Hoddesdon Urban District Council

ANNUAL REPORT
of the
MEDICAL OFFICER OF HEALTH
and the
CHIEF PUBLIC HEALTH INSPECTOR
for the year
1972

EAST HERTFORDSHIRE COMBINED DISTRICTS
REPORT OF THE MEDICAL OFFICER OF HEALTH FOR THE YEAR 1972
HODDESDON URBAN DISTRICT

P R E F A C E

To the Chairman and Members of the
Public Health Committee

Mr. Chairman, Ladies and Gentlemen,

I have the honour to present the Annual Report for the Urban District of Hoddesdon for the year ending 31st. December 1972.

This may well be the last Annual Report which I shall write for you. Annual Reports cannot be written before May/June because the relevant figures for the previous year are not available from the Registrar General before then, and my job as Medical Officer of Health terminates in April 1974.

I think that of all the Local Government Departments the Health Department produces the least tangible results. At the end of the year there are no roads built, no houses constructed, no parks opened, and no complete balance sheet attributable to the Health Department. A comparison of figures before and after an immunisation programme indicates numbers. It gives no idea of the worry, suffering, and the complications of illness that the programme may have prevented. If there is a sharp outbreak of diarrhoea and vomiting in a school, in a factory canteen or in a private household, there is little to show for the work which is done, except a number of forms from the Public Health Laboratory, entries in a diary, and a sigh of relief!

It remains to be seen how the Public Health Service will develop as the Environmental Health Service. In my opinion, Environmental Health has two separate components. Firstly, an outbreak of ill-health demands close liaison between the present Medical Officer of Health and the Public Health Inspectors, and quick easy access by the head of a school, a factory manager or householder, to these departments. I hope that this easy access and close co-operation, which is a feature of our present arrangements, will not be lost under the new order. Secondly, I think there is a largely unexplored field of Environmental Health which could involve many Departments. This demands a high degree of expertise rather than quick action.

PREFACE (cont'd)

I have always looked on Annual Reports by the Medical Officer of Health as a quick ready reference to local services. I think it is worth mentioning that they may also serve another function. This is a "watchdog function", which is rarely exercised. As so often happens in medicine, rare needs are quite important. The Medical Officer of Health is charged with looking into conditions that are, or could be prejudicial to the health of the people in the district in which he works. History shows many occasions when a lack of a clear understanding of a hazard has led to a prolonged, unnecessary exposure of the public to danger. It may be said that we know better now. Since the population is increasing, since pollution is a continuing problem, since air traffic crosses national boundaries, I think there is a strong case for a watchful eye.

At the moment, there is doubt as to whether or not a "proper officer" should write Annual Reports.

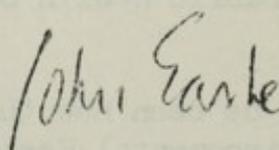

I wish to thank the Chief Officers for their help and Mrs. Guest for all her work. I also thank the Chairman and Members of the Public Health Committee for their interest.

I would add that I have enjoyed being the Medical Officer of Health of Hoddesdon Council and working in an office which overlooks gardens and green fields.

I am,

Mr. Chairman, Ladies and Gentlemen,

Your obedient Servant,

.....
John Earle

Medical Officer of Health

GENERAL STATISTICS

The estimated mid-year population for 1972 was 27,280, compared with a figure of 26,310 for 1971. This increase of 970 people in the year is largely due to migration into the area.

The density of population has increased from 5.94 persons per acre in 1971 to 6.11 persons per acre in 1972.

VITAL STATISTICS

During the year there were 543 live births and 6 stillbirths in the area. The birth rate locally, as in 1971, was nearly one fifth higher than the national average.

DEATHS & CAUSES OF DEATH

There were 201 deaths, which represent a crude death rate of 7.4 per 1,000 population. By a curious chance the number of deaths was the same in the year 1971. Of these deaths just over 100 occurred after the age of 75 and a further 45 deaths occurred between 65 and 75.

Nine people died due to Lung Cancer; an unpleasant death at any age. Five of these were under 65 years of age.

COMMUNICABLE DISEASE

Measles: There was a small outbreak of Measles, mainly in children who had not reached the age of immunisation. Apart from this, the Measles Vaccination Programme continues to show benefits.

Venereal Disease: It is not generally realised that the group of Venereal Diseases are some of the commonest communicable diseases in the Country. One underlying reason is that a woman may be infected, infectious and yet free from symptoms. She is unaware that anything is amiss.

During 1973 a telephone answering machine has been installed in Hoddesdon (Tel. No. Hoddesdon 66151). The message is an attempt to get people who are in doubt to go for a check-up. Since the Health Services are particularly interested in tracing symptomless women carriers, the Venereologist and I thought that a woman's recorded voice would be more suitable than a man's. The lady who made the recording is a member of the public who came forward after an appeal in the Press. I am most grateful to all who helped with this matter.

Paratyphoid Fever & Salmonella Food Poisoning - a total of five cases was reported, and investigated during the year.

TUBERCULOSIS

Seven cases were added to the Register. As in other areas, this disease is far less prevalent than 25 years ago, yet the disease is by no means extinct. As elsewhere, immigrants seem to be particularly at risk.

TUBERCULOSIS (cont'd)

Mass X-Ray Unit

A Mobile Unit visits Cheshunt (Old Drill Hall, Crossbrook Street), every FRIDAY, between 10a.m. and 2p.m. Anyone can attend, without appointment.

Also a Mobile Unit covers the whole of the area of the North East Metropolitan Regional Hospital Board. This is used in East Herts for the X-ray examination of special groups (namely, teachers, those working with children, and those considered at particular risk) and also for those patients sent by a General Practitioner.

NATIONAL ASSISTANCE ACTS, 1948-51

No action was required under Section 47 of the Acts during 1972.

WORKROOMS FOR THE ELDERLY

Members continue to meet on Tuesday and Thursday mornings, between 10 and 12 o'clock, in the School Hall, St. Paul's Lane, Hoddesdon, and Mrs. I.D. Harnett, the Organiser of the Workrooms for the Elderly reports that the Workrooms are still running successfully.

The financial position, and finding an adequate amount of suitable work, are difficult problems at times. The Workrooms receive financial help from the Hoddesdon Urban District Council, for which they are very grateful.

They have vacancies for about four more active persons, and anyone interested should contact Mrs. Harnett, 184, Ware Road, Hoddesdon (or telephone Hoddesdon 66129) or go to the Workrooms on any working day. During the year there was one death, three persons left owing to ill-health and one suffered a stroke but hopes to return if transport can be arranged. Three members are over 86 years of age and several are over 80 years.

Social Events - There was a visit to the Wembley Ice Show and an Outing to the seaside, also Christmas Party and Birthday Party. At the Birthday Party, Certificates were given to those members with ten years' attendance, and those members who had already received the ten year Certificate were given a Gold Star to add to it.

The Workrooms are invaluable, helping the active, lonely and elderly members. The work done by the Organiser is very much appreciated by everyone. The Committee continue to hope that the Workrooms may have premises of their own some time in the future.

HOME SAFETY COMMITTEE

The Committee continued to meet in 1972. The Chairman was Councillor K. Sandison, Hon. Treasurer, Mr. W. Scott, and the Hon. Secretary, Mrs. A.C. Crozier.

The Area 9 Home Safety Committee meeting held at Cambridge, was attended by the Chairman, Hon. Treasurer and Hon. Secretary.

A Home Safety Stall at the Town Show was manned by Mrs. Crozier, and a firework publicity campaign was again carried out.

MEDICAL ARRANGEMENTS FOR LONG-STAY IMMIGRANTS

We were only notified of the arrival of five immigrants. However, when an immigrant moves from one part of the country to another, we are NOT notified.

Obviously, food-handlers are a danger point. Food Establishments in the area are regularly visited by the Public Health Inspectors. The people concerned do not always understand English, and sometimes they appear to choose not to understand.

SPECIAL REPORTS

The Public Health Committee continues to be a forum for questions. It is quite hard work to answer questions off the cuff, before the Press. However, I look on it as a useful job for it enables elected representatives of the people to discuss medical matters, rather than merely to hear or read about them.

In January, I presented an informal report on work in the Health Department of East Hertfordshire, and have given verbal reports on the National Health Service Reorganisation.

SECTION "B"

GENERAL PROVISION OF HEALTH SERVICES FOR
HODDESDON URBAN DISTRICT COUNCIL

The County Council is responsible for providing the Maternity and Child Health Services, School Health Services, Health Visiting, and Home Nursing. Full details can be obtained from the Divisional Medical Officer, East Herts Division, Council Offices, High Street, Hoddesdon (Tel. Hoddesdon 68331, Exts. 32 and 66).

CLINICS WHICH SERVE HODDESDON URBAN DISTRICT

Wormley Community Centre, Fairfield Drive, Wormley.	(Opened in June 1972)
Child Health Clinic	Second and fourth Tuesday morning each month from 10a.m.
Relaxation & Mother Classes	Friday, 2p.m. - 4p.m.
Speech Therapy	Thursday - all day from 9a.m.
Mid.Herts Marriage Guidance Council	Tuesday - 1p.m. - 5p.m.

Immunisation & Vaccination

All parents are advised to take advantage of this service, which can be obtained from their family doctors or at Infant Welfare Clinics.

<u>APPROX. AGE</u>	<u>VACCINE</u>
6 months	COMBINED diphtheria, tetanus and whooping cough POLIOMYELITIS (ORAL)
8 months	COMBINED diphtheria, tetanus and whooping cough POLIOMYELITIS (ORAL)
13 months	COMBINED diphtheria, tetanus and whooping cough POLIOMYELITIS (ORAL)
15 months	MEASLES
School entry	COMBINED diphtheria, and tetanus POLIOMYELITIS (ORAL)
13 years	B.C.G. Vaccination against TUBERCULOSIS
13 years	RUBELLA (GERMAN MEASLES) Vaccination is offered to those girls who have not already had this disease.

SECTION "B" (cont'd)

Immunisation & Vaccination - cont'd

This is NOT a rigid time-table. Many Doctors hold slightly differing views, and prematurity or ill-health in a child may mean the schedule has to be altered to meet individual needs.

Smallpox vaccination: Children can still be vaccinated at the wish of their parents.

International Certificates of Vaccination against Smallpox: After a first, primary vaccination, a valid Certificate of Vaccination can only be given when a vaccination is seen to have "taken". This is usually 8 days after a successful vaccination. After a re-vaccination, a Certificate of Vaccination is immediately valid.

The lack of a valid Certificate of Vaccination has been known to cause travellers personal and financial difficulty.

Cervical Cytology Service

The number of attendances at the Hoddesdon Clinic fell from 192 in 1971 to 100 in 1972, the ages ranging from 25 to 65 years. No suspected cases of malignancy were discovered. These were patients who attended the Clinic at their own wish. The Doctors in the area arrange for a test of their own patients as needed.

Family Planning

Family Planning Services in the area were increased. The details are listed on page 14, together with details of other Clinic services.

Dental Services

Hoddesdon Urban District is served by eight Dental Practitioners. Details regarding School Dental Clinics are also shown on page 14.

Ambulance Service

There is an Ambulance Station in Hoddesdon. Except in an emergency, an ambulance should be ordered by a Medical Practitioner.

Hospital Services

Hoddesdon Urban District is served by the County Hospital, Hertford, the Herts & Essex Hospital, Bishop's Stortford, and the Princess Alexandra Hospital, Harlow. At Western House, Collett Road, Ware, there is now a female hospital of 91 beds, 7 of which are psycho-geriatric beds. There is also Part III Accommodation for 190 -(93 men and 97 women).

Patients suffering from infectious diseases can be treated either at St. Ann's General Hospital, South Tottenham, London.N.15 (Tel.No. 01-800 0121) or at Highlands General Hospital, World's End Lane, London.N.21. (Tel.No. 01-360 8151)

SECTION "B" (cont'd)

General Practitioner Services

Hoddesdon Urban District is now served by sixteen General Practitioners, all of whom work in partnerships. Health Visitors are attached to these partnerships.

Health Visitors and Nurses

Hoddesdon Urban District have the following Nursing Staff:-

5 District Nurse/Midwives	5 Health Visitors
2 District Nurses	2 Health Visitors -part time
1 District Nurse - part time	2 Health Visitor Assistants
1 District Midwife	1 Auxiliary Helper

Medical Loan Depot

This Depot is run by the British Red Cross Society at the Hoddesdon Health Centre, and at present is open at the following times:-

Monday to Friday - 10a.m. - 11.30a.m. Wednesday - 7p.m. - 8p.m.

Chiropody Service

This service is available on alternate Fridays, at the Hoddesdon Over 60's Centre, Stanstead Road, Hoddesdon. Domiciliary visits can also be arranged.

.....

Hoddesdon Old People's Welfare Committee

Secretary : Mrs.M.B. Suggitt, 6, Barclay Court, Hoddesdon.

The Hoddesdon Over 60's Centre, Stanstead Road, Hoddesdon, (Tel. No. Hoddesdon 62379) is open daily.

The Wormley Over 60's Centre, Community Centre, Fairfield Drive, Wormley, is open every Wednesday, between 1.45p.m. and 5p.m.

The respective Hon.Secretaries are as follows :-

Hoddesdon Over 60's Centre - Mrs.M.G.Curtis,
25A, Park Lane,
Broxbourne.
(Tel. No. Hoddesdon 62449)

Meals Service

Mrs.M. Lythall,
277, Stanstead Road,
Hoddesdon.
(Tel. No. Hoddesdon 62549)

Luncheon Club

(Every Thursday
at 12.30p.m.)

Mrs.J.Pickering,

SOCIAL SERVICES DEPARTMENT

EAST HERTS DIVISION

The Social Services Department in East Herts (with the exception of the Home Help Service) operates through the Divisional Office, and through five Area Social Work Teams.

Divisional Office - Social Services Department,
Westfield,
West Street,
HERTFORD. Tel. No. Hertford 7041

- Divisional Social Services Officer - Miss M. Copleston
(until July 1973)
- Mr. A. C. Stuteley
(from August 1973)
- Assistant Divisional Social Services Officer - Mr. H. W. Scott

Senior Social Worker - Hoddesdon Area Social Work Team
Westfield, West Street, HERTFORD.

Mrs. F. A. Simpson

ANNUAL REPORT OF THE CHIEF PUBLIC HEALTH INSPECTOR

SECTION D

1935

The Public Health Service is pleased to present to you this report on the work of the Chief Public Health Inspector during the year 1935. The report is divided into two parts, the first of which contains a general summary of the work of the Service and the second part contains a detailed report on the work of the Chief Public Health Inspector.

HODDESDON URBAN DISTRICT COUNCIL

Council Offices,
HODDESDON,
Herts.

November 1973

To the Chairman and Members
of the Public Health Committee

ANNUAL REPORT OF THE CHIEF PUBLIC HEALTH INSPECTOR

1972

Mr. Chairman, Ladies and Gentlemen,

I submit for your consideration my annual report for the year ended 31st December 1972. In doing so I would like to express my sincere appreciation to the Council and especially to the Chairman and Members of the Public Health and Housing Committee for their unfailing support for the work of the Department during my years of office as your Chief Public Health Inspector.

My thanks are also due to Dr. Earle and the other Chief Officers of the Council for their ready assistance and co-operation throughout the year, and to all the members of my staff, and in particular my two district public health inspectors, for their loyalty and diligence to duty.

WILLIAM SCOTT

Chief Public Health Inspector

2, FOOD AND DRUGS ACT, 1955

Food Hygiene (General) Regulations, 1970

The following table shows the numbers and categories of food premises in the Urban District subject to these regulations:-

<u>CLASS OF PREMISES</u>	<u>No.</u>
Supermarkets	4
Grocery - General stores	28
Greengrocers	10
Butchers	10
Fishmongers/fried fish shops	6
Sweets and confectionery	22
Bake-houses	4
Bread & flour confectionery	8
Cafes and restaurants	19
Factory canteens	13
School canteens	17
Milk distributors	2
Public houses	18
Miscellaneous food premises	23
Market stalls	5
TOTAL	189

New premises

All proposals for the provision of new premises, or for alterations to existing premises where food is to be stored, sold or manufactured, are scrutinised in order to ensure that such premises will conform to the requirements of the Food Hygiene Regulations. Discussions and consultations with architects, surveyors, builders and representatives in advance of construction, invariably result in agreement on the necessary requirements being incorporated.

Inspections

Routine inspections were made of food premises during the year and any infringements of the Regulations were pointed out to those concerned to ensure compliance.

Legal proceedings were taken against a local bakery following a complaint that a flour beetle had been found embedded in a loaf of bread. This resulted in a fine of £65 plus £20 costs.

Legal proceedings were also taken against a milk distribution company following a complaint of pieces of glass being found in a bottle of milk. A fine of £40 plus £12 costs was imposed.

A complaint of a cigarette end being found in a bar of chocolate resulted in legal proceedings being taken against the company concerned and a fine of £20 was imposed plus £10 costs.

Several other food complaints resulted in legal proceedings being instituted against the companies concerned but were not brought to court until early in 1973.

Section 2

Numerous complaints of food not being of the nature, quality or substance demanded were received during the year; the following list gives some indication of their nature.

- Flies in braising steak
- Caterpillar in a tin of sweet corn.
- Mouldy cheese
- Mould growth on butter
- Insects in a bottle of light ale.
- Maggot in a tin of plums
- Dirt on almond crisp biscuits
- Unsatisfactory tin of tuna fish
- Splinter of glass in frozen fish cakes
- Stale eggs
- Metal in a custard cream biscuit
- Decomposing and maggot infested chicken
- Mouldy bread
- Weevils in rice
- Mouldy pasties
- Black grease on chicken and ham pie
- Unsound tin of tropical fruit salad
- Unsound tin of chopped ham loaf
- Mouldy sausage rolls
- Mouldy eggs
- Mouldy apple pie
- Unsound tin of ham
- Unsound packet of puff pastry mix
- Nail in mixed fruit sponge pudding

Insects in lime juice cordial
Sliver of metal in pork luncheon meat
Black marks on spaghetti hoops
Unsound breasts of lamb
Unfresh cut chopped pork
Maggot in frozen rabbit portion
Insects in cake mix
Wire in pork sausages
Caterpillar in jar of piccalilli

Every complaint was fully investigated and where necessary the retailers, wholesalers or manufacturers were approached for their observations and comments; warning letters were sent where appropriate.

Section 16

17 premises are registered for the preparation and storage of sausages, or potted, pickled or preserved food, and there are 53 premises registered for the storage and sale of ice cream. There are no premises registered for the manufacture of ice cream.

Poultry processing premises

There are no premises of this type in the area.

Storage and transportation of food - temperature control and stock rotation

The 1971 Annual Report gave details of problems relating to vehicles used for the distribution and storage of perishable foods at temperatures unacceptable to the Council. The firm concerned promised that by the middle of 1972 their existing fleet of uninsulated and unrefrigerated vehicles would be replaced; the firm's promises were fulfilled.

The clear and incontestable case for legislation for the temperature control of perishable foods has been established over many years. Despite the lack of statutory backing it is pleasing to note that firms take note when Local Authority officers have the full backing of their Council to pursue and create a "cold chain" of food distribution where necessary.

There is however, no room for complacency. Food poisoning statistics throughout the country are constantly rising. The incorrect handling, cooking and storage of meat and meat products accounts for over two thirds of the cases reported.

Imported Food Regulations 1968

The rapid and extensive development of containerized transportation has meant that inland authorities have become increasingly responsible for the inspection and control of food imported into this country. The old system of discharging individual items of vessel's cargo at ports and their re-loading on to road and rail vehicles became too costly in terms

of labour charges and lack of efficiency. The attendant delays in clearing goods through the ports, together with the introduction of a world-wide, speedy standardised container service led to the setting up of Inland Clearance Depots (I.C.D's).

Depots were established with the co-operation of H.M. Customs and Excise so that consignments could pass through ports without delay to be cleared inland and then distributed to their ultimate destinations.

The Local Authorities of all districts into which imported food comes are automatically responsible for administering the Imported Food Regulations.

Where customs clearance of imported food is carried out at port of entry (with or without a container being opened) and the port health inspector considers it expedient, having regard to the nature of the container in which the food is imported that any examination of the food should be deferred until it reaches its destination, the Imported Food Regulations allow this to take place.

Under the regulations, the Inspector must:

1. Notify the receiving authority by the most expeditious means available, giving details of the consignment.
2. Obtain an undertaking in writing from the importer stating that the container has been sealed and will not be opened until it reaches the destination specified.
3. Send a copy of the undertaking to the receiving authority.

In these circumstances the receiving authority becomes responsible for administering the regulations in relation to that particular consignment of food.

In Hoddesdon there are two warehouses receiving food under these regulations; no difficulties arose during 1972 with regard to examinations.

3. HOUSING ACTS 1957 - 1969

No closing orders were made during the year. One house was considered unfit for human habitation and an undertaking by the owner not to relet until the dwelling was rendered fit was accepted.

HOUSING PROGRESS

<u>By Private Enterprise</u>	<u>During 1972</u>	<u>Total since end of the war</u>
New dwellings including dwellings provided by conversion and war destroyed dwellings rebuilt.	143	3,863

4. OFFICES, SHOPS & RAILWAY PREMISES ACT, 1963

Annual Report for the period 1st January 1972 to 31st December 1972

The Act requires that the Local Authority shall submit an Annual Report to the Department of Employment every year. The report for the year 1972 is given below:-

<u>Registrations & General Inspections</u>			
<u>Class of premises</u>	<u>Number of premises registered during year</u>	<u>Total number of registered premises at end of year</u>	<u>Number of registered premises receiving general inspection during the year</u>
Offices	20	91	74
Retail shops	17	187	37
Wholesale shops	1	7	7
Catering establishments open to public, canteens	2	15	15
Fuel storage depots	0	0	0
<u>Totals</u>	<u>40</u>	<u>300</u>	<u>133</u>

Total number of visits of all kinds by Inspectors to registered premises - 186

Analysis of persons employed in registered premises by workplace

<u>Class of Workplace</u>	<u>Number of persons employed</u>
Offices	1106
Retail shops	945
Wholesale depts., warehouses	115
Catering establishments open to public	105
Canteens	<u>13</u>
Total <u>Males</u> - 1149. Total <u>Females</u> - 1135	TOTAL <u>2284</u>

Exemptions

Section 5(2) Space; Section 6 Temperature; Section 9 Sanitary Conveniences; Section 10 Washing Facilities:-

In each of these categories there were no current exemption certificates at 31st December; no exemptions were granted or extended during the year. There were no cases of employees opposing applications and no appeals against any refusal to grant or extend an exemption or against the withdrawal of an exemption.

Prosecutions

No prosecutions were instituted during the year.

There were no complaints made under Section 22 of the Act, and there were no interim orders granted.

Offices, Shops & Railway Premises Act, 1963 - Accidents

The number of registered premises has increased since 1971 by more than 16%. The number of employees has increased by over 22% - 287 males and 135 females.

A proportional increase in the number of accidents notified has also taken place. In 1970 there were 8; in 1971 - 4, and in 1972 - 30.

Concern about safety standards in warehouses was expressed in the 1971 annual report. A special report was also sent to the Department of Employment with a view to them recommending more stringent training of employees in safety aspects and giving Local Authorities better guidance on mechanical handling and storage of goods in warehouses.

Strong representations were made to occupiers of the two warehouses concerned in order to minimise the number of accidents.

FACTORIES ACT, 1961

Prescribed particulars on the Administration of the Factories Act, 1961

Part 1 of the Act

1. Inspections for purposes of provisions as to health (including inspections made by Public Health Inspectors)

Premises	Number on Register	Number of		
		Inspections	Written Notices	Occupiers prosecuted
(i) Factories in which S.1, 2, 3, 4 & 6 are to be enforced by Local Authorities	-	-	-	-
(ii) Factories not included in (i) which S.7 is enforced by the L.A.	144	70	-	-
(iii) Other premises in which S.7 is enforced by the L.A.(excluding out-workers' premises)	7	7	-	-

TOTAL	13	-	-	-	-	-

5. WATER SUPPLIES

Public Mains Supply

This district is within the Statutory Area of supply of the Metropolitan Water Board. All properties have an internal supply from the Board's mains, except for a small number referred to below.

No complaints of the inadequacy of poor pressure of the public supply were received by this department during the year.

The Director of Water Examination of the Metropolitan Water Board has kindly supplied the following information so far as it relates to the Board's supply:-

1. (a) The supply was satisfactory both as to (i) quality, and (ii) quantity throughout 1972.
- (b) All new and repaired mains are disinfected with chlorine; after a predetermined period of contact the pipes are flushed out and refilled; samples of water are then collected from these treated mains; and the mains are returned to service only after the analytical results are found to be satisfactory.
The quality control from these laboratories is carried out by means of daily sampling from sources of supply, from the treatment works or well stations, from the distribution system, and through to the consumer. Any sign of contamination or any other abnormality is immediately investigated.
- (c) (i) The Board has no record of the number of structurally separate dwellings supplied in your area, but the population supplied direct according to the Registrar-General's estimates at 30th June, 1972, was 27,144.
(ii) No houses were permanently supplied by stand-pipe.
- (d) No artificial fluoride is being added, and where the fluoride content is indicated in the analyses it represents the naturally occurring fluoride in the water.
2. (a) The supply was derived from the following works and pumping stations:-
River-derived water from Coppermills.
Well water from Broxbourne and Rye Common pumping stations.
No new sources of supply were instituted and there were no changes to the general scheme of supply in your area.
The number of samples collected and the bacteriological and chemical analyses of the supply from the above sources after treatment are shown on the attached sheets.
- (b) On account of their hardness content and alkaline reaction the Board's river and well water supplies are shown to be not

WATER SUPPLIES - cont'd

plumbo-solvent. It should, however, be appreciated that all types of water pick up varying amounts of metal from the material of water piping particularly when it is newly installed; this applies to copper, zinc, iron and also to lead.

METROPOLITAN WATER BOARD - Water Examination Dept.

BACTERIOLOGICAL RESULTS - YEARLY AVERAGES, 1972

Private Water Supplies

There are approximately 34 properties in the urban district still connected to private well water supplies, including 14 industrial premises and 2 holiday caravan sites.

21 samples were taken during the year and submitted for bacteriological examination. One factory supply was found to be unsatisfactory and the use of this well was discontinued for drinking purposes after mains water had been connected.

A serious problem arose in December when a sewage pumping main was found to be fractured adjacent to one of the wells. A special filter was fixed within 24 hours by the Council in order to safeguard the supply.

Private Water Supplies - cont'd

Continuous monitoring showed no sign of faecal pollution. The filter has now been removed (June 1973) as it is considered there is no further risk of contamination.

The inherent risk of drinking water supplies derived from wells is clearly shown.

One new deep well was sunk during the year in conjunction with other improvements to the property.

SEWERAGE AND DRAINAGE

Sewage purification and disposal are undertaken at the Rye Mead Sewage Works after being pumped through a series of pumping stations.

In the more remote and thinly developed areas of the town where sewers are not available there are approximately 125 cesspools and septic tanks. The Council provides a free emptying service twice a year.

6. PREVENTION OF DAMAGE BY PESTS ACT, 1949

A total of 186 properties were inspected during the year following notification that infestations of rodents were present. Of these, 126 were rats and 111 were mice infestations. Treatment was carried out in each case and advice given where necessary.

Insect Pests

31 notifications were received of various insect infestations, including ants, flies, fleas and several species of beetle. All the premises were inspected and treatment carried out where necessary or advice given.

Wasps

Due to a cold spring and early summer a greatly reduced number of wasps nests were reported. A total of 38 nests were eradicated by the rodent operative.

7. PETROLEUM (CONSOLIDATION) ACT, 1928

The Petroleum Spirit (Conveyance by Road) Regs. 1957

There were 29 premises licensed to store petroleum spirit under the Act. These were all inspected before the licences were issued.

No accidents or contraventions occurred during the year.

8. PET ANIMALS ACT, 1951

Licences authorising the keeping of pet shops were issued in respect of two premises.

ANIMAL BOARDING ESTABLISHMENTS ACT, 1963

One licence was issued for the keeping of a boarding establishment at premises in Wormley.

RIDING ESTABLISHMENTS ACTS, 1964 & 1970

Licences were issued to three Riding Schools during the year.

GAME ACT, 1831

Licences to deal in game were issued to six shops in the district during the year.

NOISE ABATEMENT ACT, 1960

11 noise complaints were received during the year, a similar number to the 1971 figure. At the time of writing, 24 complaints had been received during 1973.

It is evident that the increased use of land either for housing adjacent to factories or vice versa, reflected itself in the number of complaints. The main cause for concern are factories that operate evening and all night.

The two factories which in the main cause the majority of complaints are in the process of spending large sums of money to reduce or attenuate the noise emanating from their premises.

9. SUMMARY OF INSPECTIONS, VISITS ETC. DURING 1972
