Medical Officer of Health:

HERBERT JONES, D.P.H. (Camb.),

LYNWOOD,

TOWER ROAD, HEREFORD,

27TH MAY, 1926.

To the Chairmen and Members of the Rural District Councils forming the Herefordshire Combined District.

LADIES AND GENTLEMEN,

I beg to lay before you my Annual Report for the year 1925.

This is the twenty-fifth and last Report that I shall have the honour to submit to you, and a few comments upon the public health of the Districts twenty-five years ago and now may not be out of place!

The birth rate has steadily fallen during that period from 23.5 per 1,000 to 18.2 per 1,000. The death rate has fallen from 14.0 per 1,000 to 12.9 per 1,000, and the infantile mortality rate from 77 per 1,000 births to 61 per 1,000 births. There has been a steady fall both in the number of cases notified and the number of deaths from Scarlet Fever and Diphtheria, and a very remarkable decrease in the number of cases of Typhoid Fever. In the first ten years of the present century the average number was 10, in the last ten years it was 3 per annum. In the ten years 1901—1910 the number of deaths per annum from Phthisis averaged 47, in the second ten years, 1911—1920, they averaged 45 per annum, and in the last five years they have averaged 44.

There has been a general awakening of interest in public health matters within the past ten or fifteen years, both by the owners of property and occupiers. When I first came to Hereford there seemed to be a general impression that no nuisances or other unsatisfactory conditions should be reported upon or any attempt made to lessen them unless they were first of all the cause of complaint by some person or persons concerned, and it was no uncommon matter for an Inspector, when reporting upon the existences of nuisances, etc., to be asked who had made a complaint. There are still some who consider that the initiative should not be taken by the Public Health officers. An entirely erroneous view. In my first Annual Report I pointed out that it was the statutory duty of the District Councils to cause an inspection of their Districts to be made from time to time with a view to ascertain what nuisances existed calling for abatement; that they must put in force as occasion may arise the powers with which they

are invested, so as to secure the proper sanitary condition of all premises within the area under their control; that they must cause to be made from time to time an inspection of their districts with a view to ascertain whether any dwelling houses are in a state so dangerous or injurious to health as to be unfit for human habitation, and that they must see that every occupied dwelling house within their districts has within reasonable distance an available supply of wholesome water sufficient for the consumption and use for domestic purposes for the inmates of the house; and there are many other matters which go to prove that Public Health officers have a great deal more to do than merely to await complaints.

During the months of my illness I am indebted to my colleagues for much ready and willing assistance when I was unable to get out. In the Bromyard District to Dr. King Lewis and Dr. W. W. Wells; in Dore, to Dr. McMichael; in Hereford, to Dr. J. R. Bulman, Dr. Middleton Brown, Dr. Peter Lowe and Col. Wanhill; in Ledbury, to Dr. Hamilton-Williams; in Leominster, to Dr. Robert Williams; and in Weobley to Dr. John S. Clarke.

To all the Inspectors I am indebted for much assistance, especially to Mr. Harold Long, who has done a great deal of statistical work in this and the 1924 Report.

I have to thank the members of the various Councils for the consideration they have given to proposals placed before them at various times.

I am, ladies and gentlemen,

Faithfully yours,

HERBERT JONES.

PUBLIC HEALTH STAFF.

Medical Officer of Health—HERBERT JONES, L.R.C.S.I., L.S.A., D.P.H. (Camb.), (1901).

Sanitary Inspectors :--

Bromyard Rural—J. WOODYATT, Market Square Chambers, Bromyard. Tel. 15 Bromyard. (1912).

Dore Rural—T. J. Prosser, Newton, Vowchurch. (1915).

Hereford Rural—H. Long, 30, Breinton Road, Hereford, Cert. Royal San. Institute. Tel. 1396. (1911).

Ledbury Rural—C. A. Wilson, Claremont, Colwall. Cert. Royal San. Institute. (1924).

Leominster Rural—D. W. CAVE, Luston, Leominster. Cert. Royal San. Institute. (1906).

Weobley Rural—Evan Lewis, Church House, Weobley. Cert. Royal San. Institute. (1916).

Hereford Rural Isolation Hospital:—

Matron: Miss M. Chrystie (1924).

The Medical Officer of Health is a whole-time officer, and one-half his salary is contributed from Exchequer grants. He has no allowance for clerical, office or travelling expenses.

The Bromyard Inspector is a part-time officer, and no contribution is made to his salary from Exchequer grants.

All the other Inspectors are whole-time officers (Mr. Lewis is also Relieving Officer), and one-half of their salaries is contributed from Exchequer grants, except in the case of the Dore Inspector.

The figures in brackets indicate the date of appointment.

Herefordshire Combined District.

REPORT OF THE MEDICAL OFFICER OF HEALTH

For the Year ending December 31st, 1925.

RATEABLE VALUE.

The rateable value of the six districts on March 31st, 1925, was £496,401. A penny rate produces £1,314.

COST OF SANITARY ADMINISTRATION.

The cost of the Public Health Services in the six Rural Districts to the local rates is less than a penny rate, and if no contribution were obtained from Exchequer grants, the local cost would be less than a rate of three half-pence. These services include salaries, fees for notifications and registrars' returns, printing, stationery, postages, telephones, disinfectants, anti-toxin, etc.

Private Family.—Any person or group of persons included in a separate return as being in separate occupation of any premises or part of premises is treated as a separate family for census purposes.

Structurally Separate Dwellings.—A structurally separate dwelling has been defined for the census as any room, or set of rooms, intended or used for habitation, having separate access either to the street or to a common landing or staircase.

BIRTHS AND DEATHS.

In the six rural areas forming the combined district the birthrate in 1925 was 18.2 per 1,000 of the inhabitants, compared with 18.7 in 1924. The death-rate was 12.9 per 1,000, compared with 13.6, and the infantile mortality rate 61 per 1,000 births, compared with 51 the previous year.

INFECTIOUS DISEASE IN 1925.

Number of Cases Notified. Case-rate per 1,000 living.

RURAL DISTRICT.	Small-pox.	Scarlet Fever.	Diph- theria,	Typhoid Fever.	Puer- peral Fever.	Erysi- pelas.

	0	7 1.07	15 2.30	0 -	0.15	3 0,45
Six districts—cases case-rate		93 1.83	40 0.79	0.01	0.03	13 0.25
England and Wales case-rate	0	0.03	0.07	0.01	0.04	0.30

In the six districts 93 cases of scarlet fever (compared with a yearly average in the previous ten years of 70) were notified, and there was one death. In the Bromyard Rural District there were 23 cases, compared with an average of 7 in the previous ten years; in Dore 16 cases, compared with an average of 7; in Hereford Rural 27 cases, compared with an average of 18; in Ledbury Rural 12, compared with an average of 17; in Leominster Rural 10 cases, compared with an average of 11; and in Weobley 7 cases, compared with an average of 11.

Of diphtheria there were 40 cases (none fatal), compared with an average in the previous ten years of 44 (four fatal).

One case of Typhoid fever was notified from the Hereford Rural District. In the previous ten years the average yearly number of notifications in the combined district was three.

TUBERCULOSIS.

Judged by the death-rate the incidence of pulmonary tuberculosis (phthisis) is lower than it was early in the present century. For statistical purposes the notification records are not of much value, but the death-returns show that in the ten year period 1901–1910 the annual average number of deaths was 47, in the ten year period 1911–1920 it was 45, in 1921 the number was 49, in 1922 it was 54, in 1923 it was 41, in 1924 36, and in 1925 it was 33. The death-rate per 1,000 population for the combined district and for the separate areas is given in the following table:—

Pulmonary Tuberculosis Death-rate per 1,000 Population and Actual Number (in Heavier Type).

YEARLY AVERAGE.

Rural District.	1901- 1910.	1911- 1920.	1921.	1922.	1923.	1924.	1925

HOUSING.

During the five years 1901—1905 there were erected annually an average of 30 houses, during the next five years an average of 40, the next five years an average of 33, for the five years ending 1920 an average of 22, and during the last five years 56.

The housing survey of 1919 disclosed that about 5 per cent. of the working-class houses in the six districts were seriously defective and 25 per cent. needed repair.

NEW HOUSES ERECTED.

WATER SUPPLY.

In only a very few parishes is there any combined system of water supply. Where the water is laid on to the houses and taps are provided, the task of achieving a proper standard of cleanliness is made difficult from the fact that at about one-fourth of the cottage houses the supply is distant from the dwellings. No new house should be erected unless there be an ample supply of water on the site. If there is no such supply, the site cannot be considered suitable on which to build. Of the 117 samples of water examined at the County and City Public Health Laboratory, 37 were reported unfit for domestic consumption.

A very complete record, parish by parish, has been made

of the waters examined during the past 25 years.

SEWERAGE AND DRAINAGE.

At Colwall, in the Ledbury Rural District, there are well-designed outfall works, and the Parish of Weobley is sewered to an outfall.

The slop drains from far too many cottages discharge into the nearest roadside ditch—a practice which I have condemned year after year. Privies with large offensive pits are to be found attached to cottages in all parts of the district; pail-closets and the use of earth are being used more and more generally.

HOP-PICKERS.

Between ten and twelve thousand men, women and children come into the combined district for about four weeks in August and September, seeking employment in the hop-fields. They are for the most part from South Staffordshire, Monmouthshire and South Wales, and Cheltenham. Barns, stables, cowsheds and other outbuildings are utilised for their accommodation, though on an increasing number of farms there are specially erected buildings. There is a much greater regard for the welfare of the pickers on the part of the employers than was formerly the case.

By-laws with respect to the accommodation of hop-pickers have been adopted by the Hereford, Leominster, and Weobley Rural District Councils. The Bromyard and Ledbury Councils

have not adopted them.

Shortly before the hop-picking begins a circular letter is sent by the Medical Officer of Health to those hop-growers who are known to employ pickers from outside the county, calling attention to the following requirements:—

 The limewashing of the inside walls of all buildings during the week prior to their occupation by the pickers.

2. The cleansing of the floors of all buildings, especially of stables and cowsheds prior to their occupation.

The clearing away of accumulations of manure from the proximity of the quarters.

4. The provision of adequate privy accommodation.

The provision of cooking places.

6. The provision of a proper supply of water on the premises.

PUBLIC HEALTH ACT, 1925.

The Public Health Act, 1925, came into operation on September 8th, 1925.

Certain portions of the Act are in force in all Rural Districts and certain other portions are only in force when adopted by a Rural District, while there are a few sections which a Rural District Council cannot adopt.

It will be convenient if those sections under the first category are considered first, namely, those in Part VII. (Infectious Disease and Hospitals),

which are in force without adoption.

Section 57 provides that every person having the charge or control of premises, in which is lying the body of a person who has died from any dangerous infectious disease, who fails to take such steps as may be reasonably practicable to prevent persons coming into contact with the body unnecessarily shall be liable to a penalty not exceeding £5.

Section 58 provides that where a Medical Officer of Health reasonably believes that there is in a common lodging house a person who is suffering or has recently suffered from a dangerous infectious diseases, he may, on complaint to a Justice, obtain a warrant to enter the lodging house and

examine any person found in the house.

Section 59 provides that a Petty Sessional Court may make an Order directing that a common lodging house shall be closed on account of the existence or recent existence of dangerous infectious disease until it is certified by the Medical Officer of Health to be free from infection. Before making the Order the Court must be satisfied that the closure is necessary in the interests of the Public Health.

If, during the period of closure, a lodger is received or allowed to remain the keeper of the lodging house is liable to a fine of five pounds and a daily

penalty of forty shillings.

The Rural District Council must make compensation to the lodging

house keeper for any loss sustained by him due to the closure.

No provision is made for immediate action being taken by a Rural District Council in the interval of its meetings. It is obvious that it is essential that prompt action should be taken or it would be useless.

The expression "dangerous infectious disease" is defined by Section

The expression "dangerous infectious disease" is defined by Section 60 as any infectious disease named in Section 6 of the Infectious Disease (Notification) Act, 1889, and any other infectious disease declared to be a dangerous infectious disease by an Order of the Minister of Health.

The diseases named in Section 6 of the 1889 Act are small-pox, cholera, diphtheria, membranous croup, erysipelas, scarlet fever, puerperal fever, and the fevers known by any of the following names:—Typhus, typhoid, enteric, relapsing or continued, and any disease duly included by resolution of a local authority in the Act, which has received the approval of the Minister of Health.

Section 62 is an important one for it provides for the removal to a hospital or an institution of a person who is suffering from pulmonary tuber-culosis and is in an infectious state, and for his detention therein for a period of three months, which may be extended for a further period of three months. An Order for the removal of such person may be made by a Court of Summary Jurisdiction on the application of a County Council, an Urban or Rural District Council, and the Court must be satisfied that the person to whom it refers is in an infectious state, his lodging or accommodation is such that proper precautions to prevent the spread of infection cannot be or are not being taken, that serious risk of infection is being caused to other persons, and, lastly, that a suitable institution exists for his reception and accommodation.

The costs entailed in the removal of the person affected and in his detention and maintenance are to be borne by the Authority who apply for the order of removal. The Court may further order the Authority to contribute towards the maintenance of any dependents of the person affected.

Section 123 of the Public Health Act, 1875, enacts that any Local Authority may provide and maintain a carriage suitable for the conveyance of persons suffering under an infectious disorder, and Section 13 of the Isolation Hospitals Act, 1893, requires every hospital provided under that Act to maintain an ambulance for the removal of patients. Section 63 of the present Act makes it legal for either of these conveyances to be used by persons on their discharge from hospital or by sick persons not suffering from an infectious disease provided that suitable precautions are taken to prevent the communication of infectious disease to any person so conveyed.

Section 64 enables a Rural District Council to give a subscription or a

donation to a voluntary hospital.

Under Section 65, a Rural District Council may provide dwelling houses for officers or servants employed at a hospital which has been provided by the Council.

Section 67 empowers a Rural District Council to pay for lectures and in other ways carry on propaganda on questions relating to health and disease.

Parking places where vehicles of any particular class or description may wait may be provided by a Rural District Council under Section 68.

Section 69 empowers a Rural District Council or a Parish Council to acquire by purchase, gift or lease and to lay out, equip and maintain lands for the purpose of cricket, football, or other games and recreations.

Section 70 makes it legal for a District Council to let its offices for con-

certs and other entertainments.

Where a public slaughter house has been established, power is given

by Section 71 to establish in connection with it cold-air stores.

Regulations are already in force with regard to the precautions that should be taken against the contamination of certain foods, and these are now extended by Section 72 to rooms in which food is prepared for sale or in which any food, other than food contained in receptacles so closed as to exclude all risk of contamination, is sold or is stored or kept with a view to future sale.

Section 73 makes it unlawful, with a penalty for non-observance of £5, for a rag and bone dealer to sell or distribute any article of food or any

balloon or other toy.

Penalties are enforceable under Section 74 for neglect of traffic directions by a Police Constable in uniform who may arrest without warrant any person who rides or drives so as to endanger the life or limb of any person.

Section 75 empowers a District Council to make by-laws with respect

to persons waiting to enter public vehicles.

Most of the Sections in Parts II. and III, and all in Part IV. may be adopted by a Rural District Council and the Minister of Health may by Order, apply any of the provisions of Parts II., III., IV., V., or VIII. to a Rural District.

Those sections of Part II. which can be adopted by a Rural Council refer to the provision of street bins for the collection of refuse, waste-paper, etc.; of public fountains; of fire-alarms, to the surface drainage of courts and streets; to the lopping of trees overhanging highways; to the placing over highways of rails, beams, wires, etc.; and to the making of by-laws relating to wireless installations; to bridges over streets and as to new streets generally.

The Minister of Health may require by Order the provisions of certain sections to apply to a Rural District. These sections refer to the naming of streets; the prevention of water or soil from going over a street, and

with respect to private street works.

Those sections of Part III. which can be adopted by a Rural Council refer to the reconstruction of drains, the laying of drains in private streets; the laying of drains by the Council and the power to require specially large drains in a new street. To the prevention of the entry of petrol into a sewer

and to the provision of a properly ventilated soil-pipe. Powers relating to tents, vans, and sheds are extended and make it easier to deal with these habitations.

The sections of Paragraph IV, which can be adopted by a Rural Council refer to verminous persons and premises and give power to cleanse them and generally deal with them.

Part V., which cannot be adopted by a Rural Council, but which the Minister of Health may apply by Order to a Rural District, refers to water-courses, streams, etc., their covering in, repair of culverts and the like.

Part IX., which may be adopted by a Rural District Council, refers to the provision of baths and wash houses.

RECOMMENDATIONS.

I recommend that the following sections should be adopted :-

In Part II., Section 13, relating to the provision of street bins for the collection of refuse or waste paper, etc.

Section 14 relating to public drinking fountains and seats in public places.

Section 15 relating to public fire alarms.

Section 16 consequent on the previous sections.

Section 20 relating to the surface drainage of streets.

Section 23 relating to the lopping of trees, shrubs, etc.

Section 24 relating to projections against or in front of houses.

Section 26 relating to the making of by-laws with respect to wireless installations.

In Part III., Section 42, relating to the ventilation of soil-pipes.

Section 43 relating to nuisances caused by occupation of tents, vans, etc.

In Part IV., Sections 45, 46, 47, 48, 49, and 50, relating to verminous persons and premises.

In Part V., Sections 51, 52, 53, 54, and 55, relating to water-courses, streams, etc.

HERBERT JONES,

Medical Officer of Health.

7th October, 1925.

PUBLIC HEALTH (MEAT) REGULATIONS, 1924.

The following communication has been sent to every person it is known to concern:—

Dear Sir,

SLAUGHTER HOUSES AND SLAUGHTERING.

A person shall not slaughter an animal for sale for human consumption unless he has, not less than three hours before the time of slaughter, sent notice to the Local Authority of the day, time and place at which the

slaughtering is to take place.

Where it is the REGULAR PRACTICE in any slaughter house to slaughter animals at fixed times, on fixed days, and written notice of such fixed times has been sent previously to the Local Authority, special notice is not required. If, however, it is necessary to slaughter at times other than those already fixed, notice not less than three hours before the time of slaughter must be given.

If the slaughter of any animal is necessary without delay by reason of accidental injury, illness, or exposure to infection, notice must be sent as soon as reasonably possible either before or after slaughter takes place.

as soon as reasonably possible either before or after slaughter takes place.

Where an animal is slaughtered for human consumption, and it appears that any part of the carcase or internal organs is, or may be diseased or unsound, the person by, or on whose behalf an animal is slaughtered, must

give notice of the fact.

The person by, or on whose behalf an animal is slaughtered for human consumption, shall not cause or permit the carcase of an animal, including the mesentery and internal organs, other than the stomach, intestines and bladder, to be removed from the place of slaughter until the carcase, with its organs, has been inspected, or its removal has been authorised by an Inspector of the Local Authority.

EXCEPT-

In the case of a Sheep, or in the case of an animal which has been slaughtered at a slaughter house at the fixed time, of which notice in writing has been previously given, unless some part of the carcase or its organs appears to be diseased or unsound.

The removal may, in any case, take place at the expiration of three hours from the time of slaughter, or six hours from the delivery of any notice relating thereto, save that if such time falls between 7 p.m. one day, and 7 a.m. the next day, the removal shall not take place before 7 a.m.

Where the animal was slaughtered by reason of accidental injury, and the place of slaughter is unsuitable for the retention of the carcase, the carcase and organs may be removed to some convenient place, but the notice required to be given in cases of slaughter through injury, etc., must be given to the Local Authority in whose District that place is situate, and the notice shall have effect as if that place was substituted for the place of slaughter.

Notices in this District must be sent to:-

THE MEDICAL OFFICER OF HEALTH,

Any such notice other than a notice of regular slaughter may be given verbally, or by letter addressed to me as above.

If posted, it will be considered to be received at the time at which it would have been delivered in the ordinary course of the Postal Services.

No gut scraping, tripe cleaning, manufacture, or preparation of articles of food for man or animals, household washing, or work of any nature, other than is involved in the slaughter and dressing of carcases, shall be carried on in any slaughter-house,

No articles other than those necessary in connection with slaughtering, and the cleansing of the slaughter-house, shall be stored in the building.

No person shall blow or inflate with his breath, or in any other manner likely to cause infection or contamination, the carcase of any animal slaughtered for human consumption.

No person shall use a slaughter-house for the slaughter of any animal

which previous to slaughter is not intended for human consumption.

SHOPS, STORES, ETC.

The occupier of any room in which any meat is sold, or exposed for sale, or deposited for the purpose of sale, or for the preparation for sale, or with a view to future sale, must not allow:—

Any urinal, closet, ashpit, or the like, to be within, or communicate with any such room, or so placed that offensive odours therefrom can penetrate such room.

A drain or pipe to be in such room unless the inlet is efficiently

trapped.

The room to be used as a sleeping place, and not to communicate

directly with a sleeping place.

He must provide adequate means of ventilation for such room, and not cause any refuse or filth, solid or liquid, to be deposited therein, except as may be reasonably necessary for the proper carrying on of the trade.

The walls and ceilings of such room must be limewashed, cleansed, or

purified as often as may be necessary.

All persons engaged in such room must observe due cleanliness in regard

to such room, and all articles, apparatus, and utensils therein.

The occupier must take such steps as may be reasonably necessary to guard against the contamination of the meat by flies, and shall cause the meat to be so placed as to prevent mud, filth, or other contaminating substance being splashed or blown thereon.

Not permit any gut scraping, tripe cleaning or household washing to

be done therein.

Every counter, slab, or other article, in which meat is placed for sale, and all knives or other implements used to be thoroughly cleansed after use, and kept at all times in a cleanly condition.

All trimmings, refuse and rubbish to be kept in properly covered recep-

tacles, kept for the purpose, apart from any meat intended for sale.

TRANSPORT AND HANDLING.

Every person who conveys, or causes to be conveyed, any meat in a vehicle, must:-

Keep clean the inside and covering of the vehicle, the receptacle in which the meat is placed, and any slings or apparatus used in loading or unloading, as come in contact with the meat or its

If the vehicle is open at the back, or sides, or if any other commodity is being conveyed therein, cause the meat to be protected by a clean cloth.

Not permit any live animal to be carried at the same time as the meat.

Not permit any part of the meat to touch the ground.

Take all reasonable precaution to prevent the meat being exposed to contamination.

Where meat is dealt with wholesale, the person occupied in handling to wear a clean and washable head-covering and overall.

The Public Health Act, 1896, provides by Sub-Section 3, Section 1, that if any person wilfully neglects or refuses to obey or carry out, or obstructs the execution of any regulations made under any of the enactments mentioned in that Act, he shall be liable to a penalty not exceeding £100, and, in the case of a continuing offence, to a further penalty not exceeding £50 for every day during which the offence continues.

Sincerely yours,

HERBERT JONES,

Medical Officer of Health.

PHYSICAL FEATURES AND GENERAL CHARACTER.

The Rural District of Bromyard, which entirely surrounds the Bromyard Urban District, is situated in the north-eastern side of the county. It is bounded on the north and east by Worcestershire, on the south by the Ledbury Rural District, and on the west by the Hereford and Leominster Rural Districts. The district is a hilly one. On the eastern side Whitbourne is 200 ft. above sea level, while Tedstone Wafer is 669 ft., and the Ridgeway 650 ft. Bishops Frome, in the south, is 262 ft. In the west, Bredenbury is 775 ft., and Hegdon Hill (the highest point in the district) is 829 ft. Brockhampton, about the middle, is 700 ft., and the Wall Hills, in the north, rise to a height of 738 ft.

The district is well watered with streams from the hills, which empty into the rivers Lodon in the west, Frome in the middle of the district, and a tributary of the Teme in the east. All these rivers flow from north to south.

Geologically the district is chiefly Old Red Sandstone.

The subsoil is for the most part of clay or marl; in the parishes of Avenbury, Edvin Loach, and Whitbourne of sand, and in Whitbourne and the northern portion of Much Cowarne, of gravel.

There are within the district 32 parishes, all of which are in the county of Hereford, in the Bromyard Poor-law Union and Bromyard Registration District, but the Poor-law Union and Registration District includes the Bromyard Urban District, and are not therefore co-terminous with the Bromyard Rural District. The population in the 32 parishes at the census of 1921 varied from 10 in Saltmarshe to 1,113 in Cradley. In ten parishes there were less than 100 persons. There are collections of houses into villages at Bishops Frome, Craoley, Stoke Lacy, Whitbourne and Pencombe; elsewhere houses are scattered.

There are 53 miles of county main roads and 128 miles of district roads in the Bromyard Rural District.

INDUSTRIES.

The industries are principally agricultural. Hops and fruit are largely grown, and there is extensive breeding of Herefordshire cattle. There are extensive tile works in the parish of Linton, and brickworks in the parish of Linton. There are corn mills in the parishes of Acton Beauchamp, Bishops Frome, Cradley, Much Cowarne, Stoke Lacy, Thornbury, and Winslow. In Acton Beauchamp and Stanford Bishop glove-making is carried on by a few cottagers. Gravel quarries are being worked in the parish of Stoke Lacy.

INFECTIOUS DISEASES.

SCARLET FEVER.

Twenty three cases (no deaths) in fifteen houses. Ten cases were removed to hospital.

DIPHTHERIA.

One case. Removed to Malvern Isolation Hospital.

For an account of the method of dealing with infectious cases in the district, see page 9 of the 1907 Annual Report.

PHTHISIS.

Six cases, two deaths. The deaths occurred among residents from the parishes of Much Cowarne and Ocle Pychard.

ISOLATION HOSPITAL.

The Joint Bromyard Urban and Rural Districts Isolation Hospital was erected in the Rural District in 1896. There is accommodation for four patients in two wards. A full description of the hospital will be found on page 60 of the Report for 1901.

The number of cases treated is as follows:-

1897 to 1906—89 cases.	1920- o case.
1907 to 1916—117 ,,	1921-0 ,,
1917—I case.	1922- 8 cases.
1918—0 ,,	1923-4 ,,
1919-0 ,,	1924-0 ,,
	1925-14 ,,

The cost of the Joint Hospital in the past ten years was as follows:—

Year ending March 31st.

1916 1917 1918 1919 1920 1921 1922 1923 1924 1925

Repayment of loans and interest ... £55 £53 £52 £51 £50 £48 £47 £46 £44 £43 Current expenses ... £186 £120 £123 £95 £118 £134 £105 £210 £169 £102 Of the £1,250 borrowed in 1894 for 33 years, £1,140 has been repaid. The £350 borrowed in 1896 has all been repaid.

NURSING ARRANGEMENTS, HOSPITALS AND OTHER INSTITUTIONS AVAILABLE.

Professional Nursing in the Homes-

- (a) General—A District Nurse is provided by the District Nursing Association for the following parishes:— Acton Beauchamp, Avenbury, Bishops Frome, Bredenbury, Evesbatch, Wacton, and Winslow.
- (b) For infectious diseases—none.

The nursing is not provided by the County Council, but by a District Nursing Association, which is affiliated to and receives grants from the County Nursing Association, which in its turn is subsidised by the Ministry of Health and the County Council. The District Association is supported by local voluntary contributions and by a grant from the Board of Guardians. The Nurses are appointed by the District Association, and to a limited extent are under the supervision of the County Association Superintendent of Nurses, who is also County Inspector of Midwives.

The Midwives Acts are administered by the County Council.

There are eight (four trained) Midwives practising in the Rural District.

The Notification of Births Acts are administered by virtue of the County of Hereford (Notification of Births) Order, 1918, by the County Council.

CLINICS AND TREATMENT CENTRES.—The Tuberculosis Clinic in the Market Square, Bromyard, provided by the County Council available for the Bromyard Rural District on alternate Thursdays from 10.30 to 12 noon (January 7th, 1926).

HOSPITALS :-

General—Herefordshire General Hospital, Hereford City; Worcester General Infirmary, Worcester City.

Cottage Hospitals-None.

Poor Law Infirmaries—Bromyard Union Infirmary, 35 beds.

Special Hospitals—Bromyard Urban and Rural Joint Isolation Hospital for Scarlet Fever, 4 beds.

Hereford Victoria Eye Hospital.

Worcester Ophthalmic Hospital.

Ambulance Facilities.—A horse ambulance (a converted carriage) is kept at the Isolation Hospital for the removal of infectious cases. A horse is hired as required.

A Motor Ambulance, presented by the British Red Cross Society, is stationed at Messrs. Connelly Brothers, Commercial Road, Hereford (Tel. 1039), and is available for the removal of non-infectious cases, on payment of mileage charges.

LABORATORY, &c.

Bacteriological and chemical examinations are made at the County and City Public Health Laboratory, 132, St. Owen Street, Hereford, free of charge.

The following examinations were made during 1925:-

		Positiv	e. 1	Vegati	ve.	Total.
For diphtheria		15		22		37
For tuberculosis		4		16		20
For typhoid fever		0		0		0
For gonorrhœa		0		0		0
Water samples		-		-		12*
Milk for tubercle ba	cilli	0		I		I

*10 good, 2 bad.

26,000 units of diphtheria anti-toxin was supplied to two Doctors at the cost of the District Council under the terms of the Diphtheria Anti-toxin (outside London) Order, 1910.

SANITARY ADMINISTRATION.

Adoptive Acts, By-laws and Regulations relating to the Public Health, in force within the District.

Public Health Acts Amendment Act, 1907, Part III., Sections 35 and 50, and Part IV., adopted in 1911.

By-laws with respect to Common Lodging-houses adopted in 1876.

ARRANGEMENTS FOR DISINFECTION AND DISINFESTATION.

There is no steam disinfector available. Disinfection is carried out with Formalin lamps. The number of rooms disinfected was 26, and the number of lots of bedding was 24.

REPORT OF SANITARY INSPECTOR.

Market Square Chambers, Bromyard, 27th April, 1926.

DAIRIES AND COWSHEDS (34).

There are no regulations under the Dairies, Cowsheds and Milkshops Orders in force in the district. It is very desirable they should be made. Little or no attention is paid to the cleanliness of the milkers' hands or of the cows' teats, and accumulations of manure are frequently found near to the milking sheds.

There are 24 Dairies and Cowsheds registered in the Rural District. No action was taken during 1924 with respect to them under the Dairies, Cowsheds and Milkshops Orders.

SLAUGHTER-HOUSES (6).

There are at present slaughter-houses in the parishes of Bredenbury, Cradley (2), Ocle Pychard, Stoke Lacy and Whitbourne. The buildings are of brick with tiled roofs. There is a water supply on the premises, and the drainage flows over land. The flooring is as follows:—One Cradley, Whitbourne, and Stoke Lacy—concrete; one Cradley—blue bricks; Bredenbury and Ocle Pychard, red brick.

BAKEHOUSES (9).

The walls and ceilings of a public bakehouse are required to be whitewashed at least every six months. A printed card pointing out this obligation is placed in each bakehouse. A copy of the card is given in the 1912 Report. There are bakehouses in Bishop's Frome (2), Cradley (2), Hampton Charles, Little Cowarne, Linton, Ocle Pychard and Whitbourne. They are all structurally good and are well kept.

The Sale of Food and Drugs Act is not administered by the District Council.

WORKSHOPS.

From information furnished by the Sanitary Inspector, there has been made a Register of the Workshops situated within the Bromyard Rural District.

Attention has been paid during the year to the limewashing of Blacksmiths' Shops.

The following is a summary of the Register of Workshops :-

PARISH.		Bootmaker.	Blacksmith.	o Builder.	Carpenter.	Cooper.	o Dressmaker.	Machinist.	o Tailor.	Wheelwright.	Doral.

HOP-PICKERS.

No by-laws with respect to hop-pickers' quarters are in force in the district. Many of the hop-growers are anxious to make the pickers comfortable, and it is unfair to them that all the quarters should not be brought up to the same standard. The by-laws are not exacting.

WATER SUPPLY.

In no part of the district is there a combined piped water supply. Shallow wells, mostly without pumps, springs and dip wells are in common use. The dip wells are liable to be polluted, and should be dealt with as far as practicable as suggested on page 9 of the 1921 Report. A large number of houses have no water on the premises, and it has to be carried in buckets or otherwise. The inhabitants of the parish of Norton on Bromyard Downs are particularly badly placed in this respect. Some years ago an attempt was made to provide a piped supply in this parish, but it did not materialise. There is no supply on the school premises at Cradley (Storridge), Stoke Lacy and Ullingswick. Of the eight samples sent for analysis in 1925, six were reported as good, and two as bad.

SEWERAGE AND DRAINAGE.

There is no combined drainage in the district. The drainage from the Workhouse, in the parish of Linton, is treated in a septic tank and over three bacteria contact beds, the effluent flowing into an adjoining ditch. The conditions described on page 14 apply very generally to the Bromyard Rural District.

SCHOOLS (16).

The table on page 36 sets out the sanitary condition, etc., of the schools in the Bromyard Rural District. On page 19 of the 1921 Report will be found some general remarks and recommendations with respect to schools.

The following schools were closed by the School Medical Officer during 1925:—

Bredenbury, 2nd February to 27th February-Influenza.

Cradley, 19th February to 13th March-Influenza.

Brockhampton, 24th February to 6th March-Influenza.

,, 10th November to 18th December—Scarlet Fever.

Whitbourne, 3rd March to 13th March-Influenza.

Upper Sapey, 1st April to 8th April—Coughs and colds.

5th May to 15th May—Scarlet Fever.

Much Cowarne, 13th August to 28th August-Scarlet Fever.

PHYSICAL FEATURES AND GENERAL CHARACTER.

The Rural District of Dore is situated in the south-western corner of the county, and is bounded on the north by the Hay and Weobley Rural Districts, on the east by the Hereford and Ross Rural Districts, on the south by Monmouthshire, and on the west by Monmouthshire. The Black Mountains form the boundary of the district on the western side, and rise to a height of 2,306 ft. There is a range of hills on the eastern side running from north to south-east. Orcop Hill in the west is 958 ft. high, Pontrilas, at the foot of Orcop Hill, is 250ft., and Madley, in the north-east, is 254 ft. above sea-level.

The district is well watered, streams from the surrounding hills emptying into the rivers Monnow and Dore. The Monnow, which rises in the northwest, flows due south to the boundary of the Dore district, and then in a north-easterly direction, forming the southern boundary. The river Dore flows along the Golden Valley, through the centre of the district from north to south.

Geologically the district is Old Red Sandstone. Garway Hill and Stockley Hill are of Cornstone formation.

In a large proportion of the district there is a sandy subsoil, though in a few parishes, noticeably in Kenderchurch, St. Devereux, Vowchurch, and Walterstone, there is a subsoil of marl and clay.

There are within the Dore Rural District 27 parishes, all of which are in the county of Hereford, in the Dore Poor-Law Union, and in the Hereford Registration District, but the Poor-Law Union and Registration District include the parishes of Grosmont and Llangua in the Abergavenny Rural District of the County of Monmouth, and are not co-terminous with the Dore Rural District. The population in the 27 parishes of the Dore Rural District at the census of 1921 varied from 51 in Llancillo to 677 in Madley. In seven parishes there were less than 100 inhabitants. There are collections of houses into villages at Peterchurch, Ewyas Harold, Kentchurch (Pontrilas), Longtown, Kingstone, and Madley; elsewhere the houses are more or less scattered.

There are 41 miles of county main roads and 188 miles of district roads in the Dore Rural District.

INDUSTRIES.

The industries are almost exclusively agricultural. Hops are cultivated on the eastern border, and apples are extensively grown throughout the district. There is also breeding of Herefordshire Cattle.

Two cases had not been previously notified.

NURSING ARRANGEMENTS, HOSPITALS AND OTHER INSTITUTIONS AVAILABLE.

Professional Nursing in the homes:-

(a) General—A District Nurse is provided by the District Nursing Association for the following parishes:— Abbeydore, Dulas, Ewyas Harold, Kenderchurch, Kentchurch, Llancilloe, Madley, Orcop, Rowlestone and Tyberton.

(b) For infectious diseases—none.

The nursing is not provided by the County Council, but by a District Nursing Association, which is affiliated to and receives grants from the County Nursing Association, which in its turn is subsidised by the Ministry of Health and the County Council. The District Association is supported by local voluntary contributions and by a grant from the Board of Guardians. The Nurses are appointed by the District Association, and to a limited extent are under the supervision of the County Association Superintendent of Nurses, who is also County Inspector of Midwives.

The MIDWIVES ACTS are administered by the County Council.

There are six (four trained) Midwives practising in the Rural District.

The NOTIFICATION OF BIRTHS ACTS are administered by virtue of the County of Hereford (Notification of Births) Order, 1918, by the County Council.

Clinics and treatment centres-none.

HOSPITALS :-

General—Herefordshire General Hospital, Hereford City. Poor Law Infirmaries—Dore Union Infirmary, Abbeydore. 22 beds.

Special Hospitals—Isolation Hospital, Credenhill, for small-pox, scarlet fever and diphtheria.

Hereford Victoria Eye Hospital.

AMBULANCE FACILITIES.—A Motor Ambulance owned by the Hereford Rural District Council, stationed at Messrs. Fryer's Garage, Widemarsh Street, Hereford (Telephone, 1320), is available for the removal of infectious cases on payment of mileage charges.

A Motor Ambulance, presented by the British Red Cross Society, is stationed at Messrs. Connelly Bros., Commercial Road, Hereford (Telephone, 1039), and is available for the removal of non-infectious cases on payment of mileage charges.

LABORATORY, &c.

Bacteriological and chemical examinations are made at the County and City Public Health Laboratory, Hereford, free of charge.

The following examinations were made during 1925:—

Positive. Negative. Total.

			CORPECT	 Perro		
For diphtheria			4	 5		9
For tuberculosis			3	 6		9
For typhoid feve	er		0	 0		0
For gonorrhœa			0	 0	***	0
Water samples	*8	good. 2	bad.	 -	• • •	10*
	*8	good, 2	bad.			

8,000 units diphtheria anti-toxin was supplied to one doctor at the cost of the District Council under the terms of the Diphtheria Anti-toxin (outside London) Order, 1910.

ARRANGEMENT FOR DISINFECTION AND DISINFESTATION.

There is no steam disinfector available. Disinfection is carried out with Formalin lamps. The number of rooms disinfected was 12, and the number of lots of bedding was 13.

SANITARY ADMINISTRATION.

Adoptive Acts, By-laws and Regulations relating to the Public Health in force within the District.

Urban powers under the Public Health Act, 1875, with respect to slaughter-houses, and Sections 29. 30 and 31, of the Public Health Acts Amendment Act, 1890, have been in force in the Dore Rural District since 1920.

Regulations under the Dairies, Cowsheds and Milkshops Orders were made in 1889.

By-laws with respect to Tents, Vans and Sheds were adopted on September 30th, 1912, and allowed by the Local Government Board on 16th October, 1912.

DAIRIES AND COWSHEDS (6).

There are six dairies registered in the Dore Rural District. No action was taken during 1925 under the Dairies, Cowsheds and Milkshops Orders. A new Register has been prepared during the year. Regulations have been in force since 1889.

The principal cause of complaint with regard to cowsheds is the accumulation of manure, which is often to be found right up to the milking sheds. More attention should be paid to the personal cleanliness of the milkers and to the cleansing of the udders.

On pp. 14, 15 of the 1924 Report reference is made to the Milk and Dairies (Amendment) Act, 1922, and to the Regulations of the Ministry of Health with respect to "graded" and other specially designated milk.

SLAUGHTER-HOUSES (6).

There are slaughter-houses in the parishes of Ewyas Harold, Kentchurch (Pontrilas), Longtown, Madley (2) and Peterchurch. They require to be more frequently inspected if they are to be kept in a really cleanly state. (See page 18.)

There are no By-laws in force with respect to slaughter-houses.

REPORT OF SANITARY INSPECTOR.

WORKSHOPS.

From information furnished by the Sanitary Inspector a Register has been made of the Workshops situated within the Dore Rural District.

Attention has been paid during this year to the limewashing of Blacksmiths' Shops.

The following is a summary of the Register of Workshops:-

Paris	зн.		Blacksmith.	Builder.	Cornmill.	Dressmaker.	Harnessmaker.	Engineering.	Shoemaker.	Tailor.	Wheelwright.	TOTAL.

BAKEHOUSES (8).

There are public bakehouses in the parishes of Longtown (3), Vowchurch, Abbeydore, Peterchurch, Ewyas Harold and Kentchurch.

They are kept in a fairly good condition, though some require

constant inspection, more especially with respect to the removal of manure, etc., from the vicinity of the bakehouse premises.

The Sale of Food and Drugs Acts are not administered by the District Council.

WATER SUPPLY.

There are combined piped water supplies to houses in the parishes of Ewyas Harold, Kentchurch (Pontrilas), Longtown, Michaelchurch, Peterchurch, Vowchurch and Walterstone. In the district generally shallow wells and springs provide the supply. In many cases it is several hundred yards from the houses. Open dip wells should be dealt with wherever practicable, as described on page 9 of the 1921 Report.

There is a very inadequate supply to many houses in the upper part of Longtown and in Llanveynoe, also to houses in parts of Abbeydore, in Orcop, and on Vowchurch Common. Ten samples were sent for analysis; eight were reported as good and two as bad.

SEWERAGE AND DRAINAGE.

There is combined drainage to a few houses in Ewyas Harold, Madley and Peterchurch. The Peterchurch drain was re-laid in 1922 and openings re-trapped at the cost of the property owners using it. The conditions described on page 14 apply very generally to the Dore Rural District.

SCHOOLS (15).

The table on page 50 sets out the sanitary condition, etc., of the schools in the Dore Rural District. On page 19 of the 1921 Report will be found some general remarks and recommendations with respect to schools.

The following schools were closed by the School Medical

Officer during 1925:—

Crasswall, 12th January to 6th February—Whooping Cough. Longtown, 20th January to 27th February—Whooping Cough. Michaelchurch, 27th January to 3rd March—Whooping Cough. Orcop, 27th January to 6th March—Mumps.

Madley, 9th February to 6th March-Mumps.

,, 2nd June to 12th June—Whooping Cough.
Newton, 23rd February to 6th March—Influenza and colds.
Abbeydore, 23rd March to 27th March—Coughs and colds.
Peterchurch, 31st March to 9th April—Mumps and influenza.
Ewyas Harold, 20th July to 7th August—Measles.

Wormbridge, 29th October to 4th December-Coughs, colds

and scarlet fever.

HOP-PICKERS.

Hops are grown in Madley parish, where only local pickers are employed. There are no by-laws with respect to hop-pickers.

PHYSICAL FEATURES AND GENERAL CHARACTER.

The Rural District of Hereford is situated in the middle of the county, and completely surrounds the city of Hereford. It is bounded on the north by the Leominster Rural District, on the north-east by the Bromyard Rural District, on the south by the Ross Rural District, and on the west by the Dore and Weobley Rural Districts. The middle of the district is low-lying.

In the north Dinmore Hill rises to a height of 943 ft., in the south Orcop Hill to 958 ft., and Aconbury Hill 905 ft., on the west Credenhill is 720 ft., while on the eastern side are Dinedor 595 ft., Backbury 738 ft., and Westhide 422 ft.

The district is well watered. The river Wye flows across from west to east in a very tortuous bed, and the rivers Lugg and Frome flow from north to south until they empty into the Wye. In the low-lying portions, following the courses of the rivers is alluvial deposit.

Geologically the district is Old Red Sandstone. Credenhill, Dinedor, Dinmore, and Callow hills are of Cornstone formation.

The subsoil is gravelly loam in those parishes through which the rivers flow, and in the remainder of the district for the most part marl or clay.

All the 39 parishes are in the Herefordshire Registration District, in the county of Hereford, and in the Hereford Poor-law Union, but the Rural District is not co-terminous with the Registration District, which includes also the parishes of the city of Hereford and the parishes of the Dore Poorlaw Union, or with the Poor-law Union, which includes the parishes of the city of Hereford.

The population at the census of 1911 in the 39 parishes within the district varied from 25 in Dinmore to 1,497 in Burghill, but if the 502 Asylum residents are deducted, the Burghill population (995) is still the largest in the district. There are collections of houses into villages at Bullingham, Fownhope, Holmer, Little Dewchurch, Lugwardine, Marden, Mordiford, Wellington, and Withington.

There are 70 miles of county main roads and 210 miles of district roads in the Hereford Rural District.

INDUSTRIES.

The industries are almost entirely of an agricultural nature, hops and fruit are largely grown, and there is extensive breeding of Herefordshire cattle and dairying. Encaustic tile works are situated in Withington parish, and there are chemical works in Credenhill parish. The wooden soles of Yorkshire and Lancashire clogs are made in the Eaton Bishop parish. There are flour mills in the parishes of Clehonger, Credenhill, Eaton Bishop, Lugwardine, and Wellington; sawmills in Much Dewchurch; a cheese factory in Dinmore; large nurseries in Breinton, and munitions in Bullingham.

ISOLATION HOSPITAL.

On a site of three and a half acres in the parish of Stretton Sugwas brick buildings were erected in 1904 at a cost of about £1,500, the whole being paid out of current rates. There is an administrative block, pavilion with two six-bed wards (1,500 cubic feet per patient), laundry block and discharge block. In 1921 an army hut was erected of wood with asbestos roofing. There is accommodation in it for 13 patients and two nurses, a bathroom, w.c. and kitchen. Miss M. Chrystie carried out her duties most efficiently, and to the entire satisfaction of the Hospital Committee and the Medical Superintendent.

The number of cases admitted has been as follows:-

	Small- pox.	Scarlet Fever.	Ty- phoid Fever.	Measles	Diph- theria.	Chicken Pox.	Con- tacts.	Obser- vation,

Two diseases can be treated simultaneously.

The Weobley Rural District Council since 1904 has paid a retaining fee for the use of at least two beds. From April 1st, 1923, the following District Councils have paid a retaining fee for at least two beds for the isolation of small-pox, scarlet fever and diphtheria:—Dore Rural, Ledbury Urban, Ledbury Rural, Leominster Rural, Ross Urban.

NURSING ARRANGEMENTS, HOSPITALS, AND OTHER INSTITUTIONS AVAILABLE.

Professional nursing in the homes-

(a) General—A District Nurse is provided by the District Nursing Association for the following parishes:— Bartestree, Bolstone, Dinmore, Dormington, Eaton Bishop, Fownhope, Holmer, Holme Lacy, Lugwardine, Little Dewchurch, Moreton-on-Lugg, Pipecum-Lyde, Stoke Edith, Weston Beggard, Wellington and Withington.

The Hereford Board of Guardians subscribe ten pounds per annum to the Association.

(b) For infectious diseases—none,

The nursing is not provided by the County Council, but by a District Nursing Association, which is affiliated to and receives grants from the County Nursing Association, which in its turn is subsidised by the Ministry of Health and the County Council. The District Association is supported by local voluntary contributions and by a grant from the Board of Guardians. The Nurses are appointed by the District Association, and to a limited extent are under the supervision of the County Association Superintendent of Nurses, who is also County Inspector of Midwives.

The MIDWIVES ACTS are administered by the County Council.

There are 13 (9 trained) Midwives practising in the Rural District.

The Notification of Births Acts are administered by virtue of the County of Hereford (Notification of Births) Order, 1918, by the County Council.

CLINICS AND TREATMENT CENTRES.—The Tuberculosis Clinic provided by the County Council at St. Peter's House, Hereford, is available for the Hereford Rural District. The Tuberculosis Officer attends from 9.30 a.m. to 12.30 p.m. every Wednesday and Saturday.

There is a V.D. Clinic in a building in the grounds of the Hereford Workhouse.

HOSPITALS :-

General-Herefordshire General Hospital, Hereford City.

Cottage Hospitals-None.

Poor Law Infirmaries—Hereford Union Infirmary in Hereford City, 60 beds.

Special Hospitals —Isolation Hospital, Credenhill, for small-pox, scarlet fever and diphtheria, 25 beds.

Hereford Victoria Eye Hospital, 20 beds.

Ambulance Facilities.—A Motor Ambulance owned by the Hereford Rural District Council, stationed at Messrs. Fryer's Garage, Widemarsh Street, Hereford (Telephone, 1320), is available for the removal of infectious cases on payment of mileage charges.

A Motor Ambulance, presented by the British Red Cross Society, is stationed at Messrs. Connelly Bros., Commercial Road, Hereford (Telephone, 1039), and is available for the removal of non-infectious cases on payment of mileage charges.

LABORATORY, &c.

Bacteriological and chemical examinations are made at the County and City Public Health Laboratory, 132, St. Owen Street, Hereford, free of charge.

The following examinations were made during 1925:-

		Positive.		Λ	egative	Total	
For	diphtheria		61*		139		200
For	tuberculosis		6		31		37
For	typhoid fever		O		3		3
For	gonorrhœa		0		O		0
Wat	er samples		-		-		52†
Milk	for Tubercle B	Bacilli	0		2		2

^{*} Include swabs of patients in Isolation Hospital.

Diphtheria anti-toxin was supplied at the cost of the District Council under the terms of the Diphtheria Anti-toxin (outside London) Order, 1910, to 5 doctors to the extent of 86,000 units.

SANITARY ADMINISTRATION.

Adoptive Acts, By-laws and Regulations relating to the Public Health in force within the district.

Urban Powers under the Public Health Act, 1875, with respect to slaughter-houses and Sections 29, 30, and 31, of the Public Health Acts Amendment Act, 1890, have been in force in the Hereford Rural District since 1920.

The Public Health Acts Amendment Act, 1890, Part III., and the Infectious Diseases (Prevention) Act, 1890, were adopted in 1891.

Regulations under the Dairies, Cowsheds, and Milkshops Orders were made in 1905.

By-laws with respect to Hop and Fruit Pickers were made in 1909; Tents and Vans in 1912, and New Buildings in 1918.

^{† 35} good, 17 bad.

WORKSHOPS AND WORKPLACES.

From information furnished by the Sanitary Inspector, the Register of the Workshops situated within the Hereford Rural District has been revised.

Attention has been paid during the year to the lime-washing of Blacksmiths' Shops.

The following is a summary of the register of Workshops:-

ARRANGEMENTS FOR DISINFECTION AND DISINFESTATION.

A modern Steam Disinfector is installed at the Hereford Union Workhouse, and is used by the Hereford Rural District Council.

Household disinfection is carried out with Formalin lamps and Formalin spray. The number of rooms disinfected was 78, and the number of lots of bedding, &c., was 56.

DAIRIES AND COWSHEDS (64).

Regulations under the Dairies, Cowsheds, and Milkshops Orders were made in 1905.

Accumulations of manure near the milking sheds and uncleanliness on the part of milkers are far too much in evidence. In only a few instances is there any appreciation of the importance of cleansing the udders.

On pp. 14, 15 of the 1924 Report, reference is made to the Milk and Dairies (Amendment) Act, 1922, and to the Regulations of the Ministry of Health with respect to "Graded" and other specially designated milk.

SLAUGHTER-HOUSES (2).

The Much Dewchurch slaughter-house is of brick with concrete floor, draining to a dumb well. There is water on the premises. The Lugwardine slaughter-house is a brick building with a brick floor. The drains discharge on to land behind the building. There is a good supply of water on the premises. (See page 18.)

BAKEHOUSES (10).

There are public Bakehouses in the parishes of Credenhill, Fownhope (3), Little Dewchurch, Much Birch (3), Little Birch and Wellington. They are all structurally good.

The Sale of Food and Drugs Acts are not administered by the District Council.

TENTS, VANS, &c.

A copy of the By-laws with respect to Tents, Vans, Sheds and similar structures adopted in 1912 will be found at the end of the 1912 Report, together with a shortened form set out in more understandable terms than the official phraseology of the actual By-laws. In order to get these By-laws carried out the procedure adopted is for the Inspector to take a copy of the latter form and read it over to the occupier of a tent, &c. A record is kept of those persons who have had the form. After a suitable period a re-inspection is made, in order to see that the By-laws are being carried out.

HOP-PICKERS.

By-laws with respect to hop-pickers came into force in 1909. Since that date there has been a very distinct improvement in the quarters provided for the pickers, and without any complaints from the growers as to the by-laws being irksome or unreasonable.

A few weeks before the arrival of the pickers the following letter was sent to the growers:—

"In sending you a copy of the By-laws relating to the accommodation of hop-pickers, I desire specially to draw your attention to the importance of limewashing all inside walls, the cleansing of floors, the clearing away of manurial accumulations, and the provision of a proper water supply, cooking places, and adequate privy accommodation."

About 2,407 pickers came from outside Herefordshire, chiefly South Wales and Staffordshire, to 22 farms. As few as six to one farm and as many as 650 to another. The privy accommodation was bad at two or three farms.

WATER SUPPLY.

There is a combined piped water supply to some of the houses in the parishes of Allensmore, Bolstone, Dormington, Fownhope, Much Birch, Much Dewchurch, Stoke Edith, Sutton, and Westhide, and a supply for domestic services only is obtained for houses in Lugwardine and Bartestree from the River Lugg. wells or springs provide supplies elsewhere. Many of these are not actually on the premises. Where dip wells are liable to pollution, as most of them are, they should be dealt with as far as practicable as suggested on page 9 of the 1921 Report. In the parishes of Aconbury, Little Birch and Much Birch, many houses are particularly badly off for water. A scheme for a joint supply has been prepared by Mr. John Parker, M.Inst.C.E., and at the end of the year was under the consideration of the Rural District Council and the Parish Councils concerned. The Hereford City supply is laid on to Burghill, including the Mental Hospital, and Holmer. I consider it is a great pity that more advantage is not taken of the City supply in all the parishes adjoining the borough. The Corporation would benefit financially and the Rural District from a public health point of view. Of the 52 water samples analysed during 1924, 17 were reported as bad and 35 as good.

SEWERAGE AND DRAINAGE.

Six houses drain into a common road drain at Wellington. At Fownhope, 18 houses and the schools drain into the main road drain. The Westhide drainage is being carried out by Mr. William Jenkins. The conditions described on page 14 apply very generally to the Hereford Rural District.

TABLE SHOWING THE SANITARY CONDITION, WATER SUPPLY, Etc., AT EACH OF THE SCHOOLS IN THE HEREFORD RURAL DISTRICT.

SCHOOLS (25).

The table on page 70 sets out the sanitary condition, etc., of the schools in the Hereford Rural District. On page 19 of the 1921 Report will be found some general remarks and recommendations with respect to schools.

The following schools were closed by the School Medical

Officer during 1925 :-

Eaton Bishop, 5th January to 9th January—Whooping cough.

Clehonger, 22nd February to 6th March—Coughs and colds.

Clehonger, 8th June to 26th June-Measles.

Mordiford, 27th January to 13th February—Mumps. Lower Bullingham, 3rd February to 6th March—Measles.

Lower Bullingham, 15th April to 27th April—Mumps. Burghill, 9th February to 27th February—Mumps.

Stretton Sugwas, 6th February to 20th February—Coughs and colds.

Stretton Sugwas, 6th April to 9th April—Mumps.

Little Dewchurch, 12th February to 27th February— Mumps.

Little Dewchurch, 27th April to 22nd May-Whooping

Allensmore, 16th February to 13th March—Chicken pox. Bullinghope, 23rd February to 27th March—Mumps and whooping cough.

Sutton, 24th February to 6th March—Coughs and colds.

Withington, 24th February to 6th March-Mumps.

Pipe and Lyde, 2nd March to 6th March—Coughs and colds.

Breinton, 2nd March to 13th March—Mumps and influenza. Callow, 13th March to 27th March—Coughs and colds. Callow, 4th December to 24th December—Measles.

PHYSICAL FEATURES AND GENERAL CHARACTER.

The Rural District of Ledbury, which entirely surrounds the Ledbury Urban District, is situated in the eastern portion of the county, and is bounded on the north by the Bromyard Rural District, on the east by Worcestershire, on the south by the Newent (Gloucestershire) and Ross Rural Districts, and on the west by the Hereford Rural District. There are many hills in the district. The Malvern Hills, which form the eastern boundary, rise to a height of 1,000 ft. within the district, and Eastnor Hill in the east is 600 ft. above sea-level. On the western side Woolhope is 530 ft., Westhide 533 ft., Marcle Hill 700 ft., Seager Hill 886 ft., and Bradlow Hill in the middle of the district is 770 ft. above sea-level. Colwall Church is 329 ft., Bosbury 220 ft., and Donnington 150 ft. above sea-level.

The river Frome flows in a westerly direction in the northern part of the district, and in the central part the river Leadon flows in a southerly direction.

Geologically the district is chiefly Old Red Sandstone, except the western boundary, where it is Silurian. Limestone crops up in Mathon parish.

The soil is a rich red clay. The subsoil is chiefly limestone (locally known as a bastard limestone).

The 22 parishes within the district are in the Ledbury Poor-law Union, but the Rural District is not co-terminous either with the Registration District or with the Poor-law Union, which include the Ledbury Urban District and the parish of West Malvern in Worcestershire. There are collections of houses into villages at Bosbury, Colwall, Eastnor, Mathon, Tarrington, and Woolhope.

There are 49 miles of county main roads and 146 miles of district roads in the Ledbury Rural District.

INDUSTRIES.

The industries are almost entirely of an agricultural nature, hops and fruit being largely grown, and there is extensive breeding of Herefordshire cattle. There are large mineral water works and fruit pulp and bottling works in the parish of Colwall, and a jam factory in Ledbury Rural, and there are corn mills in Bosbury, Colwall, Eastnor, and Ledbury Rural. There are cider works in Ledbury Rural and Much Marcle. There is also a brewery in the parish of Colwall. Large limestone quarries are to be found in the parishes of Ledbury, Putley, Wellington Heath, Coddington, Colwall, Mathon, Castle Frome, Much Marcle, Woolhope, and Yarkhill.

INFECTIOUS DISEASES.

The Hereford Rural District Council admits Ledbury cases to their Isolation Hospital. Nine cases were admitted in 1925, and 78 cases in the previous ten years.

SCARLET FEVER.

Twelve non-fatal cases in twelve houses in eight parishes. Seven cases were removed to the Hereford Rural Isolation Hospital, and one to the Malvern Isolation Hospital.

DIPHTHERIA.

Two cases in 2 parishes. Both cases were removed to the Hereford Rural Isolation Hospital.

PHTHISIS.

Five cases, six deaths. The six deaths occurred among residents in the parishes of Bosbury, Canon Frome, Eastnor, Putley and Tarrington (2).

NURSING ARRANGEMENTS, HOSPITALS, AND OTHER INSTITUTIONS AVAILABLE.

Professional nursing in the homes:-

(a) General—A District Nurse is provided by the District Nursing Association for the following parishes:— Ashperton, Aylton, Bosbury, Canon Frome, Castle Frome, Coddington, Colwall, Donnington, Eggleton, Little Marcle, Ledbury Rural, Munsley, Pixley, Putley, Stretton Grandison, Tarrington and Yarkhill.

The Ledbury Board of Guardians subscribe ten pounds per annum to the Association.

(b) For infectious diseases—none.

The nursing is not provided by the County Council, but by a District Nursing Association, which is affiliated to and receives grants from the County Nursing Association, which in its turn is subsidised by the Ministry of Health and the County Council. The District Association is supported by local voluntary contributions and by a grant from the Board of Guardians. The Nurses are appointed by the District Association, and to a limited extent are under the supervision of the County Association Superintendent of Nurses, who is also County Inspector of Midwives.

The MIDWIVES ACTS are administered by the County Council. There are twelve (eight trained) Midwives practising in the

Rural District.

The Notification of Births Acts are administered by virtue of the County of Hereford (Notification of Births) Order, 1918, by

the County Council.

CLINIC AND TREATMENT CENTRES.—The Tuberculosis Clinic provided by the County Council at Homend Lodge Cottage, Ledbury, is available for the Rural District. The Tuberculosis Officer attends from 12.30 to 2 p.m. on alternate Tuesdays. (January 12th, 1926.)

A Voluntary Infant Welfare Centre in the Parish Room, Ledbury, towards which a grant of five pounds annually is made by the County Council, is available for the Ledbury Rural District.

HOSPITALS :-

General—Herefordshire General Hospital, Hereford City.

Worcester General Infirmary, Worcester City.

Great Malvern Hospital, Malvern.

Cottage Hospitals—Ledbury Cottage Hospital.

Poor Law Infirmaries—Ledbury Union Infirmary in Ledbury town, 30 beds.

Special Hospitals—Isolation Hospital, Credenhill, for smallpox, scarlet fever and diphtheria.

Hereford Victoria Eye Hospital. Worcester Ophthalmic Hospital. AMBULANCE FACILITIES.—A Motor Ambulance, owned by the Hereford Rural District Council, stationed at Messrs. Fryer's Garage, Widemarsh Street, Hereford (Telephone, 1320), is available for the removal of infectious cases on payment of mileage charges.

A Motor Ambulance, presented by the British Red Cross Society, is stationed at Messrs. Connelly Bros., Commercial Road, Hereford (Telephone, 1039), and is available for the removal of non-infectious cases on payment of mileage charges.

LABORATORY, &c.

Bacteriological and chemical examinations are made at the County and City Public Health Laboratory, Hereford, free of charge.

The following examinations were made during 1925:-

	F	Positive.	N	egativ	e.	Total.
For diphtheria		0		9		9
For tuberculosis		I		21		21
For typhoid fever		0		0		0
For gonorrhœa		0		0		0
Water samples		_		-		15*

7* good, 8 bad.

Diphtheria anti-toxin was supplied at the cost of the District Council under the terms of the Diphtheria Anti-toxin (outside London) Order, 1910, to three doctors, to the extent of 28,000 units.

ARRANGEMENTS FOR DISINFECTION AND DISINFESTATION.

There is no steam disinfector available. Disinfection is carried out with Formalin lamps and spraying with Formalin.

The number of rooms disinfected was 19, and the number of lots of bedding, etc., was 19. Two Schools were disinfected.

SANITARY ADMINISTRATION.

Adoptive Acts, By-laws and Regulations relating to the Public Health in force within the district.

Urban Powers under the Public Health Act, 1875, with respect to Slaughter-houses, and Sections 29, 30 and 31 of the Public Health Acts Amendment Act, 1890, have been in force in the Ledbury Rural District since 1913. Urban Powers with respect to Building By-laws since 1898.

The Public Health Acts Amendment Act, 1890, Part III., was adopted in 1897.

Regulations under the Dairies, Cowsheds, and Milkshops Orders were made in 1906.

By-laws for Colwall only with respect to new buildings have been in force since 1898, and with respect to the removal of refuse and cleansing of privies since 1904.

The model by-laws of the Ministry of Health with respect to Slaughterhouses (excluding those relating to stunning—9A, 9B) were adopted on May 30th, 1922.

Mr. F. H. Williams resigned his appointment as Sanitary Inspector in October 1924, and was succeeded by Mr. C. A. Wilson, who holds the Certificate of the Royal Sanitary Institute.

REPORT OF SANITARY INSPECTOR.

Number of Outworkers		 	0

DAIRIES AND COWSHEDS (50).

Regulations under the Dairies, Cowsheds and Milkshops Order have been in force since 1906. A few of the Cowsheds are very well kept. At most of them there is very little attention paid either to the personal cleanliness of the milkers or to the cleanliness of the surroundings.

SLAUGHTER-HOUSES (8).

Urban Powers with respect to slaughter-houses were sanctioned by the Local Government Board in 1913.

The slaughter-houses are well constructed and kept in a fairly satisfactory condition.

9r lbs. of Meat was seized, carried before a Justice and condemned.

The model by-laws of the Ministry of Health (excluding those relating to stunning—9A, 9B) were adopted on May 30th, 1922 (see page 18.)

BAKEHOUSES.

The public Bakehouses are now kept tolerably clean. They are in the parishes of Ashperton, Bosbury (3), Castle Frome, Colwall (1), Eastnor, Mathon and Woolhope (2).

The Sale of Food and Drugs Acts are not administered by the District Council.

HOP-PICKERS.

The housing conditions are better than they were in pre-war days, but I am convinced that there will not be any general substantial improvement until suitable by-laws are adopted and enforced. It is not fair to those growers who do what is requisite to ensure the comfort of the pickers that a minority of growers should be allowed to be neglectful.

Special quarters are being provided in an increasing degree. At four farms there are well-constructed corrugated iron Nissen huts with well-boarded floors. A few farms have Army huts. At one farm the huts are lighted with electric light, and at another there is acetylene gas. The water supply as a rule is good, and the cooking arrangements are an improvement on former years. In far too many instances the privy accommodation was insufficient, and the scavenging of the privies inadequate, so that accumulations of filth were found all over the approaches to the closets. More

attention requires to be given to the limewashing of the inside walls of the quarters and to the removal of accumulations of manure from their vicinity.

General reference is made to hop-pickers' quarters on p. 14.

WATER SUPPLY.

In Colwall, Eastnor and Tarrington there are combined piped water supplies. Wells with or without pumps, springs and dip wells are found elsewhere. Dip wells, most of which are liable to pollution, should be dealt with as far as practicable as suggested on page 9 of the 1921 Report. At quite a large number of houses in various parts of the district the inhabitants have to go some distance for their supplies. Of the fifteen samples sent for analysis in 1925 seven were reported as good and eight as bad.

SEWERAGE AND DRAINAGE.

In Bosbury, Colwall, Eastnor and Tarrington there is a combined drainage, that at Colwall being on the most extended scale. Elsewhere the conditions described on page 14 apply generally to the Ledbury Rural District.

SCHOOLS (19).

The table on page 87 sets out the sanitary condition, etc., of the schools in the Ledbury Rural District. On page 19 of the 1921 Report will be found some general remarks and recommendations with respect to schools.

The following schools were closed by the School Medical Officer during 1925:—

Tarrington, 2nd February to 13th February—Colds. 19th May to 12th June—Measles.

Colwall Boys', 5th February to 20th February—Influenza.

,, Girls', 5th February to 6th March—Influenza.

"Hill, 10th February to 20th February—Influenza. "28th October to 17th November—Measles. Coddington, 10th February to 20th February—Coughs

and colds.

Castle Froome, 20th February to 27th February—Coughs and colds.

Ashperton, \ 4th March to 20th March—Influenza. \ 8th June to 26th June—Measles.

Putley, 23rd March to 9th April—Mumps. Mathon, 20th April to 8th May—Measles.

Wellington Heath, 7th December to 24th December—Chicken pox.

There has been no unusual or excessive mortality during 1925.

^{*} See page 9.

PHYSICAL FEATURES AND GENERAL CHARACTER.

The Rural District of Leominster is situated in the north-east corner of the county, and does not quite surround the Urban District of Leominster. It is bounded on the north by the County of Salop, on the east by the County of Worcester and the Bromyard Rural District, on the south by the Hereford Rural District, and on the west by the Weobley and Wigmore Rural Districts. The district is for the most part flat, with rising ground on the western and southern boundaries.

Leominster railway station (in the Leominster Urban District) is 224 ft. above sea-level, and Bodenham is 200 ft. A range of hills on the west rises to 943 ft., and in the middle of the district a range of hills runs from north to south rising to 500 ft. at Middleton Hill. Dinmore Hill in the south is 943 ft. above sea-level. The river Lugg enters the district about the middle of the western boundary; it flows in an easterly direction through the borough of Leominster, again enters the Rural District, and flows in a winding bed due south. The river Teme flows through the northern portion of the district from west to east, and the river Arrow flows from west to east through a part of the western portion.

Geologically the district is Old Red Sandstone with alluvial deposit in the low-lying portions following the courses of the rivers.

In the parishes of Croft, Ford, Hope, Laysters, Lucton, and Stoke Prior limestone crops up.

A clay subsoil is found over the greater portion of the district, and a subsoil of gravel in parts of the parishes of Bodenham, Docklow, Eye, Ford, Kingsland, Yarpole, Stoke Prior, and Brimfield. The hilly portions of Lucton, Croft, Yarpole, Orleton, and Richard's Castle are on rock.

There are within the district 26 parishes, all of which are in the county of Hereford, but the Rural District is not co-terminous either with the Registration District or with the Poor-law Union, which include the Borough of Leominster and Leominster Out-parish. In the Leominster Registration District and Poor-law Union are 23 parishes, in the Tenbury Registration District and Poor-law Union are two parishes (Brimfield and Little Hereford), and the parish of Richard's Castle is in the Ludlow Registration District and Poor-law Union. The population in the 26 parishes of the Rural District at the census of 1911 varied from 13 in Hampton Wafer to 944 in Kingsland. There are collections of houses into villages at Kingsland, Bodenham, Hopeunder-Dinmore, Stoke Prior, Brimfield, Orleton, Yarpole, Kimbolton, Luston, and Hatfield.

There are 43 miles of county main roads and 156 miles of district roads in the Leominster Rural District.

INDUSTRIES.

The industries are entirely of an agricultural nature, hops and fruit being largely grown, and there is extensive breeding of Herefordshire cattle. There are corn mills in Bodenham, Eyton, Humber, Kingsland, Lucton, Orleton, and Pudlestone,

INFECTIOUS DISEASES.

The method of dealing with infectious disease in the district is described on pages 9 and 10 of the Report for 1907.

SCARLET FEVER.

Ten cases in four different parishes in six houses. All the cases were nursed at home, and there was no death.

DIPHTHERIA.

Seven cases in two different parishes in five houses.

PHTHISIS.

Eight cases, four deaths. The four deaths occurred among residents in the parishes of Kingsland, Little Hereford (2) and Monkland.

NURSING ARRANGEMENTS, HOSPITALS, AND OTHER INSTITUTIONS AVAILABLE.

Professional nursing in the homes-

- (a) General—A District Nurse is provided by the District Nursing Association for the following parishes:— Croft, Hope-under-Dinmore, Kingsland, Lucton Orleton and Yarpole.
- (b) For infectious diseases—none.

The nursing is not provided by the County Council, but by a District Nursing Association, which is affiliated to and receives grants from the County Nursing Association, which in its turn is subsidised by the Ministry of Health and the County Council. The District Association is supported by local voluntary contributions and by a grant from the Board of Guardians. The Nurses are appointed by the District Association, and to a limited extent are under the supervision of the County Association Superintendent of Nurses, who is also County Inspector of Midwives.

The Midwives Acts are administered by the County Council.

There are six (five trained) Midwives practising in the Rural District.

The Notification of Births Acts are administered by virtue of the County of Hereford (Notification of Births) Order, 1918, by the County Council.

CLINIC AND TREATMENT CENTRES.—The Tuberculosis Clinic provided by the County Council in Leominster Borough is available for the Leominster Rural District. The Tuberculosis Officer attends from 12.30 to 2 p.m. at the Cottage Hospital on alternate Fridays. (January 1st, 1926.)

A Voluntary Infant Welfare Centre at the Cottage Hospital, Leominster, towards which a grant of five pounds annually is made by the County Council, is available for the Leominster Rural District.

HOSPITALS :-

General—Herefordshire General Hospital, Hereford City. Cottage Hospitals—Leominster Cottage Hospital.

Ludlow Cottage Hospital, 11 beds. Tenbury Cottage Hospital, 10 beds.

Poor Law Infirmaries—Leominster Union Infirmary, in Leominster town, 22 beds.

Special Hospitals—Infectious Diseases—Hereford Rural Isolation Hospital.

Hereford Victoria Eye Hospital.

AMBULANCE FACILITIES.—A Motor Ambulance, owned by the Hereford Rural District Council, stationed at Messrs. Fryer's Garage, Widemarsh Street, Hereford (Telephone, 1320), is available for the removal of infectious cases on payment of mileage charges.

A Motor Ambulance, presented by the British Red Cross Society, is stationed at Messrs. Connelly Bros., Commercial Road, Hereford (Telephone, 1039), and is available for the removal of non-infectious cases on payment of mileage charges.

LABORATORY, &c.

Bacteriological and chemical examinations are made at the County and City Public Health Laboratory, Hereford, free of charge.

The following examinations were made during 1925:-

		Positiv	e. I	Vegati	ve.	Total.
		7		17		24
		5		26		31
er		0		0		0

		-		-		20*
	er 	er	7 5 er o	7 5 er 0	7 17 5 26 er 0 0	5 26 er 0 0 0 0

*14 good, 6 bad.

21,000 units Diphtheria anti-toxin was supplied to one doctor at the cost of the District Council under the terms of the Diphtheria Anti-toxin (outside London) Order, 1910.

SANITARY ADMINISTRATION.

Adoptive Acts, By-laws and Regulations relating to the Public Health in force within the district.

Urban Powers under the Public Health Act, 1875, and Sections 29, 30 and 31 of the Public Health Amendments Act, 1890, have been in force in the Leominster Rural District since 1914.

Regulations under the Dairies, Cowsheds, and Milkshops Orders were made in 1908.

By-laws with respect to Hop and Fruit-pickers were adopted in 1908.

ARRANGEMENTS FOR DISINFECTION AND DISINFESTATION.

There is no steam disinfector available. Disinfection is carried out with Formalin lamps and spraying with Formalin.

The number of rooms disinfected was 24, and the number of lots of bedding was 22. One school was disinfected.

REPORT OF SANITARY INSPECTOR.

As required by Article XIX (12) of the Sanitary Officers Order, 1922.

I	Luston, Leominster, 22nd January, 1926.				

DAIRIES AND COWSHEDS (41).

Regulations under the Dairies, Cowsheds, and Milkshops Orders have been in force since 1908.

At many of the farms more attention should be paid to the personal cleanliness of the milkers. Accumulations of manure, sometimes right up to the milking sheds, is found far too often.

On pp. 14, 15 in 1924 Report, reference is made to the Milk and Dairies (Amendment) Act, 1922, and to the Regulations of the Ministry of Health with respect to "graded" and other specially designated milk.

SLAUGHTER-HOUSES (10).

Urban Powers with respect to slaughter-houses were granted in 1914. By-laws have not yet been adopted.

The slaughter-houses are in the parishes of Brimfield, Boden-ham (2), Kingsland (3), Orleton (2), Richard's Castle and Yarpole.

BAKEHOUSES (7).

There are Bakehouses in the parishes of Bodenham, Brimfield, Kingsland (2), Orleton, and Yarpole. They are kept in a fairly clean condition.

The Sale of Food and Drugs Acts are not administered by the District Council.

HOP-PICKERS.

By-laws with respect to hop-pickers have been in force since 1908, and the Sanitary Inspector reports that there is a vast difference in the condition of the quarters in the past few years, principally as regards the cleanliness of the inside walls and floors, the removal of manure and the adequacy of closet accommodation. About 300 pickers came from outside Herefordshire to 8 farms, varying from 10 on one farm to 114 on another; most come from South Staffordshire, and a few from South Wales. There were approximately 280 women and 20 men with their accompanying children.

WATER SUPPLY.

In the parish of Hope and in the Ashton part of Eye there are combined piped water supplies. Fourteen houses in Luston parish are now supplied from the water mains of the Borough of Leominster. I think it is a great pity that efforts should not be made to make more use of the Leominster supply in the parishes adjoining that town. In the survey compiled with great care by Mr. D. W. Cave, Sanitary Inspector, he found that one-third of the houses in the Rural District have no supply on the premises, and that in more than 250 instances it is more than 100 yards distant. Dip wells, most of which are open to pollution, should be dealt with, as far as practicable, on the lines suggested on page II. Of the twenty samples sent for analysis in 1925 fourteen were reported good and six bad.

SEWERAGE AND DRAINAGE.

In the parish of Kingsland there is a combined drain serving most of the houses in the main street. It has very little fall, and is flushed periodically from an adjoining stream. The conditions described on page 14 apply very generally to the Leominster Rural District.

SCHOOLS (17).

The table on page 104 sets out the sanitary condition, etc., of the schools in the Leominster Rural District. On page 19 of the

1921 Report will be found some general remarks and recommendations with respect to schools.	1-
The following schools were closed by the School Medica Officer during 1925:—	ıl
Little Hereford, 5th January to 9th January—Scarle Fever.	t
Little Hereford, 20th February to 6th March-Mumps	3.
Little Hereford 10th March to 13th March-Influenza.	
Brimfield, 23rd March to 3rd April-Influenza.

WORKSHOPS.

From information furnished by the Sanitary Inspector, a Register has been made of the Workshops situated within the Leominster Rural District.

Attention has been paid during the year to the limewashing of Workshops, Penthouses and Bakehouses.

The following is a summary of the Register of Workshops:-

PHYSICAL FEATURES AND GENERAL CHARACTER.

The Rural District of Weobley is situated in the north-eastern portion of the county, and is bounded on the north by the Wigmore Rural District, on the east by the Leominster Rural and Urban Districts and the Hereford Rural Districts, on the south by the Dore Rural District, and on the north-west by the Kington Rural District. The district is a hilly one, many peaks rising abruptly. The Weobley Workhouse is 291 ft. above sea-level, and Canon Bridge is 191 ft., while Merry Hill in the south-east is 600 ft., Mansell Hill in the south 763 ft., and Wormsley Hill 881 ft.

Streams from the hills empty into the rivers Arrow in the north and Wye in the south. Both these rivers flow across the district from west to east.

Geologically the district is Old Red Sandstone.

In the parishes of Bridge Sollers, Eardisland and Letton are alluvial deposit, and limestone crops up in the parish of Mansell Gamage.

Over nearly the whole district there is a clay subsoil with sandstone in the parishes of Brobury, Moccas, Preston-on-Wye and Staunton-on-Wye.

There are 26 parishes within the district, which is co-terminous with the Weobley Registration District and with the Weobley Poor-law Union. The whole district is in the county of Hereford. The parish of Weobley contains the ancient borough of Weobley, where there are about 100 houses more or less compactly gathered together. There are collections of houses into villages at Almeley, Canon Pyon, Dilwyn, Eardisland, Staunton-on-Wye, Kinnersley, King's Pyon, and Preston-on-Wye.

There are 45 miles of county main roads and 130 miles of district roads in the Weobley district.

INDUSTRIES.

The industries are altogether of an agricultural character, hops and fruit are extensively grown, and there is breeding of Herefordshire cattle. A quarry was worked in 1902 in the parish of Sarnesfield; and in the parishes of Mansell Lacy, Mansell Gamage, Byford, Brobury, Staunton-on-Wye, Norton Canon, and Moccas a great deal of timber has been felled during the past few years. There are cider works in Canon Pyon. Sawmills and turnery are established in Almeley.

INFECTIOUS DISEASES.

The method of dealing with infectious disease in the district is described on pages 9 and 10 of the Report for 1907.

Anti-toxin is supplied under the Order of the Local Government Board, dated 15th August, 1910.

SCARLET FEVER.

Seven non-fatal cases in five houses in three different parishes. Four cases were removed to the Hereford Rural Isolation Hospital.

DIPHTHERIA.

Fifteen non-fatal cases. No cases were removed to the Isolation Hospital.

OPHTHALMIA NEONATORUM.

One case notified.

PHTHISIS.

Eight cases, four deaths. The deaths occurred among residents in the parishes of Brinsop, Dilwyn (2) and Moccas.

ISOLATION HOSPITAL.

The Weobley Council pays a retaining fee to the Hereford Rural District Council for two beds in the Isolation Hospital of the latter Authority. In 1925 four cases were treated there from Weobley, and 54 cases in the previous ten years.

NURSING ARRANGEMENTS, HOSPITALS, AND OTHER INSTITUTIONS AVAILABLE.

Professional nursing in the homes-

- (a) General—A District Nurse is provided by the District Nursing Association for the following parishes:— Almeley, Birley, Bishopstone, Brinsop, Bridge, Sollars, Brobury, Byford, Canon Pyon, Kinnersley, King's Pyon, Letton, Mansel Lacy, Mansel Gamage, Moccas, Monnington, Norton Canon, Preston-on-Wye, Sarnesfield, Staunton-on-Wye, Weobley, Wormesley and Yazor.
- (b) For infectious diseases—none.

The nursing is not provided by the County Council, but by a District Nursing Association, which is affiliated to and receives grants from the County Nursing Association, which in its turn is subsidised by the Ministry of Health and the County Council. The District Association is supported by local voluntary contributions and by a grant from the Board of Guardians. The Nurses are appointed by the District Association, and to a limited extent are under the supervision of the County Association Superintendent of Nurses, who is also County Inspector of Midwives.

The Midwives Acts are administered by the County Council.

There are eight (five trained) Midwives practising in the Rural District.

The Notification of Births Acts are administered by virtue of the County of Hereford (Notification of Births) Order, 1918, by the County Council.

CLINIC AND TREATMENT CENTRES.—The Tuberculosis Dispensaries provided by the County Council at St. Peter's House, Hereford, at the Cottage Hospital, Leominster, and at Church Street, Kington, are available for the Weobley Rural District.

A voluntary Infant Welfare Centre, to which a grant of five pounds annually is made by the County Council, is established at Weobley, with a branch at Dilwyn.

HOSPITALS :-

General-Herefordshire General Hospital, Hereford City.

Cottage Hospitals—Leominster Cottage Hospital. Kington Cottage Hospital, 5 Beds.

Poor Law Infirmaries—Weobley Union Infirmary, Weobley, 20 beds.

Special Hospitals—Isolation Hospital, Credenhill, for smallpox, scarlet fever and diphtheria.

Hereford Victoria Eye Hospital.

AMBULANCE FACILITIES.—A Motor Ambulance, owned by the Hereford Rural District Council, stationed at Messrs. Fryer's Garage, Widemarsh Street, Hereford (Telephone, 1320), is available for the removal of infectious cases on payment of mileage charges.

A Motor Ambulance, presented by the British Red Cross Society, is stationed at Messrs. Connelly Bros., Commercial Road, Hereford (Telephone, 1039), and is available for the removal of non-infectious cases on payment of mileage charges.

LABORATORY, &c.

Bacteriological and chemical examinations are made at the County and City Public Health Laboratory, 132, St. Owen Street, Hereford, free of charge.

The following examinations were made during 1925:-

-							-
		P	ositive.	N	egative.		Total.
For diphtheria			18		44		62
For tuberculosis			I		27		28
For typhoid feve	r		-		I		I
For gonorrhœa			-		-	• • •	-
Water samples					-		8*
	*6	good, 2	bad.				

Diphtheria anti-toxin was supplied at the cost of the District Council under the terms of the Diphtheria Anti-toxin (outside London) Order, 1910, to three doctors to the extent of 62,000 units.

ARRANGEMENTS FOR DISINFECTION AND DISINFESTATION.

The steam disinfector at the Hereford Union Workhouse, Hereford, is available for the Weobley Rural District.

Household disinfection is carried out with Formalin lamps and Formalin spray. The number of rooms disinfected was 20, and the number of lots of bedding, etc., was 18. Three Schools were disinfected during the year.

SANITARY ADMINISTRATION.

By-laws with respect to Common Lodging Houses have been in force since 1901, with respect to Hop and Fruit-pickers since 1907, and with respect to Tents, Vans, Sheds and similar structures since 1912.

REPORT OF SANITARY INSPECTOR.

Certificate of Royal Sanitary Institute.
Church House, Weobley,
24th February, 1926.

HOP-PICKERS.

By-laws with respect to hop-pickers have been in force since 1907, and have had the effect of very considerably improving the conditions under which the pickers are housed. On the four hop-farms on which are employed pickers from outside the district there were quartered about 200 pickers. Home pickers are employed on about ten other farms. A few weeks before the picking begins a communication is sent to the growers setting out the requirements. Further reference is made to hop-pickers on p. 14.

DAIRIES AND COWSHEDS (6).

No regulations with respect to Dairies and Cowsheds have been made. Greater cleanliness in the surroundings and on the part of the milkers is necessary. I repeat my recommendation of former years that Regulations should be made.

No action was taken during the year under the Dairies, Cowsheds, and Milkshops Orders.

SLAUGHTER-HOUSES (5).

There are at present slaughter-houses in Dilwyn, Stauntonon-Wye and Weobley (3). They are kept in a fairly good condition. (See page 18.)

BAKEHOUSES (8).

There are Bakehouses in Canon Pyon, Dilwyn, Kinnersley, Preston-on-Wye and Weobley (3). They are kept fairly well.

The Sale of Food and Drugs Acts are not administered by the District Council.

WORKSHOPS AND WORKPLACES.

From information furnished by the Sanitary Inspector, a register has been made of the Workshops situated within the Weobley Rural District.

Attention has been paid during the year to the lime-washing of Blacksmiths' Shops.

The following is a summary of the Register of Workshops:-

PARISH.	Cider Stores.	Baker.	Blacksmith.	Bootmaker.	Builder.	Carpenter.	Saddler.	Dressmaker.	Machinist.	Tailor.	Wheelwright.	TOTAL.
Almeley	0	0	1	1	0	1	0	0	1	0	0	4

TENTS, VANS, &c.

A copy of the By-laws with respect to Tents, Vans and similar structures adopted in 1912 will be found at the end of the 1912 Report, together with a shortened form set out in more understandable terms than the official phraseology of the actual By-laws. In order to get these By-laws carried put, the procedure adopted is for the Inspector to take a copy of the latter form and read it over to the occupier of a tent, etc. A record is kept of those persons who have had the form. After a suitable period a reinspection is made, in order to see that the By-laws are being carried out.

WATER SUPPLY.

There is a combined piped water supply to 14 houses and Jarvis's School Buildings in the parishes of Staunton-on-Wye, and in the parish of Letton to six houses. Elsewhere supplies are obtained from wells and springs. In the Report for 1920 (page 93) I referred to the condition of the central part of Weobley parish as regards water supplies, and I hope to be able to report durire the current year the provision of a proper public supply. The y are dip wells in the district which are liable to be polluted. Thed should be dealt with, as far as practicable, on the lines suggester on page 9 of the 1921 Report. Of the 8 samples sent fo analysis in 1925, 2 were reported as bad.

SEWERAGE AND DRAINAGE.

For about 100 houses in Weobley there is a main sewer laid in 1893, the loan for which has now been paid off. A description of the outfall, etc., will be found on page 134 of the Report for 1906. The Workhouse drainage is described on page 94 of the Report for 1920. There is a combined drainage for Jarvis's Schools and 14 houses in Staunton-on-Wye, for a few houses in Dilwyn, and for three in Canon Pyon. The conditions described on page 14 apply very generally to the Weobley Rural District.

SCHOOLS (15).

The table on page 120 sets out the sanitary condition, etc., of the schools in the Weobley Rural District. On page 19 of the 1921 Report will be found some general remarks and recommendations with respect to schools.

The following schools were closed by the School Medical Officer during 1925:—

Dilwyn, 23rd February to 6th March-Influenza.

Norton Canon, 25th February to 13th March—Whooping Cough.

Weobley, 2nd March to 13th March—Whooping cough and Influenza.

Staunton-on-Wye, 17th March to 8th April—Whooping Cough.

Byford, 17th March to 27th March—Coughs and colds.
Blakemere, 26th March to 9th April—Coughs and colds.
Canon Pyon, 27th March to 10th April—Influenza.
King's Pyon, 11th May to 15th May—Bad coughs.
Eardisland, 4th November to 25th November—Chicken pox.

The following Loans were outstanding at 31st March, 1925:—Markets, £11 13s. 4d.; Water Supply, £718 8s. od.; Burial Ground, £168 10s. od.; Housing Scheme (1919), £5,369 16s. 11d.

There has been no unusual or excessive mortality during 1925.

* See page 9.

The Bromyard Urban District was formed from the Bromyard Rural Sanitary District on January 1st, 1895. It includes the parish of Bromyard and a portion of the parish of Winslow (L.G.B. Order, November 17th, 1894). Prior to January 18th, 1895, the area now included in the Bromyard Urban District was a special Drainage District of the Rural Sanitary District of the Bromyard Union.

PHYSICAL FEATURES AND GENERAL CHARACTER.

The Urban District of Bromyard is situated on the north-eastern side of the county of Hereford, and is entirely surrounded by the Bromyard Rural District. The area of the town is roughly triangular in shape with the apex of the triangle on the western and the base on the eastern side. The eastern boundary is formed by the River Frome; the remaining boundaries are artificial. The lowest part of the town (341ft. above sea-level) is about 100 yards north of Sherford Bridge, over the River Frome, At the Market Place the height is 394ft., at the corner of Milvern Lane and Sheep Street 416ft., and at the boundary of the town on New Road it is 572ft. above sea-level.

The geological formation is Old Red Sandstone.

In the middle of the town towards the eastern side the bouses are gathered together in compact, fully built-up streets. There are practically no courts or back-to-back houses. Several new houses have been erected lately at Westhill, which is very well situated from a residential point of view, being 550 feet above sea-level.

INDUSTRIES.

There was for many years an extensive clothing factory giving employment to men, women, and girls both in the factory and as out-workers. This was closed in the autumn of 1906.

Extent to which Hospital and other forms of Gratuitous Medical relief are utilised:—

INFECTIOUS DISEASE.

The town was remarkably free from infectious disease during the year. There has been two cases of scarlet fever, both treated in the Isolation Hospital, and no diphtheria was notified.

An account of the methods adopted for the prevention of infectious diseases will be found on pages 9 and 10 of the 1907 Report.

TUBERCULOSIS.

There were two deaths from pulmonary tuberculosis (phthisis),

New cases ... Pulmonary ... I female—10 years.

Non-Pulmonary ... I male—24 years.

Deaths ... Pulmonary 2 { I male—24 years. I female—51 years.

Non-Pulmonary ... o

On the 31st December, 1925, there were on the Register the following cases:—

		1	Tales.	Females.
Pulmonary		 	4	3
Non-Pulmon	ary	 	2	3

HOUSING.

Many of the houses, especially in Milvern Lane and some in Sheep Street, ought not to be occupied, and they would be closed were it possible to find other accommodation for the occupants. Until the cost of building is reduced and private enterprise once more erects cottages, it is difficult to say in what way the existing unsatisfactory conditions can be amended.

NURSING ARRANGEMENTS, HOSPITALS, AND OTHER INSTITUTIONS AVAILABLE.

Professional nursing in the homes-

- (a) General—A District Nurse is provided by the District Nursing Association.
- (b) For infectious diseases—none.

The nursing is not provided by the County Council, but by a District Nursing Association, which is affiliated to and receives grants from the County Nursing Association, which in its turn is subsidised by the Ministry of Health and the County Council. The District Association is supported by local voluntary contributions and by a grant from the Board of Guardians. The Nurses are appointed by the District Association, and to a limited extent are under the supervision of the County Association Superintendent of Nurses, who is also County Inspector of Midwives.

The Midwives Acts are administered by the County Council. There are two (both trained) midwives practising in Bromyard.

The Notification of Births Acts are administered by virtue of the County of Hereford (Notification of Births) Order, 1918, by the County Council.

CLINICS AND TREATMENT CENTRES.—Tuberculosis Clinic provided by the County Council at the Market Square, Bromyard. The Tuberculosis Officer attends from 10.30 a.m. to 12 noon on alternate Thursdays, beginning 7th January, 1926.

HOSPITALS :-

General—Herefordshire General Hospital, Hereford City.

Worcester General Infirmary, Worcester City.

Poor Law Infirmaries—Bromyard Union Infirmary in Bromyard Rural District, 35 beds.

Special Hospitals—Bromyard Urban and Rural Joint Isolation Hospital for Scarlet Fever, 4 beds.

Hereford Victoria Eye Hospital.

Worcester Ophthalmic Hospital.

Ambulance Facilities.—A Horse Ambulance (a converted carriage) is kept at the Isolation Hospital for the removal of infectious cases. A horse is hired as required.

A Motor Ambulance, presented by the British Red Cross Society, is stationed at Messrs. Connelly Bros., Commercial Road, Hereford (Telephone, 1039), and is available for the removal of non-infectious cases on payment of mileage charges.

LABORATORY, &c.

Bacteriological and chemical examinations are made at the County and City Public Health Laboratory, Hereford, free of charge.

The following examinations were made during 1925:—

	Pc	Negative.			Total.	
For diphtheria		2		6		8
For tuberculosis		I		5		6
For typhoid fever		0		0		0
For gonorrhæa		0		0		0
Water samples		_		-		I

This sample was taken from the Town supply, and pronounced

as of good quality.

Diphtheria anti-toxin was supplied at the cost of the District Council under the terms of the Diphtheria Anti-toxin (outside London) Order, 1910, to one doctor to the extent of 8,000 units.

SANITARY ADMINISTRATION.

Adoptive Acts, By-laws and Regulations relating to the Public Health in force within the district.

The Public Health Acts Amendment Act, 1890, adopted 1895. By-laws with respect to:—

The cleansing of footways and pavements.

The removal of house refuse.

The cleansing of earth-closets, privies and ashpits.

Nuisances.

Slaughter-houses.

Common lodging-houses, and

New streets and buildings.

REPORT OF THE SANITARY INSPECTOR.

Notices complied with Notices outstanding The slaughter-houses, lodging-houses and bakehouses have been regularly inspected and found clean.

J. D. BARRS,

Sanitary Inspector.

8

Broad Street, Bromyard, 28th January, 1926.

ARRANGEMENTS FOR DISINFECTION AND DISINFESTATION.

There is no steam disinfector available. Disinfection is carried our with Formalin lamps. The number of rooms disinfected was five, and the number of lots of bedding disinfected was five.

DAIRIES AND COWSHEDS.

There are no Dairies or Cowsheds in the town.

There are two Milkshops. No action was taken during 1924 with respect to them under the Dairies, Cowsheds, and Milkshops Orders.

SLAUGHTER-HOUSES (4).

There are now four slaughter-houses in the town. Two are registered for a limited period. They are well built and have good floors. They are well supplied with water, and are kept fairly clean.

BAKEHOUSES (5).

The five bakehouses in the town are kept in a better condition than formerly, although in some there is room for improvement, especially as regards the floors.

The Sale of Food and Drugs Acts are not administered by the Urban District Council.

COMMON LODGING-HOUSES.

There is one registered common lodging-house in the town with accommodation for 17 lodgers in three bedrooms. Only one bedroom has a fireplace. The house was not built specially for a lodging-house. By-laws with respect to common lodging-houses, based on the model series, are in force.

SCAVENGING.

The scavenging of the streets is carried out daily by the Council's workmen. House refuse is removed weekly at the cost of the Council. During the summer months the streets are watered with a solution of calcium chloride.

SEWERAGE AND DRAINAGE.

An account of the sewerage and drainage of the town will be found in the Annual Report for 1920, page 105.

WATER SUPPLY.

A description of the public water supply is given on page 105 of the Report for 1920, and a sample submitted during the year 1925 passed satisfactorily.

SCHOOLS.

There are two public elementary schools in the Urban District, with an aggregate accommodation for 310 pupils.

Water-closets are provided and the drainage of both schools is connected with the public sewers.

The Junior Division and Senior Division of the Elementary Schools were closed from the 9th March to the 13th of the same month by the School Medical Officer, owing to Influenza.

PUBLIC HEALTH STAFF.

Medical Officer of Health—HERBERT JONES, D.P.H. (Camb.), who is also M.O.H. for the Herefordshire Combined District.

One-half his salary is contributed from Exchequer grants.

Sanitary Inspector—J. D. Barrs, who is also Surveyor to the Bromyard Urban District. One-half his salary is contributed from Exchequer grants.

NEW HOUSES.
