To the Chairman and Members of the Hartismere Rural District Council.

Mr. Chairman, Ladies and Gentlemen.

I have the honour to present the Annual Report of the Medical Officer of Health for 1963.

The standardised Birth Rate has again risen.

The Infant Mortality Rate has reached a new low level - 7.88 per 1000 live births. This is most satisfactory.

The Stillbirth Rate has also shown a very gratifying decrease and the Standardised Death Rate has fallen to 9.60.

There have been no significant changes in the causes of death.

I am,
Yours faithfully,

K. M. HARDING,

Medical Officer of Health.

November, 1964.

Standardised death rate		9.60	
Death rate England and Wales		12.2	

The Registrar General has continued to supply a comparability factor, 0.87, by which the Crude Death Rate must be adjusted for comparison with other areas of the country. As this factor is less than unity, the Standardised, or corrected Death Rate is less than the Crude Death Rate. This indicates that Hartismere has a greater "weighting" of elderly persons than the average for the rest of the country.
