R. Banks, F.R.S.H., M.A.P.H.I.

---

Additional Public Health Inspector

W.R. Patey, M.A.P.H.I.

# ANNUAL REPORT

of the

Acting Medical Officer of Health for the Urban  
District of Haverhill in the Administrative County  
of West Suffolk, for the year ended 31st December,  
1972

---

Public Health Department,  
Severals House,  
Newmarket.

29th August, 1973.

To the Chairman and Members of the  
Haverhill Urban District Council

Mr. Chairman and Gentlemen,

In accordance with the Public Health Officers regulations, 1959, I have the honour to present for your information the annual report of the Medical Officer of Health for 1972. The appointment of Medical Officer of Health is at present vacant and filled on a temporary basis by the County Medical Officer of Health. I succeeded Dr. D.A. McCracken in July 1972 and it therefore falls to me to present this report.

The estimated population of the district has increased by 540 people, the natural increase, that is excess of births over deaths, being 200. The birth rate remained considerably higher than that for England and Wales as a whole, reflecting the younger age structure of the population of Haverhill. For the same reason the death rate was low in comparison with the rest of the country, but included seven deaths from lung cancer and twenty five from coronary heart disease. Cigarette smoking is a very significant factor in lung cancer and implicated in coronary heart disease and many of these deaths could have been prevented had the subjects not ignored the clear evidence of the dangers of cigarette smoking which is now available.

The incidence of notifiable infectious disease was very low and indeed the lowest figure for the last ten years. This satisfactory state of affairs is largely due to a very marked reduction in the incidence of measles for which the introduction of immunisation against this disease, which still has an appreciable incidence of serious complications, must be held responsible.

The environmental work of the Public Health Department is dealt with in the Report of Mr. R. Banks, Chief Public Health Inspector, which follows. I am greatly indebted to Mr. Banks for his help in maintaining the work of the department during this difficult transitional period and in particular for his great help in compiling this report.

D.G.H. Patey,

County Medical Officer of Health

# ANNUAL REPORT

of the

Acting Medical Officer of Health for the Urban  
District of Havering in the Administrative County  
of West Suffolk, for the year ended 31st December,  
1972

Public Health Department,  
Beverly House,  
Newmarket.

29th August, 1973.

To the Chairman and Members of the  
Havering Urban District Council

Mr. Chairman and Gentlemen,

In accordance with the Public Health Officers Regulations, 1972, I have  
the honour to present for your information the annual report of the Medical  
Officer of Health for 1972. The appointment of Medical Officer of Health is at  
present vacant and filled on a temporary basis by the County Medical Officer of  
Health. I succeeded Dr. D.A. McCracken in July 1972 and it therefore falls to  
me to present this report.

The estimated population of the district has increased by 240 people, the  
natural increase, that is excess of births over deaths, being 200. The birth  
rate remained considerably higher than that for England and Wales as a whole,  
reflecting the younger age structure of the population of Havering. For the  
same reason the death rate was low in comparison with the rest of the country,  
but included seven deaths from lung cancer and twenty five from coronary heart  
disease. Cigarette smoking is a very significant factor in lung cancer and  
improved in coronary heart disease and many of these deaths could have been  
prevented had the subjects not ignored the clear evidence of the dangers of  
cigarette smoking which is now available.

The incidence of notifiable infectious diseases was very low and indeed the  
lowest figure for the last ten years. This satisfactory state of affairs is  
largely due to a very marked reduction in the incidence of measles for which the  
introduction of immunisation against this disease, which still has an appreciable  
incidence of serious complications, must be held responsible.

The environmental work of the Public Health Department is dealt with in the  
Report of Mr. R. Banks, Chief Public Health Inspector, which follows. I am grateful  
indeed to Mr. Banks for his help in maintaining the work of the department during  
this difficult transitional period and in particular for his great help in  
compiling this report.

D.G.H. Patey,

County Medical Officer of Health

# SECTION A

## GENERAL STATISTICS AND SOCIAL CONDITIONS

Area of the District	..	..	..	..	..	..	..	2,562 acres
Rateable Value (as at 1.4.72)	..	..	..	..	..	..	..	£516,240
Sum represented by a lp. Rate	..	..	..	..	..	..	..	£5,650
Rates .. .. .	..	..	..	..	..	..	..	102.5p
(County Rate 61p    U.D.C. Rate 41.5p)								
Number of inhabited houses	..	..	..	..	..	..	..	4,378
Estimated population as at 30.6.72	..	..	..	..	..	..	..	13,010
Population - Census 1971	..	..	..	..	..	..	..	12,430

The industrial activities of the district are varied and include agriculture, the manufacture of ready made clothing, gloves, brushes, ropes, twines, sacks, telecommunications equipment, office furniture, steel furniture, wooden furniture, sports equipment, camping equipment, sheet metal products, essences, oil well equipment, jewellery, automobile accessories, ladders, non-ferrous castings, scientific glassware, wooden cabinets, wooden household products, chemicals, paint, refrigeration appliances, data processing equipment, weighing machines, food machinery, tools and electrical and mechanical components, display models, motor vehicle lamp holders and rubber and plastic goods. There are firms engaged in engineering, the processing of sausage skins, specialist packing, laundering, printing, the processing of animal feeding stuffs, potato processing, paper converting, paint spraying and food warehousing.

There is a Town Development scheme which is being carried out with the co-operation of the Greater London Council.

Death Rates			11.3	13.8	11.1	11.6	11.5	13.2				

## SECTION C

### GENERAL PROVISION OF HEALTH SERVICES IN THE AREA

#### Hospitals and Ambulance Facilities

There are no hospitals within the area. The County Council are responsible for the ambulance service and have provided an ad hoc ambulance station at Camps Road where a full-time service is maintained. There are two first-line ambulances with a reserve maintained at the station. They are manned by fully experienced and trained crews.

#### Nursing in the Home

An average of seven district nurse-midwives were available during the year to deal with community mid-wifery and home nursing. In addition two temporary nurses were employed at various periods. Three domiciliary health visitors were available in the district and for clinic duties as well as the nursing/midwifery staff who are all on the staff of the County Health Department.

#### Health Clinic

The ad hoc premises have now been fully utilised for some years and are adequately staffed by the County Council with some help from the Hospital Board and the Family Planning Association. Clinics are held at regular intervals, some once or twice weekly, whilst the more specialised at longer, but nevertheless, regular times.

Clinics etc. held are :-

Child Health (Infant Welfare), Ante-natal, Mothercraft, Post-natal, Chiropody, Dental, Speech Therapy, Physiotherapy and Dermatology (Regional Hospital Board) Educational Psychology, Family Planning, Mother Club, Slimming Club and Marriage Guidance.

#### OPEN AIR SWIMMING POOL

The Open-air Swimming Pool is situated at Swan Lane near to the centre of the town. The main pool is 75' x 30' with a maximum depth of 7' constructed in 1930, with a Junior Pool 40' x 20' with a depth varying from 1' 6" to 3' 0". A filtration and chlorination plant was installed in 1938 and increased in capacity in 1964. A heating system for both pools was installed in 1970.

The charges are £1.50 for Adult Season Ticket holders and £1.10 for Junior Season Ticket holders. The charge for a single session is £0.12 for Adults and £0.06 for children.

There were 28 Adult Season, 216 Junior Season tickets sold. In addition, 1,712 adults and 14,416 juniors paid for admission.

The pool was reserved for the exclusive use of schools during the summer term in the mornings and four afternoons and one evening each week is reserved for the Swimming Club.

Daily field tests are carried out on the bath water and regular bacteriological tests are carried out which show that a regular high standard was achieved.

#### SEWERAGE

Stage I of the Elmhurst surface water sewer to connect part of the Duddery and Colne Valley Road areas to the river to the south east of the Elmhurst Estate was completed.

Number of dwelling houses connected to the sewers ..... 4,427

Number of dwelling houses not connected to the sewers ..... 40  
(Not within a reasonable distance of a public sewer)

A sewer was constructed to the Inlet Works of the Sewage Works to allow for the development of the residential land to the north east corner of the town.

## SEWAGE DISPOSAL WORKS

Apart from minor details the Contract for the extension of the Works was completed. The Works is now capable of dealing with the River Authority's standard 10 BOD, 10 Suspended Solids, 10 Ammonia.

In order to cater for the further extension of the town and particularly in view of the large quantity of trade effluent, instructions were given for the acquisition of the site at Sturmer and the design for the Sewage Works Extension. The intention is to remove the sludge treatment plant from Couplas Road, to put additional storm water treatment at Couplas Road and to do complete treatments on a balanced flow principle at the two Works.

## REFUSE COLLECTION AND DISPOSAL

Collection of domestic and trade refuse is undertaken by the Department. 4304 domestic premises and approximately 265 trade, commercial and other premises are now collected weekly.

The bonus system of refuse collection which was organised in 1963 is continuing and is working satisfactorily.

Collection is carried out by a 35 cub. yd. Dennis Paxit III and a Karrier Musketeer 17/60 capacity compression type vehicles and a 25 cub. yd. Fore and Aft Tipper. Disposal is by tipping.

The free collection of bulk items of household refuse is continuing, a service which is very necessary in an expanding town.

A Vickers Seedrum 50 ton capacity Refuse Pulveriser plant has been installed and is working satisfactorily.

The collection of abandoned vehicles in the town is being carried out under the powers given by the Civic Amenities Act.

## SECTION F

### WATER SUPPLY

Mains water is supplied to the district by the West Suffolk Water Board.

Bacteriological samples taken throughout the year and submitted to the Public Health Laboratory Service were reported as satisfactory. Samples submitted for chemical analysis were reported by an analyst to be suitable for drinking and general purposes.

All occupied and unoccupied dwellings in the district are supplied from public water mains. At the end of the year there were 4,378 occupied dwellings served in this way and the estimated population figure was 13,010. All dwellings have a direct supply into the dwellings with the exception of two cottages which are supplied by an external standpipe.

The Water Board does not fluoridate the water supply but a certain fluoride content occurs naturally. Water is obtained from four sources and the fluoride content varies in different zones of the town according to the bore hole from which the water is obtained. In the main 150,000 gallons per day is obtained from the Burton End bore well with a fluoride content of 0.60 parts per million and 400,000 gallons per day from the Bartlow bore well with a fluoride content of 0.10 parts per million. These supplies are augmented as necessary by water from the Wixoe and Great Wrattling bore holes containing 0.60 and 0.30 parts per million of fluoride respectively.

### COUNCIL HOUSING

Council housing is under the management of the Council's Housing Manager, P.A. Hewitt, F.I.H.M.

At the end of the year the Council owned :-

222	4-bedroom houses
2465	3-bedroom houses
254	2-bedroom houses
52	2-bedroom bungalows
42	1-bedroom bungalows
47	bedsitter bungalows
4	3-bedroom flats
36	2-bedroom flats
24	1-bedroom flats
16	bedsitter flats
28	bedsitter flats with warden service
1	Warden's flat
26	other houses purchased by the Council
<u>3217</u>	

### PRIVATE HOUSING

The Council's slum clearance programme was completed some years ago. There remain a small number of old houses the condition of which is reviewed from time to time by the public health inspectors and in this connection a small area consisting of six houses was declared a clearance area during the year.

In the course of the year 6 standard and 27 discretionary improvement grants were approved by the Council.

## POULTRY INSPECTION

There is one small poultry slaughterhouse within the district which was visited 51 times during the year. A total of 2,372 birds consisting of 1,187 hens and 1,185 chickens were slaughtered during the year. 1.52 per cent of the birds weighing a total of 154 lbs. were rejected as unfit for human consumption.

Slaughtering normally takes place about once a week at these premises and an inspector pays a visit on each occasion. The premises are clean and well conducted and the low rate of rejection of unfit birds is due to the fact that the proprietor rejects emaciated and poor birds at the farms rather than bring them to the slaughterhouse.

## FOOD PREMISES

Butchers' shops .. .. .	12
Butchers' Manufacturing Premises .. .. .	9
Bakehouses .. .. .	1
Grocers' and General Stores .. .. .	13
Cafes, School Kitchens & Factory Canteens .. .. .	15
Wet and Fried Fish-Shops .. .. .	4
Greengrocery .. .. .	9
Sweets, Confectionery .. .. .	16
Milk Depots .. .. .	2
Hotels with catering facilities .. .. .	2
Public Houses and Licensed Clubs .. .. .	14
Shops with Off Licenses .. .. .	5

For the most part there was the utmost co-operation from members of the food trades in securing compliance with the Food Hygiene (General) Regulations, 1970.

## PEST DESTRUCTION

The Council employs one rodent operator who in addition to dealing with rodent disinfection carries out other disinfection and disinfection work.

A free rat and mice destruction service is provided in respect of domestic dwellings and the treatment of business premises is charged at cost on an hourly basis. This has been found to encourage early notification of infestation thus ensuring prompt destruction treatment.

Rodent treatment of the Council's refuse tips is carried out weekly and the Council's sewers are treated twice annually. Because the town is surrounded by farm land vigilance has to be exercised to prevent any influx of rats from these quarters especially after harvest time.

Insect disinfection is carried out at domestic premises free of charge but a nominal charge is made for the destruction of wasp nests.

We are fortunate in having a keen and efficient rodent operator. During the year he made 637 visits and 1,167 re-visits to various premises and sites in the course of his duties.

## PETROLEUM ACTS AND REGULATIONS

The Council is responsible for the annual licensing of some 32 petroleum installations and storage places, the necessary inspection and administration work being carried out by the public health inspectors. The Home Office model code of principles of construction and licensing conditions has been adopted.

All newly installed pipelines and underground storage tanks are tested before licensing and existing installations are inspected and tested at periodic intervals.

## EXPLOSIVES ACTS

On behalf of the County Council the Council is responsible for the annual registration of some 16 premises for the keeping of explosives such as fireworks, safety cartridges and bird scaring ropes. The necessary inspection work is carried out by the Public Health Inspectors and advice is always given to shopkeepers immediately prior to the fire-work season.

### PET ANIMALS ACT, 1951

Two licences to keep a pet shop are in issue. These premises have been well conducted and the above Act properly complied with.

## SECTION G

### Prescribed Particulars on the Administration of the

#### Factories Act, 1961

#### Part 1 of the Act

- 1 - Inspections for the purpose of the provisions as to health (including inspections made by Public Health Inspectors)
