- 6 Royal Society of Health, Diploma in Health Engineering.
- 7 Royal Society of Health, Diploma in Air Pollution Control.
- 8 Diploma in Bacteriology (Battersea College).

Health Countile to put

To the Chairman and Members of the Harlow Urban District Council

Mr. Chairman, Ladies and Gentlemen,

I have pleasure in presenting to you my Statistical Review for the year 1972.

Until now it has been the statutory duty of a medical officer of health to publish annually a report on the health and sanitary circumstances of the district for which he is responsible. In Harlow I produced full reports every five years with merely statistical reviews in the intervening years.

On 31st March 1974 the office of the Medical Officer of Health will cease to exist and with it will also disappear the annual report in its present form. Although in the National Health Service Reorganization Act, 1973, provision is made for the Community Health Councils to publish reports "on matters relating to the operation of the health service within the district", they are unlikely to replace the reports of the medical officer of health which, despite all their faults, were valuable annual audits of the health of the community. Moreover, since Harlow will become part of a large National Health Service district, which itself will be administered by an Area Health Authority, separate statistics for this town, especially like those shown in part III of this report, will probably no longer be available.

Nevertheless, I do believe that the reorganization of the National Health Service, which unifies the three branches of medicine, is in the best interests of everybody concerned, although it may take some time before the benefits become apparent.

However, the complete administrative separation of the social services, which already causes difficulties, may in the long run prove to be a major disaster. It is not inconceivable that the next reorganization of local government and of the National Health Service, whenever that may be, will bring the health and social services together and enlarge the National Health Service management teams at various levels by the addition of a social work officer.

The vital and other statistics in this publication cover only one year and deal with relatively small numbers; they are, therefore, subject to chance fluctuations. Figures which are either better or worse when compared with those of previous years or with the national figures, must be viewed in this light.

These statistics are a numerical expression of much work which has gone into keeping the community in good health, and I want to take this opportunity of thanking all those who helped achieve this and particularly my staff and colleagues in local government and outside who have also contributed information for this review.

I am, Mr. Chairman, Ladies and Gentlemen,

Yours faithfully,

I. ASH, MD, MFCM, DPH.

Medical Officer of Health

Visitors to Harlow:

The following were visitors to the Department during 1972:

Dr. M. K. Ambursa, A.B.U. Hospital, Nigeria.

Dr. C. Bartlett and Miss Williamson, Social Workers, San Ramon, California, U.S.A.

Dr. Broyelle, Ministry of Health, France.

Dr. Bustamante, Medical Administrator, Philippines.

Sister M. Julie, Hospital Service, Edinburgh.

Dr. T. Kawaguchi, Ministry of Health, Japan.

Miss LaVerne Fakkema, School of Nursing, Yale University, U.S.A.

Dr. Aloysius Mboi, Ministry of Health, Indonesia.

Miss E. Mitchell, Nursing Officer, World Health Organization, (W.P.R.O.), Manila.
