9 PIER STREET,

HULL.

June, 1953

To the Chairman and Members of the Hull and Goole Port Health Authority.

GENTLEMEN,

I have the honour to submit the Report of the Port Medical Officer of Health of the Hull and Goole Port Health Authority for the year ended 31st December, 1952.

The Report has been prepared in accordance with the instructions contained in Form Port 20 of the Ministry of Health.

It is pleasing to note that the number and volume of shipping entering the Port Health District has undergone a steady increase during the past year.

During 1952 the Public Health (Ships) Regulations, 1952, came into operation and superseded the Port Health Regulations 1933 and 1945.

The work done by all the staff has continued on the same high level and after many years of really hard work the effect of the advice and action taken by the Port Health Authority is being felt in all branches of shipping. For example the number of rats found on board ships is steadily decreasing and the standard of crew accommodation found in modern ships would astound the mariner of 50 years ago.

I often wonder if the public fully realize the tremendous amount of work done by the Port Health staffs and if I may for a moment select one branch of the Port Health Authority—the Food Inspection staff; they were responsible for the inspection of no less than 7,635,626 food packages landed from ships within the Port of Hull and 821,292 packages landed at Goole. It will be seen that on the Port Health staff falls a very important burden in the prevention of ill health in this country.

I am also grateful to H.M. Collector of Customs and Excise and staff, the Superintendent of H.M. Customs Waterguard and his Officers, H.M. Inspector (Home Office—Aliens Branch) and his staff, the Pilots, Dock Masters, Owners, Agents, Masters of vessels and others for the assistance they have given me during the year. I am also grateful to the Docks and Inland Waterways Executive at Hull and Goole for supplying information regarding the trade of the respective ports.

Finally, I would like to pay tribute to my predecessor, Dr. Nicolas Gebbie, who was Port Medical Officer of Health for some 21 years, during which he established himself not only nationally but internationally as an authority on this most interesting aspect of Public Health.

The Chairman and Members of the Authority have continued throughout the year to take a keen interest in Port Health Work and their courtesy and kindness to me on all occasions are much appreciated.

I am.

Your obedient servant,

Alexander Hutchison, M.D., Port Medical Officer of Health.

# HULL AND GOOLE PORT HEALTH AUTHORITY

Constituted by an Order of the Local Government Board, dated 11th June, 1887

# Members Elected by the Corporation of Kingston upon Hull

Alderman R. E. Smith (Chairman)—to 1st April, 1953 Councillor H. J. Barney Councillor G. E. Brint

# Members Elected by the Goole Borough Council

Alderman E. Johnson (Deputy-Chairman) Councillor C. P. Wadsworth

# REPORT.

### Jurisdiction of Port.

There has been no alteration in the definition of the limits of jurisdiction of the Port Health Authority.

### Amount of Shipping entering the District during the year.

During 1952, 10,880 vessels entered the Ports of Hull and Goole with a total net tonnage of 7,264,486, as against 10,020 vessels with a total net tonnage of 6,585,456 in 1951.

In the year under review, 485 ships were boarded by the Medical Officers of the Authority; this shows a decrease of 51 when compared with the figure for 1951.

The Port Health Inspectors visited 6,658 vessels, on 646 of which sanitary defects were discovered; 204 of these were rectified. In 1951, the figures were respectively 6,230, 681 and 215. Details of this work will be found in Table G, page 28, and in Appendix 1, pages 46-48, and Appendix 5, pages 54-59.

Outwards	547	165	712

Total Passengers, Inwards and Outwards . . 1,064

Figures for Table C were supplied by H.M. District Inspector (Home Office—Aliens Branch).

During the year 23,037 passengers, Alien and British, entered or departed from the Ports of Hull and Goole as against 23,367 for 1951.

The number of Aliens entering the district continues to decrease; the figure for the year under review being 789 less than the previous year.

British passengers outward exceeded by 615 the figure for 1951.

There are regular freight, and in certain cases, passenger services between this port and France, Belgium, Holland, Denmark, Germany and the Scandinavian countries.

Vessels also arrive at the port from Australia, New Zealand, South America, the U.S.A. and Canada, India and Pakistan, South East, West and North Africa, Italy, Jugo-Slavia, Greece, Turkey, Syria and Israel.

Coastwise traffic is principally concerned with London and the East Coast Ports.

The trade of Goole is chiefly concerned with coastwise ports and the continental ports of Europe.

### INLAND BARGE TRAFFIC

### REPORT ON THE INSPECTION AND REGISTRATION OF CANAL BOATS

River and canal traffic is between Hull and Leeds, Bradford, Halifax, Castleford, Sheffield, Thorne, Doncaster, Selby, Brighouse, Barnsley, Wakefield, Goole, Selby, York, Newark, Nottingham and Gainsborough.

Number of inspections of Canal Boats	571
Number of boats examined for the purpose of registration	18
Number of additional inspections made to ascertain if notices served and verbal cautions given had beeen complied with	4
Total number of inspections	593

The 589 inspections were made on 308 boats which are registered to accommodate 1,116 adult persons and 523 children, whilst 622 adults (619 males and 3 females) and 1 child were found to be occupying them.

No records are kept of the net tonnage of river craft using the district.

### Infectious Diseases

On the 21st April, 1952, the Mate of the Canal Boat "Trent No. 2" was removed to the Castle Hill Hospital, Cottingham, E. Yorks., suffering from Tuberculous Meningitis, and was discharged on the 20th December, 1952.

The cabin occupied by the Mate, together with the bedding, etc., were disinfected under the supervision of an Officer of the Authority.

### Legal Proceedings

It has not been found necessary during the year to institute legal proceedings.

### WATER SUPPLY

For the District
------------------

or the District			Source of Water
St. Andrew's Dock			Docks and Inland Water- ways Executive Supply
Albert and Sir Wm. W	right ]	Docks	do.
Humber Dock			Hull Corporation supply
Victoria Dock			do.
Alexandra Dock			do.
King George Dock			do.
Saltend Jetty, No. 1			do.
,, ,, No	. 2		do.
Goole Docks			Goole Borough Council supply
The water is derived	from	loon w	colle : ite hardness is just aren

The water is derived from deep wells; its hardness is just over twenty parts per 100,000 about six being permanent.

### For Shipping

The water supplied to ships with the exception of the supply to the St. Andrew's, Albert and Sir Wm. Wright Docks, is identical with that of the City and is delivered either by means of water boats or by hydrants situated on the dock-side.

### Reports of Tests for Contamination

### (a) Chemical :--

Eleven water samples obtained from water-boats and ships in Hull and Goole were examined by the Port Analyst.

Satisfactory	Suspicious	Unsatisfactory	Total
10	_	1	- 11

### (b) Bacteriological :-

Eighteen samples were examined bacteriologically by the Director of the Public Health Laboratory Service. The results of the examinations were as follows:—

Highly Satisfactory	Satisfactory	Suspicious	Unsatisfactory	Total
9	1	2	6	18

Where the water samples were considered to be unsatisfactory as the result of the chemical or bacteriological findings, instructions were issued for the water tanks to be cleansed and cement-washed and re-filled with fresh water from the district supply.

### Precautions against Contamination of Hydrants and Hosepipes

The Authority possess no jurisdiction over shore premises or equipment.

Some vessels are supplied with fresh water from water-boats while others are supplied direct from hydrants on the quayside owned by the Docks and Inland Waterways Executive.

Samples are taken periodically from water-boats and occasionally from the hydrants, the latter with the consent and co-operation of the Docks Executive.

Should any hydrant or equipment be found in an unsatisfactory condition the matter is reported to the Docks Executive who take the necessary action.

# Number and Sanitary Condition of Water Boats and Powers of Control by the Authority

Docks				Nu	mber of Boats	Capacities in Tons
St. Andrev	v's				3	121, 140, 92
Albert and	Sir	Wm. V	Vright		2	67, 63
Humber					1	65
Victoria					2	50, 36
Alexandra					6	65, 60, 60, 50, 50, 45
Goole					2	60, 20

These boats are inspected at frequent intervals by the Authority's Inspectors and the tanks are periodically cleansed and cement-washed, with the exception of the three boats in the St. Andrew's Dock. The tanks on these boats are lined with a bitumastic material and are scrubbed down at regular intervals. From time to time samples of water are taken for chemical analysis and bacteriological examination. Where adverse reports are received the appropriate action is taken.

Control of water-boats is exercised under Part IV, Section 141 of the Public Health Act, 1936, which states:—

Any well, tank cistern, or water-butt used for the supply of water for domestic purposes which is so placed, constructed or kept as to render the water therein liable to contamination prejudicial to health, shall be a statutory nuisance for the purposes of Part III of this Act.

Part IV of the Act is not applicable to ships but by reason of the interpretation of the foregoing section any question of contaminated fresh water tanks on ships is dealt with under Part III, which does apply to ships.

# PUBLIC HEALTH (SHIPS) REGULATIONS, 1952. LIST OF INFECTED AREAS

The list of Infected Areas is prepared and amended from the information supplied in the Weekly Record of Quarantinable Diseases issued by the Ministry of Health.

The list is in the form of a pocket folder to which stick-on printed slips, showing the areas added or deleted, can be affixed.

The folder and any amendments are circulated by post to all Officers of H.M. Customs Waterguard, the Humber Pilots and H.M. Immigration Officers.

### RADIO MESSAGES

The port is not designated under Article 12(1)(b) of the Regulations as a radio transmitting port.

Radio telegrams from Masters regarding the arrival of incoming vessels are received from the Humber Radio Station at Mablethorpe, Lincs., via the General Post Office, Hull.

### NOTIFICATIONS OTHERWISE THAN BY RADIO

Information concerning ships requiring the attention of the Medical Officer is telephoned by Officers of H.M. Customs Waterguard to the office of the Authority during the normal working hours and to the Inspector on night duty at all other times.

### MOORING STATIONS

The Quarantine Station at No. 7 Buoy in the River Humber has been retained as the outside Mooring Station for both Hull and Goole.

Four inside mooring stations have been established in the Hull Docks as follows:—

- King George Dock. The berth known as the "Dry Dock End Overside Berth."
- Alexandra Dock. The Buovs.
- Victoria Dock. The berth between the end of the coal conveyors and the dolphins.
- 4. Sir Wm. Wright Dock. The berth immediately off the Bull Nose at the entrance to the Graving Dock.

At Goole the inside mooring station has been established on the south side of the Barge Dock and is known as the "Western Berth Barge Dock."

In practice, provision has been made for any place of mooring, loading or discharge to be regarded as a mooring station for the purpose of the Regulations.

### HOSPITAL ACCOMMODATION FOR INFECTIOUS DISEASES

All cases of infectious or suspected infectious disease can be admitted to the Castle Hill Hospital, Cottingham, E. Yorks.

### SURVEILLANCE AND FOLLOW UP OF CONTACTS

Daily visits are paid to ships on which infectious disease or sickness suspected to be infectious has occurred.

When contacts leave a ship their names and the addresses to which they are proceeding are notified to the Medical Officer of Health of the districts concerned. Prepaid Reply Cards are issued in certain cases on which contacts are required to notify to this Authority any further change of address.

### CLEANSING AND DISINFECTION OF SHIPS, PERSONS, CLOTH-ING AND OTHER ARTICLES

All quarters on board ships that have been occupied by cases of infectious or suspected infectious disease are disinfected by or under the supervision of an Officer of the Authority.

Disinfection of persons, clothing, bedding, etc., is carried out at the Hull Corporation Disinfecting Station, Scarborough Street, Hull.

### **SMALLPOX**

All cases or suspected cases of Smallpox may be sent to the City Hospital, Cottingham, E. Yorks.

Ambulances for the removal of cases to hospital are provided at all times by the Hull Corporation Ambulance Service which is under the direction of the Medical Officer of Health of the City.

Vans are also available for the conveyance of bedding, etc., to and from the Corporation Disinfecting Station, Scarborough Street, Hull.

All ambulance crews and the staff of the Authority are subjected to periodical vaccination. Dr. Alexander Hutchison, Medical Officer of Health of the City of Kingston upon Hull, and of the Hull and Goole Port Health Authority, is the Smallpox Consultant for the district.

Specimens for laboratory diagnosis are forwarded to either :-

(a) The Virus Reference Laboratory,

Central Public Health Laboratory, Colindale Avenue, London, N.W.9

or (b) The Department of Bacteriology,

Mount Pleasant,

Liverpool, 3.

### VENEREAL DISEASE

Cases of Venereal Disease are treated at the Clinic, Mill Street, Hull.

The times of attendance are as follows :-

Monday	 ••	 10-0 a.m. to 12-0 noon 5-0 p.m. to 6-30 p.m.
Tuesday	 	 10-0 a.m. to 12-0 noon 5-0 p.m. to 6-0 p.m.
Wednesday	 	 10-0 a.m. to 12-0 noon 5-0 p.m. to 7-0 p.m.
Thursday	 	 10-0 a.m. to 12-0 noon
Friday	 	 10-0 a.m. to 12-0 noon 5-0 p.m. to 6-0 p.m.
Saturday	 	 10-0 a.m. to 12-0 noon

A "Notice to Seamen" Card has been printed in fourteen languages, giving the address of the clinic and the times of attendance.

At Goole, cases are treated at the Bartholomew Hospital.

In-patients are treated at the Western General Hospital, Anlaby Road, Hull, and at the Kingston General Hospital, Beverley Road, Hull.

At Goole, in-patients are treated at the Bartholomew Hospital.

# CASES OF NOTIFIABLE AND OTHER INFECTIOUS DISEASES ON SHIPS.

### CASES LANDED FROM OTHER SHIPS

Disease	Number of ca		Number of ships
	Passengers	Crew	concerned
Tuberculous Meningitis .		1	1
Rubella		1	1
Measles		1	1

# OBSERVATIONS ON THE OCCURRENCE OF MALARIA ON SHIPS

There has been a marked drop in the number of cases of Malaria occurring on ships trading on the West Coast of Africa.

In 1951, 5 cases were landed at Hull and 26 cases reported during the voyage. In 1952, 1 case was landed at Hull and 10 occurred on vessels during the voyage.

Though these figures are probably not complete, nevertheless Masters of West Coast vessels have commented in conversation with Medical Officers on the decrease of the incidence of cases of Malaria occurring during the voyage. Their opinion is that this is due to the use of paludrine as a routine suppressive. The men have no objection to taking this drug. This was definitely not the case when quinine or mepacrine were used as suppressives, when the men often threw the tablets over the side as soon as issued.

# MEASURES TAKEN AGAINST SHIPS INFECTED WITH OR SUSPECTED FOR PLAGUE

No ships, infected with or suspected for Plague, arrived in the district during the year.

# MEASURES AGAINST RODENTS IN SHIPS FROM FOREIGN PORTS

### Procedure for Inspection of Ships for Rats

The Authority's Rodent Searchers inspect all ships from foreign ports for evidence of rat infestation, special attention being directed to those coming from Infected Areas.

Where evidence of recent infestation is found traps are laid to confirm the findings.

The Inspectors of the Authority also pay daily visits to ships from Infected Areas and enquiries regarding the presence of rats form part of their normal duties.

# Arrangements for the Bacteriological or Pathological Examination of Rodents

A proportion of all rats trapped and all found dead, including those destroyed by the Rat Catchers employed by the Docks and Inland Waterways Executive, are submitted to the Director of the Public Health Laboratory Service, 184 High Street, Hull, for bactériological examination. Seventy-one rats were examined during the year, none of which showed evidence of Bacillus pestis. Details are given in Table E (page 27).

### Arrangements for Deratting Ships

Three methods of rat destruction are employed, namely, (1) Fumigation by hydrogen cyanide. (2) Fumigation by sulphur dioxide, and (3) Trapping. Poisoning is not used as a means of rat destruction. Details are given in Tables E and F (page 27).

Where deratting by fumigation is considered necessary the work is carried out by commercial contractors. The firms undertaking this work are as follows:—

- (a) Messrs. Harrison & Doughty Ltd., Wyke Street, Hull.
- (b) Messrs. R. W. Arro & Co. Ltd., 433 Hedon Road, Hull.
- (c) Riverside (Painters & Contractors) Ltd., 27a West Dock Avenue, Hull.
- (d) Deodor-X-Hygiene Services Ltd., Prince's Dock Chambers, Prince's Dock Side, Hull.

### PROGRESS IN RAT-PROOFING OF SHIPS

It is pleasing to observe the continued application and incorporation of rat-proofing principles in the construction of new ships. Where, during the course of inspection, the Officers of the Authority discover unprotected rat harbourages, Masters, Owners or Agents are requested to undertake remedial measures. Progress is undoubtedly being made in this sphere of preventive activities.

# PREVENTION OF DAMAGE BY PESTS ACT, 1949 PREVENTION OF DAMAGE BY PESTS (APPLICATION TO SHIPPING) ORDER, 1951

The following table shows the number of Rodent Control Certificates issued under the above Order during 1952.

No. issued to Rat-free ships	No. issued to ships after deratting	No. of rats trapped	No. of rats found after fumigation
539	5	4	25

# THE HYDROGEN CYANIDE (FUMIGATION OF SHIPS) REGULATIONS, 1951

The above Regulations came into force on the 1st February, 1952.

Under these Regulations it is the duty of the Contractor who undertakes the fumigation of a vessel by hydrogen cyanide to give twenty-four hours' notice of his intention to the Medical Officer of Health, allowance being made for exceptional circumstances. Notice must be given on the prescribed form as set out in the First Schedule to the Regulations.

A certificate to the effect that the vessel is clear of gas is given by the Operator to the Shipowner or to his representative. It is not necessary to give a similar certificate to the Port Medical Officer of Health.

The responsibility for rendering first-aid in the event of casualties arising during the course of the fumigation is placed upon the Undertaker.

TABLE E

RODENTS DESTROYED DURING THE YEAR IN SHIPS FROM FOREIGN PORTS

Category	Number
Black Rats	591*
Brown Rats	_
Species not known	_
Sent for examination	26
Infected with Plague	

<sup>\*</sup> This total includes 407 rats killed as a result of fumigation.

### Public Health (Shell-Fish) Regulations, 1934 & 1948.

There are no shell-fish beds within the jurisdiction of the Authority.

### MEDICAL INSPECTION OF ALIENS

# MEDICAL INSPECTORS OF ALIENS HOLDING WARRANTS OF APPOINTMENT

- 1. Dr. Alexander Hutchison, Port Medical Officer of Health.
- 2. Dr. R. H. Moyes, Deputy Port Medical Officer of Health.
- 3. Dr. G. R. Walker, Asst. Port Medical Officer of Health.
- 4. Dr. J. Tong, Asst. Port Medical Officer of Health.
- Dr. S. Klinger, Asst. Medical Officer of Health (part-time Boarding Duty).

### OTHER STAFF

The Inspectorial and Clerical Staff devote a certain amount of time to the work in connection with Alien traffic.

### ORGANISATION OF WORK

The expected time of arrival of ships carrying Alien passengers is notified by telephone by H.M. Immigration Officers and the Agents to the office of the Authority.

The Medical Inspector is accompanied by an Inspector when boarding these vessels.

### NATURE AND AMOUNT OF ALIENS TRAFFIC

Alien passengers arrive principally from Germany, Holland, Belgium, Denmark, Norway, Sweden and Finland, and consist mainly of Aliens coming to take employment in this country and visitors for the purpose of business or pleasure. The number of passengers, British and Alien, passing through the district is shown in detail in Table C (page 13).

### ANNUAL RETURN BY THE MEDICAL INSPECTOR OF ALIENS TO THE MINISTRY OF HEALTH FOR THE YEAR ENDED 31ST DECEMBER, 1952

Total	No. of arriving vessels	s carr	ying Ali	iens		862
Total	No. of Aliens (exclude men and airmen):—	ling t	ransmi	grants,	sea-	
(a)	Arriving at the Port					3,510
(b)	Medically inspected					2,551
(c)	Medically examined					248

to be said and the said	Aliens perm	itted to land	Allons not	
Certificates issued	Uncondi- tionally	Conditionally	Aliens not permitted to land	Total
(a) Unsound mind or mentally defective (b) Undesirable for medical	Nil	Nil	Nil	Nil
reasons	Nil	Nil	1	1
(c) Physical incapacity	Nil	Nil	Nil	Nil
(d) Acute infectious disease (e) Conditionally landed for	Nil	Nil	Nil	Nil
adequate medical examination	_	Nil	_	Nil

# ACCOMMODATION FOR MEDICAL INSPECTION AND EXAMINATION

The medical inspection and examination of Alien passengers is normally carried out on board the vessels concerned but on certain occasions Aliens are seen at the H.M. Immigration Office or at the office of the Authority.

### MISCELLANEOUS

# ARRANGEMENTS FOR THE BURIAL ON SHORE OF PERSONS WHO HAVE DIED ON BOARD SHIP FROM INFECTIOUS DISEASE

There is a crematorium in Hull and the Authority would strongly recommend the cremation of any person who had died on board ship from infectious disease.

### CERTIFICATES OF HEALTH

During the year six Certificates of Health were issued to local firms in respect of materials for export.

The details are as follows :-

	Name of Firm	Commodity	Destination
1.	Richard Hodgson & Sons Ltd., Beverley	Wet Salted Rangoon Buffalo Hides	Izmir, Turkey
2.	Lep Transport Ltd.	Woollen Rags	Antwerp
3.	Richard Hodgson & Sons	Dry Eritrean Hides	Beirut
	Ltd., Beverley	Dry Sudan Hides	do.
		Dry East African Hides	do.
4.	Lep Transport Ltd.	Mixed Stockings	Antwerp
5.	Lep Transport Ltd.	Mixed Stockings	Tilburg, Holland
6.	Richard Hodgson & Sons Ltd., Beverley	Tanganyika Suspension Dried Cattle Hides	Beirut

As a result of a complaint by the owners, a sample of air from the cold storage rooms and a sample of liquid from the deck of a ship in the port were examined by the Port Analyst for the presence of hydrogen cyanide.

The results in both cases were negative and statements to that effect were issued to the shipowners.

### DANGEROUS DRUGS (NO. 3) REGULATIONS, 1923

During the year three applications were received from Masters of foreign-owned vessels for certificates to procure drugs under the provisions of the above regulations. The drugs were required to complete the necessary equipment for the ships, in accordance with the Ministry of Transport standards for British ships.

#### ABSENCE OF "OFFICIAL CERTIFICATES"

During the year the under-mentioned foodstuffs were detained owing to the absence of the "Official Certificates." All the consignments were returned to the countries of origin.

Description		Quantity
Salami Sausage	 	 5 cases
Vienna Sausages	 	 13 ,,
Bacon, tinned	 	 18 ,,
Meat Preserves	 	 25 ,,
Lunch Tongues	 	 5 cartons

# PUBLIC HEALTH (PRESERVATIVES, ETC. IN FOOD) REGULATIONS, 1925-48

Eight samples of foodstuffs were taken for chemical analysis under the above Regulations during the year.

Number of samples of foodstuffs submitted to :-

- (a) Port Analyst .. .. 12—report on pages 44-45.
- (b) Director of the Public Health

  Laboratory Service for bacteriological examination . . 13—report on page 46.

Action taken as a result of unsatisfactory reports:—

Bacon Rind.—The bacon was released on condition that the affected parts were pared off under supervision. The bacon was consigned to the Union Cold Store, Liverpool, and the Medical Officer of Health of that City was notified of the circumstances.

Mussels.—Where the faecal coli. content exceeded 30 per cent. importation was prohibited.

#### REPORT OF THE PORT ANALYST

#### FOODSTUFFS

In the table below the results of the examination of thirty-eight samples of foodstuffs are set out :—

Total		Satisfactory	Unsatisfactory
38		35	3
Sample N	lumber	Result of 1	Examination
Apple Juice	3	Two samples parts per mi sulphur diox	ee from preservatives. contained 40 and 56 llion respectively of ide (350 parts per ed). Free from other
Apple Syrup	5	Four samples and 180 parts ively of sulph per million a	ee from preservatives, contained 10, 16, 20 s per million respect- ur dioxide (350 parts llowed). Free from
Apricot Pulp	1	of sulphur d	40 parts per million lioxide (1500 parts llowed). Free from
Bacon, Stained	1		tion was considered
Bacon Rind,		,	
Discoloured	1	Stained with a	compound of copper.
Blackeurrant Pulp	1	sulphur dioxi	5 parts per million of de (1500 parts per d). Free from other
Cherries, Glaced	2	Free from pres	servatives.
Fruit Drops,	2	One sample co	e from preservatives. ontained 49 parts per phur dioxide; free eservatives.
Fruit Pulp,		-	
Crystallised	1	Free from pre	
Gooseberry Pulp	1	of sulphur dio	11 parts per million xide (1500 parts per d). Free from other

Sample Nur		Result of Examination
Lemon Juice	1	Contained 590 parts per million of sulphur dioxide (350 parts per million allowed). Free from other preservatives.
Lemon Syrup	1	Free from preservatives.
Lollipops Lunch Tongues,	1	Free from preservatives.
Tinned	1	Free from preservatives.
Malt Syrup	î	Free from preservatives.
Margarine and Meat	3	No cyanide was detected.
Pears	1	Contained 0.13 parts per million of arsenious oxide (maximum allowable limit 1.4 parts per million).
Piping Jelly	3	Two samples free from preserva- tives. One sample contained 26 parts per million of sulphur di- oxide. Free from other preserva- tives.
Pomegranates	1	No evidence was obtained that the damage to the fruit was caused by a corrosive substance.
Raspberry Pulp	1	Contained 966 parts per million of sulphur dioxide (2000 parts per million allowed). Free from other preservatives.
Redcurrant Pulp	1	Contained 1220 parts per million of sulphur dioxide (1500 parts per million allowed). Free from other preservatives.
Strawberries in Syrup	1	Free from preservatives.
Strawberry Pulp	1	Contained 1851 parts per million of sulphur dioxide (2000 parts per million allowed). Free from other preservatives.
Sugar and Glucose Composition	1	Free from preservatives.
Tomato Soup,		*
Tinned	1	Free from preservatives and col- ouring-matter.
Vitamin Beverage	1	Free from preservatives.

#### BACTERIOLOGICAL EXAMINATIONS

Thirty-two samples of foodstuffs were submitted to the Director of the Public Health Laboratory Service for bacteriological examination. Twelve samples of Mussels were reported to be unsatisfactory.
