CHARLES H. D. ROBBS,

Medical Officer of Health.

April, 1924.

Gentlemen,

I have the honour to submit my Seventeenth Annual Report on the Health and Sanitary Condition of the Rural District for the Year 1923.

I. GENERAL STATISTICS.

Area	-	-	-	85,827 acres.

	Total.	Males.	Females.
	17.	9.	8.
Rate per 1000 Births	-	-	64.1 per
Average Death Rate, England and Wales	-	-	69.

The statistics for the District show no very marked departure from the average for England and Wales during the year, the Birth Rate and Death Rate being slightly above the average, whilst the Infantile Birth Rate is lower than that for the whole of the country.

The low level of the Death Rate and, more particularly, of the Infantile Death Rate, are very satisfactory.

The mortality records show no very striking feature. There are ten deaths from tuberculosis, five being pulmonary, and 19 deaths from cancer.

Of infectious diseases, measles and whooping cough show one death from each, influenza three deaths, and the obscure encephalitis lethargica caused one death. There was one fatal case of infantile diarrhoea. There was no death from puerperal sepsis.

It will be seen that the notifications received during the year were again few in number. It is probable that the notification of pneumonia and tuberculosis, particularly in the latter case of non-pulmonary disease, is far from complete.

The outstanding feature was the occurrence of a case of Small-Pox, in the village of Ropsley. It was not possible to trace definitely the source of infection. The patient, who had a severe type of disease, was conveyed to the Rural District Isolation Hospital with the minimum of delay, and made a satisfactory convalescence. When the very large number of cases of small-pox which occurred in the country during 1923 is considered, it is satisfactory that no other cases occurred in your district. It is to be noted with regret that the inhabitants of the villages adjacent to the infected area did not take the opportunity to be vaccinated free of cost to nearly so large an extent as might have been the case.

It was not considered necessary to open the Isolation Hospital for any other infectious case.

A further note may be made on the subject to tuberculosis. Of the six patients notified as suffering from Pulmonary Tuberculosis, one died during the year, the four other deaths from this disease being cases which had been notified previously.

CAUSES OF SICKNESS.

There had been no marked feature during the year. Epidemics have not been present, and the general health has been good.

NURSING ARRANGEMENTS.

There is nothing to be added to the Summary contained in the Report for 1921. Ambulance facilities are available both for infectious and non-infectious cases, and the motor ambulance which is used both by the Borough of Grantham and the Rural District has been of very great service, particularly in conveying patients to the Grantham Hospital.

Arrangements for the examination of pathological material continue, and diphtheria anti-toxin is supplied free to practitioners.

SANITARY ADMINISTRATION.

On the advice of the Medical Officer of Health, the Council decided to make Chicken-Pox a notifiable disease, and this came into operation in January, 1924.

A summary of the work of the Sanitary Department, and action taken under the Public Health Acts, will be found in the Sanitary Inspector's Report, together with statistics as regards Housing.

It will be seen that there has been very little Building during the year in the district. It is probable that in 1924 there will be a decided increase.

Yours faithfully,

C. H. D. ROBBS.
