MAGNET THERAPY is the most effective mode of science in which Therapeutic MAGNETS are used to cure illnesses. It occupies a unique place among the non medical modes of treatment widely tried by people whose ailments are not cured by prevalent medicines.

How do Magnets Heal

Our Earth has a magnetic field around it so does our body and every cell and organ of our body is a magnetic unit and has a specific vibratory frequency - when there is a perfect harmony between vibratory frequencies of various tissues and organs of the body, health is restored but if this harmony is lost because of changes in the natural vibratory frequency of an organ or part of the body disease ensues. When Magnets are placed in contact with a part of the body, the cells and organs of that part regains their natural vibratory frequency.

Magnet Therapy strikes at the root of the disease. It strives to restore the natural vibratory frequency of the various organs and to re-establish a balance in the electromagnetic field.

MAGNETISED WATER: — Water influenced by Magnets undergo certain physical and chemical changes (its physical properties like centres of crystallization, Ph (Hydrogen ion concentration) and Nitrogen dissolving capacity are suitably altered.

Such magnetised water when consumed improves health, and increases the immunity of the body. It improves digestion and reduces acidity, acts like a diuretic, dissolve Kidney stones, prevents deposition of cholesterol on the inner surface of blood vessels.

TO MAGNETISE WATER:— Fill glass/plastic bottle $\frac{3}{4}$ full of water and place the High powered Magnets on its sides with the North pole on one side and South pole on the other side and leave it for 12 to 24 hours.

Dosage — 100-mls 3 to 4 times daily.
