### REPORT

ON THE

### **HUNTINGDON RURAL DISTRICT FOR 1958**

## To the Huntingdon Rural District Council

Mr. Chairman, Ladies and Gentlemen,

I beg to submit the Annual Report on the sanitary conditions of the District for the year ending 31st December, 1958.

The area is situated mainly in the west centre of Huntingdonshire, extending approximately 13 miles to the west and 10 miles to the north of the County Town.

The population are mostly engaged in agriculture and its associated industries. The area contains airfields, and there are a large number of British and American Air Force personnel resident in the district.

The population, mid-year estimate, according to the Registrar General, is 12,960, an increase of 450 over the previous year.

The general health of the District has been very good. Unfortunately, towards the end of the year there were eight cases of Poliomyelitis (the last one beginning 7-1-59), seven of which were in the Brampton area. Fortunately, all recovered. The County have been having a strong drive in the immunisation programme against this disease.

The birth rate is considerably above the national average, and has actually been above this average since 1946.

The death rate is low, and has been lower than the national figure since 1947.

The infantile mortality rate, and the still births rate, are also low and a reason for gratification, but too much must not be assumed from these figures, as the total numbers involved are small.

As this report was being prepared, news came of the death of Dr. J. R. Garrood. He was Medical Officer of Health of the District from 1925 until 1958, being well known and respected throughout the area. He was one of the last of the Medical Officers of Health who were also in General Practice. My father did similar work, and I know from experience how great was the value of the work that they did for the community.

### GENERAL STATISTICS

Wales	16.4	16.4	11.7	11.7	22.5	21.6

Comparability factor for births, 1.33, and for deaths, 1.31

The Comparability factors shown under the table of birth and death rates are supplied by the Registrar General. When our rates are multiplied by these figures they are comparable with the national figures, or with the adjusted rates of anywhere else in the country. In issuing the factors, allowance is made for any unusual distribution of age groups in the population—for instance, a large number of Air Force personnel being resident.

The following table shows the classification of deaths from all causes (Registrar General's figures) :—

	Causes of Death		M.	F.	Totals

### PUBLIC HEALTH INSPECTOR'S REPORT

### MONTAGU HOUSE, HUNTINGDON.

### SEWERS

Developments.

- (a) Prior to this year ... Main sewerage for Alconbury and Alconbury Weston, Brampton and Sawtry.
- (b) During this year ... NIL

Three main sewerage schemes have now been completed. The villages of Alconbury and Alconbury Weston and Brampton are served by sewage works which have been taken over from Air Ministry and adapted and improved and a new sewage works has been provided for Sawtry.

### SANITARY CONVENIENCES

No. of houses at the end of the year with W.	C.'s	 2,409
No. of houses at the end of the year with pail	closets	 926
No. of W.C.'s constructed during year for new	houses	 63
No. of W.C.'s newly constructed for old property		 93
No. of dustbins substituted for ashpits		 NIL
No. of conversions grant aided (Sec. 47 P.H.A.	1936)	 48

There are still a number of pail cosets to be converted to water closets in the village of Sawtry.

All the properties within reasonable distance of the sewers in Alconbury, Alconbury Weston and Brampton now have water closets in place of pail closets.

Work is now proceeding on similar conversions in Sawtry and approximately 60 per cent of the properties in this village now have water closets.

### SCAVENGING

No. of houses in district		 	3,335
No. of houses with dustbins		 	1,801
No. of Notices sent requiring provision	of bins	 	NIL
No. of new bins provided		 	63
Details of Collection.			
Frequency-Night soil		 7	Weekly

Dry refuse ... Part weekly - part fortnightly
Transport and No. of men ... 2 vehicles, 6 men
Whole area is covered.

Particulars of service(s)-

Unburnable refuse collection and night soil collection.

Details of disposal arrangements-

Controlled tipping. Night soil to prepared pits at Alconbury and to land.

Development required—

None.

Tronc.				
Complaints received re non-	remov	val	 	 - 30
No. of bins emptied			 	 1,801
No of pail closets emptied			 	 906

0
DRAINS
New drains tested
DISPOSAL WORKS
Existing
CESSPOOLS
No. of new cesspools provided 30 No. of cesspools abolished 45
Although 30 new septic tanks were provided in the villages without adequate sewers 45 cesspools were abolished due to the provision of new sewers.
RIVERS AND STREAMS
Two complaints respecting pollution and nuisances arising from pollution of streams were investigated during the year. The first arose from the effluent for a pea vining plant gaining access to a stream and pollution occurred for some 2 miles downstream. The Great Ouse River Board were informed and with their co-operation the nuisance was abated. It still, however remains to be seen whether the measures taken will be adequate for working over the full period of pea vining next year. The second case concerned a brook, the level of which is governed by sluice gates. After careful and prolonged investigation it was decided that the sluice gates were not operated with the necessary frequency to secure a change of water in the brook, arrangements for which have now been completed.
SHOPS AND OFFICES
No. of shops inspected 46 Total number of visits 102
No action was taken other than that referred to subsequently under the heading of Public Health Hygiene Regulations, 1955.
MOVEABLE DWELLINGS
No. of Licences in force for multiple sites 3

The caravans concerned in the 32 licences to station and use moveable dwellings are dispersed over 13 villages and therefore could not reasonably be accommodated on one or even two sites. In fact it has been argued by members of the Council that the judicious siting of individual caravans provided with the necessary sanitary arrangements does, in many instances, less harm to the amenities of their surroundings than the herding together of numbers of caravans on one site. This does not imply that a licenced site or sites may, in the future, become necessary but that the number of applications for licences in any particular area does not warrant serious consideration of the provision of a multiple site.

Estimated maximum number of campers resident in area at

30

45 28

any one time during summer ... ...

No. of inspections ... ... ... No. of nuisances discovered ... ...

No. of nuisances remedied ... ... No. of Licences to station and use

### PETROLEUM ACTS

Of the total number of licences in force at the end of the year 53 were renewals and 4 new licences. In January there were petroleum storage tanks in use which had been installed 20 years or more previously. All of these were tested and it was subsequently necessary to substitute two of them with new tanks.

### DISINFESTATION

(a) Bed Bugs.

No. of houses	infested-

(b) Private		 	

No. of houses disinfested-

(a) Council ... NIL (b) Private NIL

NIL NIL

Precautionary measures taken to ensure tenants belongings are free from vermin before removal to Council Houses: Inspection only.

### PESTS ACT, 1949

No.	of	houses	inspected	d.		 	 	409
No.	of	houses	treated	and	cleared	 	 	163

Total No. of properties inspected	Total No. of major rat infestations found	Total No. of minor rat infestations found	No. of mice infestations found	No. of infested properties treated	No. of notices served under section 4
1,383	6	377	4	324	NIL

In August a decision was taken to operate a contract system for the control of rats and mice on agricultural and business premises. By the end of the year 36 contracts were in operation. In addition, it was decided that treatment of similar premises the occupiers of which did not desire a contract, but who required spot treatment to control rats and mice, would be subject to a charge of 14/- per hour. Sufficient experience of the scheme has not yet been obtained to offer comment on the operation of the contract system.

### DISINFECTION

No. of inspections						 5
Rooms disinfected-	-					
(a) Tuberculosis						 2
(b) Others						 NIL

### PUBLIC HEALTH HYGIENE REGULATIONS, 1955

Steady progress is being made by negotiation in ensuring that premises subject to these regulations are being brought up to the required stan-dard. During the year 6 public houses and 7 shops and cafes have been provided with hot water, wash hand basins and glass washing facilities. Many of the business premises are owner/occupied and part of their living accommodation. No staff is employed and the facilities required by the regulations are readily available. No prosecutions have been instituted during the year.

### STREET NAMES AND NUMBERING

The naming of streets and the numbering of properties in Alconbury has now been completed and in Brampton there remains some 20 proper-

ties which have not yet been numbered.

It is appropriate here to remark on the co-operation which has been shown by the occupiers of properties in both these villages. Having been given the opportunity to provide and fix the numbers themselves or to allow the Council to provide and fix them at a set charge the majority of them expressed their wishes promptly and carried out the work without delay.

# HOUSING STATISTICS

1.	Inspection of Dwelling-houses during the year:-	
	(1) (a) Total number of dwelling-houses inspected for housing defects (under Public Health or Housing Acts)	327
	(b) Number of inspections made for the purpose	471
	(2) Total number of dwelling-houses found to be in a state so dangerous or injurious to health as to be unfit for human habitation	24
	(3) Number of dwelling-houses (exclusive of those referred to under the preceding sub-head) found not to be in all respects reasonably fit for human habitation	134
2.	Remedy of Defects during the year without Service of Formal Notices:	
	(a) Number of defective dwelling-houses rendered fit in consequence of informal action by the Local Authority or their officers excluding those dealt with by Improvement Grants	115
	(b) Number of dwelling-houses rendered fit with the assistance of Improvement Grants	28
3.	Action under Statutory Powers during the year:— (A)—Proceedings under Sections 9 and 10 of the Housing Act, 1957:—	
	(1) Number of dwelling-houses in respect of which notices were served requiring repairs	Nil
	(2) Number of dwelling-houses which were rendered fit after service of formal notices:—	
	<ul><li>(a) By owners</li><li>(b) By Local Authority in default of</li></ul>	Nil
	owners (B)—Proceedings under Public Health Acts :—	Nil

	(a) By owners (b) By Local Authority in default of owners	Nil Nil
(1	C)—Proceedings under Sections 17 and 21 of the Housing Act, 1957, & Sections 10 (1) & 11 (2) Local Government (Miscellaneous Provisions) Act, 1953:—	
	<ul> <li>(1) Number of dwelling-houses in respect of which Demolition Orders were made</li> <li>(2) Number of dwelling-houses demolished</li> </ul>	24
	in pursuance of Demolition Orders  (3) Number of houses closed during the year  (4) Number of families displaced during the	21 Nil 12
()	D)—Proceedings under Section 18 of the Housing Act, 1957 :—	12
	(1) Number of separate tenements or under- ground rooms in respect of which Closing Orders were made	Nil
	(2) Number of separate tenements or underground rooms in respect of which Closing Orders were determined, the tenement or room having been rendered fit	Nil
()	E)—Proceedings under Γart III of the Housing Act, 1957, and Housing Repairs and Rents Act, 1954:—	
	CLEARANCE AREAS :—	
	(1) Number of Clearance Areas declared during the year	Nil
	(2) Total number of houses included in (1) above	Nil
	(3) Number of houses included by reason of unfitness for human habitation	Nil
	(4) Number of houses included by reason of bad arrangement, etc	Nil
	(5) Number of families displaced during the year	12
	(6) Number of houses demolished during the year	9
Н	Housing Act, 1936—Part IV. Overcrowding.	
	a) (i) Number of dwellings overcrowded at the	
	end of the year	10

	(ii) Number of families therein	10
	(iii) Number of persons dwelling therein	51
(b)	Number of new cases of overcrowding reported during the year	2
(c)	(i) Number of cases of overcrowding relieved during the year	1
	(ii) Number of persons concerned in such cases	6
(d)	Particulars of any cases in which dwelling- houses have again become overcrowded after the Local Authority have taken steps for the abatement of overcrowding	Nil
(e)	Any other particulars with respect to over- crowding conditions upon which the Medical Officer of Health may consider it desirable to	
	report	Nil

During the year all of the temporary hutments previously converted for living accommodation have been deleted.

### HOUSING

Since the submission of the report on housing to the Minister of Housing and Local Government in 1955, 92 houses have been the subject of demolition orders and 49 have been demolished. The figures given to the Minister were that 100 houses would be demolished in the first five years.

This year has seen the demolition of the 9 dwelling-houses known as The Crofts, High Street, Brampton, which were included in a clearance area.

### IMPROVEMENT GRANTS

The Council's policy of encouraging the use of Improvement Grants has been continued during 1958, and grants for a further 28 dwelling-houses have been approved. Not only is this policy saving many dwellings from foreseeable demolition, but also helping to preserve the type of cottage peculiar to the area.

### RENT ACT, 1957

Only one application for a Certificate of Disrepair was received during the year and before all the work was completed the occupier was rehoused in a Council bungalow. The owner then took up residence in the bungalow subject to the certificate. Many enquiries on the effect of the Act were received and dealt with.
