's ability to rehouse families in urgent need, but for various reasons this situation did not arise. Adaptation of the site for building purposes did not proceed at the expected rate, mainly because of national conditions, and consequently no great difficulty was experienced in absorbing families leaving the site.

The provision of sites for the accommodation of gypsies and other travellers was considered at the request of the Minister of Housing and Local Government, at a Conference of Local Authorities held at the Shire Hall, Gloucester in September. It was generally agreed that a comprehensive policy, taking account of conditions over a large area, rather than in individual Districts, should be formulated. This opinion, together with relevant proposals, was sent to the Minister by the County Council, and in October, information on the same subject was sought by the Rural District Councils Association.

An indication was given that it was proposed to introduce legislation in 1968, which would place a statutory duty upon certain authorities to provide an adequate number of camps for gypsies and others, and the Association of Public Health Inspectors announced that they were to hold a Conference in London early in 1968. The Council considered this announcement and in view of the importance of the subject decided to be represented at the Conference. No further information became available during the year.

## PREVENTION OF DAMAGE BY PESTS ACT, 1949

The Department's functions under the above-mentioned legislation have again been carried out efficiently and without having to resort to formal proceedings.

All of the Council's depots, sewerage systems and other open spaces have been inspected during the year under review. Where infestations have been found the necessary treatments have been undertaken and continued until negative results were obtained from baiting.

In view of its safe nature, as far as humans and domestic pets are concerned, and the satisfactory results obtained, "warfarin" continues to be the principal rodenticide used by the Council's operatives for the control of rats and mice.

During the year "warfarin" resistance was reported for the first time in Gloucestershire, but there was no evidence of this in the Council's District.

## Food Hygiene

Towards the end of the year a routine food inspection visit made by one of the Public Health Inspectors, led to the discovery of a food importing business operated from a private house in the Council's area .

The business consisted essentially of the importation of frozen lobsters direct from the West Indies, with the object of selling them mainly to the local catering trade.

Unfortunately, the bacteriological condition of the lobsters was most unsatisfactory, and indicated that they had been subjected to faecal contamination during or after processing.

Immediate action was taken to inform other local authorities thought to be involved, and a comprehensive scheme of sampling and examination was put into operation.

After consultation with the Public Health Laboratory Service and the Importers, it was concluded that no satisfactory and feasible method of re-processing the lobsters could be adopted, and consequently about £500 worth of stock was surrendered for destruction.

In view of the obvious risks of widespread food poisoning, the Importers decided to discontinue this line of business. Furthermore, to avoid any recurrence of the circumstances either in this District or elsewhere, the Department notified the Ministry of Health in the hope that the matter would be taken up with the West Indies' Administration.

This incident was an unusual one, but it's occurrence makes one acutely conscious of the large burden which will inevitably fall upon inland authorities for the inspection of imported food, when "containerisation" \* becomes regular practice.

Note: \* "Containerisation" - The use of bulk containers which are sealed in the Country of origin, and remain unopened until final delivery

## Ice Cream

During 1967, ten licences were issued under Section 16 of the Food and Drugs Act, 1955 for the sale of ice cream.

## Anthrax Order, 1938

No cases of anthrax were confirmed during the year.

## Slaughterhouses

The following slaughterhouses were licensed in 1967.

1. Churchdown, Chapel Hay
2. Eastington, Alkerton Place
3. Minsterworth, The Flatt
4. Brookthorpe-with-Whaddon, Brickhouse Farm
5. Hempsted, Sudmeadow Road

As a result of boundary changes the slaughterhouse at Hempsted was transferred from the Council's control. However, the demands on the Department's time in terms of visits required, both during and after office hours, were only slightly reduced.

This was due in some degree to the more stringent inspection conditions laid down in the Meat Inspection (Amendment) Regulations, 1966, and to the opening of a new slaughterhouse at Eastington in replacement of the very inadequate existing one.

The loss of the Hempsted slaughterhouse, which was, of course, conveniently accessible from the office, did not affect materially the overtime meat inspection problem. Comparatively little slaughtering was done there outside normal office hours, which is in direct contrast to the pattern established over many years in the small, widely scattered, privately owned slaughterhouses in the District. In these it is not economical for slaughterhouse operators to employ full-time staffs, because of the small throughput, and slaughtering is done mainly at evenings and weekends. This in turn involves the public health inspectors in unavoidable overtime work, and it does not appear that this trend is likely to change.

TABLE 17. Carcasses and Offal inspected and condemned in whole or in part.

	Cattle Exclu- ding Cows	Cows	Calves	Sheep & Lambs	Pigs	Total
Number killed (if known)	1757	84	169	9039	5001	16050

## PUBLIC HEALTH ACT, 1936

### Health Education

The Department has again been active in the field of health education and several visits have been made to organised groups to deliver lectures on various aspects of environmental health.

Interested organisations are contacted at regular intervals and details supplied relating to the subject matter upon which talks and lectures are available. From requests received, it is apparent that people are becoming more interested in the environment in which they live, and are alive to the threat to health which is associated with high noise levels, atmospheric pollution and many other facets of everyday life which they tended, until recent years, to accept.

It is felt that this is a useful service for many reasons, not the least of which is that it enables members of the public to meet the public health inspector and to put their problems to him. The passage of information is therefore in two directions and this is of considerable value as knowledge gleaned from this source is put to good use in utilising the resources of the department to the best advantage.

Members of the department are available at all times to attend meetings of recognised organisations and whilst it is desirable that reasonable notice be given, lectures and demonstrations can frequently be arranged at short notice.

It is considered that this service is appreciated by members of the public as it is not unusual to have several requests to talk to the same organisation on different subjects.

# NEW HOUSING, 1967

TABLE 19.

## Number of dwellings erected during the year:

### By the Council:

Churchdown (Grove Road)	..	..	..	..	..	..	..	..	69
Westbury-on-Severn (Westbury Court Gardens)	..	..	..	..	..	..	..	..	8
Whitminster	..	..	..	..	..	..	..	..	6

By Private Enterprise .. .. . 178

Total .. . 261

## Number of dwellings under construction at 31st December, 1967:

### By the Council:

Upton-St.-Leonards (Ash Path)	..	..	..	..	..	..	..	..	53
-------------------------------	----	----	----	----	----	----	----	----	----

By Private Enterprise .. .. . 240

Total .. . 293

## Number of Council Houses sold to tenants in 1967:

NIL

Number of dwellings owned by the Council at 31st December, 1967: 2,198

## Number of applicants on Council's Housing List:

At 31st December, 1966 .. .. . 681

At 31st December, 1967 .. .. . 494

## Housing Progress:

## Number of dwellings erected from 1st April, 1945 to 31st December, 1967:

By the Council and local housing society .. .. . 2294

By Private Enterprise .. .. . 6204

# HOUSING ACT, 1957

## Housing in Clearance Areas and

### Unfit Houses Elsewhere

TABLE 20.

#### Houses Demolished During the Year:

Number of houses demolished	..	..	..	..	..	..	..	1
Persons displaced	..	..	..	..	..	..	..	-
Families displaced	..	..	..	..	..	..	..	-

#### Unfit Houses Closed During the Year:

Number of houses closed	..	..	..	..	..	..	..	6
Persons displaced	..	..	..	..	..	..	..	5
Families displaced	..	..	..	..	..	..	..	1
Unfit Houses made fit	..	..	..	..	..	..	..	23

The figures above relate, of course, to formal action under the provisions of the Housing and Public Health Acts, and represent only a small part of the work which was undertaken by the Department during the year.

In all, 1,456 housing visits were made by the public health inspectors in 1967, more than double the figure for the previous year. A large number of these visits were made during the course of the pilot housing survey already referred to following Table 13, and the early indications arising out of this preliminary investigation are that previous estimates of the condition of the District's housing stock have been somewhat optimistic. This follows the national pattern indicated in the Ministry's report on older properties, and it remains to be seen whether the results of the detailed survey which is to be commenced early in 1968 will confirm these findings.

Administration of the Factories Act, 1937 to 1961

PART I

TABLE 21. A. Inspections for the purpose of provisions as to health

Premises	No. of premises in Register	No. of In- spections	No. of Written Notices	No. of Occupiers Prose- Cuted
(i) Factories in which Secs. 1, 2, 3, 4, and 8 are to be enforced by Local Authorities ..	7	-	-	-
(ii) Factories not included in (i) in which Sec. 7 is enforced by the Local Authority ..	80	61	-	-
(iii) Other premises in which Sec. 7 is enforced by the Local Authority (excluding out-workers)	49	5	-	-
Total .. ..	136	66	-	-

TABLE 22. B. Cases in which defects were found

Particulars	Number of cases where defects were found				No. of Cases in which Prosecutions were instituted
	Found	Reme- died	Referred		
			to H.M.I.	by H.M.I.	
Want of cleanliness (S.1) ..	-	-	-	-	-
Overcrowding (S.2) .. ..	-	-	-	-	-
Unreasonable Temp. (S.3) ..	-	-	-	-	-
Inadequate Vent. (S.4) .. ..	-	-	-	-	-
Ineffective drainage of floors (S.6) .. ..	-	-	-	-	-
Sanitary conveniences (S.7) ..	-	-	-	-	-
(a) insufficient .. ..	-	-	-	-	-
(b) Unsuitable or defective	-	-	-	-	-
(c) not separate for sexes ..	-	-	-	-	-
Other offences against the Act (not including offences relating to Outwork) .. ..	1	1	-	-	-
Total .. ..	1	1	-	-	-

Administration of the Factories Act, 1937 to 1961

PART VIII

OUTWORK

No Outworkers were listed in the District during 1967.

Factories Act inspections are combined where possible with visits under the provisions of the Food Hygiene (General) Regulations, 1960, the Clean Air Act, 1956, and the Petroleum Regulations etc.,.

OFFICES, SHOPS AND RAILWAY PREMISES ACT, 1963

TABLE 24.

							Number of registered premises receiving a general inspection during the year
Offices	..	..	..	..	..	..	37
Retail Shops	..	..	..	..	..	..	58
Wholesale shops, warehouses	..	..	..	..	..	..	--
Catering establishments open to the public canteens	..	..	..	..	..	..	10
Fuel storage depots	..	..	..	..	..	..	1
Total	..	..	..	..	..	..	106

The working conditions of industrial workers have been controlled by the Factories Acts for many years. This control did not apply to persons working in offices, shops and similar premises, who comprised a substantial part of the nation's working population. Local Authorities are required to administer much of the above-mentioned Act of which parts came into force on the 1st May 1964, and the remainder on the 1st August 1964. In addition to the control of cleanliness, temperature, lighting, ventilation, and washing arrangements, the Act also lays upon local authorities responsibilities for investigating and dealing with accidents arising on these premises.

Responsibility for safety is a new departure for local authorities and no accidents were reported during the year.

Advice was given during routine inspections of premises on the lighting of work areas. It had been hoped that by this time guidance as to lighting standards would have been given in the form of Regulations, but the Minister has been so far unable to arrive at a universally acceptable standard. In the meantime advice continues to be based on the Code evolved by the Illuminating Engineering Society of Great Britain.

## PETROLEUM ADMINISTRATION

With the continuing increase in the number of motor vehicles using the roads, the sale of petroleum rises year by year. Many of the garages and filling stations, particularly those situated on the main "through routes" have increased their storage capacity within recent years to cater for this need. It would seem that the needs of the motorist, in this respect, are being catered for adequately at the present time, as no new tanks were installed in the year under review.

The emphasis, at filling stations, is now being concentrated upon alternative means of vending. In order to obtain the maximum use from the tanks installed on the premises. A comparatively recent innovation is the "Blender Pump" which permits a selection of petrol grades to be dispensed from one pump. Further enquiries have been received from Petrol Companies, concerning the installation of "self service" petrol pumps and visits have been made by officers of the Department to other authorities to see these installations in use and to assess the dangers involved and the best means of combating them. There can be no doubt that the self service dispensing of petroleum is here to stay and it would be naive to assume that this method of vending can be prohibited. It must be recognised however, that there are inherent dangers present where members of the public are allowed access to such a dangerous commodity, and stringent conditions must be imposed to ensure maximum safety.

The fire fighting facilities at a large bulk storage depot gave cause for some concern, but following meetings with representatives of the Gloucestershire Fire Service and the Company concerned, steps are being taken to bring about an improvement.

No accidents connected with the handling of petroleum spirit were reported during the year.

The number of premises licensed to store petroleum spirit during 1967 was 103 and this represented a total storage capacity in excess of  $2\frac{3}{4}$  million gallons.

S. W. D. Harris

Chief Public Health Inspector.
