Beverly
28-4-16

Dear Dr Pierce,

Just received the
wire & replied.

I have arranged for a
taxi to come over on Sat
afternoon, to arrive about
5 O'clock, having been
advised by the Undertaker
here as being a better plan.
Very sorry if I have not
let you know as soon
as you expected, but I
thought tomorrow morning
would do. Kindest regards

Yours faithfully
R. J. Shaw

B. MAW,
JEWELLER AND OPTICIAN.

Market Place,
Beverley,

28. 3 - 1916

Dear Sir,

Thank you for the report of my daughter's condition, which is about as anticipated - I wish it could have been better.

Mrs Maw, & perhaps myself also, will be over on Thursday afternoon when I should like you to furnish me with a Certificate as to her condition. She is an employee of the E. R. Education Authority, under 3 months leave, on Dr Gregory's Certificate & now I shall have to furnish another in applying for an extension.

Will you, therefore, give me a Certificate to the effect, that she is under your care & that she is having the best possible treatment, but is unable to return to duty & needs a further period of rest. Thanking you in anticipation

I remain,

Yours faithfully. B Maw

25th March, 1916.

Dear Mr. Maw,

There is no special change to report in Miss Maw's condition.

She seems to be a little stronger, but she still requires feeding, and she is resistive. Her temperature rises from time to time.

I remain,

Yours very truly,

25th March, 1916.

Beverley,

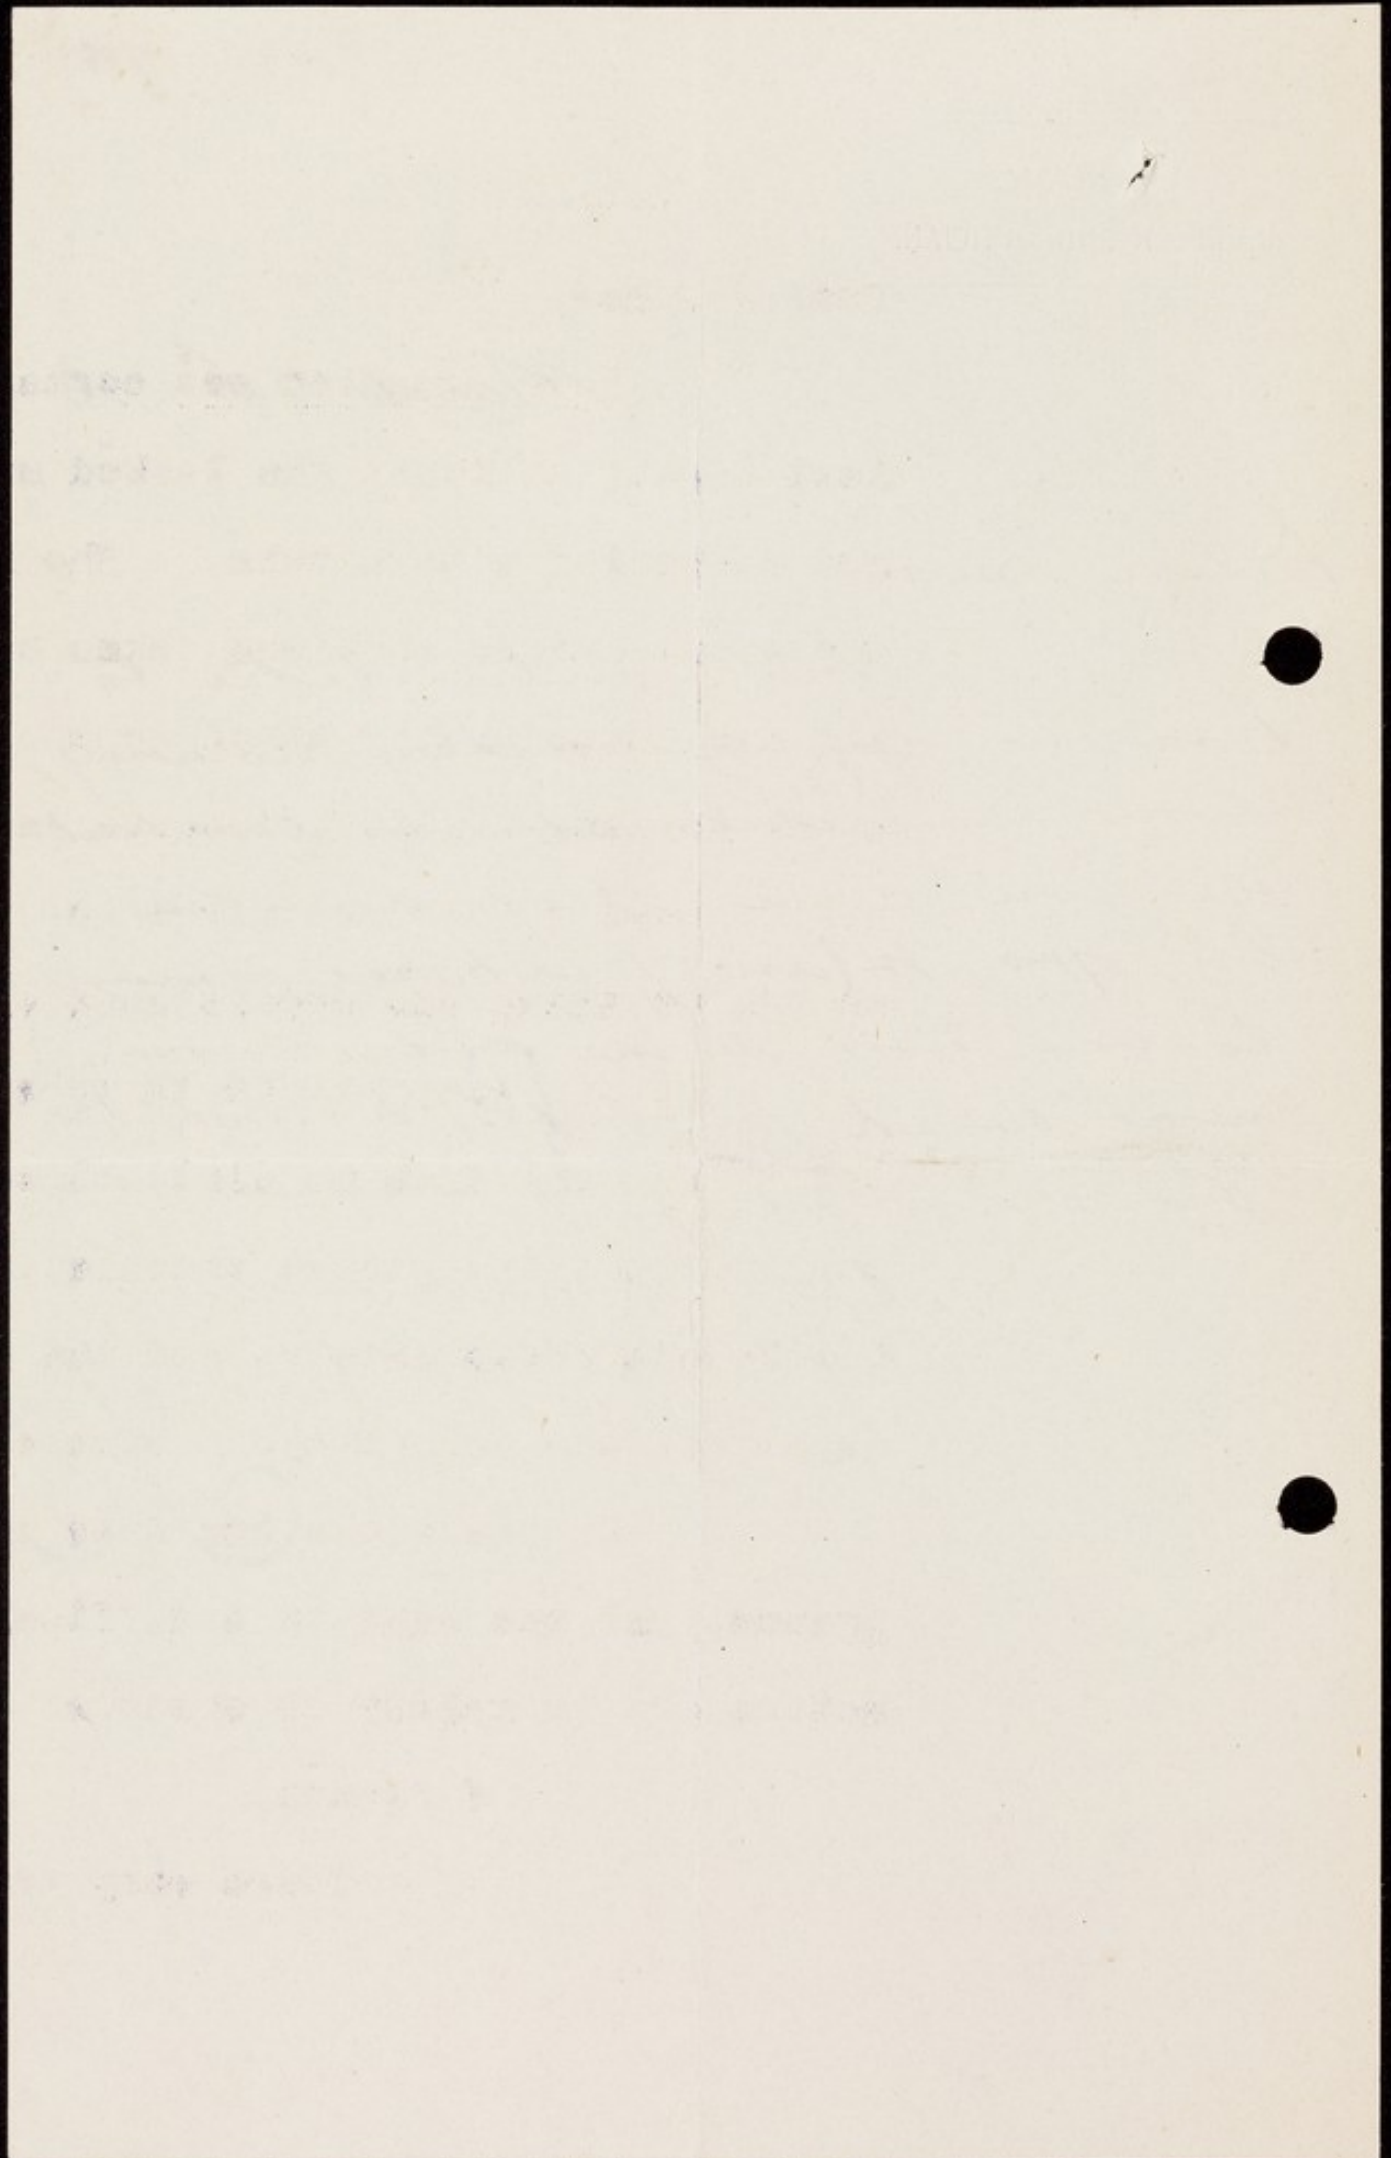

March 24th 1916

Dear Sir,

I should like to know, by Sunday morning, how my daughter is this week if you can drop us a line.

Myo Maw purposes coming to see her some afternoon next week, probably Wednesday or Thursday.

Yours faithfully
B. Maw

11th March, 1916.

Dear Mr. Maw,

Your daughter was certainly rather better last night; at least she looked much better, though she had to be fed with a tube. She has for a short time improved periods when she takes her food herself, and she has occasionally asked sensible questions. The other morning I just succeeded in getting a smile from her, but as a rule she gives no intelligent response, though we think she understands all that goes on.

Her temperature is up a little every evening, and though there is no distinct evidence we think there must be some intestinal trouble. There has been a little diarrhoea lately, and the report for last night says that she was rather restless and slept only $3\frac{1}{2}$ hours.

On the whole she does not appear to be losing ground, yet the case is a difficult one and the exact nature of the malady is obscure.

I remain,

Yours very truly,

11th March, 1916.

Dear Mr. New,

Your daughter was certainly rather better last night; at least she looked much better, though she had to be fed with a tube. She has for a short time improved periods when she takes her food herself, and she has occasionally asked sensible questions. The other morning I just succeeded in getting a smile from her, but as a rule she gives no intelligent response. I think we think the undertakings all that goes on. Her temperature is up a little every evening, and though there is no distinct evidence we think there must be some intestinal trouble. There has been a little diarrhoea lately, and the report for last night says that she was rather restless and slept only 2 1/2 hours. On the whole she does not appear to be losing ground, yet the case is a difficult one and the exact nature of the malady is obscure.

I remain,
Yours very truly,

B. MAW,
JEWELLER AND OPTICIAN.

Dear Sir,

I should like a line
or two stating how my daughter
is getting on. We presume
she is much the same as when
we saw her, but would like
to be fully up to date because
of many enquiries we have.
I intend having a look
at her some afternoon next,
probably Thursday, when I
hope it will be convenient
to see her.

Yours faithfully
B Maw

Dear Sir,

Mrs Maw will
be over tomorrow
(Thursday), during
the afternoon, to see
my daughter whom
we hope is improving.

Yours faithfully
B Maw

25th January, 1916.

Dear Sir,

I am sorry I cannot as yet report any improvement in Miss Maw. She continues to be quite incoherent and does not take any interest in anything. She is restless and excited and apparently quite lost to everything around her. It is consequently quite impossible to converse with her or to get any reasonable response.

Her general health is fairly good, but, of course, she is thin and looks frail.

With regard to your visit; it would not do much good and would be painful to you. On the other hand I hardly think it would harm the patient, as she would not take much notice.

I hardly think I can give any prognosis, as it is difficult to form any opinion as to how the case will turn out, but we usually expect young patients who are excited like this to recover.

I remain,

Yours very truly,

Bielby Maw, Esq.

25th January, 1916.

Dear Sir,

I am sorry I cannot as yet report any improvement in Miss Haw. She continues to be quite incoherent and does not take any interest in anything. She is restless and excited and apparently quite lost to everything around her. It is consequently quite impossible to converse with her or to get any reasonable response.

Her general health is fairly good, but, of course, she is thin and looks frail. With regard to your visit, it would not do much good and would be painful to you. On the other hand I hardly think it would harm the patient, as she would not take much notice. I hardly think I can give any prognosis, as it is difficult to form any opinion as to how the case will turn out, but we usually expect young patients who are excited like this to recover.

I remain,

Yours very truly,

Edith Haw, Esq.

24th January, 1916.

Dear Sir,

At the recent meeting
of the Retreat Committee the
terms for Miss M. Maw were
fixed at £3. 3. 0 per week.

I enclose the usual
form of Agreement, which please
return to me when signed.

Yours faithfully,

Bielby Maw. Esq.

York, 13th July, 1896.

The Committee of the Retreat avail themselves of this opportunity to give additional publicity to the reduction in the terms for "recommended" patients, which came into force on the 1st inst., in accordance with the 4th minute of the Meeting of the Directors of the Retreat, held 29th April, 1896, a copy of which is annexed.

The following minute of the Retreat Committee, held 21st April, 1896, has been read:—

"In view of the improving financial position of the Retreat, and the
"kind response given by Friends in different parts of the country to
"the appeals which have been made on behalf of the Institution, the
"Committee are of opinion that a reduction in the terms of recommended
"patients from 14/- to 12/- per week may be made. It is proposed that
"the reduction shall date from the 1st of July next. The sanction of the
"Directors' Meeting is to be asked for the proposed reduction."

After careful consideration, this meeting decides to adopt the recommendation of the Committee.

B. MAW,
JEWELLER AND OPTICIAN.

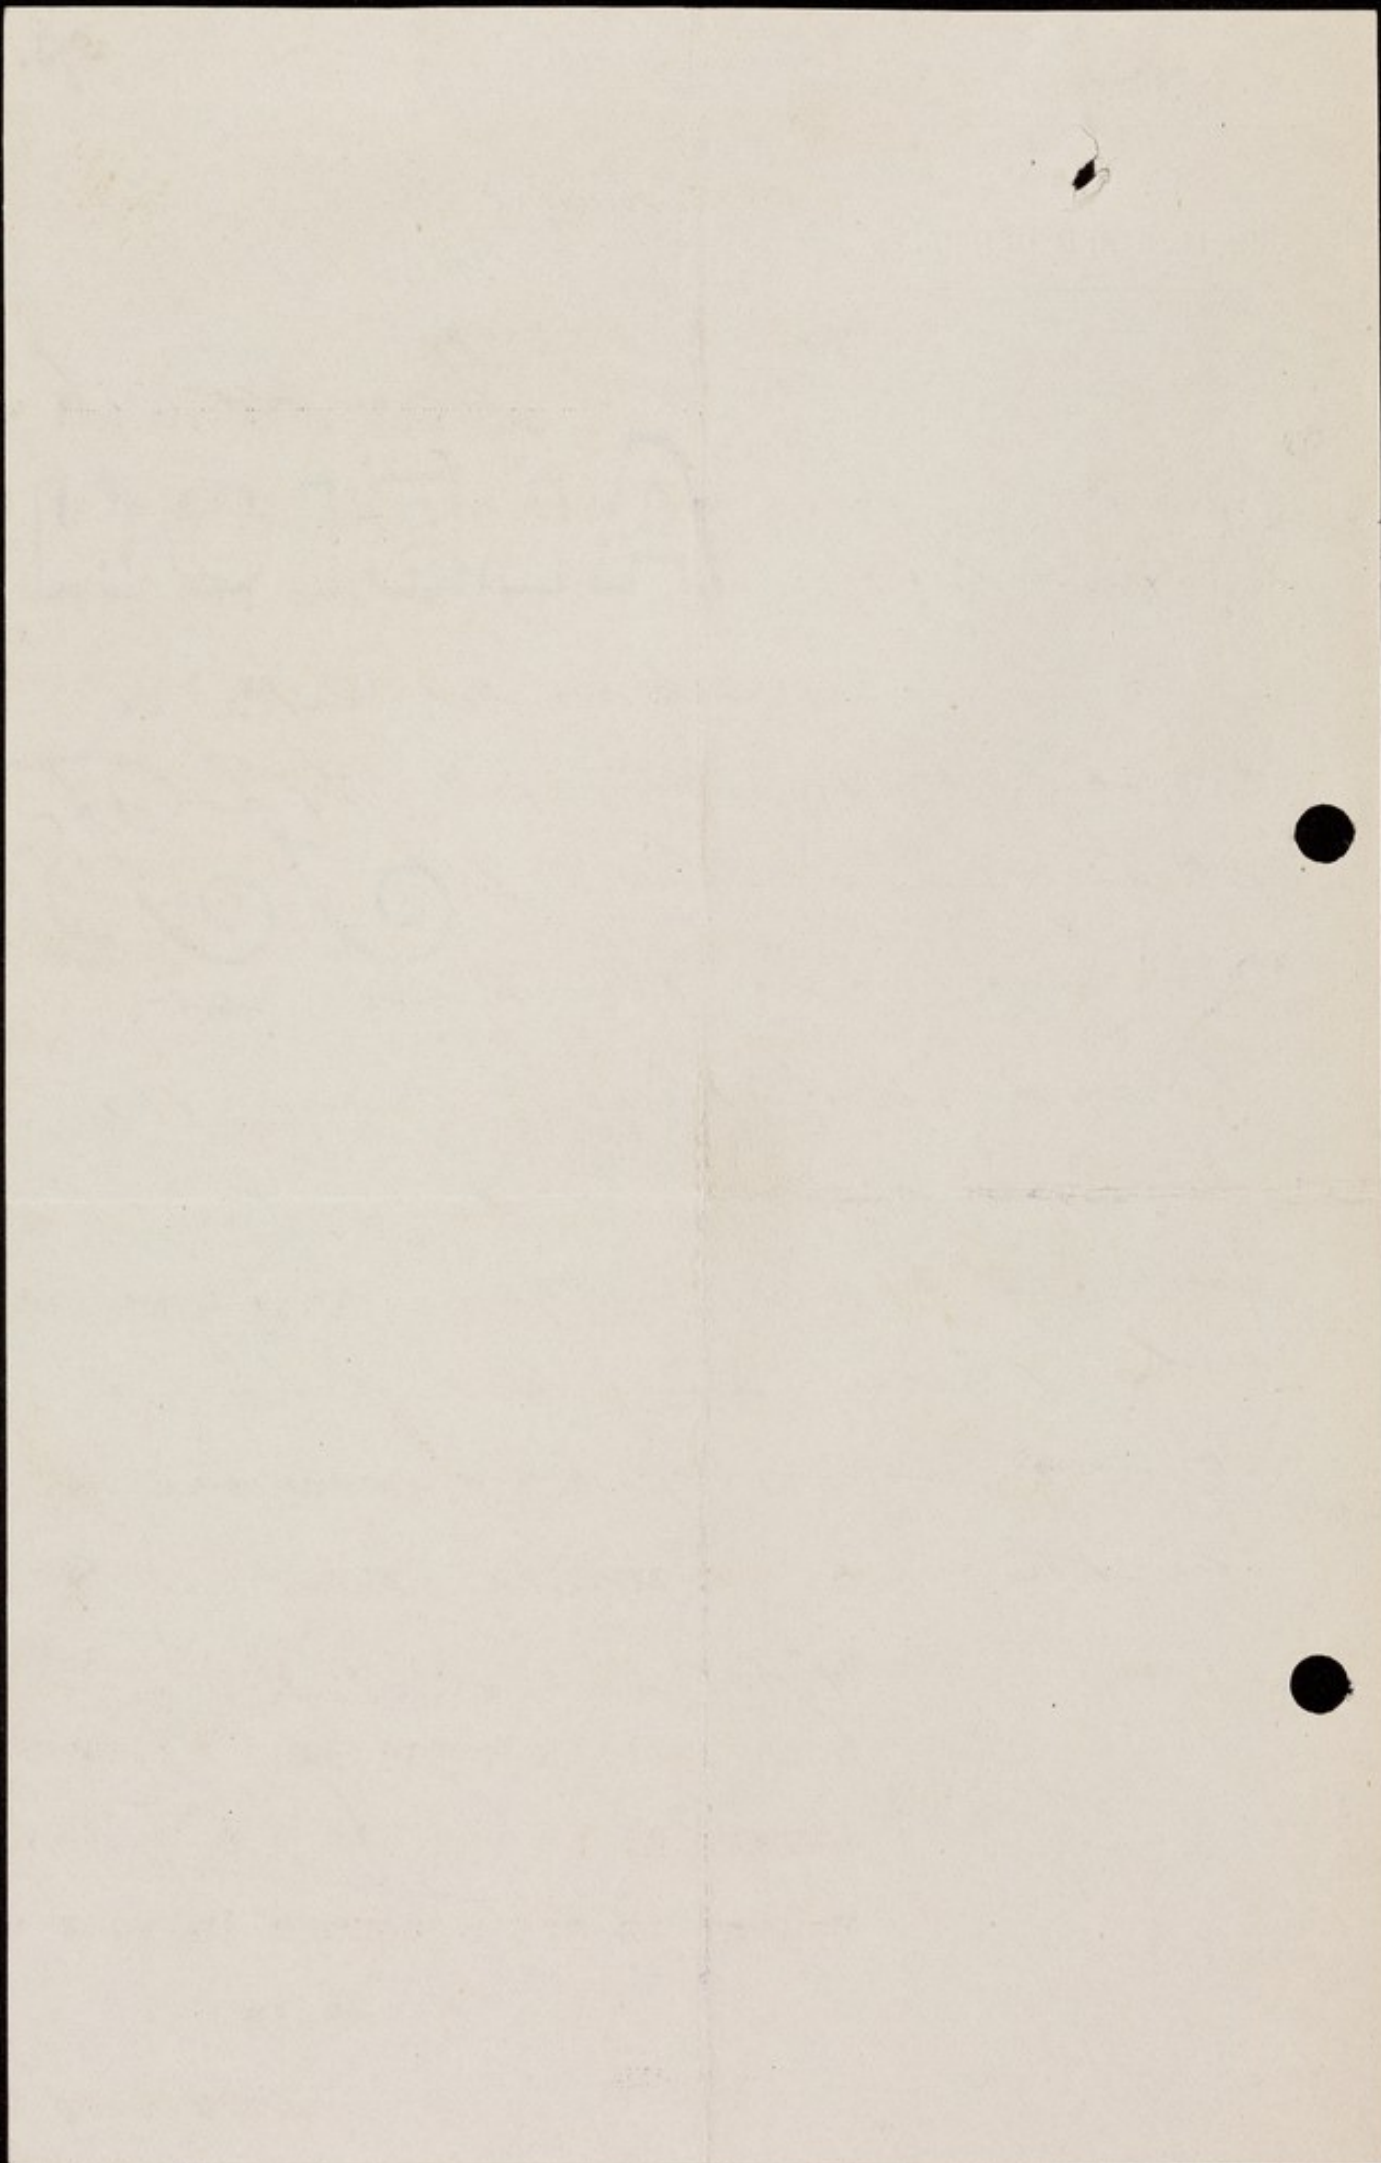

Market Place,
Beverley,

Jan 24 1916

Dear Sir,

I should like a
brief report as to how my
daughter, Miss Maw, is
going on. We have not
heard anything since the
beginning of last week &
are feeling rather anxious.
Is there any likelihood
of us seeing her soon,
without harm to her?

Yours faithfully
B Maw

17th January, 1916.

Dear Dr. Gregory,

I was not able to get to the telephone in time for your message this afternoon.

Miss Maw has not begun to show any signs of improvement, in fact she has been very excited and destructive, and it looks as if she will give us a good deal of trouble. She is hardly able to reply to a question, though now and then one does get a single answer which seems to be sensible, but the greater part of what she says is incoherent. It is early yet to give any opinion as to the prospects of recovery, but the general outlook does not seem to me to be unfavourable.

I notice on the paper that her mother's maiden name was Hopper. It so happens that I have had two patients lately of that name, but they were both married women, and I gather that there is not likely to be any blood relation. Perhaps the name Hopper is not uncommon in your part of the country.

I remain,

Yours very truly,

17th January, 1916.

Dear Mr. Gregory,

I was not able to get to the telephone in

time for my message this afternoon.

It is not yet begun to show any signs of

improvement, but the weather is very excited and

unusually so. I hope it will give us a good

deal of excitement, and I hope to reply to a

question, but I am not sure I can get a single

answer to the question, but the weather part

of the question is not yet begun to show any signs of

improvement, but the weather is very excited and

unusually so. I hope it will give us a good

deal of excitement, and I hope to reply to a

question, but I am not sure I can get a single

answer to the question, but the weather part

of the question is not yet begun to show any signs of

improvement, but the weather is very excited and

unusually so. I hope it will give us a good

deal of excitement, and I hope to reply to a

question, but I am not sure I can get a single

Yours very truly,

—The Secretary is instructed to obtain the necessary signatures to the accompanying form of guarantee before the care of any patient is undertaken by The Retreat.

YORK RETREAT HOSPITAL FOR THE INSANE.

In consideration of the Directors of the York Retreat Hospital for the Insane agreeing to receive Marion Maw of

as a patient in the said Hospital, I HEREBY UNDERTAKE AND AGREE with Richard Thompson of Dringate, The Mount, York the Treasurer of the said Hospital, to pay or cause to be paid, to the said Richard Thompson as such Treasurer, or to the Treasurer for the time being of the said Hospital, all such Sum or Sums of Money as shall from time to time be or become due and payable for the Lodging, Maintenance, and care of the said patient in the said Hospital, or whilst under the charge of the Authorities of the said Hospital, and all such Sum or Sums of Money as shall be paid or disbursed by or on behalf of the said Institution for any articles of Wearing Apparel, or other necessities, or extras supplied to, or provided for the said Patient, or the repairing or mending and washing of the articles of Wearing Apparel of the said Patient, so long as the said Patient shall continue in the said Hospital, or be under the charge of the Authorities of the said Hospital, and also to pay or cause to be paid the expenses in respect of the Funeral of the said Patient, in case the said Patient shall die in the said Hospital, or whilst under the charge of the Authorities of the said Hospital. AND I FURTHER AGREE to pay interest at the rate of five per cent. per annum on any accounts due from me as above, which shall not have been discharged within Twenty-eight days from the receipt of such account from the Treasurer, Secretary or Clerk of the said Hospital. AND I ALSO UNDERTAKE AND AGREE, at my own expense, to remove the said Patient from the said Hospital within Fourteen days after receiving Notice in writing from the Treasurer, Secretary or Clerk for the time being of the said Hospital, requiring such removal.

PROFIT ON

Name Marion Maw. Age 23. Date of Adm. Jan. 13. 1916.
Address 2 Market Place, Beverly.
Description - Single - School teacher.
Religious Persuasion - Wesleyan.

H. P. C.

Six days ago manner was noticed to be peculiar - very voluble - exaggerating small matters at first - then thought everyone was perfect. Talked also about the war - and said the Kaiser was the only imperfect man. Has been working for an exam. & teaching pupils - working to excess.

P. H.

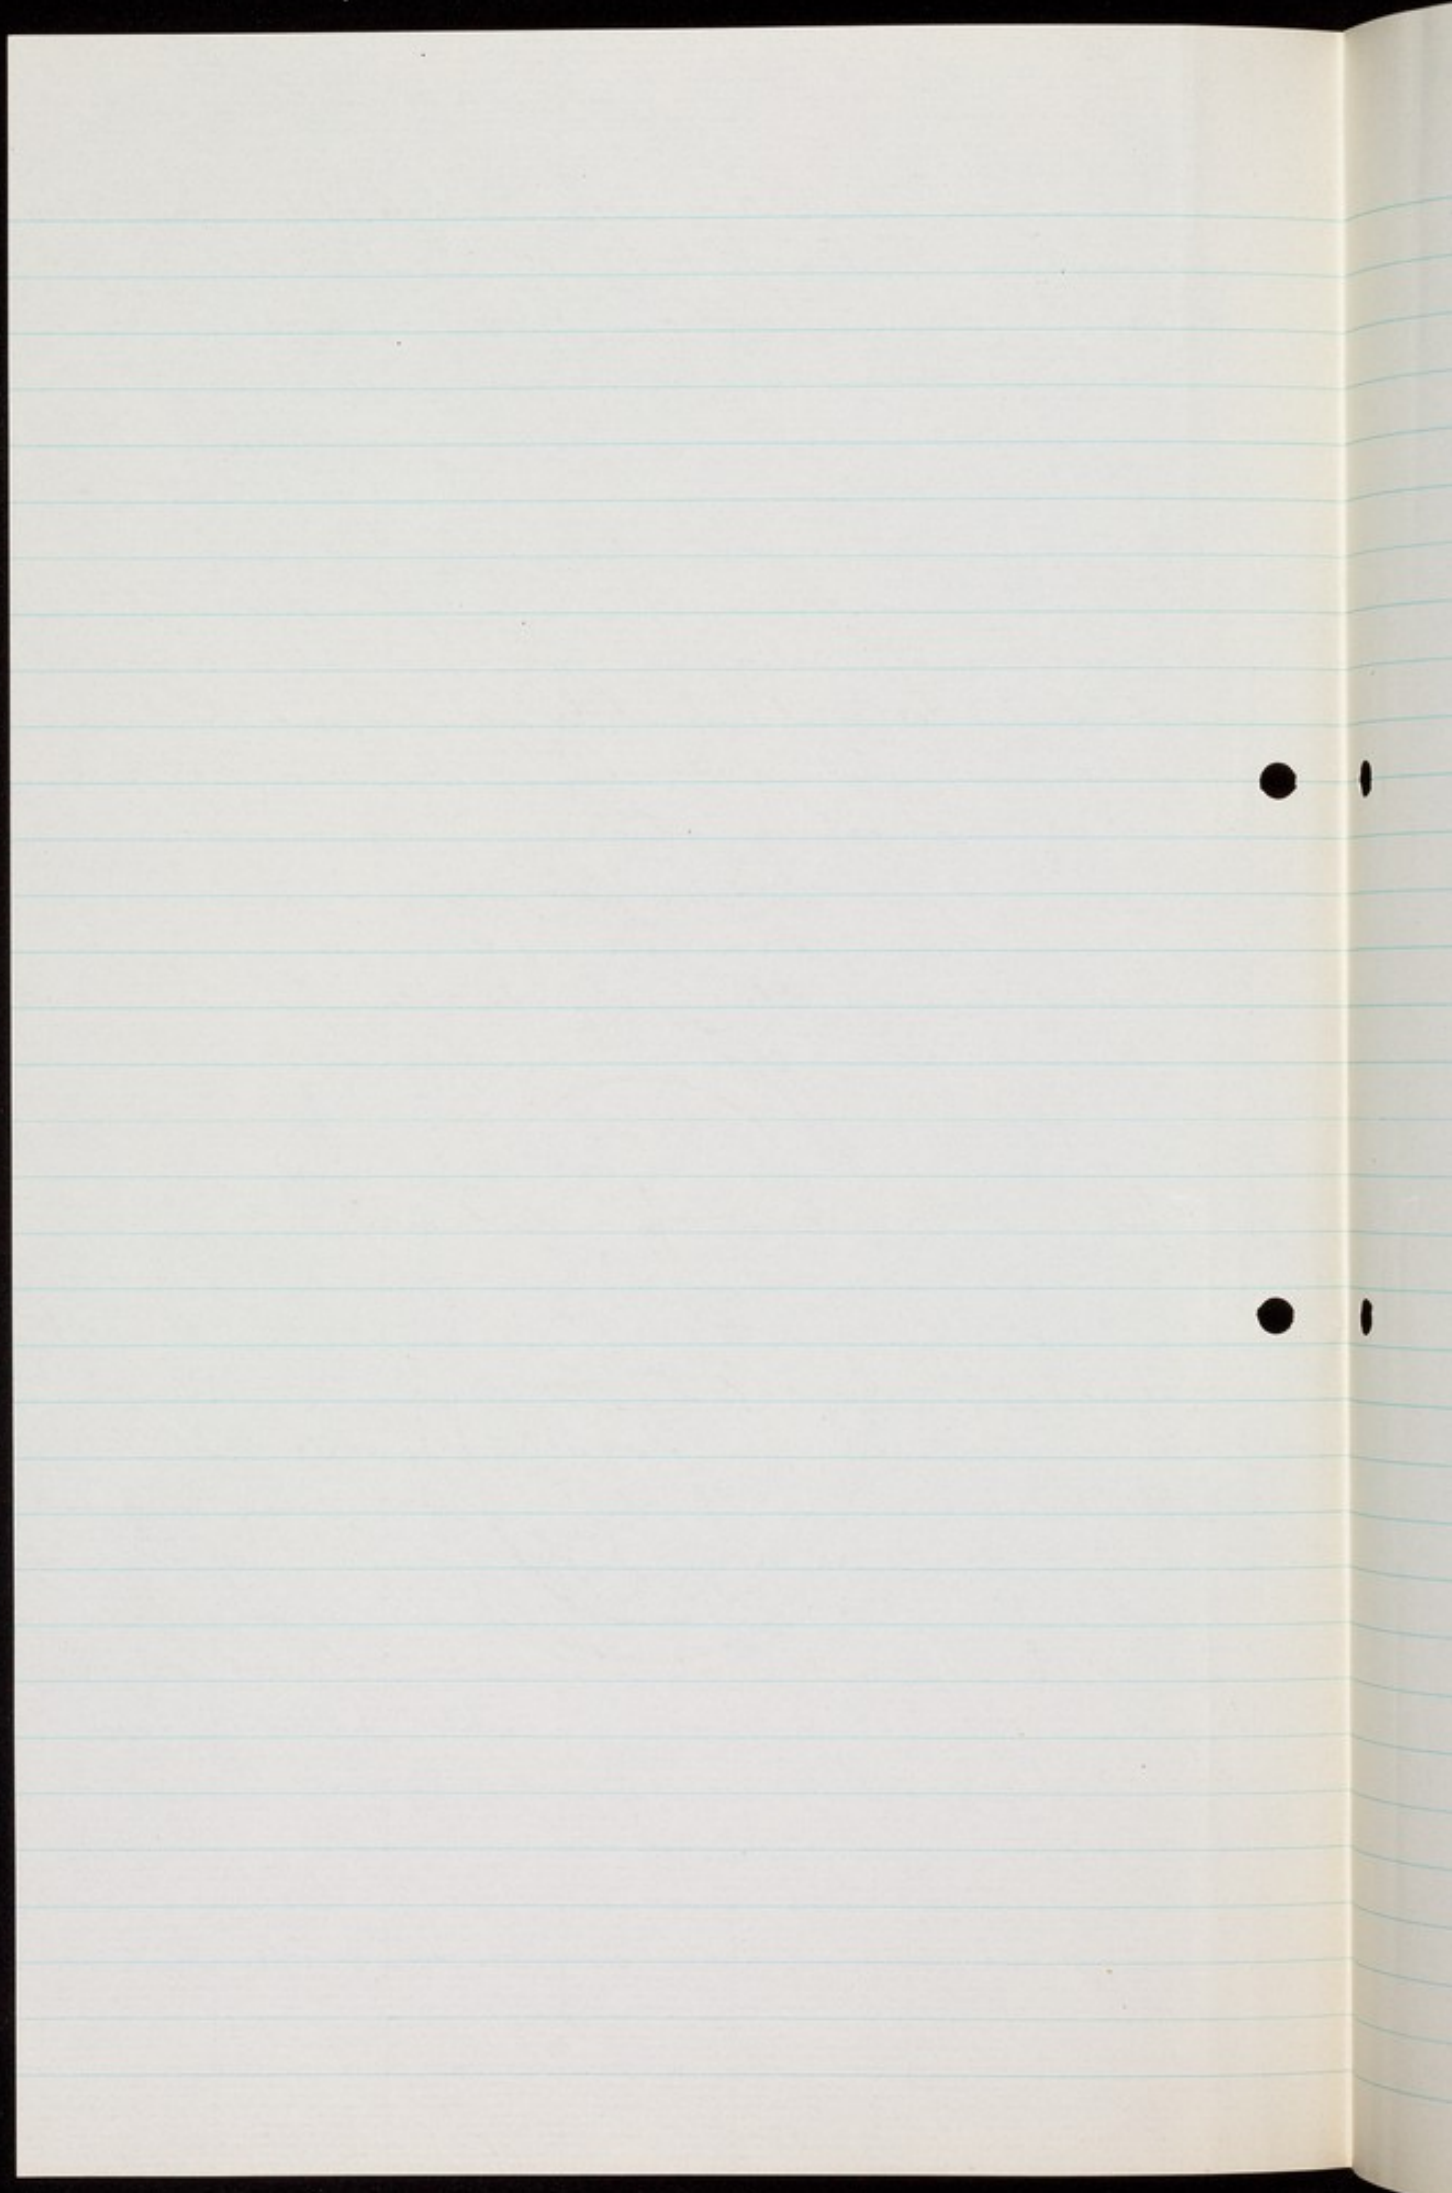

Health good. clever. very amiable. favourite pursuits music and reading.

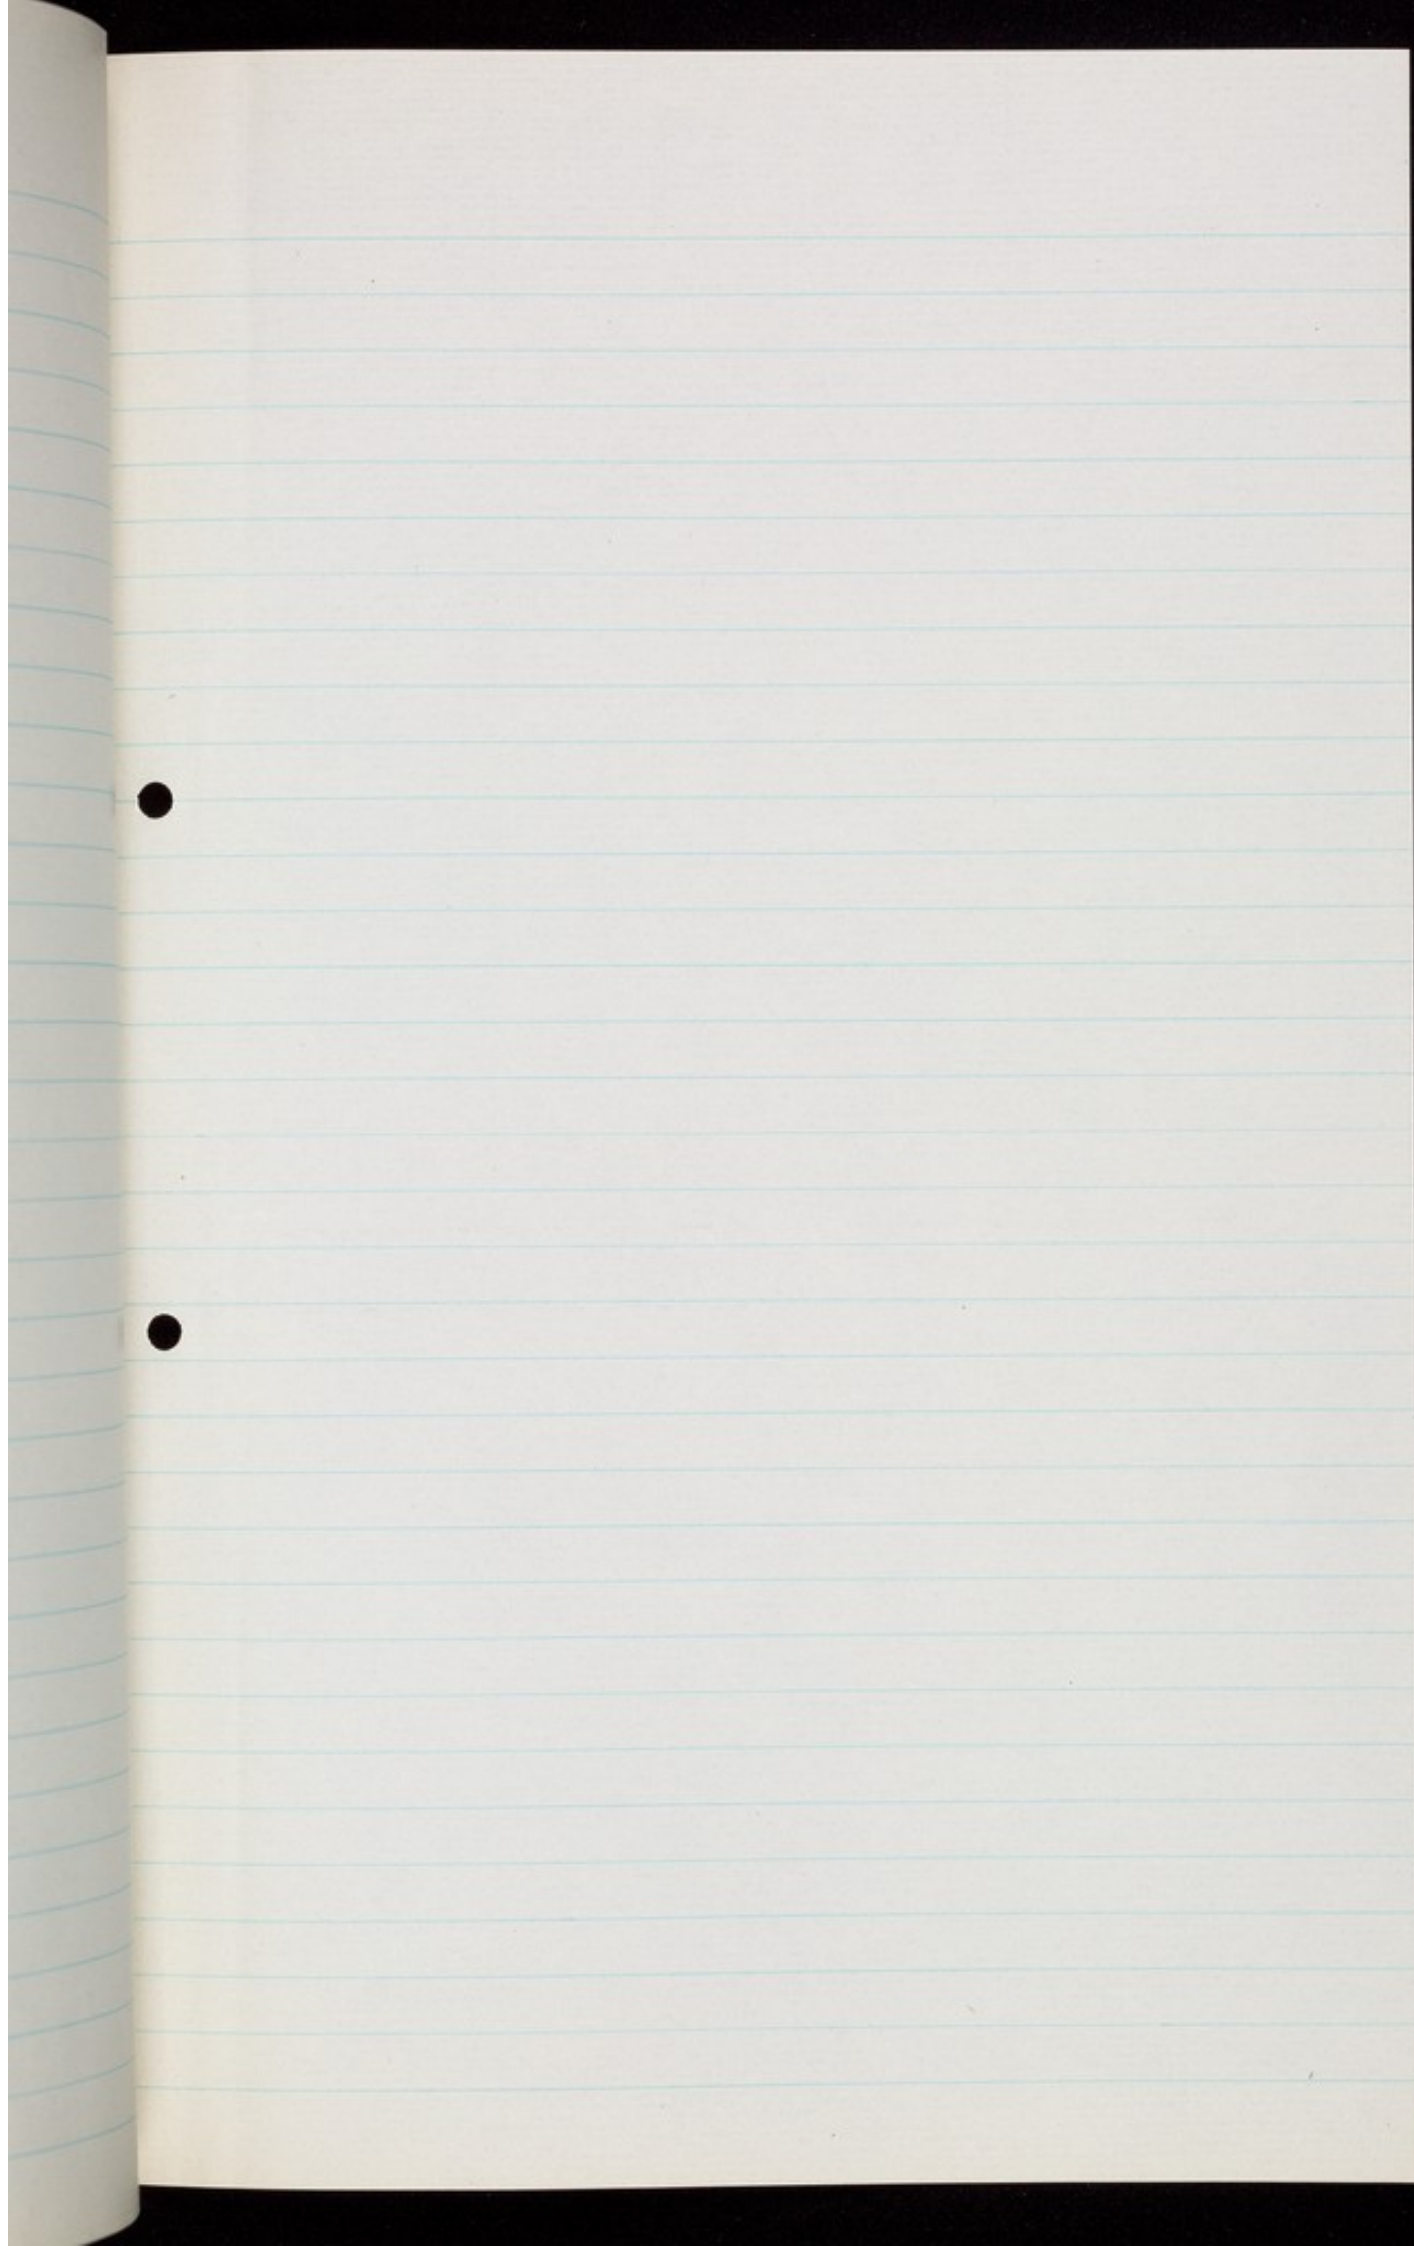

F. H.

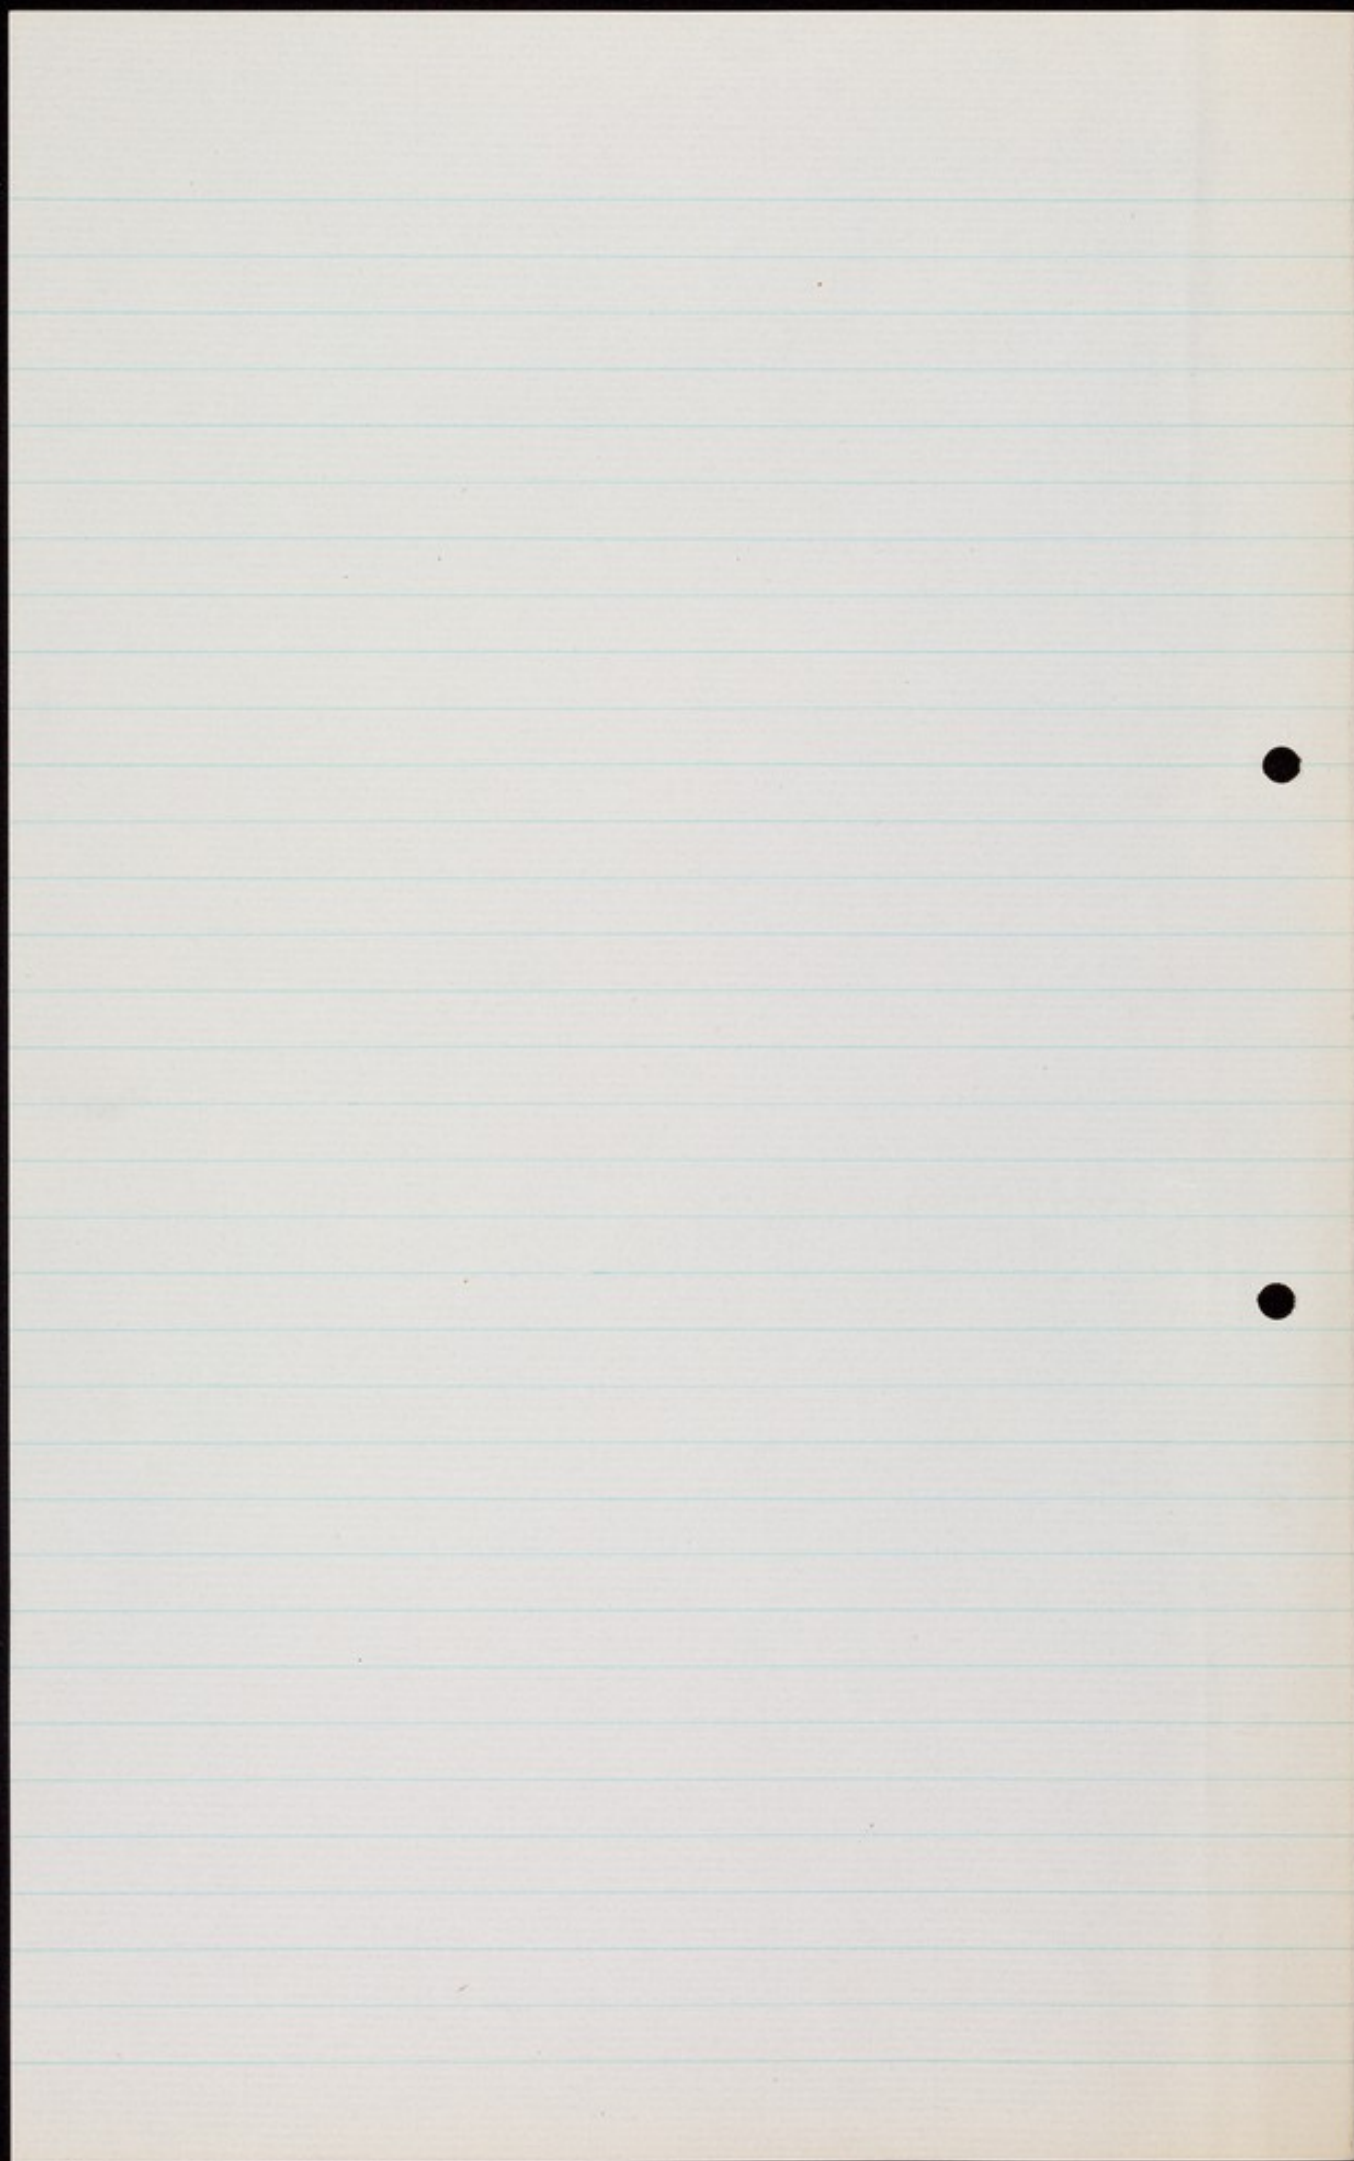

Good. No history of insanity.

Abstract of Certificate.

Patient in a state of exaltation - states that there is no night - a great light has turned everything into everlasting day & everyone is perfect except Kaiser Wilhelm. Incoherent in talk - unable to fix her attention on any subject. Does not know day of week or month or year. Quite unable to take care of herself.

Jan 13th Patient admitted at 10 a.m. & was carried in the chair to her bed, Slept nearly 3 hours after admission, she tried to bite herself & broke the skin of one of her fingers, has taken three glasses of milk Patient is sleeping in the 4th dormitory right

No sleep very restless throwing her arms about - chattering.

14th

Had nothing to drink until 6.30 P.M. & then she took 0¹ of milk, very restless but quiet right

Slept one hour restless & noisy

15th

Very excited & noisy, has taken 6 glasses of milk right

Slept one hour troublesome & noisy, dirty in habits

16th

Very excited & noisy sleeping in the padded R. right

Slept 15 min restless & noisy, dirty in habits

17th

Very noisy, indeed, has taken 9 glasses of milk right

18th

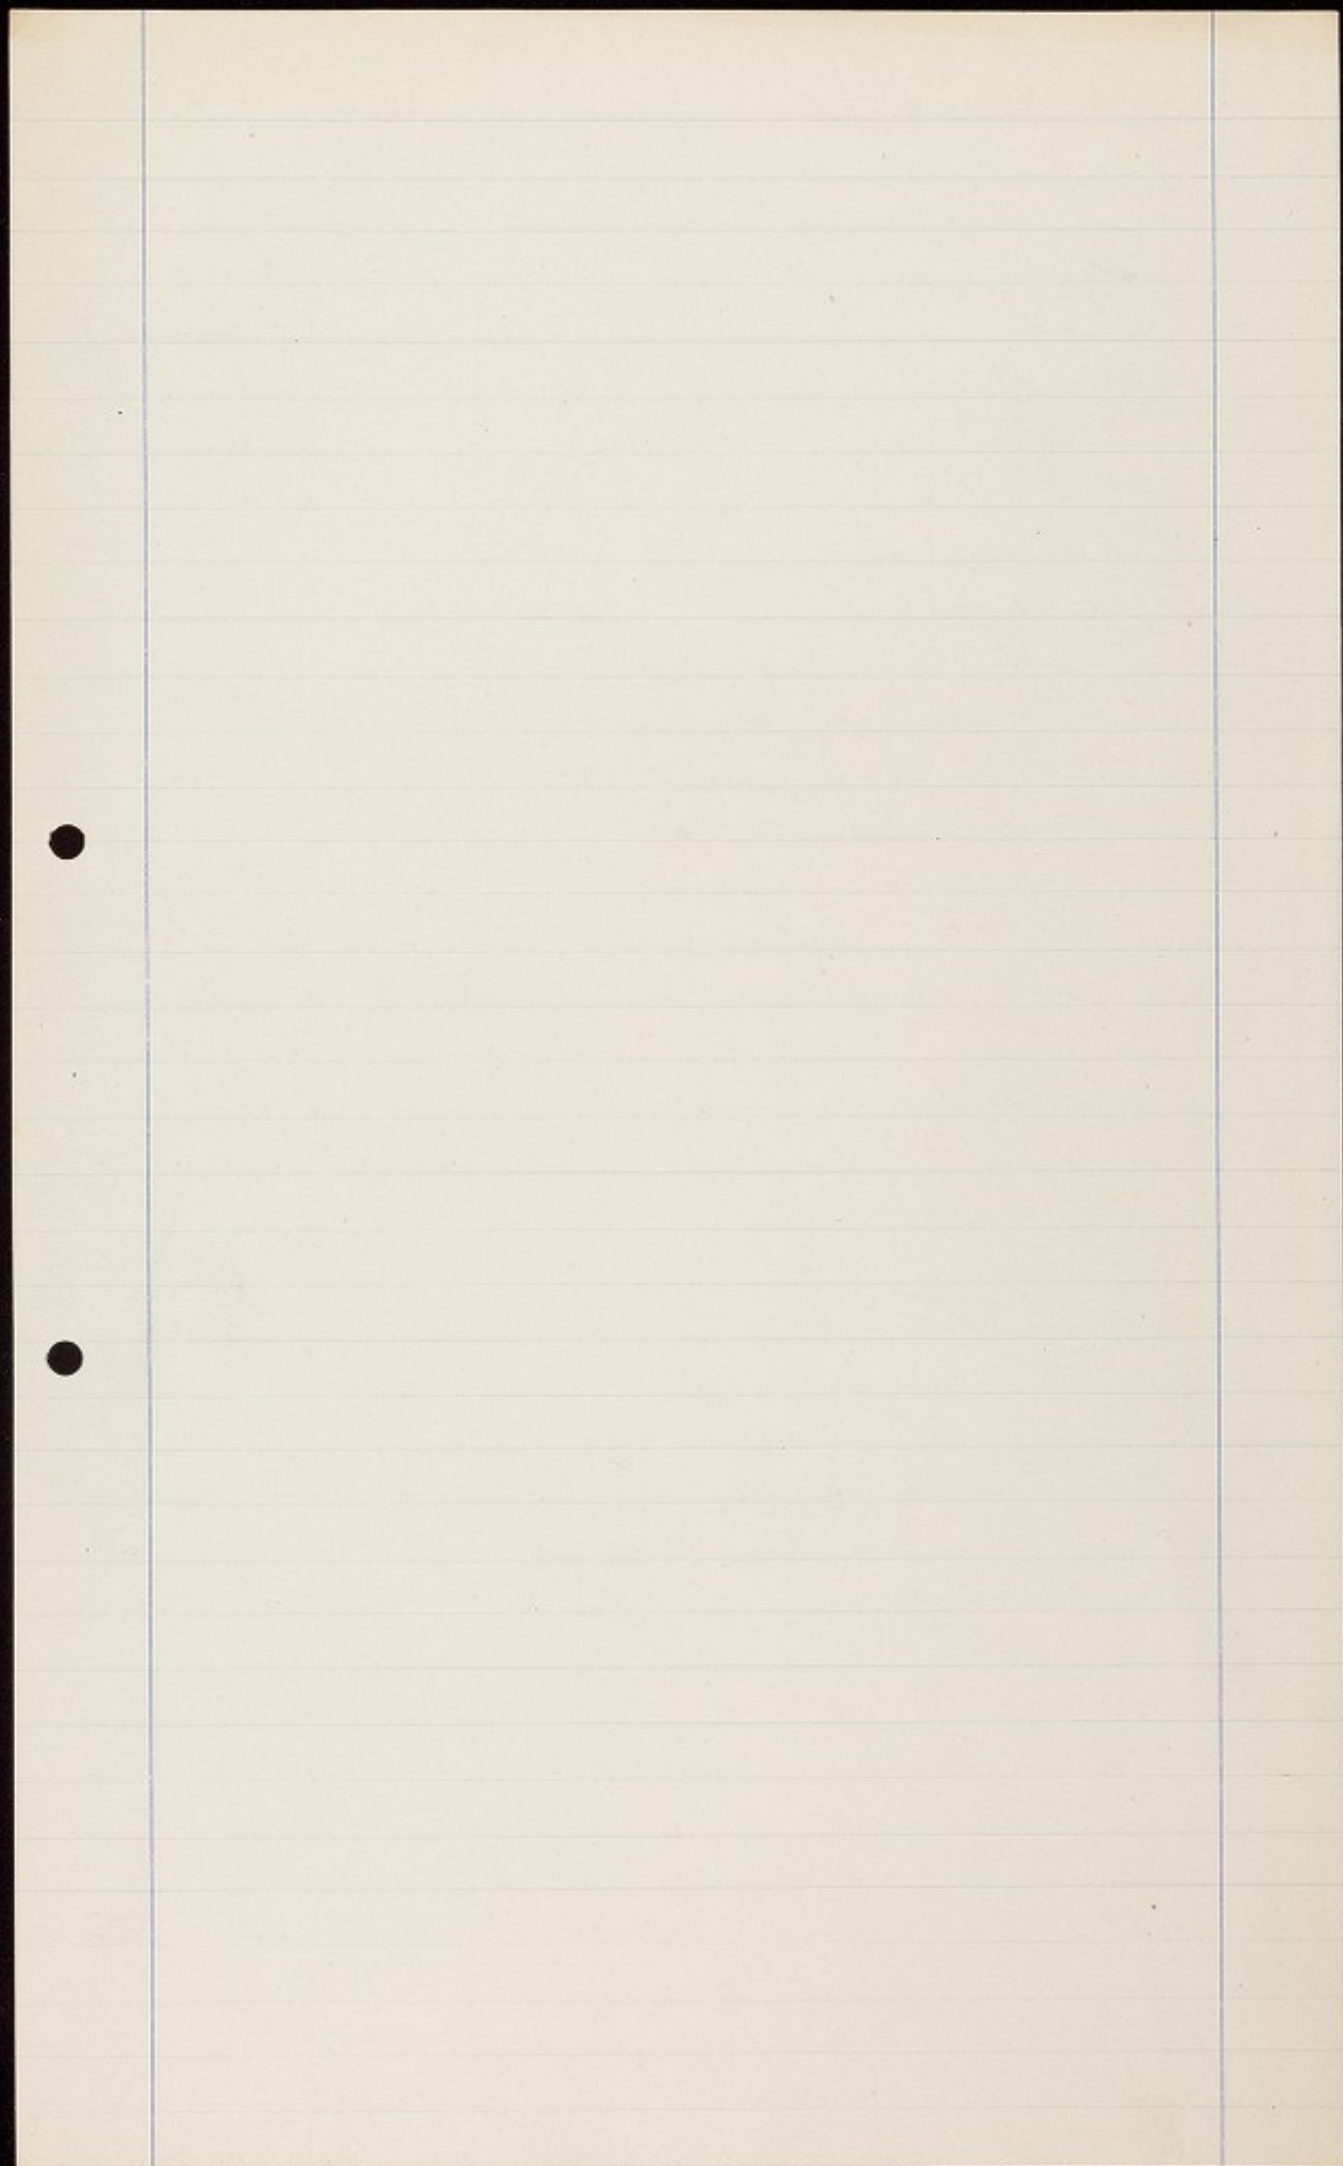

Slept about 3 hrs restless & noisy, milk 0¹

Quiet day very restrictive (habits dirty) has been out in the shelter most of the day, taken milk 0¹

right No sleep restless & noisy, taken milk 0¹

19th

Out in the shelter most of the day constantly wet has taken plenty milk, bread + butter + cake (is sleeping in the strong room)

20th Night Slept about $\frac{1}{4}$ hr at intervals
out in the shellie good part of the day,
restless + restless, has taken bread + butter
& milk. Is sleeping in the Padded Room

21st Night Slept 1 hour restless all night
out in the shellie good part of the day
has taken her milk well

22nd Night Slept 30 min restless
out in the shellie most of the day has
taken her food very well today

23rd Night No sleep restless + noisy
out in the shellie very troublesome. Tied
the piece of ribbon out of her vest tightly
round her neck & tried to bite her tongue
has taken her food fairly well, is sleeping
in strong rugs

24th Night Slept 30 min restless
Most excited at times has taken her food fair
Night No sleep restless

25th Night Night
out in the shellie most of the day, excited
& troublesome over her food
Night slept $\frac{3}{4}$ of an hour restless at intervals
skin broken at bottom of her back

26th Night
In the strong room all day, taken her
food very well (had collocation on her back)
Pulse very quick 140

27th Night Slept 30 min restless when attended to
out on the 6th balcony most of the day
had a continuous bath half an hour

was then taken out as she turned so blue in the face & her pulse 140 has taken good quantity of milk Paraldehyde 3i given tonight was asleep in a very few minutes

Night Slept until 3 A.M. was awake 40 min & then went to sleep again

28th

on the 6th balcony good part of the day in quite a perspiration when brought in has taken her milk well

Night Paraldehyde given at 11-15 no sleep until 3.30 A.M. slept about 2 hrs

29th

In the strong room all day, seems a little brighter tonight has taken her milk well. Sleeping in 6th dormitory Temp 100 P 124

Night Slept 2 1/2 hrs breathing difficult at 2 A.M. Temp 100² P 124

30th

Transferred to the 6th gallery

30th

Pt. looks very poorly during the night breathing strange. Fairly good day restless at times appears to have spasms of pain. Even Temp 99⁶ Pulse 120 Taken 3pts milk during the day

31st

Slept this very restless Morning Temp 99³ Continues much the same. a little brighter at times & looking round. Taken a fair amount of milk. Visited by her father & mother. Took very little notice of them Ev. Temp 100⁴ Pulse 120

Feb 1st 1916

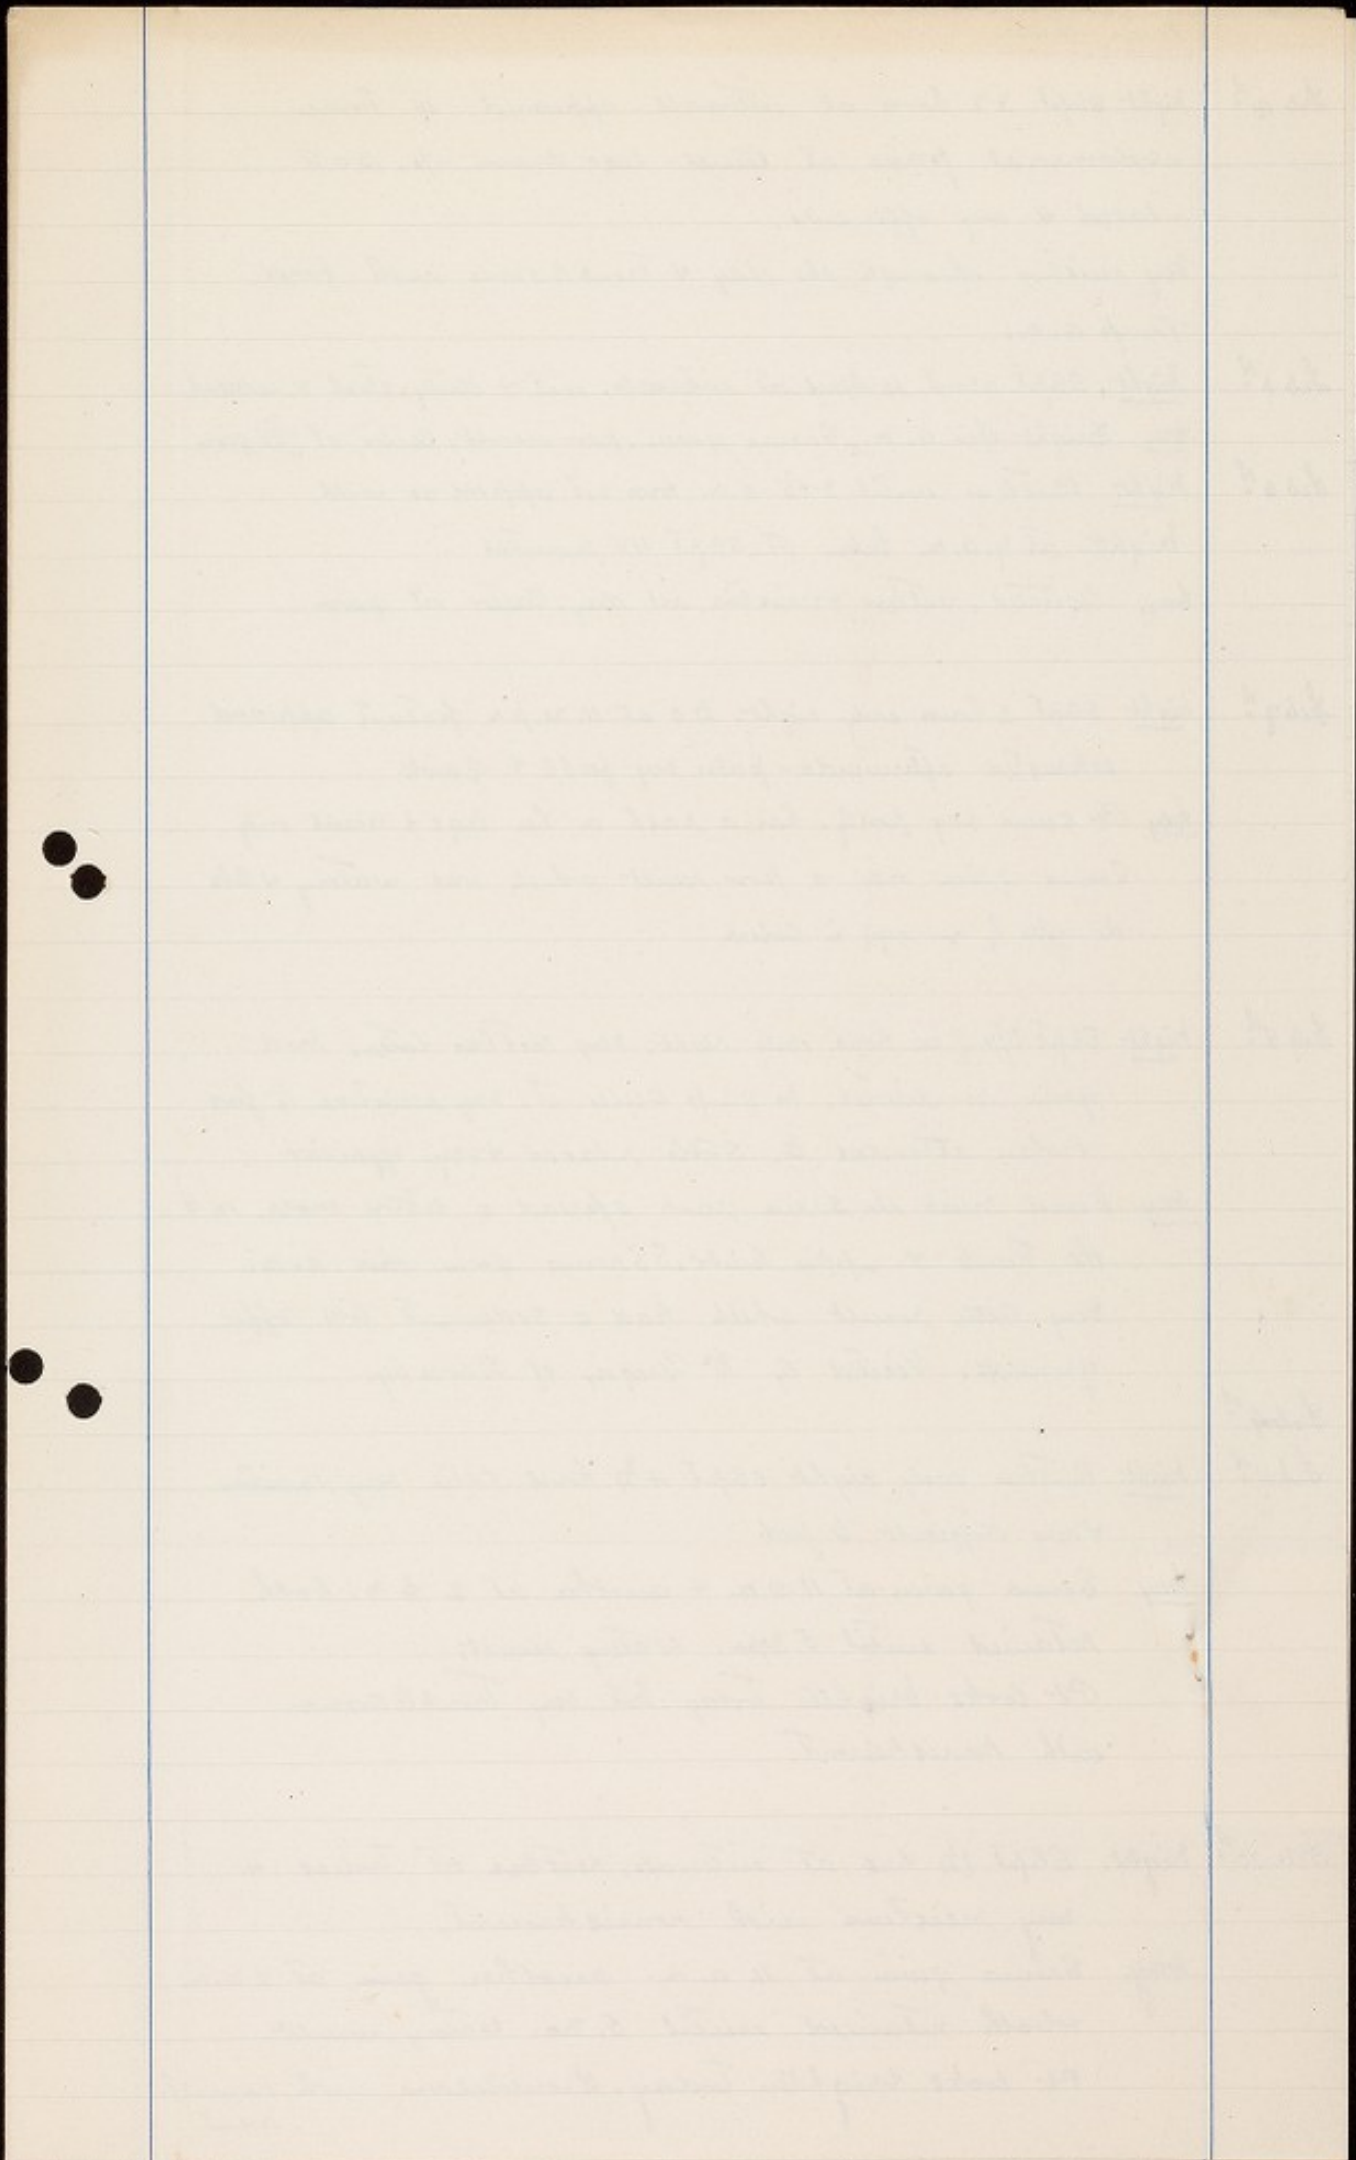

Transferred to 11th Gallery -

" 2nd "

Patient had a very quiet day, but very restless when anything is done for her. did not look at all well this evening Temp a.m.

" 3rd "

Quiet day, rather restless this afternoon taken food much better, Temp a.m.

Mrs. Maw.

- Feb 4th night. Slept $3\frac{1}{2}$ hours at intervals. appeared to have abdominal pain at times. legs drawn up. B o it relaxed & very offensive.
Very resistive through the day & troublesome with food.
Temp a. m.
- Feb 5th night. Slept about 4 hours at intervals. wet & dirty, stool & relaxed.
day Bright this a. m. Eucema given, poor result. Castor oil $\frac{3}{5}$ given
- Feb 6th night. Restless until 3-15 a. m. does not appear so well.
Brighter at 4 a. m. Taken O.T. Slept 45 minutes
day. Agitated, restless & resistive all day. Castor oil given
- Feb 7th night. Slept 2 hours early night. D o at 11.30 p.m. patient appeared exhausted afterwards - pulse very feeble & quick.
day It seems very poorly. has a rash on her legs & arms only
Eucema given only a poor result which was watery & like the yolk of an egg in colour
- Feb 8th night. Slept $\frac{3}{4}$ of an hour early night. very restless later. Med given as directed. no sleep since it. very resistive to food & when attended to. Stool relaxed & very offensive
day. Seems much the same rash spread a little more on to the trunk & upper limbs. S Eucema given this a. m.
very little result which had a sediment like coffee grounds. Visited by Dr Gregory of Beverly.
- Feb 9th night. Restless early night slept $4\frac{3}{4}$ hours later very resistive & very difficult to feed.
day. does not seem so well today, rash spread to her face, chest & abdomen but fading away on her legs. very troublesome with nourishment
Even Temp 100 pulse 132 R 16.
- Feb 10th night. Slept $1\frac{1}{4}$ hrs at intervals, restless at times & very resistive with nourishment.
day. Eucema given at 11 a. m. another given at 2 a. m. & both retained until 5.30. Watery result
It looks brighter today. Troublesome with nourishment.

Mrs. Maw.

- Feb 4th night. Slept $3\frac{1}{2}$ hours at intervals. appeared to have abdominal pain at times. legs drawn up. B.O. II relaxed & very offensive.
Very resistive through the day & troublesome with food.
Temp a.m.
- Feb 5th night. Slept about 4 hours at intervals. wet & dirty. stool & relaxed.
day Bright this a.m. Enema given. poor result. Castor oil $\frac{3}{4}$ ss given
- Feb 6th night. Restless until 3-15. a.m. does not appear so well.
Brighter at 4 a.m. Taken O.T. Slept 45 minutes
day. Agitated, restless & resistive all day. Castor oil given
- Feb 7th night. Slept 2 hours early night. D.O. at 11.30 p.m. patient appeared exhausted afterwards - pulse very feeble & quick.

Miss M. Maw.

- March 1st 1916
night. Slept 2½ hours. Legs massaged.
day. Pt very pale at 11 a.m. Taken a little nourishment during the day. Perspired freely at 4 p.m.
Very troublesome with her arms & legs when massaged & straightened out. fed 3 times.
- March 2nd
night. Slept 3 hours. Very bright & speaking a little this a.m.
day. Took a little bread & butter & coffee at 9 a.m.
Very troublesome over morning feed & it took Dr. Wilbur 45 minutes to pass it. seems to be something which stops the tube when it gets about 3 inches through the nostril. Visited by her mother in the afternoon but did not speak to her.
Left side of abdomen swollen this evening.
Evening temperature 99° pulse 132 R 24.
- March 3rd
night Slept 2 hours. Wet & dirty & swelling in abdomen subsided after motion.
day Very reticent with food. Fed 3 times & patient has a good deal of mucous in the throat & she refuses to either cough or spit it out.
Talking ~~quite~~ a very nicely in the evening & wanted to know what place she was at & why she was brought. Evening temp 98° pulse 116 & resp 20.
- March 4th
night Slept 2½ hours No ill Taken 3½ milk. Talking steadily.
day. Very reticent with food. Right chest swollen.
Looking rather flushed at times & perspired freely.
brought up a quantity of mucous during the day.
Lies very still & quiet.
- March 5th
night Slept 3 hours. pt looking rather pale at 6 a.m.
brought up a quantity of mucous.
Not a very bright day. Lying very still & quiet all a.m. & not taking notice of anything. Very flushed at 2.30 p.m. when her bowels moved, & when they roared again at 6.30 she turned very blue round the nose & mouth. Dr. Pierce did not feed in the evening because she was not looking at all well.

1916. Miss Miriam Maw.

- March 6th right. Slept $5\frac{1}{4}$ hours. Looking very pale this a.m. but seemed brighter
day. Took a small piece of bread & butter & $\frac{3}{4}$ of milk coffee for breakfast. & the same amount at tea time but very resistive was it. Legs massaged 3 times & still very troublesome & resistive when they are straightened out. Saliva dribbling from her mouth all day. Fed 3 times.
- March 7th right. Slept 4 hours.
day. Much brighter & better day.
- March 8th right. Slept $8\frac{3}{4}$ hours.
day. Taken a little more food. (minced chicken baked potatoes & milk pudding at noon) Bright in a.m. & watched every thing that was going on in the dormitory, rather depressed & crying in the afternoon, dribbling from the mouth all day. Fed twice
- March 9th right. No sleep.
day. Fairly bright day. Taken a little food but not enough to save a feed. Fed 3 times.
- March 10th right. Slept $2\frac{1}{2}$ hours. pt bright but very resistive.
day. Fairly bright day. Taken very little food. Fed 3 times. & brought up a quantity of mucus.
- March 11th right. Slept $3\frac{1}{4}$ hours.
" day. Very bright all day. Taken very little food. Fed twice.
- March 12th right. Slept 5 hours.
" day. Very depressed & weeping in a.m. Talking & talking notes of things afterwards Fed 3 times
- March 13th right. Slept $4\frac{1}{4}$ hrs. Very resistive when washed.
day. Depressed in a.m. but brighter towards evening but bad tempered.
- March 14th right. Slept ^{hrs} 5. ^{min} 45. Very resistive this a.m.
day. Depressed & weeping until 5 p.m. then a little brighter
- " 15th right. Slept 3 hrs 55 min Very resistive
day. Depressed early a.m. very resistive
- " 16th right. Slept $4\frac{1}{2}$ hrs.
day. Visited by her Father this afternoon but would not speak to him. dribbled from the mouth a great deal.
