Hollingbourn Rural District Council

Annual Report for the Year 1968

ON

THE HEALTH OF THE
HOLLINGBOURN RURAL DISTRICT

OF THE

MEDICAL OFFICER OF HEALTH

Dr. F. H. M. DUMMER,
M.B., Ch.B., C.P.H. D.P.H.

HOLLINGBOURN RURAL DISTRICT COUNCIL

PUBLIC HEALTH COMMITTEE MEMBERS

Mr. L. M. Apps (Chairman)
Mr. J. K. W. Alexander (Vice Chairman)

Cmdr. J. Bostock	Lt./Cmdr. J. J. Owen
Major H. A. Boxall	Mr. W. Pring
Mr. M. Coppin	Rear-Admiral P. S. Smith
Mr. A. W. Hooker	Mr. D. Taylor
Mrs. K. S. Mitchell	Mr. L. H. Woodcock
Mrs. A. G. R. Nissen	Mr. R. W. Woods

PUBLIC HEALTH OFFICERS

OF THE

HOLLINGBOURN RURAL DISTRICT

Medical Officer of Health	Dr. F. H. M. Dummer, M.B., Ch.B., D.P.H.
Deputy Medical Officer of Health	Dr. J. T. Cecil, M.B., B.S., D.P.H.
Chief Public Health Inspector	Geoffrey H. Chambers, M.A.P.H.I., M.R.S.H.
1st Additional Public Health Inspector	Stanley B. Brook, M.A.P.H.I.
2nd Additional Public Health Inspector	Richard C. Comport, M.A.P.H.I., M.R.S.H.
Clerk to the Public Health Department	Mrs. M. R. Hardes (Until 12th July, 1968) Miss P. Cheesman (From 12th August, 1968)
Secretary to the Medical Officer of Health	Miss H. Wood

Mr. Chairman, Ladies and Gentlemen,

I have the honour to present my twelfth Annual Report on the health of the Rural District of Hollingbourn.

The statistical picture of your District as presented in the pages which follow, is a very healthy one. Your birth rate is higher than that of the average of the country as a whole and higher than that of the County of Kent. Your death rate and your infantile mortality rate are both substantially lower than either the county's or the country's. Indeed, as far as infantile mortality is concerned only two infants died in 1968, giving a new record low rate of 5.33 per thousand live births which, along with the inevitable bit of luck reflects very favourably on the high standards of maternal care in your District.

Even on the vexed subject of cancer, 1968 was a relatively fortunate year, the total number of deaths from this cause having fallen by 16, to a low figure of 33 which has only been bettered on two occasions in the past ten years. There was a decrease this year in the number of persons dying from cancer of the lung, of the stomach and of the breast. The majority of fatalities remained distinctly in the older age groups and showed no sign of a trend to spread in to the younger age groups.

The number of new cases of tuberculosis remains at a statically low figure and the deaths related to tuberculosis have so diminished in number in recent years that the disease is no longer a primary cause of death at any age. When new cases do occur, however, a considerable and apparently disproportionate amount of work has to be undertaken in tracing and treating contacts. This work is, nevertheless, of the greatest importance, because unless every potential avenue of infection has been explored, the danger of spread of the disease from a focus of infection is very great.

I am glad to be able to report that the response to vaccination and immunisation against the major killing infectious diseases has been good, but of course we can never really be satisfied until everyone who requires protection avails himself of the opportunity of providing a barrier of resistance against these largely preventable diseases. As time goes on such diseases as diphtheria become almost legendary in the unreality - that is the danger period, because we have to keep in mind the fact that our protection from them is only as strong as the barrier of immunisation that we maintain. Once we fail to erect this barrier, we are wide open to infection.

Once again the heart diseases and cancer accounted for well over 50 per cent of the deaths in your District. Chest infections were of minor significance compared with these, but a great deal of ill-health is still caused by respiratory diseases which is not helped by heavy cigarette smoking. Once again no death was caused through abortion or other complications of pregnancy or childbirth.

Dr. [Name], [Address], [City]

I have the honor to acknowledge your letter of the 1st of [Month] regarding [Subject].

The information received from your letter is being forwarded to the appropriate authorities for their consideration. I am sure that they will take the necessary steps to ensure that the matter is handled in a satisfactory manner. I will keep you informed of any further developments.

Yours faithfully,
[Signature]

The matter of the [Subject] is being treated as a matter of internal security. It is therefore being handled in a confidential manner. I am sure that the necessary steps will be taken to ensure that the matter is handled in a satisfactory manner. I will keep you informed of any further developments.

I am glad to be able to report that the necessary steps have been taken to ensure that the matter is handled in a satisfactory manner. I am sure that the necessary steps will be taken to ensure that the matter is handled in a satisfactory manner. I will keep you informed of any further developments.

I am sure that the necessary steps will be taken to ensure that the matter is handled in a satisfactory manner. I will keep you informed of any further developments.

The field of public health is a very wide one and in the following pages you will find an account of some of the services carried out on your behalf during 1968. Again the number of inspections topped 3,000 and you will note the wide variety of interests in the basic groundwork of environmental health. We were very pleased to see the completion of the geriatric unit at Lenham - a much needed and highly appreciated feature of your housing programme.

We are always conscious of the potential danger of the spread of disease in your District because of the existence of the A.20 highway and the vast numbers using it, especially in the summer months. Catering establishments along this road have to be doubly careful of their standards because of this very real hazard.

Once again every animal known to have been slaughtered for food in your District was examined by the Inspectors. No whole carcass was condemned because of tuberculosis and there was a very real decrease in the percentage discarded due to infection in part by tubercle. This is a very pleasing result and one which bears out the wisdom and efficacy of the eradication policy.

You will note the increase in the total number of birds processed in your District - an increase in 1968 to 600,000 from 448,000 in 1967. The percentage condemned remains, as last year, at 2 per cent.

Again my thanks are due to the Public Health Inspectorate, Mr. Chambers your Chief Public Health Inspector, and to Mr. Brook and Mr. Comport, for their loyal co-operation throughout the year. Although a small Department, a great deal of work is carried out in it and the responsibility on each of the Inspectors is quite considerable. Mrs. Hardey resigned in July and she was succeeded by Miss Cheesman who has quickly and efficiently settled into her new job.

As always the Public Health Committee has been interested in our work and my thanks are due to the Chairman and Members for their support throughout the year. We have also had full co-operation from our colleagues and I am grateful to all the Officers for the assistance which we have freely called on.

I have the honour to be,
Mr. Chairman, Ladies and Gentlemen,
Your obedient Servant,

F. H. M. DUMMER

Medical Officer of Health.

Typhoid Fever	-	-
Food Poisoning	-	-
Malaria	-	-
Puerperal Pyrexia	1	-
TOTALS	140	-

The only unusual feature of the above table is the surprisingly high incidence of whooping cough. In the last ten years the highest total has been 32 and usually never exceeds 16. Other communities in Kent have also experienced this high incidence - it is hardly an "outbreak" - in 1968. It may be that the organism is changing in some way and that the present vaccine is not effective enough to provide a reasonable barrier of immunity against the disease. It is surprising in view of the fact that there has been little change in the annual figures for immunisation against whooping cough.

TUBERCULOSIS

I am indebted to Dr. D. L. Pugh, the Consultant Chest Physician, for the following details of the numbers of contacts of known cases of tuberculosis examined during the year, and the number found to be suffering from tuberculosis. These figures relate to the area of the Chest Clinic, which coincides with the area of the four authorities, Maidstone Borough, Maidstone Rural District, Hollingbourn Rural District and Malling Rural District.

- (a) Number of contacts seen during 1968 of newly notified cases of tuberculosis .. 163
- (b) Number of contacts seen during 1968 of cases notified prior to 1968 455
- (c) Number of contacts in (a) found to be suffering from pulmonary or non-pulmonary tuberculosis Nil
- (d) Number of contacts in (b) found to be suffering from pulmonary or non-pulmonary tuberculosis Nil

AGE GROUPS	NEW CASES				DEATHS			
	Pulmonary		Non-pulmonary		Pulmonary		Non-pulmonary	
	M	F	M	F	M	F	M	F
0 - 1	-	-	-	-	-	-	-	-
2 - 4	-	-	-	-	-	-	-	-
5 - 14	-	-	-	-	-	-	-	-
15 - 24	-	1	-	-	-	-	-	-
25 - 34	-	-	-	-	-	-	-	-
35 - 44	-	-	-	-	-	-	-	-
45 - 54	1	-	-	-	-	-	-	-
55 - 64	-	-	-	-	-	-	-	-
65 - 74	-	-	-	-	1	-	1	-
75 and over	2	-	-	-	-	-	-	-
TOTALS	3	1	-	-	1	-	1	-

There has been no change from last year in the number of new cases of tuberculosis. This fact, together with the small number of deaths associated with this disease, indicates the great advances which have been made in the treatment and prevention of tuberculosis.

As will be seen from the table above, considerable work is still involved in the investigation of contacts or suspected contacts. As wide a net as possible is thrown in order to apply the utmost surveillance to any suspicious circumstance.

APPENDIX B

I am indebted to Mr. H. L. Felt, the Assistant District Attorney, for the following material in the number of contacts of known cases of tuberculosis during the year, and the number found to be suffering from tuberculosis. These figures relate to the area of the Great Plains, which coincides with the area of the four subgroups, Lakota, Dakota, and Cheyenne. The following table shows the number of contacts and the number of contacts who are suffering from tuberculosis.

(a) Number of contacts seen during 1955 of newly notified cases of tuberculosis	162
(b) Number of contacts seen during 1955 of cases notified prior to 1955	477
(c) Number of contacts to (a) found to be suffering from tuberculosis or non-tuberculosis	161
(d) Number of contacts to (b) found to be suffering from tuberculosis or non-tuberculosis	161

SUBGROUP	TUBERCULOSIS				NON-TUBERCULOSIS			
	M	F	M	F	M	F	M	F
0 - 1	-	-	-	-	-	-	-	-
2 - 3	-	-	-	-	-	-	-	-
4 - 5	-	-	-	-	-	-	-	-
6 - 7	-	-	-	-	-	-	-	-
8 - 9	-	-	-	-	-	-	-	-
10 - 11	-	-	-	-	-	-	-	-
12 - 13	-	-	-	-	-	-	-	-
14 - 15	-	-	-	-	-	-	-	-
16 - 17	-	-	-	-	-	-	-	-
18 - 19	-	-	-	-	-	-	-	-
20 and over	-	-	-	-	-	-	-	-
TOTALS	1	1	1	1	1	1	1	1

There has been no change from last year in the number of cases of tuberculosis. The fact that the number of contacts of cases of tuberculosis is the same as last year is due to the fact that the number of contacts of cases of tuberculosis is the same as last year.

As will be seen from the table, contacts of cases of tuberculosis are the same as last year. The fact that the number of contacts of cases of tuberculosis is the same as last year is due to the fact that the number of contacts of cases of tuberculosis is the same as last year.

CANCER

The number of deaths from cancer in Hollingbourn Rural District during the past ten years is given below:-

1959	30
1960	37
1961	40
1962	35
1963	42
1964	46
1965	44
1966	29
1967	49
1968	33

Deaths from cancer in 1968, distributed according to sites:-

Site	Male	Female	Total
Cancer of stomach	-	4	4
Cancer of lung, bronchus	8	2	10
Cancer of breast	-	2	2
Cancer of uterus	-	-	-
Other cancers	11	6	17
TOTALS	19	14	33

Deaths from cancer in 1968, distributed according to age groups:-

Age Groups	Male	Female
0 - 4	-	-
5 - 14	-	-
15 - 24	-	-
25 - 34	-	-
35 - 44	-	-
45 - 54	1	5
55 - 64	11	3
65 - 74	4	3
75 and over	3	3
TOTALS	19	14

TABLE

The number of boats from various in Mississippi Sound
 reported during the past ten years is given below:

1907
1908
1909
1910
1911
1912
1913
1914
1915
1916
1917
1918

Boats from various in 1908, distributed according to
 class:-

Class	Male	Female	Total
Boats of 2000	..	4	4
Boats of 1000, 2000	8	2	10
Boats of 500	..	2	2
Boats of 200
Other boats	11	8	19
Total	19	14	33

Boats from various in 1909, distributed according to
 sex:-

Age groups	Male	Female
0 - 14
15 - 24
25 - 34
35 - 44
45 - 54
55 - 64	1	..
65 - 74	11	..
75 - 84
85 and over
Total	12	..

INFANT MORTALITY 1968

CAUSE OF DEATH	Under 1 week	1 - 2 weeks	2 - 3 weeks	3 - 4 weeks	Total under 4 weeks	4 weeks and under 3 months	3 - 6 months	7 - 12 months	Total under 1 year
Non-aeration of lungs	1	-	-	-	1	-	-	-	1
Respiratory distress	1	-	-	-	1	-	-	-	1
TOTALS	2	-	-	-	2	-	-	-	2

Last year I commented on the very low infantile mortality rate at 13.80 per thousand live births. In 1968 a new low record was achieved at 5.33 per thousand. This is less than one third the rate for the average of the whole country and is certainly a unique feature of this year's Report.

Once again, I pay tribute to the excellence of the antenatal and delivery services operating in the District.

last year I commented on the fact that the percentage rate of 11.50 per thousand live births. In 1966 a new low record was achieved at 7.75 per thousand. This is less than one third the rate for the average of the whole country and is certainly a major feature of this year's report.

Once again, I pay tribute to the efficiency of the national and delivery services operating in the district.

HOUSING

The completion of a large housing scheme at Headcorn and of a geriatric unit at Lenham allowed the making of Closing or Demolition Orders on 42 properties throughout the district and the rehousing of a good proportion of the occupiers. This number of Orders is approximately twice that for the previous year and Undertakings were accepted in respect of three more properties.

The above figures are very satisfactory but it would appear from the amount of Council Housing proposed they are unlikely to be repeated. Without doubt there is still a considerable number of properties requiring extensive repairs and improvements or Demolition Orders and to ensure that they are dealt with within a reasonable period, one would hope that, despite present misgivings, a similar number of Orders is made annually for the next few years and there is an increase in the number of comprehensive improvement schemes carried out.

The number of houses actually demolished during the year was eight and a further ten were completely renovated and the Orders cancelled.

<u>Total Numbers of Lettings</u>		<u>No. of Families Rehoused from Slum Clearance Properties</u>
Council Houses	26 (78)	5 (7)
Old Peoples' Dwellings	38 (17)	9 (9)
(Previous Year in Brackets)		

The following table dealing with Improvement Grants is almost identical with that for the previous year. The number of properties requiring modernisation is considerable and the number of schemes proceeded with is, therefore, disappointing. It is hoped that the Housing Bill before Parliament will result in a considerable increase in the amount of grants as well as amending the present schemes so that the number of properties improved is considerably increased. Meanwhile increased enquiries and visits to discuss possible improvement schemes are taking more of the Public Health Inspectors' time but unfortunately with no increase in improved properties.

HOUSE PURCHASE AND HOUSING ACT, 1959 - IMPROVEMENT GRANTS

1. Discretionary Grants

Number of applications received	23		
Number of applications approved	26		
Number of applications actually proceeded with		15		
Of those 15, the following figures apply:-				
Total cost of Improvement Work	£9,840	0s.	0d
Total cost of Grants paid	£4,402	0s.	0d

2. Standard Grants

Number of applications received	24		
Number of applications approved	25		
Number of applications actually proceeded with		23		
Of those 23, the Maximum Grant approved was		£4,335	0s.	0d
Total amount of Grants paid	£4,301	0s.	0d

The completion of a large housing scheme at London and of a further one at London aimed at the relief of housing shortage. Orders on the completion of the scheme. This order of the Board is a good proportion of the scheme. The order of the Board is a good proportion of the scheme. The order of the Board is a good proportion of the scheme.

The above figures are very satisfactory but it would appear that the number of Council houses proposed for the year is not sufficient. It is suggested that the number of Council houses proposed for the year is not sufficient. It is suggested that the number of Council houses proposed for the year is not sufficient.

The number of houses actually completed during the year was 1,000 and a further 1,000 are being completed and the order cancelled.

Total number of houses		Total number of houses	
1,000	1,000	1,000	1,000
1,000	1,000	1,000	1,000

The following table shows the number of houses completed during the year. The number of houses completed during the year is 1,000. The number of houses completed during the year is 1,000. The number of houses completed during the year is 1,000.

TABLE SHOWING THE NUMBER OF HOUSES COMPLETED DURING THE YEAR

1. Houses completed during the year		2. Houses completed during the year	
1,000	1,000	1,000	1,000
1,000	1,000	1,000	1,000
1,000	1,000	1,000	1,000

FOOD PREMISES

The standard of the premises selling food within the district has remained generally good throughout the year. Once again special emphasis has been placed on visits to the various cafes on the main A.20. Several improvements were made to the catering arrangements at the County Show and these have enabled a good standard to be maintained over the two days concerned.

The premises in the Rural District in which food is prepared, served and sold are as follows:-

Motels	2
Cafes	11
Residential Hotels	3
Roadhouse	1
Public Houses serving meals	13
Public Houses not serving meals	42
Grocers	59
Greengrocers	4
Fishmongers	1
Butchers	9
Food Processing Plants	7
Total	<u>152</u>

The number of premises registered under the Food and Drugs Act are as follows:-

(i) for the sale and storage of ice cream	67
(ii) for the preparation or manufacture of sausages, or potted, pickled, pressed or preserved food intended for sale	1

MILK AND DAIRIES

This Authority is responsible only for the registration of Distributors of Milk and 7 registrations were made during the year making a total of 61 on the Register.

ICE CREAM

Two new applications were received for registration, making a total of 67 on the Register.

DISPOSAL OF CONDEMNED FOOD

The small quantity of food condemned from the slaughterhouses is collected by Sheppey Glue Works, Queenborough, or alternatively is dealt with in the furnace at the Lenham Bacon Factory.

MEAT INSPECTION

Every animal slaughtered in your district for human consumption is examined by your Inspectors.

	<u>Cattle</u>	<u>Calves</u>	<u>Sheep and Lambs</u>	<u>Pigs</u>
Number Killed	76 (111)	- (-)	168 (188)	10,260 (8,217)

	<u>170</u>	<u>1</u>

Unsatisfactory Sample

Untreated Milk

This informal sample contained 23% extraneous water. Follow-up formal samples were satisfactory. Suspected tampering by outside persons. Written caution to producer.

OFFICES, SHOPS AND RAILWAY PREMISES ACT, 1963

During the last year, eight additional premises were registered under this Act and twelve taken off the register as the business had either closed or no longer employed staff.

Total registrations as at December, 1968 were as follows:-

Offices	25
Retail Shops	50
Wholesale Shops	12
Catering Establishments	17
	<hr/>
	104
	<hr/>

A total of 55 inspections were carried out during the year. The greater majority of premises complied with the Act and those that did not only had minor contraventions. In all cases the people concerned have co-operated with the department and there has been no need for formal action.

SWIMMING POOLS

Once again regular weekly samples were taken from the school pools during the summer term and from the hotel pool all the year round. These samples have generally been of a high standard which it is essential to maintain as the school pools in particular have to cope with many bathers in a short space of time.

The use of a portable test has helped very much in maintaining this standard as on the spot results are obtained and, if necessary, advice given to remedy any drop in chlorine level or adverse change in the pH value.

DETROIT, MICHIGAN AND RAILWAY EMPLOYMENT ACT, 1934

During the last year, eight additional persons were registered under this act and twelve taken off the register as the business had either closed or an industry changed itself.

Total registrations as at December 1935 were as follows:-

12	Michigan
2	Local Shops
12	Michigan State
17	Outstanding Registrations
43	

A total of 22 inspections were carried out during the year. The greatest number of persons employed with the act was found at the only two plant conventions. In all cases the people concerned have been reported to the department and there has been no loss of local action.

DETROIT, MICHIGAN

There were several persons who were taken from the school books during the summer term and from the school pool at the same time. These persons were formerly from a high standard which is in accordance with the school pool in Detroit and have no right to any further action of law.

The use of a portable tank has helped very much in maintaining the standard of the school pool and, if necessary, the school pool has been helped very much in maintaining the standard of the school pool.

WATER SUPPLY

The rural district area comprises twenty-three parishes which are served by three private water undertakings. The Mid-Kent Water Company serves the largest area and draws water from underground sources within the district. The Maidstone Waterworks Company with boreholes at Detling and Aylesford Forstal and surface springs in Boxley, serves parts of the parishes of Boxley and Detling. The third water undertaking, the Medway Water Board, serves parts of the parishes of Boxley, Bredhurst and Detling. All waters are alkaline.

The connections made during 1968 are:-

<u>Mid-Kent Water Company</u>	<u>No. of Properties connected as at 31st December, 1967</u>	<u>No. of Properties connected and disconnected during 1968</u>
Bicknor	20	0

	<hr/> 873	<hr/> 22
<u>Medway Water Board</u>		
Boxley	153	+ 6
Bredhurst	81	+ 7
Detling	3	0
	<hr/> 237	<hr/> 13

Some variation from last year's figures may be due to conversion of two or more houses into one property.

The supply of water to the area as a whole is satisfactory in quality and quantity.

Samples of treated water and raw water for biological examination by the Water Undertakings have proved to be pure and wholesome.

WATER SUPPLY (CONTINUED)

Number of dwellings in the area	6,918
Number of dwellings connected to Company's Mains as at 31st December, 1967	6,680
Number of dwellings connected to Company's Mains during 1968	223
Number of dwellings not supplied by Public Water Mains	9
Number of dwellings supplied by an outside stand-pipe	6

Fluoride Content

The fluoride content of the water supply is negligible, being less than 0.1 parts per million.

WATER SUPPLY (continued)

2,318	Number of dwellings in the area
	Number of dwellings connected to
	Company's mains as at
2,400	1st December, 1967
	Number of dwellings connected to
223	Company's mains during 1968
	Number of dwellings not supplied
9	by public water mains
	Number of dwellings supplied by an
2	outside water supply

THORNTON TOWNSHIP

The Thornton township of the water supply is negligible, being less than 0.1 galls per million.

PUBLIC CLEANSING

The following services are operated:-

Refuse Collection
 Refusal Disposal
 Cesspool Emptying
 Maintenance of Cesspool Emptying Sites
 Operation and Maintenance of Sewage Disposal Works and Plants
 Rodent and Other Pest Control
 Litter Bin Maintenance
 Litter Collection including Removal and Disposal of Abandoned Cars
 Public Conveniences

The comparable figures are:-

	<u>1966</u>	<u>1967</u>	<u>1968</u>
Whole days lost	1,032	820	1,026
Holiday man/hours	4,377	4,648	5,023
Absent man/hours	325	204	717
Illness man/hours	2,744	1,629	2,622
Total men employed during year	43	46	46

The complement of 40 was reduced on 31st October by the retirement of the Depot Foreman. His place has been taken by the Depot Superintendent. Three men have been employed on a part-time basis for roadside litter collection. One of these men has since the opening of the new depot been employed on cleaning. For this reason, and illness of others, roadside litter collection has been reduced. Some changes in staff have occurred during the year and it was necessary to dismiss one driver during the year. Although there have been vacancies from time to time, it has been possible to find replacements. At the close of the year there was one vacancy.

	<u>Normal Working</u>			<u>Overtime</u>

REFUSE AND SALVAGE COLLECTION

There have been no changes during the year in normal refuse collection.

Roadside litter has been removed when labour and vehicles have been available. The tractor and trailer purchased for sludge removal has been particularly useful when it has been possible to use it.

The compound at the refuse tip constructed under the provisions of the Civic Amenities Act has been used by residents for disposing of bulky items.

Thirty one abandoned cars have been removed by contractors. Since the passing of the Civic Amenities Act cars have been accepted at the refuse tip. During December a contractor had commenced to cut up these cars and this system was working well at a reduced cost for disposal.

REFUSE DISPOSAL

Fly infestations are a problem in summer time. Some relief has been possible with soil from nearby developments, but only some soils are suitable for refuse vehicles to pass over.

CESSPOOL EMPTYING

Five vehicles were operated during the year. One vehicle was replaced as it failed to conform to the Construction and Use Regulations in relation to braking. For a short period of time in September a private contractor was employed for emptying in Bredhurst due to exceptional rainfall.

	<u>1966</u>	<u>1967</u>	<u>1968</u>
Requests	4,608	4,795	5,041
Loads	10,885	11,337	12,004

During the year the Detling and Thurnham sewerage scheme affecting 373 properties was completed and the cesspool emptying service for the sewered area will be completely withdrawn on 30th April, 1969.

SEWAGE DISPOSAL PLANTS AND SEWAGE PUMPING STATIONS

Plants:

Shrubsole Drive, Sandling
Cobfield, Chart Sutton
Orchard Bank, Chart Sutton
Court Broomes, East Sutton
Green Lane, Platts Heath
Northdown, Stockbury

The Plant at Queensway, Detling was demolished during the year when the sewer in the village was completed.

SEWAGE DISPOSAL PLANTS AND SEWAGE PUMPING STATIONS (CONTINUED)

Pumping Stations:

Langley
Forge Leas, Harrietsham
Orchard Glade, Headcorn
Hollingbourne
Robins Avenue, Lenham
Captains Close, Sutton Valence

To this list has now been added:

Hockers Lane, Detling
Ware Street, Thurnham
Hook Lane, Harrietsham

It was necessary to renew the filter media at Shrubsole Drive. Due to the narrow access and the confined working space in the filter bed, mechanical equipment could not be used and the work was carried out by direct labour.

SEWAGE DISPOSAL WORKS

Harrietsham

A supply of water was laid on during the year.

Industrial wastes have now been eliminated from the effluent discharged to the sewer by Marley Tile.

Headcorn

Two fractures in the pumping main occurred during the year and at the end of the year the reinstatement had not been completed.

Leeds

The inadequate pump for recirculation at these works continues to present maintenance problems.

Lenham

Some land drainage has been possible, allowing a partial treatment of the overflow sewage for which there is no capacity at the works.

It is virtually impossible to satisfy the demands of both the adjoining landowner and the River Authority.

Sutton Valence

The works continues to provide a satisfactory effluent there being only a marginal increase in flow from new properties.

SEWAGE DISPOSAL WORKS (CONTINUED)

Ulcombe

This works continues satisfactorily.

Sewage sludge is removed from Headcorn, Leeds, Harrietsham, Sutton Valence and Ulcombe. In the main it has been possible to arrange for disposal on farms convenient to the works, but sometimes wet weather prevents this operation. As mentioned earlier in this report, the tractor and trailer is used on other duties when sludge is too wet to lift.

PEST CONTROL

The Rodent Operator carries out the maintenance of the litter bins as well as the extermination of insects and other pests. The wet autumn reduced the wasp problem considerably.

The requests for destruction were:-

	<u>1967</u>	<u>1968</u>			<u>1967</u>	<u>1968</u>
Rats	201	231				
Mice	43	41				
Wasps	79	23				
Flies	1	3				
Fleas	2	-	Visits	1,506	863	
Bugs	-	2	Surveys	248	244	
Ants	3	12	Bodies found	636	439	
Beetles	5	7				
Earwigs	-	-				
Cockroaches	3	3				
	<u>337</u>	<u>322</u>				

LITTER

Roadside litter collection along the A.20 and A.2020 has been carried out but illness amongst the old age pensioners employed has prevented a regular collection.

Bins along these roads are emptied by refuse vehicles and Kent County Council lorries. Elsewhere bins are emptied by refuse vehicles.

The County Council has refunded the cost of collection along the A.20 in the sum of £231 for the period 1st November, 1967 to 1st November, 1968.

Summary

This report summarizes the results of the 1967-68 fishing season.

The results of the 1967-68 fishing season are summarized in the following table. The table shows the number of fish caught, the number of fish sold, and the number of fish kept for personal use. The table also shows the number of fish caught by different methods, the number of fish caught by different species, and the number of fish caught by different locations.

1967-68 FISHING SEASON

The following table shows the number of fish caught, the number of fish sold, and the number of fish kept for personal use. The table also shows the number of fish caught by different methods, the number of fish caught by different species, and the number of fish caught by different locations.

The following table shows the number of fish caught, the number of fish sold, and the number of fish kept for personal use.
