Telephone Number Harrogate 68954 Public Health Department Municipal Offices, Harrogate.

To the Mayor, Aldermen and Councillors of the Borough of Harrogate.

Mr. Mayor, Ladies and Gentlemen,

I have the honour to present for your consideration the Annual Report on the work of your Health Department and the health of the Borough during the year 1967.

We have had an epidemic of measles for the second year running in the town. This is a new phenomenon, for measles has previously been characterised by a biennial incidence. Happily, a satisfactory vaccine against this troublesome disease is now available, and plans are being made to offer vaccination to all susceptible children as quickly as possible. We must hope that, as a result of this activity, measles, like poliomyelitis, will disappear from the scene. The Department continues to work closely with the general practitioners. This liaison should be facilitated by the provision of health centres which are shared by doctors in general practice and by the nursing and medical staffs of the local health authority. The first of these should be started near the General Hospital during 1968.

We began during the year to offer to married women a test which indicates the presence of pre-cancerous conditions of the lower part of the uterus, in the hope of being able to refer for treatment at an early stage, those who are liable to develop the graver disease. The response has been quite good, but there are still many women who have not taken advantage of this simple preventive measure. The other health services provided by the County Council are dealt with in the report, which thus provides an overall picture of the available local authority health services in the town.

I have the honour to be,

Mr. Mayor, Ladies and Gentlemen,

Your obedient servant,

N. V. HEPPLE,

Medical Officer of Health.

STATISTICS

Registrar General's estimate of population (mid 1967)	 60,720
Area (in acres)	 8,320
Number of inhabited houses, March 31st, 1967	 21,146
Rateable Value, March 31st, 1967	 £2,477,150
Sum represented by a penny rate, March 31st, 1967	 £9,813

SOCIAL CONDITIONS OF THE AREA

Harrogate is an expanding town which depends largely on catering for large numbers of holiday and conference visitors through the hotel and catering trades. It also contains research establishments for the artificial fibres and tobacco industries, and for the manufacture of rubber. There is an increasing number of administrative departments of all types, and the town is the shopping centre for a large rural area, and for residents from other towns.

Juvenile unemployment is minimal, and in December 1967, there were 451 men and 77 women registered as unemployed at the local exchange which also covers Knaresborough, and adjacent areas. The unemployment percentage figure was 1.9 which was below the national average of 2.7.

EXTRACTS FROM VITAL STATISTICS FOR THE YEAR 1967

NOTES ON VITAL STATISTICS

BIRTHS. The birth rate of 16.7 was higher than in 1966. The rate for England and Wales was 17.2.

DEATHS. The death rate of 9.3 was lower than in the previous year and compared favourably with the national rate of 11.2.

These conditions together were responsible for more than four fifths of the deaths.

NATURAL INCREASE OF POPULATION. The number of births exceeded the number of deaths by 259.

INFANT MORTALITY. 14 children under one year of age died during the year, giving an infantile mortality rate of 14.6 per 1,000 live births, as compared with 13.0 for the previous year, and 18.3 for England and Wales.

Deaths from stated Causes at Various Ages under One Year of Age:-

		1967									
Cause of Death	1966	Under 1 week.	1-2 weeks.	2-3 weeks.	3-4 weeks.	Total under 4 weeks.	4 wks. & under 3 mths.	3 and under 6 months.	6 and under 9 months.	9 and under 12 months.	Total Deaths under 1 yr.
Bronchitis	- 2 7 1 - 1 - 1	- - 6 1 1 2 - 1		1111111111		- - 6 1 1 2 - 1	1111111111	1	1	11111111111	- 1 - 6 1 1 2 1 1 - 1
Totals	12	12	-	-	-	12	1	1	1	-	14

MATERNAL MORTALITY. A maternal death occurred shortly before term in a twenty three year old woman who developed a fulminating acute renal necrosis without warning and died before delivery.

CREMATIONS. During 1967 there were 765 cremations at the Stonefall Crematorium of whom 431 had been residents of the Borough of Harrogate.

1967	60,720	958	16.7	14	14.6	699	9.3	

The deaths from the year 1949 have been adjusted by an Area Comparability factor supplied by the Registrar General and the births have been similarly adjusted since 1950. These factors are 0.81 and 1.06 respectively.

GENERAL PROVISION OF HEALTH SERVICES IN THE AREA

LABORATORY FACILITIES.

(a) Chemical.

The chemical analysis of milk, foodstuffs, spring and well water is carried out by Messrs. Richardson and Jaffé, Bradford. The chemical analysis of the public water supply is carried out for the Claro Water Board by Messrs. T. Fairley and Partner, Leeds.

(b) Bacteriological.

Samples of milk and other foodstuffs, including ice-cream, are taken for examination to the Public Health Laboratory situated at Seacroft, Leeds. This laboratory also undertakes the bacteriological examination of swimming bath and spa waters and the drinking water supply for the Claro Water Board.

Any special investigation into outbreaks of infection is undertaken at this laboratory as well as the isolation and typing of viruses.

The routine bacteriological examination of clinical material, such as throat swabs, is undertaken at the laboratory of the Harrogate General Hospital.

REMOVAL TO SUITABLE PREMISES OF PERSONS IN NEED OF CARE AND ATTENTION

No action was taken during 1967.

3. SCHOOL HEALTH SERVICE.

A. School Medical Inspections.

Despite the increased number of medical inspections carried out during 1967, slightly less defects were found than in the previous year. Children requiring treatment for defective vision formed 41% of the total defects.

Total	174	84	10	1

^{*6} E.S.N./Physically handicapped.

F. Audiometry

During 1967 routine testing of six to seven year olds was continued. Health Visitors who had received special training in the use of the pure-tone audiometer visited schools in the Division.

Of 1,139 school children tested in this group, 18 were referred for further investigation. Health Visitors are also trained in the methods of testing the hearing of the pre-school child, particularly those with a history indicating a special risk.

4. SPEECH THERAPY.

The Speech Therapist attends at Dragon Parade and Ripon Clinics. 53 new cases were treated during the year, and the treatment of 37 others was continued.

21 visits were paid to schools and 19 domiciliary visits were made.

^{*1} E.S.N./Maladjusted.

5. CARDIAC CLINIC.

29 new cases were referred to the Cardiac Clinic during 1967, 25 being for immediate review. 17 of the cases were from the Harrogate area, 6 from Ripon, 3 from Wetherby, 2 from Horsforth, and 1 from the North Riding area.

31 clinics were held during the year and 184 children made 215 attendances. Mr. G. H. Wooler, the Leeds Thoracic Surgeon, held two clinics at the Harrogate Hospital when 9 children were seen. 6 children were admitted to Killingbeck Hospital for operation, two of whom were for cardiac catheterisation, two for thoracotomy, one for valvotomy, and one for closure of patent ductus. 17 children were also seen at Leeds for further investigation or follow-up after previous operations.

4 children were discharged from the Cardiac Clinic during the year, two being transferred to the adult clinic and two being referred back to their own doctors.

6. CHILD GUIDANCE CLINIC.

During the year 116 new cases were seen. 85 boys and 31 girls. 95 of these were referred from Division 7, as follows:—

Divisional Medical	Officer	 	42

(e) Routine Tests on Young Babies

One type of mental defect is due to a metabolic disturbance which produces damage to the brain in early life. It is detectable by a simple test on the urine of young babies which is now done as a routine by the health visitors for the babies in their care.

1,566 children were tested, all with a negative result.

The health visitors and midwives also test young infants for congenital dislocation of the hip by the Ortolani test.

(f) Dental Care

The arrangements for dental treatment of expectant mothers and nursing mothers continue as before.

(g) Care of Unmarried Mothers and their Children

The unmarried girl who is having a baby is often desperately in need of expert help and advice. She needs to make arrangements for the confinement, and for her own rehabilitation and the care of her child afterwards.

Valuable work in this field is done by the Social Workers of the Ripon Diocesan Moral Welfare Association who work in close co-operation with the general practitioners, the health visitors, and the health department.

The County Council makes grants in approved cases towards the cost of institutional care before the confinement.

126 cases were dealt with by the Department during the year, 2 were under fifteen years of age, 46 were between the ages of fifteen and nineteen, 44 between twenty and twenty-four, 21 between twenty-five and twenty-nine, 11 between thirty and thirty-nine, and 2 were over forty.

(h) Care of Premature Infants

These small babies need special care to avoid injury from chilling. 3 special portable incubators and equipment are provided, based at Harrogate and Ripon. These incubators are electrically heated either by mains electricity or a 12 volt car battery. All ambulances in the area have been fitted with special plugs for this purpose. The Sorrento cots are still available.

(i) Albany Avenue Day Nursery

This nursery is open from 8.30 a.m. to 4.30 p.m. from Monday to Friday. It accommodates the young children of mothers who are obliged to maintain themselves and their families by going out to work. The health of these children is supervised by the medical staff of the Department.

29

(j) Inspection of Children at Residential Nurseries and County Children's Homes

Medical inspections were carried out at the residential nurseries and County children's homes by the medical staff of the department. In addition, all children were examined on admission and discharge and any medical problems dealt with.

8. MIDWIFERY.

Four whole-time domiciliary midwives and eleven home nursemidwives were working in the Division at the end of 1967. They attended 148 home confinements during the year. In addition, 1,991 patients were delivered in hospital and 85 in private nursing homes.

The practice of allowing women to go home twenty-four or forty-eight hours after having their babies in hospital is increasing and the closest possible liaison is maintained between the staff of the hospital maternity departments and the local health authority midwives in order that the mother may be under continuous care. 265 patients were sent home at forty-eight hours; 240 patients after forty-eight hours but up to and including the fifth day and 406 patients after the fifth but before the tenth day.

Applications for maternity beds on social grounds are investigated by the domiciliary midwives. This has proved necessary owing to the shortage of accommodation in the maternity units of the Harrogate and Ripon Hospitals and the York Maternity Hospital.

The Obstetric Flying Squad was called out on 3 occasions during

the year.

Medical Aid Notices.

13 medical aid notices were issued by midwives during the year, all in respect of domiciliary cases. The following summary gives the conditions for which medical aid was sought:-

Pregnancy	_
Labour	1
Lying-in	6
The child	6

Analgesia.

Analgesia was administered by County Council midwives to domiciliary patients as follows:-

Trilene		55
Pethidine		14
Trilene and	Pethidine	52

9. HEALTH VISITING.

18 full-time health visitors, 2 part-time health visitors, 2 full-time assistants to health visitor and 4 part-time assistants to health

visitor were employed in the Division at the end of the year. Two of them did tuberculosis visiting and maintained liaison between the Health Department and the Chest Physicians. One was largely occupied with the admission and discharge of elderly people to hospitals, old people's homes and Part III accommodation, working closely with the Geriatric Unit at Knaresborough Hospital. Like the rest of the nursing staff, the health visitors work under the general direction of the Divisional Nursing Officer.

The following table shows categories of visits made:-

1,397 47,129		Total visits
110,1	No. of cases i.e., first visits	first visits but excluding ineffective visits
1. Children born in 1967	1,833	8,211

(c) B.C.G. Vaccination

B.C.G. Vaccination was again offered to all children 13 years of age and over attending schools in the area.

The following are details of work carried out:-

1. No. of Medical Officers (including Divisional Medical Officer) approved to undertake B.C.G. Vaccination 5

Acceptances (a) No. of children offered tuberculin testing and vaccination if necessary (whether the offer was made during the year or previously) 1,922 (b) No. of (a) found to have been vaccinated previously (c) No. of acceptances ... 1,146 (d) Percentage of acceptances 59.6% Pre-Vaccination Tuberculin Test (a) No. of children 2(c) tested 1,046 (b) Result of Heaf Test: (i) Positive 130 (ii) Negative 872 (iii) Not ascertained 44 (c) Percentage positive 13.0% ... 4. Vaccination No. vaccinated following negative Heaf Test 872

12. MENTAL HEALTH.

(a) Mental Welfare.

Harrogate Therapeutic Centre.

The tenancy of a three-storey house was obtained, and the Centre transferred to its new premises at 13, Dragon Parade, Harrogate, on the 10th July, 1967. As a result it was possible for the Centre to be open, with a mental welfare officer in charge, from 9.0 a.m. to 4.0 p.m. each day, from Monday to Friday, instead of only in the afternoons as formerly.

Most of the mornings are taken up in the preparation of the mid-day meal. The afternoons are spent in occupational therapy, such as mending, laundry, and reconditioning furniture, and in group discussions. On three afternoons per week, one of the Psychiatrists from Clifton Hospital attends to see discharged patients.

By the end of the year there was an approximate weekly attendance of 110, including 25 day patients. The kitchen and dining room had almost reached capacity, serving twenty meals per day.

Psychiatric Social Club.

The Psychiatric Social Club continued to meet weekly at the Harrogate Training Centre.

Out-Patient Clinics.

Out-Patient Clinics are held on Tuesday and Friday afternoons at the Harrogate Hospital and on Monday afternoons at the Ripon Hospital. A mental welfare officer attends.

Rehabilitation.

2 patients under sixty, and 3 patients over sixty were rehabilitated in furnished accommodation.

(b) Harrogate Training Centre.

Staff

Mr. J. W. Plant resigned his appointment as Senior Instructor to take up the post of Manager at the Kings Lynn Adult Training Centre. Mr. Roebuck was appointed as temperary Instructor to assist Mr. Rattray.

Trainees.

The numbers on the Register are set out below:-

	27th Jan., 1967	31st Dec., 1967
Junior Wing	45	43
Adult Female Wing	14	17
Adult Male Wing	16	17
Special Care Unit	6	7

One girl from the Adult Female Wing obtained a residential post at the Royal Bath Hospital and another obtained a place at Botton Hall Village, which is a Rudolf Steiner establishment.

Outings.

A full programme of outings was arranged during the year. Highlights included visits to Manchester Airport, Leeds Railway Station, York City, Porters (Selby) Ltd. Timber Yard, and Selby Abbey. Public transport was used whenever possible. Seaside visits were made, one class at a time, by minibus. The smaller groups giving greater freedom of activity.

Competitions.

For the fourth year in succession the Centre was successful in the Yorkshire Regional Art Competition run by the National Society for Mentally Handicapped Children. The paintings were displayed in the Leeds Art Gallery and seven trainees won prizes.

Payments to Patients.

The system of incentive pay for the trainees in the Adult Wings works well, and pay day is eagerly anticipated.

Adaptation of Premises.

A washbay for Class 1, containing washbasins and toilets, has been converted from the adjacent storeroom and outside storage shed. This unit is now self contained which is a great improvement. An alternative wooden shed has been provided in the grounds for the storage of outdoor apparatus.

Television and Record Library.

Selected programmes for schools are viewed each week by the children in the Junior Wing. These are proving very beneficial. The Centre continues to be a member of the Harrogate Record Lending Library and records are changed fortnightly.

(c) Meadow Bank Hostel.

Residents.

Eight children live in the Hostel from Monday to Friday, returning to their own homes each weekend. They attend the Training Centre during the day. There has been one admission and one discharge during the year. The small girl who was discharged is now travelling to the Training Centre daily and a boy, aged ten, was admitted in her place, owing to the long term illness of his mother.

Leisure activities include outings and picnics in the Warden's car, train and bus rides, and a visit to the local pantomime. Birthdays, Christmas, and Bonfire Night are all celebrated with parties.

Short-stay Children.

23 short-stay children were admitted during the holidays when the Training Centre was closed. Some of these children present quite a problem as many of them are completely strange to the staff and are of widely different age groups and capabilities. They are often just becoming adjusted to hostel life when it is time for them to return home.

Staff.

The Assistant Warden left at the end of July. She had been very helpful indeed and we were lucky to secure a replacement of equal merit.

13. HOME HELP SERVICE

This service has shown a slight increase in the number of cases over the previous year, and 4,794 more hours were worked than in 1966.

6 full and 178 part-time home helps were employed, equivalent to 79 whole-time workers.

The following table gives details of the work undertaken for various categories of user:—

Category	No. of Cases	Employed Hours
Aged 65 or over	960	139,774
Under 65 years :— (a) Chronic sick and tuberculous	88	18,403
(b) Mentally disordered	1	107
(c) Maternity	59	2,169
(d) Others	56	3,398
Totals	1,164	163,851

14. PREVENTION, CARE AND AFTER-CARE OF TUBERCULOSIS.

The Chest Physicians hold sessions once a week at Scotton Banks Hospital, twice a week at Harrogate General Hospital and once a week at Ripon and District Hospital. The health visitors who do tuberculosis visiting attend the clinics at the Harrogate and Ripon Hospitals.

The Chest Physician reports regarding the Harrogate Area as follows:-

"During the year 1967, there were ten new cases of pulmonary tuberculosis notified, including one case which was re-notified after a period of quiescence. Four of these cases were infectious and five were new transfers in. 29 names were removed from the register, 17 being recovered, 5 transferred and 7 died - one of these being a case recently notified during the year. Two new cases of non-pulmonary tuberculosis were also notified, one involving the renal

tract and one involving glands. As a result of these new cases, 180 contacts were seen including home and work contacts.

Because of what appeared to be a rather high number of tuberculin positive children in a certain school at Harrogate, at the age of 13, 42 members of the teaching and domestic staff were examined but fortunately none showed any evidence of active disease.

Continued supervision in Out-Patient Clinics of about 80 already notified cases of tuberculosis was continued but the incidence of active infectious disease in the area is very low.

The Care Committee in the area has continued to give us very valuable help, financially and by backing our suggestions. Food parcels were given out to needy cases at Christmas and various families and patients have received help in the way of clothing, extra food and so on.

On the whole the situation as regards tuberculosis in the area appears to be reasonably under control. Sporadic new cases do occur but there is no relation between these and fortunately no secondary cases from these have been notified during the year."

3 new cases were seen at Ripon Hospital but contacts were very limited and little preventive action was necessary. 1 case of pulmonary tuberculosis died and his name was removed from the Register.

15. CERVICAL CYTOLOGY.

A screening test for the detection of cancer of the cervix was offered to all married women. Sessions were held twice weekly at Dragon Parade Clinic, Harrogate, and monthly at Alma House Clinic, Ripon. 1,354 women attended the Harrogate sessions and there were 9 positive smears. At Ripon 259 women attended and there were 4 positive tests.

16. CHIROPODY.

This service continued to be provided for old age pensioners, expectant mothers, and handicapped persons.

A direct service is in operation in the Borough of Harrogate and Ripon City. Indirect services, provided in conjunction with voluntary bodies, are worked in Knaresborough, Pateley Bridge, Boroughbridge, Nun Monkton, Burton Leonard, Whixley, Upper Poppleton and Kirby Malzeard.

17. REGISTRATION OF NURSING HOMES.

There were 14 registered nursing homes in the Division at the end of the year. 24 visits of inspection were made.

18. REGISTRATION OF OLD PEOPLE'S HOMES.

The 26 old people's homes registered in the area were visited in conjunction with the Divisional Welfare Officer.

19. CHILDREN NEGLECTED OR ILL-TREATED.

11 meetings of the Co-ordinating Committee were held in Harrogate during the year.

Representatives of the Local Authority Health, Education and Welfare Departments, the N.S.P.C.C., the Ministry of Social Security, the Guild of Help, the Ripon Dioceson Social Responsibility Council, the Medical Social Workers and the Probation Officers attended the meetings held at the Clinic, 2 Dragon Parade.

At the end of the year, 21 families were on the list. 6 new cases were admitted to and 4 families were removed from the list during the year. One family was coping well and was no longer in need of supervision, the children of another had all been taken into care, and two families had left this area.

Three families had their rent guaranteed. Two of the families allow rent arrears to accumulate then make regular payments to clear the debt, before starting the cycle over again. The third family was at Brentwood Recuperative Centre, Marple, Cheshire, from the 21st December, 1966, to 3rd February, 1967, when the mother and children unwillingly left at the father's insistence. He had been a disruptive influence ever since his arrival at the Centre from prison on the 23rd December, and he decided he would be better off financially if the family returned to Harrogate. They got into serious difficulty over rent shortly after their return, the husband refusing to pay the rent because the tenancy was in his wife's name. He then left home. The large rent arrears have been cleared. His wife copes very much better when on her own.

20. MEDICAL EXAMINATION OF STAFF, ETC.

Medical examination of new staff is only carried out on those who have a significant medical history or who are over 45 years old, thus avoiding some unnecessary work for the medical staff.

Medical examinations were carried out as follows:-

West Riding County Council		 	36
District Councils		 	84
Other authorities		 	13
Applicants for Teachers' Train	ing Colleges	 	114
Children for employment (incl			41

21. HEALTH EDUCATION.

Relaxation classes are held in many Clinics and have also been started in the Ripon Army Camp and the U.S. Base, Menwith Hill.

Talks have been given by various members of the medical and nursing staff to schools, mothers clubs, Girl Guides, St. John Ambulance Brigade, Friendship Clubs for old people, Inner Wheel, Women's Institutes, a nurses' training school, a teachers' training college, and at the Army Apprentices' School.

Films have been shown to various youth clubs.

AMBULANCE SERVICE

In the West Riding this is a separate service. The ambulance station is at Harrogate under the charge of a Superintendent Ambulance Officer. In both Ripon and Pateley Bridge there are sub-depots which are manned by the respective divisions of the St. John Ambulance Brigade which give stirling service. Short wave wireless control is held throughout the West Riding area.

Scarlet Fever.

There were 31 notifications during the year, compared with 26 in 1966, a rate of 0.51 per 1,000 population.

Whooping Cough.

39 cases were notified, compared with 7 in the previous year, giving a notification rate of 0.64.

Measles.

714 notifications were received compared with 578 in 1966, which gave a notification rate of 11.76 per 1,000 population. There was one death of a young mongol child.

Dysentery.

There were 2 notifications, both of the Sonne type, during the year, compared with 10 the previous year. Both were in children cf five years of age.

Pneumonia.

1 case of acute primary pneumonia occurred in a woman aged forty-nine.

Erysipelas.

2 cases occurred, both in patients over sixty-five years of age.

Tuberculosis.

7 new pulmonary cases, 4 males and 3 females, and 2 non-pulmonary cases, both females, were notified during the year.

The Corporation continues to give priority to the rehousing of cases of tuberculosis who need it.

The following tables give details from the Tuberculosis Register:-

CANCER.

136 deaths were attributed to cancer, giving a death rate of 2.24 per 1,000 population.

Borough of Harrogate

ANNUAL REPORT

CHIEF PUBLIC HEALTH INSPECTOR

CLEANSING SUPERINTENDENT

THE YEAR

1967

Borough of Harrogate

ANNUAL REPORT

OF THE

CHIEF PUBLIC HEALTH INSPECTOR

AND

CLEANSING SUPERINTENDENT

FOR THE YEAR

1967

Borough of Harrogate

ANNULAL REPORT

IIVIJAOO DAILCAINGISE

HOR THE YEAR

1961

ANNUAL REPORT OF THE CHIEF PUBLIC HEALTH INSPECTOR AND CLEANSING SUPERINTENDENT FOR THE YEAR 1967.

To The Mayor, Aldermen and Councillors of the Borough of Harrogate.

Mr. Mayor, Ladies and Gentlemen,

I herewith submit for your consideration my twentyfirst annual report for 1967.

This has been an exceedingly difficult year for the Department. The pressure of work has increased considerably due mainly to the public making more use of the facilities available to them and to work in connection with food inspection and supervision.

Additional clerical staff is needed to cope with the ever expanding duties being carried out.

The Cleansing Department struggled throughout the year to maintain a seven day collection. They failed to do so in three districts and, following holidays, collection of refuse throughout the Borough fell into arrears. Every effort was made to recruit sufficient labour to carry out this very important task but men either were not available or were not attracted to the job. The disposal costs for refuse are still exceedingly low, there being a credit of elevenpence per ton after deducting from the amount received for salvage the gross expenditure on labour, plant, equipment, land and other buildings and administration.

The slaughterhouse continued to function in a satisfactory manner though the continued falling off in the throughput of animals is making it extremely difficult to keep this establishment an economical unit.

I would like to express my thanks to the Chairman and Members of the Health and Housing Committees for their support and assistance and to the officials of other Departments for their advice and co-operation during the year.

I am, Mr. Mayor, Ladies and Gentlemen,

Your obedient servant,

E. DODSWORTH, Chief Public Health Inspector, Cleansing Superintendent.

SANITARY CIRCUMSTANCES OF THE AREA. GENERAL.

Meteorology. The Harrogate Meteorological Station, which is under the control of the Borough Engineer, is situated at the Northern Sewage Disposal Works, Bilton, from which the following observations were taken:—

Sunshine. 1,390.7 hours of sunshine were recorded during the year, 196.9 more than 1966.

Rainfall. The total rainfall recorded during the year was 33.60 inches, the wettest day being the 16th October when 1.61 inches of rain was recorded. The figure for 1966 was 35.15.

Temperatures. The maximum temperature during the year was 79°F. recorded on the 17th July, and the minimum temperature was 16°F. recorded on the 8th January.

Wind. The prevailing wind during the year was westerly.

WATER SUPPLY

The distribution of water in the Harrogate area is undertaken by the Claro Water Board which was formed on the 1st April, 1959, and subsequently enlarged by the addition of the Wath Rural District Council on the 1st April, 1960.

The constituent authorities of the Board are as follows:-

Harrogate Borough Council.

Knaresborough Urban District Council.

Nidderdale Rural District Council.

Ripon City.

Ripon and Pateley Rural District Council.

Wath Rural District Council.

Wetherby Rural District Council.

The water supply of the town is derived from five impounding reservoirs and an adit in the Pennine Range. The adit which is known as Eagle Level is situated about three-quarters of a mile west of Pateley Bridge. There are two catchment areas, one six miles west of Harrogate, and the other north of Masham in the North Riding of Yorkshire, some twenty-eight miles away.

The supply is abundant, pure and soft in character, and the gathering grounds are largely owned and wholly controlled by the Board, farming activities being strictly limited.

The whole of the supply is filtered by slow sand pressure filters and subsequently sterilised with chlorine and ammonia to ensure a wholesome water to the consumers.

Samples of water are taken regularly from the town's mains at various points within the Borough for chemical and bacteriological examination.

Number of samples examined	75
Being samples of water from:-	
Domestic supplies (Town's mains)	44
Domestic supplies (wells, etc.)	5
Wells and springs (mineral)	26
Number of samples found upon examination to be satisfactory	66
Number of samples found to be unsatisfactory	9

In the portions of the Borough which were incorporated on the 1st April, 1938, from the Wetherby Rural District and the former Knaresborough Rural District there are still thirteen houses which obtain their supply from wells and springs. It has not been possible to connect these dwellings to the main water supply.

Report on Two Samples of Water taken on 7th September and 2nd March 1967 from the Filter Works

Residual Chlorine		Nil.	Nil.

Plumbo-Solvency of Water Supplies.

Six samples of water were submitted for analysis under the above heading and were found to be satisfactory.

CLOSET ACCOMMODATION.

The following table shows the number of pail closets, earth closets and cesspools, etc., in the Borough at the end of December, 1967

Pail and tub closets	 	 8
Privies	 	 10
Waste water-closets	 	 2
Cesspools	 	 62

All pail closets are emptied either once or twice weekly.

Cesspools are emptied by means of a cesspool emptier as and when required.

RIVERS AND STREAMS.

These come under the supervision of the Yorkshire Ouse and Hull River Authority.

Routine inspections have been carried out on all becks and streams within the Borough during the year. One case of pollution was found and action taken to abate the nuisance.

INSPECTION OF THE AREA.

15,929 inspections were carried out during the year by the Public Health Inspectors, an increase of 238 over the previous year's figures. A wide variety of premises were inspected and every effort made to see that the requirements of the various Acts and Regulations were complied with.

STATUTORY NOTICES

Thirty-five legal notices were served during the year in order to secure the abatement of nuisances of various kinds.

In all other instances the full co-operation of the persons responsible for remedying defects or conditions existing in connection with a trade or premises was fully received by the department.

NOISE ABATEMENT ACT, 1960.

Fourteen complaints were received about nuisances from noise, thirteen of which were investigated. Ten were confirmed and the necessary action taken to have the nuisances abated.

An alleged noise nuisance from a factory in the town was again investigated by the department, but it was found that the noise from the works was the result of the trade being carried out and every practical means had been taken by the firm for preventing and counteracting any nuisance.

SWIMMING BATHS AND PADDLING POOL.

There are 3 indoor swimming baths in the Borough owned by the Corporation, all being equipped with continuous filtration and chlorination plants.

During the year a total of 24 samples of water were taken, all of which were satisfactory.

In addition to the above there are 5 indoor swimming baths and one open-air swimming pool, all privately owned. 31 bacteriological samples of water were taken from these baths, 3 of which were unsatisfactory, due to defects in the purification plant.

I PUBLIC SWIMMING BATHS:

DISINFESTATION.

For the past few years I have written about the increasing infestations of beetles and the difficulty of dealing with them. It appears to me that they are becoming more and more resistant to insecticides. One hundred-and-twenty-seven complaints were received by the department against a total of sixty-one for 1966.

There was a similar increase with regard to wasp complaints. The department only deals with nests situated at a level where they can easily be reached. If an infestation occurs in part of a building necessitating the use of ladders, equipment is loaned out to the occupiers who usually engage a builder to carry out the work of disinfestation.

RAT AND MOUSE DESTRUCTION

There was an increase in the number of rat and mouse infestations reported during the year. This is consistent with the growth of the town. The rodent operator appointed to carry out this work is finding it increasingly difficult to cope with all the complaints reaching the department, and it is obvious that extra staff must be employed.

The following gives details of the work carried out during 1967

		Com- plaints	No. of Premises Visited	Total No. of Visits	No. of Complete Treat- ments	Bodies

DISINFESTATION OF SEWERS.

The 10% test was carried out in November, 248 manholes were baited and 30 of them showed "takes". These 30 and 180 adjoining manholes were treated with Fluoracetamide.

INSPECTION OF FACTORIES.

Routine inspections of factories sited in the town were carried out. Most of them were well maintained and complied with the requirements of the Factories Act.

Prescribed Particulars on the Administration of the Factories Act, 1961.

THE OFFICES, SHOPS AND RAILWAY PREMISES ACT, 1963

Every effort was made during the year to complete the survey of all properties under the above Act. The department did not succeed in reaching this target, but a considerable amount of work was carried out and many premises were brought up to the standard required by this particular legislation.

Twelve accidents were reported against twenty-two for 1966. It is obvious that more care is being taken in offices and shops as far as the safety of the staff is concerned. It is pleasing to know that once a defect in a building or machinery is reported as having been the cause of an accident, it is dealt with immediately. Before legislation was introduced such things as defective treads to staircases etc., were not attended to following an accident, but today such defects are repaired or renewed at once.

ATMOSPHERIC POLLUTION

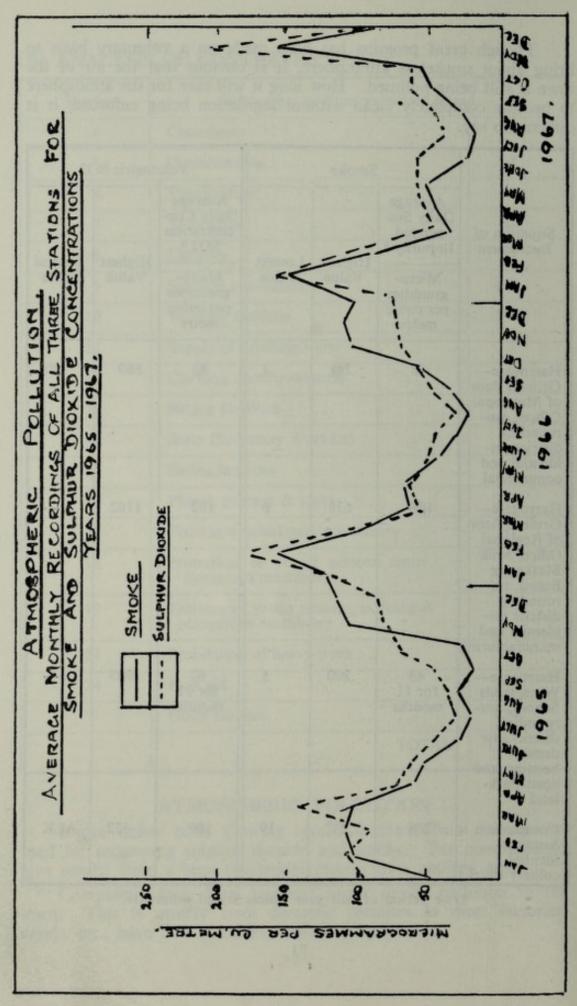

I give below table showing results obtained from instruments used for measuring sulphur dioxide and smoke. For comparison I give results from a semi-residential district in a colliery area.

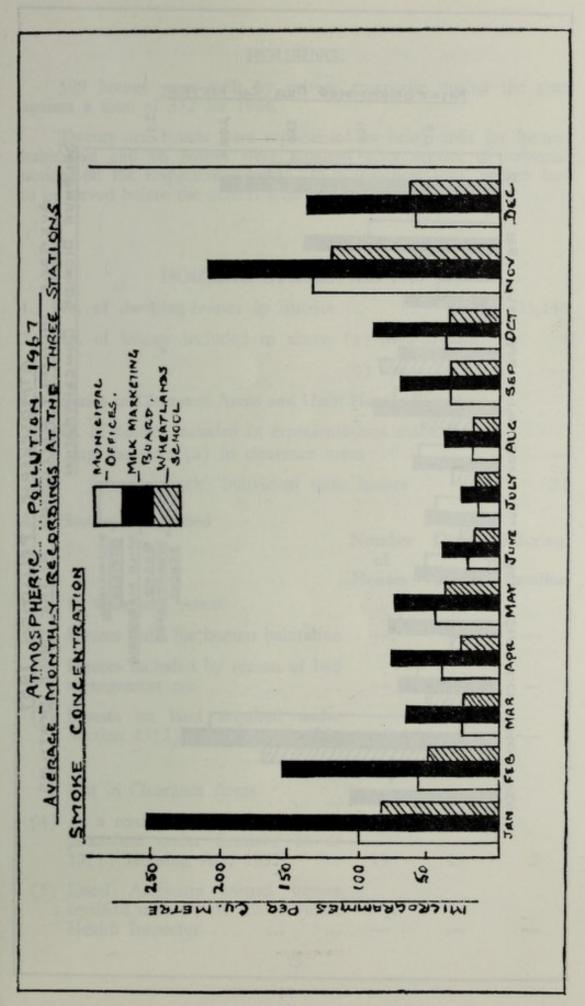

Complaints have been received about smoke pollution in the town. This is usually from domestic premises as most factories, hotels, etc., have now installed smokeless equipment.

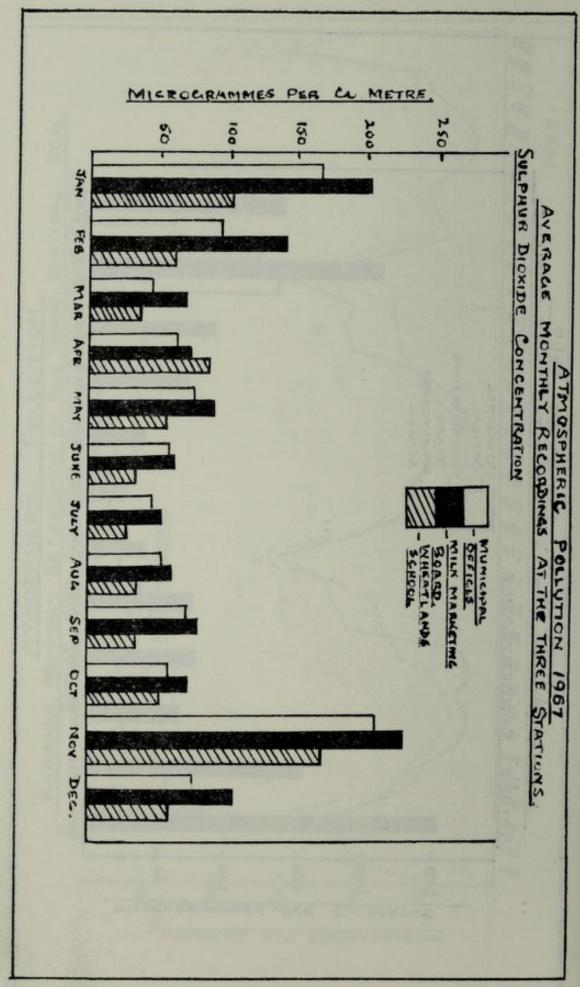

Though great progress has been made on a voluntary basis to bring about smokeless atmosphere, it is obvious that the air of the town is still being polluted. How long it will take for the atmosphere to become completely clean without legislation being enforced, it is difficult to say.

^{*}For period of full year unless stated otherwise.

HOUSING.

509 houses were built by private enterprise during the year against a total of 372 for 1966.

Twenty-one houses were represented as being unfit for human habitation and 96 houses were repaired after service of informal notices on the respective owners. In 6 instances legal notices had to be served before the defects were remedied.

WEST RIDING COUNTY COUNCIL (General Powers) ACT, 1951.

Food Hawkers.

There are now sixty-two registered food hawkers and twentythree premises used by them for the storage of food.

Hairdressers and Barbers.

Routine inspection of ninety-two registered hairdressers and barbers was carried out during the year. All were maintained in a satisfactory manner.

Rag Flock and Other Filling Materials Act, 1951.

Five premises are registered under Section 2 of the Act.

Pet Animals Act, 1951.

Twelve inspections were made to the six licensed premises, all of which, with the exception of one, were found to be well maintained.

Particular attention was given to the care and housing of animals for sale and the routine to be followed in case of an outbreak of fire in the building.

Scrap Metal Dealers Act, 1964.

There are eleven registered premises.

INSPECTION AND SUPERVISION OF FOOD. MILK SUPPLY: MILK AND DAIRIES REGULATIONS.

There are now 194 distributors of milk within the Borough, an increase of 17 over 1967.

Only 2 complaints were received during the year about the condition of milk bottles and the trade must again be congratulated on the way they carry out their business.

Summary of Chemical Analysis of Milk Samples for 1967.

Thirty samples of milk were submitted to the Public Analyst for examination to ascertain the fat and solids-not-fat content, the presumptive standards being 3% and 8.5% respectively.

The average fat content for milk samples in the town was 3.71. Solids not fat averaged 8.78%.

The Channel Island milk averaged 4.62% fat and 9.00% solids.

PARTICULARS OF OTHER FOODS CONDEMNED DURING THE YEAR, 1967.

2 tons 6 cwt. of food found to be unfit for human consumption was condemned and disposed of at the Council's tip.

The work entailed in the inspection of food increases each year. This is due to the popularity of Harrogate as a shopping centre and the growth of the town generally.

WORK CARRIED OUT AT FOOD PREMISES.

Close supervision has been maintained of all premises handling food. Defects and infringements of Acts and Regulations were found and these are enumerated in the table below.

There were no definite cases of food poisoning during the year. The routine inspections of the catering services of the town were strictly carried out and also of shops and premises where food is manufactured, prepared or sold. Regular inspections are absolutely essential due to the many changes constantly taking place in the staff employed by such establishments.

LEGAL PROCEEDINGS.

Every case must be judged on its merits. Complaints can be divided into two divisions; where food has deteriorated in quality due to the length of time it has been kept in the shop since production or where it contains extraneous matter which is not of the nature or substance demanded by the purchaser. In the latter case one must also consider whether the foreign body is innoxious in character or not, and if its introduction into the food was at the place of manufacture and if so, was due to carelessness in production or sabotage on the part of an employee.

It appears to me that this type of complaint is steadily increasing each year. Perhaps it is due to the fact that people are more aware of food hygiene generally and the functions of a health department in this respect. I give below table showing details of action taken in certain instances.

Food	Action taken
Mouldy Steak	Fined £10
Fruit Fly in bottled milk	Fined £10
Safety pin in bottled milk	Fined £10
Mouldy chocolate covered cream cake	Fined £50
Nail in Yorkshire date pasty	Fined £10

Bristle in sausages	Warning letter

FOOD AND DRUGS ACT 1955.

During the year 70 samples were taken for chemical analysis, 41 of these being formal and 29 were informal.

3 samples were found to be not genuine. Labels on food were scrutinised and if there was any doubt about the claims made on them, the food was submitted for analysis.

PUBLIC CLEANSING - HOUSEHOLD AND TRADE REFUSE.

1st April, 1967 to 31st March, 1968.

Collection of Refuse.

Refuse was collected from 24,340 houses and other premises within the Borough an increase of 431.

Collecting Vehicles.

The collection of refuse was carried out by rear loading vehicles with a total carrying capacity of 336 cubic yards.

In four of these vehicles gravity compression is used to consolidate the refuse as opposed to the power-press used in the five other vehicles.

The density of refuse continued to decrease during the year and became more difficult to handle as the bulk increased.

House refuse is an excellent guide to the changing patterns of the standard of living. The domestic discards today are much more sophisticated in character than five years ago. Television sets, furniture, carpets, washing equipment and cookers etc. appear in profusion and the story of what would appear to be a reasonable affluent society is plainly spread out before ones eyes when the refuse vehicle discharges its load at the tip.

The most amazing advance, however, is in the use of plastics. These take the form of containers of all sizes and description plus huge amounts of cellophane used for covering or wrapping articles of every description.

The refuse vehicles used for some years now by the department are slowly being outmoded by the refuse they carry. It is the intention of the department to replace them with the impeller method of loading.

The vehicles were kept in good condition by the drivers and well maintained by the cleansing foreman. The figure for repairs being £1211 19s. 9d. against £907 5s. 4d for the previous year.

P.P. with Power Press.

Trade Refuse.

The following are the charges made for the collection of trade refuse:-

9d. per 2½ cu. ft. bin in excess of one per week.

5s. per 1¹/₄ cu. yd. container.

Hotel Refuse.

One free collection is made per week. For each weekly collection in addition to the former the sum of £5 5s. 0d. per annum is charged.

Private Tipping.

The charges made for the private tipping of refuse by individuals are 4/0d. per load up to 2 tons and 6/0d. per load over 2 tons. During the year 1527 loads of refuse were disposed of on this basis yielding a revenue of £305 8s. 0d.

Tonnage and Frequency of Collection.

The highest weekly tonnage of refuse was 524 tons which was collected during the week ending 8.4.67, and lowest tonnage for the week ended 5.2.68. when 401 tons were collected. The figures for last year were 514 tons and 368 tons respectively.

25,833 tons of household and trade refuse were collected during the year against 24,147 tons for 1966/67.

Owing to the great difficulty experienced in recruiting labour, the frequency of collection in a number of districts became irregular. The public, after many years of constant routine collection did not, in a number of cases, take kindly to the delays in removing their rubbish.

Every means of attracting labour was exploited by the department but the wages offered proved to be a stumbling block when there were so many better paid and more attractive jobs available in the town. Students on vacation from the Universities were a considerable asset to the department. They enabled the holiday period to be bridged with comparative ease and kept pace with the regular members of the gangs in lifting and emptying bins.

The question of wages is now receiving the full attention of the Council within the stipulations laid down by the Government.

Hours Lost Through Sickness and Accidents.

7,772 hours were lost through sickness, an increase of 708 hours over the previous year. This is equivalent to losing the output of over three men.

The hours lost because of accident showed an increase of 496 over the previous year. The figures being 1,688 hours in 1967/68 against 1,192 hours in 1966/67.

With the extension of the holiday period allowed to the men and recruitment of staff not being sufficient to maintain at all times a full establishment, it will be appreciated that it was no easy task to carry out a weekly collection of refuse.

Disposal of Refuse.

All the refuse was disposed of by controlled tipping. The Council during the year acquired Grange tip sited off Ripon and Skipton Road. This, indeed, proved to be a most fortunate purchase as the tips used by the Council were closed owing to the outbreak of foot and mouth disease and what could have been a rather alarming situation was solved in a very satisfactory manner. When the ban was lifted, work of reclaiming the scrub land at Oakdale Farm was resumed. The photographs at the end of the report give some idea of the nature of the work being carried out. It is very gratifying to all concerned to see grass growing in places previously containing only rock and bracken,

The small tractors used with great success for the past fifteen years are now finding it difficult to operate in the light and spongy refuse and the time is now due to doze the rubbish with a four wheel drive vehicle.

The difficulty of handling plastics in collection was nothing compared to the problems posed by their disposal. The properties which made plastic containers invaluable, that they do not, rot, burn or easily sink, combined to make them very difficult to dispose of. It has been stated that of the total United Kingdom production of one million tons of plastics, about a quarter went into packaging which was discarded and that last year British housewives threw away some 600 million plastic bottles. One could be excused for thinking that they all arrived at the Harrogate tip.

Salvage.

The result from the sale of salvage produced a gross income of £9,183.

The men are to be congratulated on the efficient way in which they have recovered this salvage and the public for making it available.

The following table shows how the 1967/68 amount was made up:-

Material		Tons Cwts. Qrs.			£ s. d.		
Waste Paper		1055	11	0	9,103	12	3
Scrap Tins		36	6	2	79	9	7
Totals		1091	17	2	9,183	1	10

The table below shows the value of salvage sold since the cessation of hostilities:—

			£	S.	d.
1946-58	 	 	 49,634	10	2
1958-59	 	 	 5,733	10	3
1959-60	 	 	 6,827	16	2
1960-61	 	 	 7,186	1	7
1961-62	 	 	 8,416	11	3
1962-63	 	 	 6,511	12	8
1963-64	 	 	 6,491	10	1
1964-65	 	 	 6,710	11	2
1965-66	 	 	 8,507	13	6
1966-67	 	 	 9,853	8	5
1967-68	 	 	 9,183	8	5

Protective Clothing.

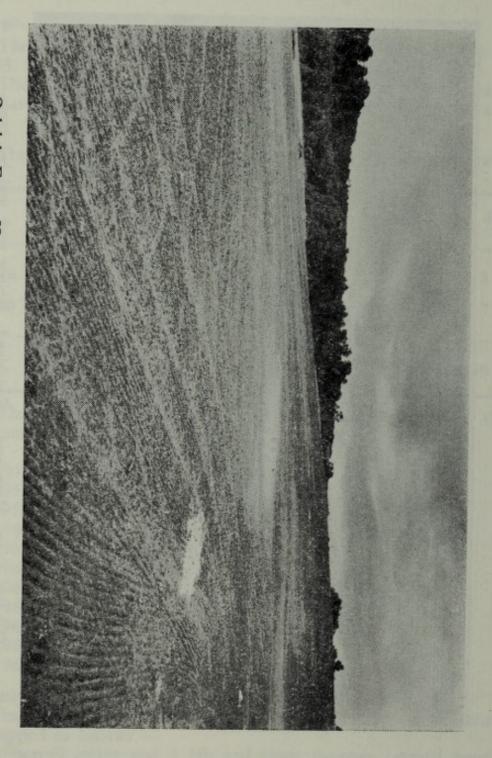

Each man employed in the collection and disposal of refuse is equipped as follows:—

1 overall jacket and 2 bib and brace trousers (annual issue).

1 three-quarter length waterproof coat and 1 pair of waterproof leggings (triennial issue).

Oakdale Farm, Harrogate - Scrubland; mainly rock and bracken - August 1964.

Oakdale Farm, Harrogate - on completion of section of tipping, 1967

PUBLIC CLEANSING COSTS FOR YEAR ENDING 31st MARCH, 1968.

The table below gives the costing return which has to be submitted to the Ministry of Housing and Local Government every financial year end. The cost of refuse collection and disposal in Harrogate is below the average for similar towns in England and Wales.
