BOROUGH OF HYTHE

Annual Reports of the Medical Officer of Health and
Chief Public Health Inspector for the Year 1968

Mr. Mayor, Aldermen and Councillors,

I have the pleasure to submit to you for the year
1968, BOROUGH OF HYTHE, KENT

Population

The Registrar General's estimate of the mid-year 1968 population was
11,300 which is an increase of 100 on the population in 1967.

ANNUAL REPORTS OF MEDICAL OFFICER OF HEALTH

Live Births and Deaths

AND

The number of live-births was 137 (126, M; 11, F.) which was an increase
of 4 over that of the previous year and the crude birth-rate was
accordingly 12.1. The Registrar General's Department's
Factor which is calculated by dividing the number of live-births by the
distribution, the rate is 12.1 compared with a national rate of
11.9 for England and Wales.

CHIEF PUBLIC HEALTH INSPECTOR

FOR THE YEAR

1 9 6 8

Stillbirths and Deaths

The number of stillbirths was 21 (16, M; 5, F.) and the stillbirth rate
was 14.9 compared with a rate of 14.6 for England and Wales.

Infantile Mortality Rate

Four infant deaths were registered this year:

Broncho-pneumonia - Hydrocephalus & Anomalous - 6 weeks.

Broncho-pneumonia - Sepsis - 10 weeks.

Fracture - 2 hours.

Cardiac (anatomical defect) - 10 weeks.

The infant mortality rate was 29.0 compared with that of
18.0 for England and Wales.

The high rate of perinatal mortality (i.e. stillbirths and infant
deaths under one week of age) is presumably, at least in part, due to
birth injuries and congenital malformations and the chief concern factor is
losses of pregnancy. (Indeed, however, should be given to the fact that
these statistics are the small for valid comparisons.)

Maternal Deaths and Mortality Rate

This category again will be three years ago deaths from pregnancy,
childbirth and abortion, and is a reflection of the high standard of modern
obstetric practice.

Deaths and Death Rate

The total number of deaths from all causes was 201 (133 M; 68 F.) and
the crude death rate was accordingly 17.8 which is an index of the higher
proportion of elderly people resident in the Borough. After adjustment
by the Registrar General's Age-standardization Factor as for Hythe the rate
became 9.7 and was lower than that of 11.6 for England and Wales.

The chief group cause of deaths, as naturally would be expected, was
Heart and Circulatory Diseases and Venous Thrombosis of the Extremities.
These are the most common causes of death amongst the aged. Of these
there were 117.

BOROUGH OF HYTHE

Annual Reports of the Medical Officer of Health and Chief Public Health Inspector for the Year 1968

Mr. Mayor, Aldermen and Councillors,

I have the honour to present to you my Annual Report for the year 1968.

Population

The Registrar General's estimate of the mid-year Home Population was 11,580 which represents an increase of 400 over that of the previous year.

Live Births and Rate

The number of live-births was 137 (76M. 61 F.) which was an increase of 4 over that of the previous year, and the crude birth-rate was accordingly 11.8; after adjustment by the Registrar General's Comparability Factor which is computed from a population standardised for age and sex distribution, the rate becomes 17.1 and was slightly higher than that of 16.9 for England and Wales.

Stillbirths and Rate

The number of stillbirths was 2(1 M. & 1 F.) and the stillbirth rate was 14.0 compared with a rate of 14.8 for England and Wales.

Infantile Mortality Rate

Four infant deaths were registered due to:-

Broncho-pneumonia: Hydrocephalus & Anencephaly - 6 months.

Broncho-pneumonia - Severe sub-normality - 8 months.

Prematurity - 3 hours.

Combined Immunological deficiency: Therapeutic aplnphoplasia: - 1 month

The infant mortality rate was accordingly 29.0 compared with that of 18.0 for England and Wales.

The hard core of Perinatal Mortality (i.e. stillbirths and infant deaths under one week of age) is prematurity, asphyxia and atelectasis, birth injuries and congenital malformations and the chief maternal factor is toxæmia of pregnancy. (Regard, however, should be given to the fact that these statistics are too small for valid comparisons.)

Maternal Deaths and Mortality Rate

This rate was again nil as there were no deaths from Pregnancy, Childbirth and Abortion, and is a reflection of the high standard of modern obstetric practice.

Deaths and Death Rate

The total number of deaths from all causes was 201 (83 M. 118 F.) and the crude death rate was accordingly 17.4 which is an index of the higher proportion of elderly people resident in the Borough; after adjustment by the Registrar General's Comparability Factor as for births the rate becomes 8.7 and was lower than that of 11.9 for England and Wales.

The chief group cause of deaths, as naturally would be expected, was Heart and Circulatory Disease and Vascular Lesions of the Nervous System, as these are the most common causes of death amongst the aged; of those there were 117.

Ischaemic Heart Disease (i.e. Coronary Thrombosis and Coronary Atheroma) was the cause of 53 deaths; 1 between 35 - 44 years of age; 1 between 45 - 54; 12 between 55 - 64; 12 between 65 - 74 and 27 over 75 years. 39 of those deaths were over 65 years of age. These figures, although too small for any valid inference, indicate that Ischaemic Heart disease is primarily a degenerative or senile disease

Cancer, as invariably in previous years, was the second highest cause of deaths of which there were 31. The age-groups were as follows:- 1 between 25 - 34; 7 between 55 - 64; 13 between 65 - 74 and 10 over 75 years.

Cancer of the Lung/Bronchus was the cause of 4 deaths (all male) in the following age-groups; 2 between 55 - 64; 2 between 65 - 74 years of age.

Cancer of the Breast was the cause of 5 deaths, in the following age groups, i.e. 2 between 65 - 74 and 3 over 75 years. It is reasonable to assume that the patients sought medical advice too late, having regard to the facts that Cancer of the Breast is an insidious disease, although easy to diagnose.

Cancer of the Stomach was the cause of 2 deaths in the following age-groups; 1 between 65 - 74 and 1 over 75 years.

The other causes of death were miscellaneous and there was no exceptional mortality; there was no death due to Infectious Disease.

Infectious Diseases

The following cases of Infectious Diseases were notified during the year:-

Scarlet Fever	6
Measles	1
Acute Primary or Influenzal Pneumonia	3
Whooping Cough	9
Infective Jaundice	1

Tuberculosis

Three new cases (2 M. 1 F.) of Pulmonary Tuberculosis were notified and the patients were aged 65 years and over.

No new cases of non-Respiratory Tuberculosis were notified.

No deaths occurred during the year from Respiratory or non-Respiratory Tuberculosis.

Health Services and Public Health Act, 1968

The Public Health (Infectious Diseases) Regulations 1968 came into force on the 1st October, 1968, and, as requested by the Minister of Health, copies of these new Regulations and also copies of Sections 47 - 49 of the Act of 1968 were sent to all medical practitioners in the area.

Under this new Act the following Infectious Diseases are now notifiable:-

Acute Encephalitis	Infective Jaundice
Acute Meningitis	Leprosy
Acute Poliomyelitis	Leptospirosis
Anthrax	Malaria
Cholera	Measles
Diphtheria	Ophthalmia Neonatorum
Dysentery	Paratyphoid Fever
(amoebic or bacillary)	Plague

Infectious Diseases (Contd.)

Health Services and Public Health Act, 1968 (Contd.)

Relapsing Fever	Typhoid Fever
Scarlet Fever	Typhus
Smallpox	Whooping Cough
Tetanus	Yellow Fever
Tuberculosis	

The following diseases are now no longer notifiable:-

Acute Influenzal Pneumonia	Erysipelas
Acute Primary Pneumonia	Membranous Croup
Acute Rheumatism	Puerperal Pyrexia

Cases or suspected cases of Food Poisoning are still required to be notified.

In conclusion, I would take this opportunity of thanking you for your support and interest in the Public Health Department and also the staff for their co-operation and very efficient service.

I am,

Your obedient Servant,

J. MARSHALL. M.B., Ch.B., D.P.H.

SECTION A.

STATISTICAL AND SOCIAL CONDITIONS OF THE DISTRICT FOR

1 9 6 8

AREA:- 3,013 acres

REGISTRAR-GENERAL'S ESTIMATE OF:

The Resident Population	11,580
<u>NUMBER OF INHABITED HOUSES ACCORDING TO THE RATE BOOKS ..</u>		4,285
<u>RATEABLE VALUE</u>		£538,768
<u>SUM REPRESENTED BY A PENNY RATE</u>	£2,125

SOCIAL CONDITIONS

The Borough of Hythe is largely a residential District, by the sea, and during the holiday months, attracts many visitors. There are a few light industries, including a Brewery, two Laundries, a Plastics Firm, a School of Infantry, and domestic trades. The standard of housing in the Borough has been maintained by the Council at a very high level due to long-term pre-war planning and as a consequence there are no slum clearance areas. There is little unemployment in the District and social conditions are generally very satisfactory.

EXTRACTS FROM VITAL STATISTICS

	<u>Total</u>	<u>M.</u>	<u>F.</u>		<u>Hythe Borough</u>	<u>England and Wales</u>
1. <u>Live Births</u>	137	76	61	Birth Rate per 1,000 estimated resident population	11.8 (Adjusted Rate 17.1)	16.9
