READ THE FOLLOWING
MEDICAL TESTIMONY to the Cure
of five cases of Gutta Serena, from G. H.
Boutell, Professor of Galvanism:—
Southsea, near Portsmouth, Hants, November
5, 1846.

Mr. W. Grimstone,

SIR,—I must, in justice to you, send the
following testimony with regard to the ex-
traordinary efficacy of your Medicated Eye
Snuff in cases of Gutta Serena. I have used
it in five cases with the most astonishing
benefit and cure. Sir, you may advertise this,
or make what use you please. The cures
have wholly astonished me, and thousand
others.

I am, Sir, your obedient servant,

G. H. BOUTELL, Professor of Galvanism.

This Medicated Eye Snuff is manufactured
for ladies, and those who are not snuff takers,
but have the misfortune to have ophthalmia,
and other diseases of the eyes and head.
This snuff is sold in canisters, 1s. 1½d., 2s.
9d., and 4s. 6d. each, pamphlet included.

By order of the Government, his celebrated
herb snuff is now stamped, owing to its being
proved, in many thousand cases, to have Cured
Diseases of the Eyes and Head, Restoring
Sight and Hearing. The informers prove this
to get their compounds put on the same foot-
ing, to which the Treasurer would not allow.

W. G.

No one who uses this Snuff will be affected
by the Cholera. (Read Dr. Andrew's reports,
Nov. 10, 1831.)

Curious proof of efficacy of Grimstone's Eye
Snuff in cases of Cholera:—Two nurses only
escaped the Cholera in 1831, and they con-
stantly used this celebrated snuff.

Sold by all Chemists. Wholesale, Herbarry
Highgate, and 434, Oxford-street, London,

1848
