Dear Sir.

Will you kindly  
inform me if there is a  
vacancy at the Retreat for  
a male patient & if so what  
the lowest terms are at which  
he could be admitted.

I should be grateful if you 2  
would give me any information  
about the necessary steps

which have to be taken to  
gain admittance to an Asylum.

The patient - William Denton,  
who is my nephew & has lived  
with us for some years past,  
has been deficient from birth.  
he is now about 35 years old.  
And our Doctor advises us  
to have him put in an Asylum  
as he is becoming more &  
more difficult to manage.

Is it necessary to have  
certificates from two magistrates

as well as a Doctor & must  
he be certified as insane?

Yours faithfully,

She would probably find sympathetic companionship in it, in your Asylum.

Secondly, I know that her personal welfare would be your first consideration & Thirdly, what ever happened to her I should feel satisfied that she was surrounded by religious influences.

Being however at a loss & unable to decide, I think it is best to ask you whether you can recommend any doctor's house where my sister could go & enjoy religious surroundings & a little intelligent society. If not will you tell me if it would be possible for my sister to have in your Asylum special privileges not granted to those who are not quite so well as herself, or who are perhaps, not so well able to afford them - My sister had a fine mind. She has had a medical education. She is of a gentle disposition & all her nurses become attached to her. I should not like her to be again under such rigorous rule as was exercised at

her twice in the course of the year,  
because the <sup>good</sup> arrangements did not  
prove satisfactory. She has  
now been for 6 months with  
Dr. James Adams, whose letter  
I enclose. For several reasons,  
I do not wish her to remain in  
Eastbourne. One is she runs

the risk of being excited by meeting  
relatives there.

On the other hand I hesitate to place  
her again in an Asylum, where she  
would associate with Patients not  
so well as herself.

I also think that the weather at  
York would be rather bleak for  
her in the coldest part of the year.

If it were not for these difficulties,  
I would not hesitate to confide her  
to your care for 3 reasons.

First because she is very happy in

Dear Friend,

With regard to the application for admission about which you write, I could not give a definite reply on the subject of terms without first communicating with the Committee. The lowest rate for persons not Friends is 48/- a week, but it is customary to make reductions for those closely connected with the Society, and if it is desirable for this lad to come here no doubt the Committee would do this. I should, however, be loth to receive so young a patient at the Retreat.

You do not give any particulars as to the nature of the case, but if it is one of mental enfeeblement I doubt whether the Retreat is very suitable, as we have no educational appliances, and the Institution is devised to deal with mental disorders of another kind. If you would give me some further particulars I would submit the matter to the Treasurer as there is no meeting of the Committee until the 18th.

Yours very truly,

R. Wilfrid Dale Esq.

Dear Sir,

With regard to the application for admission about which you write, I could not give a definite reply on the subject of terms without first communicating with the Committee. The lowest rate for persons not previously admitted is \$100.00, but it is necessary to make reductions for those closely connected with the society, and if it is desirable for this I am sure we can do so. The Committee would be glad to consider this. I am, however, not in a position to give a definite answer at the present.

You do not give any particulars as to the nature of the case, but if it is one of mental infirmity I doubt whether the treatment is very suitable, as we have no educational appliances, and the institution is devised to deal with mental disorders of another kind. If you could give me some further particulars I should submit the matter to the Treasurer as there is no meeting at the present time.

Dear Dr Bedford Prince,

I have been a long time finding a moment to reply to your query re the medals & from your sketches I see you have thought the thing well out. I could do what you want quite well but should not advise it for one or two reasons. In the first place the medal is much larger than your sketch & by the time it was in a setting sufficiently wide & projecting to protect it. The size of the whole wd be very large & it wd be heavy on appearance. Secondly the position when worn renders it very liable to rubbing or scratching & it wd soon get damaged. 3rdly the head is a work of art & while it looks right worn on the breast in an honoured position, it wd be reduced to the level of a "useful ornament" in a belt & wd lose caste proportionately. I should like to know if there is any difficulty in wearing it as a medal - if there is I would see if I could suggest any other way out have it.

I was thinking much of you one night a week ago. The Art Workers Guild - an old society of artists had "Post Impressionism" for the evening subject & there was a great gathering of the Clans as feeling on both sides runs high. The Committee in a happy moment got Dr. Hypok, the Mental Specialist from Bedlam who ~~was~~ is himself a clever painter & who has made a collection of pictures done by patients. There he had slides made of & put them on the screen & did his best to prove that the post-impressionists were on a lower plane or at the most on the same plane with his patients. He gave us photos of the artist patients - a range of their work during the progress of the disease - the changes being very remarkable & photographs of their brain after death explaining how the part of the brain being affected in different parts probably affected their methods of painting & drawing - or rather putting the subjects on the canvas.

I expect it is very stale news to you but when the lecture was given in the old Hall of Clifford's Inn to a packed audience of many of the best known painters of the day, it seemed rather impressive.

Have you seen the Frazer Show with the Post Impressionists - its a dreadful affair.

With good wishes to you all - Sincerely yours  
Nelson Dawson

And these outbacks  
are terrible, and must  
afraid he will do an  
injury to some of us.

I have the most grateful  
wish, just to send me  
a line, tell me what  
you think best -

Yours sincerely  
Rachel A. Dale.

Dear Sir -

Dr. Pierce -

I am sorry to trouble  
you, but did not  
know anyone of whom  
I could better ask  
advice. When you see  
the name you may  
have some recollection  
of my Brother being  
with you for some months  
6 years ago William Dale

We have had trouble  
with him more or less  
ever since. This Summer  
& Autumn had two  
outbreaks & is very violent  
again last night -  
was troublesome -

Not the least doubt  
he will have large under-  
standing again, & am  
every way. we do not  
feel able to send him  
to the Retreat the expense  
being too great -

Could you please let  
me of any other Asylum

he might go to, where  
the charge would be less.  
There are no or less in  
York I have heard of  
but don't seem to know  
anything about them.

There will be one  
especially appointed  
for the St. Riding I  
suppose in this district  
somewhere -

William stays in bed  
nearly every day until  
noon & will not work  
or take any interest in  
whatever goes on.

My dear Pierce,

The Education Committee sat for such a long time yesterday that I was not in a condition to come out and test the air in your recreation room, but Randles took a cab from New Earswick, kept it waiting, and came back by cab. He estimates the time at about two hours, and he has asked Mytons to put it to your account. I should be glad if you could see your way to pay him a fee of 2/6d. for the work.

The number of people in your recreation hall was estimated at 200. The tests were made from 8.55 on to about 9.30. Hot air was passing over the coils in the early part of the test, and cold air was introduced during the latter part. The temperature readings were: dry bulb 65°F, wet bulb 55°F; hygroscopic state, 51% of possible saturation. The N.E. corner and the centre of the room gave the worst readings - 14.9 of CO<sub>2</sub> per 10,000. The best result was obtained in the S.W. corner - 11.7 of CO<sub>2</sub> - but I suspect this was simply due to the air being drawn from a point further away from the people. The hall was so crowded that it was impossible to get far enough away from the folk to make a fair test, and I think under these circumstances the results may be considered extremely satisfactory. We have recorded 24 of CO<sub>2</sub> in the Council chamber, and still higher figures in the unreformed meeting house. Considering that the entertainment had been running for two hours or more, it is not likely that the proportion of CO<sub>2</sub> would increase if the room had been used for a much longer period.

With kind regards,

Yours sincerely,

*Sam. H. Davis*

Dear Dr. Pierce

I am writing  
to ask if you know Parry's  
address or someone like  
him who would have  
Gerald for a time, we have  
been fortunate in selling

Like Gerald's, of course  
he has quite lost control  
of himself at present, but  
I should be so grateful  
if you would let me know  
of anyone likely to have  
him -

With kind regards

Yours Sincerely •

which he did, but the  
bad part is we pull him  
round & he breaks out again  
in a week his case is  
quite hopeless. I wish we  
could get him into a home  
somewhere.

I have taken a nice little  
house in Doncaster with  
every convenience, perhaps  
you will manage to come.

Dear Dr. Pierce

Thank you for  
yours & enclosed address  
Gerald was indeed the next  
day, so I did not write  
as Dr. Hirst was so kind &  
said he would look after him

& see us someday when we  
are settled, I should be so  
delighted; the trains  
are only 3 minutes from  
us & about 8 mins from  
us to the station so we are  
quite gettable for anyone  
passing through Doncaster  
With kind regards to  
Mrs. Pierce—

Very Sincerely yours  
Wm. J. Dooley

Dear Sir

I am sorry to hear  
from Mrs J. Dooley that  
Dr Dooley has gone  
wrong again. As you  
have been so kind and  
done so much for him  
up to the present, I should  
be glad of your advice  
before any further step  
is taken with reference  
to his future. His father

has left him one  
thousand pounds in  
the hands of trustees  
to be used as they  
may think best for his  
advantage, & over  
which he has no control  
whatever. I can see that  
see that the money can  
be spent usefully it  
goes to his son. I had  
a letter from Mr. Dorey  
saying he was in York  
at present and that

You were kindly looking after him,  
She talks of his going back to the continent  
he has just left. do you think there  
is any use in wanting more money  
on him. I wonder it be better for  
him to go to some of the colonies. I  
am inclined to think he will do  
no good at home. I am inclined  
and one of the trustees, I am

Dear Dr Pearce,

You do not know me, but I was at Bootham three years & so, look upon you as an old friend.

A Manchester friend of mine is trying to find an asylum in the north of England for the son of a dead friend.

I understand that they are not Friends. The widow would be able to pay about £75 a year I believe.

I do not know much about the Retreat, but on being

asked if I knew of any good  
asylum, I naturally thought  
of it.

If the boy is eligible for the  
Retreat (I believe he is incurable)  
& the terms are not too high  
I should be grateful if you  
would let me know & send  
details.

If the terms are a good deal  
higher than I have named,  
perhaps you would not mind  
recommending some other  
asylum, if you know of  
one

yours sincerely  
Percival Davis
