HEALTH DEPARTMENT,
TOWN HALL,
JARROW,
Co. DURHAM,
AUGUST, 1946.

# To the Mayor, Aldermen and Councillors of the Borough of Jarrow Ladies and Gentlemen,

I have the honour to submit the 71st Annual Report of the Health Department upon the Health and Sanitary Conditions of the Borough of Jarrow for the year 1945, drawn up on lines similar to those of previous years.

In the latter part of 1945, the Ward boundaries were revised. The statistics for the year under review have however, been prepared on the basis of the old wards.

The following are the main features of the vital statistics for the Borough for the year.

The estimate of population (26,190) supplied by the Registrar General applies to civilians only and shows an increase of 70 on the 1944 estimate; the natural increase, i.e. excess of births over deaths being 168.

The Birth Rate of 19.39 per 1,000 population showed a decrease on that of 1944 (22.36). The corresponding Birth Rate for England and Wales in 1945 was 16.1. The Death Rate decreased from 14.74 in 1944 to 12.98. This rate and also the total number of deaths (340) are the lowest yet recorded in the history of the Municipality. The corresponding death rate for England and Wales was 11.4. The death rate from all forms of tuberculosis shewed an improvement at 1.15 per 1,000 population against 1.26 in the previous year. Whilst the pneumonia death rate touched a new low level at 0.53 per 1,000 population.

The Maternal Mortality Rate was 1.89 per 1,000 total (live and still) births as against 1.63 in 1944 and against the rate for England and Wales of 1.79.

The Infantile Mortality Rate for the Borough was 39.37 per 1,000 live births, compared with 73.63 in 1944, and the rate for England and Wales of 46. This is the lowest rate yet achieved in the borough and an improvement of 37.5% on the previous best rate of 62.98 which was reached in 1939. The new rate is noteworthy in another respect in that it is the first time for 48 years that the Borough Rate has excelled the rate for England and Wales. This first occurred in 1897. The Neo-Natal Infantile Mortality Rate of 15.75 was also a new record, only eight infants under the age of one month dying during the year. The Still Birth rate for the year was 41.51 per 1,000 total births and should lend itself to further improvement.

The total number of notifications of infectious disease received in 1945 (482) was less by 191 than in 1944. Excluding Measles and Whooping Cough (which only became notifiable in 1939) there was a reduction of 54 cases among the other notifiable diseases, mainly Pneumonia, and Scarlet Fever. The incidence rate of Tuberculosis was 2.52 per 1,000 population as compared with 2.37 in 1944. The increase in incidence rate of Tuberculosis emphasises the need for constant and renewed vigilance in the prevention and treatment of this disease.

The Borough Maternity Home again enjoyed a successful year and proved a useful asset to the Maternity and Child Welfare Services of the Authority. Park Road War Time Nursery remained open throughout the year although with a diminishing number of attendances. Primrose Nursery was closed in April owing to the lack of sufficient children. There has been no appreciable difficulty in dealing with illegitimate children in the Borough. Twenty-nine premature live births were notified during the year of whom twenty-six were alive at the end of one month.

Routine Sanitary work was reasonably well maintained during the year, one of the main problems encountered again being the enforcement of urgent repairs to dwelling houses with the prevailing difficulties of labour and material. The housing shortage and the progressive deterioration of the older properties make it imperative for the Local Authority to resume at the earliest opportunity its housing programmes which were suspended at the outbreak of war.

The vital statistics of 1945 show it to have been a year of good health bearing favourable comparison with the pre-war years and in some respects better.

I wish to take this opportunity of expressing my gratitude to the Chairman and Members of the Health Committee for their valuable co-operation and the keen interest which they have taken in the administration of the Department. I also desire to tender my thanks to all members of my staff for the efficient and ready assistance which I have received from them during the year.

B. BUCKLEY, Acting Medical Officer of Health.

### II. Public Health Officers of the Authority.

Acting Medical Officer of Health, Medical Superintendent of Isolation Hospital, Medical Superintendent of Maternity Home, School Medical Officer (until 31st March, 1945).

B. Buckley, M.B., B.Ch., B.A.O. (Temporary).

Assistant Medical Officer of Health and Assistant School Medical Officer (until 31st March, 1945).

J. J. Godson, M.B., B.Ch., B.A.O. (Temporary).

Chief Sanitary Inspector, Inspector under Food and Drugs Act, Inspector under Diseases of Animals Act, and Chief Shops Inspector, Rodent Officer.

R. C. Thompson, Cert. R.S.I., Cert. Meat Inspector, Cert. S.I.B., D.I.Hy.

Sanitary Inspectors.

W. W. Reed, Cert. S.I.B., Cert. Meat Inspector (Asst. Shops Inspector).

G. G. Stanley, Cert. S.I.B., Cert. Meat Inspector (Asst. Shops Inspector). (Resigned 31st August, 1945).

Matron of Isolation Hospital.

Miss C. Johnson, State Registered Nurse.

State Registered Fever Nurse.

Matron of Maternity Home.

Miss E. Marlow, State Registered Nurse.

State Certified Midwife.

Matrons of War-Time Nurseries.

Mrs. M. Smith, State Registered Nurse.

State Certified Midwife,

Mrs. P. Short, State Registered Nurse.

(Terminated duties 30th April, 1945).

Health Visitors.

Miss M. English, S.R.N., S.C.M., R.S.I.

Miss D. Watson, S.R.N., S.C.M., (Part 1) R.S.I.

Miss M. A. B. Pinkney, S.R.N., S.C.M., R.S.I.

(Commenced duties 1st June, 1945).

Clerks.

Miss R. Gatens (Health Department). Temporary.

Miss N. Roxborough (Health Department). Temporary.

Mrs. D. Walton (Maternity & Child Welfare Department).

Miss J. Dick (School Medical and Child Welfare—until 31st March, 1945).

Staff on Military Service.

F. Tweedie-Sanitary Assistant,

W. D. Forrest-Clerk.

Miss D. Tinnion-Sister, Isolation Hospital.

#### III. Statistics and Social Conditions of the Area.

Area of the Borough (including 260 acres of inland water-1,985 acres.

Population.-1931 Census, 32,018.

Registrar General's estimate of civilian population for 1945— 26,190.

Note.—The estimate of civilian population is given for the calculation of death rates and incidence of notifiable diseases amongst civilians. As estimates of the numbers and distribution of non-civilian population are not available, the birth rate can only be based on the civilian population for 1945 as used for death rates.

Non-civilian deaths and non-civilian notifications are excluded from all statistics,

Number of inhabited houses at end of 1945-7,775.

Rateable Value at 1st April, 1945.—£123,624.

Sum represented by a Penny Rate. £466.29.

Social Conditions.—The chief industries of the Borough are Shiprepairing, Petroleum Refining and Storage, and light Metal Working. No occupation in particular is adversely affecting the health of the population. One factory in the Borough has a part-time Medical Officer.

Unemployment.—Mr. R. B. Hindmarsh, Area Public Assistance Officer, has kindly supplied me with the following details of the average number of persons and cases chargeable in Jarrow during 1945. 1944 figures are given for comparison:—

Year.	Persons.	Cases,
1944	806	371
1945	 814	358

Any variations there may be between the Registrar General's Short List of Causes of Death and the Table of Causes and Ages at Death compiled locally are due to the fact that in certain instances the Registrar General obtains fuller information from the certifying medical practitioners which enables him to classify deaths with greater accuracy. Other statistics supplied by the Registrar General relating to Live and Still Births and Infantile Deaths are included in the table headed Summary of Vital Statistics.

#### REMARKS ON VITAL STATISTICS.

The estimate of the population of the Borough for 1945 supplied by the Registrar General is an estimate of the civilian population only, and non-civilians are excluded from all statistics. This estimate shows an increase of 70 on the estimated population for 1944.

The total number of live births registered in 1945, 508, and the birth rate of 19.39 both show a decrease on the corresponding figures for 1944. The natural increase in population, i.e. excess of births over deaths, was 168. The Birth Rate for England and Wales for 1945 was 16.1.

Deaths during the year totalled 340, a reduction of 45 on the 1944 figures, and the death rate was 12.98, compared with the death rate of 11.4 for England and Wales. The Death Rate is the lowest to be recorded in the Borough. An Areal Comparability Factor has not been supplied by the Registrar General so that a corrected death rate cannot be given.

The Maternal Mortality Rate for 1945 was 1.89 per 1.000 live and still births, compared with the rate of 1.79 for England and Wales.

Infantile Mortality Rate for the year was 39.37 per 1,000 live births, compared with 73.63 in 1944. This is lower than the rate for England and Wales of 46 in 1945, and the lowest ever to be recorded in the Borough. The neo-natal infantile mortality rate (i.e. deaths of infants under one month) was 15.75 per 1,000 live births, which showed a considerable decrease on the corresponding figure for 1944 of 30.82.

The tuberculosis death statistics for 1945 showed an improvement on those for 1944. The total number of deaths from tuberculosis during the year was 30, comprising 26 pulmonary and 4 non-pulmonary, giving a death rate of 1.15, compared with 1.26 in 1944, the death rate from pulmonary tuberculosis showing a decrease on the previous year. The incidence rate of tuberculosis, as represented by 66 notifications received during the year, was 2.52 cases per 1,000 population, and showed a slight increase over 1944 when 62 notifications and an incidence rate of 2.37 were recorded. The number of cases of non-pulmonary tuberculosis remaining on the register at the end of the year is the lowest so far recorded.

The Cancer Death Rate was 1.83 per 1,000 population, an increase on the figure of 1.79 in 1944. The Pneumonia Death Rate of 0.53 showed an improvement on the rate of 1.07 in 1944. Mortality from other infectious diseases was low, there being 3 deaths from Diphtheria and none from Scarlet Fever, Measles and Whooping Cough.

### IV. General Provision of Health Services in the Area.

#### Laboratory Facilities.

Pathological and Bacteriological specimens requiring examination are sent to the Central Public Health Laboratory, Newcastle-on-Tyne.

Hereunder is a summary of the investigations carried out, and of the results obtained:—

Sputum for Tuberculosis	ositive.	Negative. 83	Inconclusive.	Total.
Swabs for Diphtheria	61	189	2	252
Wasserman Reaction	_	4	_	4
Streptococci & Staphylococci	33	49	_	82
			Total	462

The Comparative Total for 1944 was 329.

#### Ambulance Facilities.

During the year, the Corporation maintained two ambulances which are both garaged at the Isolation Hospital, Primrose, telephone 67322.

The St. John Ambulance Association also possesses an ambulance. These facilities are adequate for the needs of the Borough.

#### Clinics and Treatment Centres.

#### Maternity and Child Welfare.

materinty and on	10 440	maic.

#### Maternity and Child Welfare.

#### Midwifery Service.

At the end of the year there were five practicing midwives in the Borough. The service is supervised and administered by the Durham County Council.

#### Maternity Services.

The Clinics, with the times at which they are open, are given above. In co-operation with the Ministry of Food, Dried Milk and Vitamin preparations are issued at Water Street Clinic and at Bede Burn Road Clinic. Vitamins are also issued at the Food Office, Ormonde Street.

During the year a supply of proprietary dried milk was made available for issue to eligible persons at cost price.

Bede Burn Clinic ceased to be used for A.R.P. purposes at midyear. The building is now the property of the Durham County Council, being former school property and negotiations are in progress with that body to render the building available for clinic purposes to provide facilities for the benefit of persons who live on the Housing Estate.

#### Ante-Natal Services.

Ante-Natal Clinics are conducted by the Council's Medical Staff at Walter Street Clinic for domiciliary cases, and at Danesfield Maternity Home for the in-patients.

#### Institutional Provision for Mothers and Children.

The agreement, outlined in previous reports, between the Princess Mary Maternity Hospital and the Borough Council was varied during the year, with retrospective effect to 1st April, 1945, to the extent that the block grant of £60 per annum is now replaced by a daily patient charge of 15/- subject to review in the event of rising expenses on the part of the hospital. Under this agreement 32 cases were admitted there in 1945.

During 1945 a number of emergency and necessitous maternity cases were also admitted to the South Shields General Hospital. 20 such cases were admitted during the year.

The Borough Maternity Home following an internal re-arrangement of accommodation now contains ten beds. The Home was working to capacity throughout the year, and the reduction in the amount of work achieved was due to the difficulty of obtaining adequate staff.

Admissions	254
Total admissions from Council's area	158
Ante-natal admissions	34
Live Births	208
Still Births	
Maternal Deaths	-

Infant	Deaths (un	der 10	days)		2
				1,01	18

The following table shews the percentage of Live Births taking place in institutions:—

Year.	Live Births.	Total Born in Institutions.	Percentage Born in Institutions.
1945	508	178	35.04
1944	584	225	38.52
1943	513	198	38.59
1942	474	145	30.59
1941	454	89	19.60
1940	536	88	16.41
1939	525	58	11.04

#### War-Time Nurseries.

Park Road-36 places. Matron Mrs. M. Smith, S.R.N., S.C.M.

The Nursery was open throughout the whole year and brief particulars of the attendances are given herewith together with comparative figures for 1944.

A reduction in the employment of women in industry caused a falling off in attendances during the year:—

		0-	-2 years.	2—5 years.	Total.
Attendances	1945		2,491	 3,930	 6,421
	1944		3,288	 3,440	 6,728

Primrose Hill-50 places. Matron, Mrs. P. Short, S.R.N.

Reduced attendances made it uneconomical to continue to keep this Nursery open. It was therefore closed at 30th April, 1945, and at the end of the year it was standing vacant. Attendances for the year to the date of closure are given herewith:—

	0-	-2 years.	2	2—5 years,	Total.
Attendances		334		850	 1,184
(to 30th Apri		1,155		3,375	 4,530

#### Nursery School.

The Nursery School at Clervaux Terrace was formally opened in March with Miss F. A. Thorne as Superintendent. On 1st April, 1945, it came under the aegis of Durham County Council.

#### Health Visitors.

Miss M. Pinkney was appointed in June to the vacancy created by the retirement of Mrs. Baty in September, 1944. At the end of the year there was a full complement of Health Visiotrs.

#### Child Life Protection.

At the end of 1945 there were five children on the register of the local authority. All cases were visited regularly during the year by the Health Visitors, who are separately appointed as Child Protection visitors. Five adopted children were also under supervision at the end of the year.

#### Dental Treatment.

One application was received during the year for free dental treatment.

#### Immunisation of Infants at December 31st, 1945

Age.	Number,	Number Immunised.	Percentage
0—1	460		
1-2	502	336	66.93
2-3	468	349	74.57
3-4	406	299	73.64
45	362	273	75.47
Total	2198	1257	57.19

As children under the age of one year are not usually immunised, the percentage who have been immunised, of those who are immunisable, is 72.32.

#### Premature Infants.

Particulars of children who were born in this district during the year and weighed 5½ lbs., or less, at birth have been compiled from the notification of births register, and are as hereunder:—

Total number of premature babies notified during 1945, who were born:—

(i)	at home	17
*(ii)	in hospital	12
Number of	those born at home:—	
(i)	who were nursed entirely at home	17
(ii)	who died during the first 24 hours	
(iii)	who survived at the end of one month	16
Number of	those born in hospital: -	
(i)	who died during the first 24 hours	2
(ii)	who survived at the end of one month	10

<sup>\*</sup> Includes five outward transfers.

The outstanding recommendations of Ministry of Health Circular 20/44 should be implemented as opportunity occurs.

#### Illegitimate Children.

Representatives of the local atuhority were present together with representatives of Durham Diocesan Moral Welfare Association at several meetings which the County Council convened in accordance with the Ministry of Health Circular 2866.

The Moral Welfare Association work in close harmony with the local authority in matters of adoption, etc.

#### Home Heip.

In one case a home help was provided during the year. Difficulty was experienced in obtaining suitable personnel for the scheme.

#### Summary of Maternity and Child Welfare Work.

No. of sessions	93
No, of attendances	656
Children treated (under 5 yrs.)	97

#### V. Sanitary Circumstances of the Area.

Water.—The Sunderland and South Shields Water Company supplies the Borough with a piped supply of water which is satisfactorily constant in quantity and quality.

Service pipes are laid on to all premises within the Berough, but in a proportion of the older dwelling houses the pipes are carried only into the yards and not actually into the houses.

There is no evidence of the water supply having any plumbo solvent action. The Company carries out bacteriological examinations of samples of water from each well and reservoir monthly and from the town supply as represented by tap samples weekly, and a copy of the results of these examinations is supplied to this Department.

Corrosion of Copper Pipes.—As reported last year a large number of Copper Water Pipes originally installed in Council Houses have corroded involving the renewal of the pipes and consequent increased maintenance costs. The Copper Development Association and the British Non-Ferrous Metals Research Association have the matter under consideration but we have been unable to get any satisfactory information as to the cause of the corrosion or how to prevent it.

At one house on the Council's Estate where the copper piping was to be renewed because of corrosion samples of water were taken and submitted to the Public Analyst who has reported as follows:—

Sample Mark:	27/12/44	5/1/45
oumple mark.	"1/44"	"1/45"
	Parts per 100	
Total Solid Matter dried at 100° C .	48.00	47.00
The approximate composition of Matters found by analysis was:-		
Calcium Carbonate	16.42	16.42
Magnesium Carbonate	8.34	8.23
Calcium Sulphate	2.91	2.42
Magnesium Sulphate	6.67	6.25
Sodium Chloride	6.76	6.92
Sodium Sulphate	2.46	2.28
Combined Water	4.44	4.48
	48.00	47.00
pH value of sample	7.6	7.6
Free Chlorine		None
Metallic contamination		None

The composition of the supply represented by these samples is normal in each case and the slight difference between the amounts of the constitutents are such as might be expected in samples taken with an interval between the two of some eight or nine days.

The pH value shows that the samples were alkaline, therefore they are free from any actively corrosive action due to free acid, and as there is no positive evidence of the presence of free Chlorine it cannot be assumed that chlorination of the supply is, of itself, responsible for the attack on the copper piping.

Adverting to my report dated the 30th September, 1944, in view of the fact that the corrosion occurred in the cold water system, I am of the opinion that it would have been better to have used lead service piping when making the renewals in the cold water service.

Drainage and Sewerage.—There were no developments to report during the year in connection with the arrangements for drainage, sewerage or sewage disposal.

Rivers and Streams.—The sewage of the town is discharged into the Rivers Tyne and Don without any treatment.

This has been fully commented on in previous reports, and needs no further comment, except to state that it is unsatisfactory.

Closet Accommodation.—The water carriage system operates in the Borough, there being approximately 8,060 water closets and 15 ashclosets in the district, the latter being in the more isolated localities.

**Public Cleansing.**—The arrangements for public cleansing are as outlined in previous reports, and the collection and disposal of refuse and salvage is controlled by the Borough Engineer's Department. Owing to the shortage of and difficulty in getting dust bins, nuisances have been caused by the refuse being deposited in yards and back streets.

Sanitary Inspection of the Area.—The following report is submitted by Mr. R. C. Thompson, Chief Sanitary Inspector, under the Sanitary Officers (Outside London) Regulations, 1935, Para. 27 (18).

#### PUBLIC HEALTH ACTS.

-	

The total number of complaints received during 1945 was 535. It was again extremely difficult to get essential repairs to dwelling houses done owing to the shortage of labour and materials.

The number of outstanding Notices had so increased by the third quarter of the year that the Council decided in November to appoint a Housing Repairs Committee to meet fortnightly so as to expedite the procedure. At the first meeting of the Housing Repairs Committee after detailed discussion of ways and means in the matter of defective houses, it was resolved:—

"That whenever the Corporation do agree to carry out works required by notices served under the Housing Act, 1936, or under the Public Health Act, 1936, the Borough Engineer be and he hereby is instructed and and authorised accordingly that persons upon whom notices are served be informed that the Corporation is prepared to do the work by agreement.

In all cases wherever possible notices be served under the Housing Act, 1936, and that statutory notice be served at the outset in lieu of an informal notice under the normal practice and that any notice remaining uncomplied with, wholly or in part, stand referred to the Borough Engineer.

That in such cases authority be and it hereby is given for the service of a notice of Entry.

That for the time being the Borough Engineer give priority to work required under notices,

That the builders, agents and owners be invited to a meeting to be held on the 6th December, 1945, in the Town Hall, with a view to obtaining their co-operation in ensuring that to the greatest possible extent during the winter months the houses are kept as well repaired as possible."

#### Rats and Mice Destruction Act, 1919-Infestation Order, 1943.

During the year a further survey was made of the Borough for Rodent Infestations and 70 premises were found where there was evidence of infestation.

A maintenance treatment of sewers was carried out in accordance with the Ministry of Food Circular to local authorities N.S. No. 6, and it was estimated that 413 rats were killed.

The Council's three sanitary inspectors attended the one-day instructional refresher course, and three rodent operators from the Borough Engineer's Department attended a two-day course of instruction classes on rodent control arranged by the Ministry of Food in Newcastle-upon-Tyne.

#### Fish Friers and Offensive Trades.

No. of	fish	friers' pro	emises		10
No. of	rag	and bone	dealers'	premises	1

All premises were visited during the year. At five premises it was necessary to enforce certain repairs and cleansing. Owing to the unsatisfactory condition at one of these premises they had to be closed. One was re-opened.

Slaughterhouses.—There are no premises in the Borough licensed as slaughterhouses.

Slaughter of Animals Act, 1933.—No applications were received during the year for slaughtermen's licences.

**Swimming Baths and Pools.**—The Corporation owns a swimming bath situated in Walter Street, Jarrow, which was open for the use of the public during the year. There is no system of filtration of the swimming bath water, but the bath is emptied and refilled three times per week and the water is chlorinated.

During the year the application of the Corporation to the Ministry of Health for sanction to instal a modern purification plant was awaiting the approval of the Ministry.

Schools.—No public elementary school was closed in order to prevent the spread of infectious diseases during the year. School children who are contacts of cases of infectious disease are notified to the School Medical Authority together with a recommendation for exclusion from school.

Infectious Diseases.—In all cases of infectious diseases occurring within the Borough and requiring removal to hospital, a Sanitary Inspector visits the houses, carries out any necessary disinfection and advises as to proper precautions.

70 houses were disinfected after infectious diseases.

16 lots of bedding were fumigated or destroyed.

Disinfestation.—During the year 159 sulphur candles were issued for treatment of verminous houses.

#### Factories Act, 1937.

No. of inspections made by Sanitary Inspectors	17
Defects found:—	
Sanitary accommodation unsuitable or defective	1
General cleansing required	2
These defects were later remedied,	

### VI. Housing.

#### Housing Statistics for the Year 1945.

The following is a summary of the different types of houses erected by the Local Authority up to 31st December, 1945:—

	Built Housin	g Act,	Housing Act, 1930-1936 for s			Housing Acts, slum clearance poses		
No, of Rooms	5	4	5	4	5	4	3 (Age	2 ed Persons)
Houses built on Monkton Estate	150	28

which Demolition Orders were made	1
(2) Number of dwelling-houses demolished in	ै
nursuance of Demolition Orders	1

### VII. Inspection and Supervision of Food.

The following report is submitted by Mr. R. C. Thompson, Chief Sanitary Inspector: —

#### Milk Supply.

#### Milk (Special Designations) Regulations, 1936 to 1941.

One licence was granted to carry on the process of "Pasteurising" Milk by the High Temperature-Short Time method of pasteurisation as allowed by the 1941 Regulations.

One producer within the Borough is licensed under the Regulations by Durham County Council for the production of Accredited Milk,

#### Results of Bacteriological Examinations of Milk.

	No. of Samples		
	Submitted.	Passed.	Failed.
Pasteurised Milk—			
Methylene Blue Test	4	3	1
Plate Count Test	6	6	
Phosphatase Test	6	5	1

#### Milk and Dairies Order, 1926.

The following are details of registrations under this Ord	er:—
No. of wholesale and retail purveyors of milk	100
No. of dairies	19
No. of cowkeepers	6

Of the retail purveyors registered 75 are restricted to the sale of bottled milk only.

The dairies and milk purveyors premises have been periodically visited during the year.

#### Inspection of Meat and Slaughterhouses.

#### The Public Health (Meat Regulations), 1924.

No private premises in the Borough are now licensed for use as slaughterhouses. Slaughtering for the area is carried out under Government control at the South Shields Public Slaughterhouse and the meat is allocated and distributed to the butchers in Jarrow.

A number of licences were granted during the year by the Local Food Officer to pig-keepers allowing the slaughter of pigs for home consumption. Seventeen pigs were slaughtered and on inspection were found to be satisfactory.

Periodical inspections were made to see that the requirements of the Regulations were observed in shops where meat is sold.

There were no meat stalls in the Borough.

#### Inspection of Food Preparing Places.

(Food and Drugs Act, 1938, Sections 13 and 14).

Periodical visits have been made to food preparing places under these

Sections of the Act which specify certain sanitary requirements designed as precautions against the contamination of food.

**Bakeries.**—The fourteen bakeries within the Borough were inspected Structural improvements were carried out at one bakery and notices to cleanse and limewash the premises were served in relation to three other bakeries.

Ice Cream Premises.—There are five premises registered for the manufacture and sale of ice cream, and six premises registered for the sale of ice cream only. At three of these premises extensive alterations and improvements have been carried out and the others brought into conformity with the requirements of these sections.

#### Food Condemned during the Year.

The following is a list of food condemned during the year as unfit for human consumption, and surrendered for disposal through appropriate salvage channels:—

Beef	172] lbs.
Pork	24 lbs.
Bacon	84 lbs.
Veal	2 lbs.
Brawn	9 lbs.
Beef Suet	28 lbs.
Rabbits	29 (58 lbs.)
Sausages	136 lbs.
Onions	28 lbs.
Pickles	2 lbs.
Sauce	9 bottles.
Canned Meat	1974 lbs.
Canned Fish	61% lbs.
Canned Vegetables	91 lbs.

#### Remarks.

A sample, said to have been sold as a person's ration of butter, was submitted for analysis and the Public Analyst certified that—'This is not a sample of butter but consists of 100% Margarine.'

A formal check sample of butter was purchased and submitted for analysis and the Public Analyst certified that it was 'a sample of genuine butter.' The vendor was warned regarding the sale of margarine as a ration of butter.

#### Artificial Gream. (Food & Drugs Act, 1938, Sects. 27/29).

There are no premises in the district to which these sections of the Act relating to the sale or manufacture of artificial cream applies. One factory is producing a confectionery filling and these premises have been periodically inspected. During the year this firm commenced a scheme whereby ice-cream makers sent to them their allocation of Roller Processed Skim Milk Powder and Margarine and they reconstituted it into "Milk," which they stated, on analysis, was similar to that of Full Cream Liquid Milk, and sold at 2/- per gallon. This matter was taken up with the Ministry of Food and eventually this processing was

stopped. A sample of this product was submitted for bacteriological examination with the following results:—

(1) No. of bacteria per ml. (48 hours at 37° C) = 144,000.

(2) Coliform	Test		 1/10 ml.	1/100 ml.
	Tube	1	Positive.	Positive.
	Tube	2	 Positive.	Positive.
	Tube	3	Positive.	Positive.

### The Public Health (Condensed Milk & Dried Milk) Regulations, 1923 and 1927.

The sample of condensed milk submitted for analysis complied with the requirements of these regulations (as amended by Defence Regulations) which specify standards and labels for the different grades.

### The Public Health (Preservatives, etc., in Food) Regulations, 1925 to 1939.

The samples of food submitted for analysis under the Food and Drugs Act complied with the requirements of these Regulations (as amended by Defence Regulations) which specify the type and quantity of preservatives which may be used in certain articles of food.

#### Chemical and Bacteriological Examination of Food.

Chemical examination of food is undertaken by the Public Analyst, C. J. H. Stock, Esq., B.Sc., F.I.C., of Darlington.

Bacteriological and biological examinations are undertaken at the Joint Committee's Central Public Health Laboratory, King's College, Newcastle-upon-Tyne.

# VIII. Prevalence of, and Control over, Infectious and other Diseases.

During 1945 there were no alterations to the list of notifiable diseases. The total number of infectious diseases notifications received during the year was 482 compared with 667 in 1944. Measles and Whooping Cough, which became notifiable in October, 1939, were responsible for 163 and 91 notifications respectively, compared with 291 and 94 in 1944. Disregarding the notifications of Measles and Whooping Cough, the remaining notifications totalled 228.

The only increases that occurred on the annual figures for 1944 were Diphtheria 11, Pulmonary Tuberculosis 5, Erysipelas 1.

Substantial decreases were recorded as follows:—Measles 128, Pnuemonia 57. Small reductions occurred in the number of cases of Scarlet Fever, Whooping Cough, Puerperal Pyrexia, and Non-Pulmonary Tuberculosis. No cases of the following diseases were notified:—Smallpox, Encephalitis Lethargica, Enteric Fever, Cerebro Spinal Fever, Dysentery, Poliomyelitis, Malaria or Ophthalmia Neonatorum.

It was not found necessary to close any schools during the year on account of infectious diseases.

#### 1. Scarlet Fever.

The total number of new cases notified during the year was 13. No return cases occurred during the year. The disease was of a mild character and no deaths were recorded.

#### 2. Diphtheria.

During the year 58 cases were notified as against 47 in 1944. The incidence was greatest in the South and Central Wards, where 23 cases were notified. Three deaths were recorded. Immunisation continued during the year, the material being obtained from King's College, Newcastle, under the arrangements set out in the Ministry of Health Circular 2230. The following are statistics of the number of children immunised under the Council's Scheme:—

Course completed between Jan. 1st, 1945, and Dec. 31st, 1945:

Under	5 years	 529
5 - 15	years	 111

640

Private pracitioners in the Borough also immunised a number of children privately. Sweets were again supplied during the year to encourage the children to come forward. At the close of the year it was estimated that the total number of children in the 0-5 group was 2,198 of whom 1,257 or 57.19% had been immunised. The percentage, disregarding those under one year of age who are not usually immunised, was 72.32. The estimated number in the 5 to 15 group was 4,735 of whom 2,924 or 66.83% had completed the course of immunisation.

During the year 160,000 units of anti-toxin were distributed to the practitioners of the Borough.

#### Pneumonia.

72 notifications were received during the year, as compared with 129 in 1944, the majority of the cases occurring during the winter months. Ward distribution was fairly uniform. 3 cases occurred in children under the age of one year, compared with 24 in 1944.

There are no existing facilities for the typing of pneumococci or for the provision of appropriate type sera.

#### 4. Puerperal Pyrexia.

Five notifications were received during the year. No deaths were, however, recorded from this cause.

#### 5. Erysipelas.

Fourteen notifications were received during the year, an increase of one on the previous year—no deaths were recorded. No cases were admitted to the Isolation Hospital.

#### 6. Measles.

Notifications of this disease showed a decrease from 291 in 1944 to 163 in 1945. The greater number occurred in the 5-10 age group. There were no deaths.

#### 7. Whooping Cough.

Notifications totalled 91 compared with 94 in 1944. There were no deaths,

#### 8. Tuberculosis.

The total number of new cases of Tuberculosis notified during 1945 was 66, pulmonary 58 and non-pulmonary 8. This represents an increase of 4 on the notifications received in 1944, and an incidence rate of Tuberculosis of 2.52 per 1,000 population, compared with 2.37 in 1944.

The number of non-pulmonary cases remaining on the register at the end of the year was the lowest yet recorded.

#### 9. Uncleanliness.

During the year 49 cases of Scabies were detected among school children. These cases were treated with Benzyl Benzoate and infestation now shows a decline.

The above table includes primary notifications and also any other new cases which came to notice during the year other than by primary notifications. Of these latter there were one pulmonary male and two pulmonary females. Seven inward transfers (three pulmonary males, three pulmonary females, and one non-pulmonary female) were also added to the register during the year.

Two deaths (6.6% of the total deaths from tuberculosis) occurred amongst persons who had not been notified to be suffering from tuberculosis.

The following tables give the number of cases of tuberculosis registered in the Borough at the beginning and end of the year, and the number of cases removed from the register during the year, with the reason for removal:—

Sex.		Tuberculosis	cases of s on Register ment of year.	No of cases of Tuberculosis on Registe at end of year.

### IX. Diseases of Animals Acts, 1894-1937, and the Agriculture Act, 1937 (Part Iv.).

To the Chairman and Members of the Health Committee.

MR. CHAIRMAN, LADIES AND GENTLEMEN,

The following is a brief summary of the work carried out in the Borough during the year, 1945.

I am,

Your obedient servant,
ROBT, C. THOMPSON,
Local Inspector under the Diseases
of Animals Acts.

#### Foot and Mouth Disease.

There were no cases of Foot and Mouth Disease in the Borough during the year.

#### Preventive Orders.

Foot and Mouth Disease (Packing Materials) Orders, 1925 and 1926. Foot and Mouth Disease (Boiling of Animal Foodstuffs) Orders, 1932-1940.

Kitchen Waste (Licensing of Private Collectors) (Consolidation and Extension) Order, 1942.

Foot and Mouth Disease (Disinfection of Road Vehicles) Orders, 1941-1942.

Importation of Meat, etc. (Wrapping Materials) Orders, 1932 & 1939.

The Borough of Jarrow is included in the Scheduled Area in the Kitchen Waste (Licensing of Private Collectors) (Consolidation and Extension) Order of 1942. In a Scheduled Area, the collection of Kitchen Waste is prohibited, except by Local Authorities, exempted classes of stock-keepers and persons licensed by the Ministry of Agriculture and Fisheries.

Stock-keepers and Butchers premises have been visited regarding the compliance with these Orders.

#### Tuberculosis Orders, 1938-1946.

One cow on a dairy farm in the Borough was slaughtered under the above Order. The premises were cleansed and disinfected.

#### Swine Fever Orders, 1938-1940.

There were eight piggeries in use during the year and these have been visited for any breach of the Orders relating to them.

#### Regulation of Movement of Swine Orders, 1922-1941.

The following movements were licensed under these orders during the year:—

#### The Movement of Animals (Records) Order, 1925.

During the year when stock-keepers premises were visited, attention was called to the requirements of this Order, and the necessity for the records being accurately kept.

#### Parasitic Mange Order, 1938.

Information was received that a horse on premises in the Borough was suffering from Parasitic Mange. The premises were visited and the horse seen. The Divisional Inspector of the Ministry of Agriculture and Fisheries was notified and the horse was examined by a Veterinary Inspector, and found that it was not suffering from Parasitic Mange.

#### Importation of Animals Order, 1930.

An officer of a vessel lying at the Mercantile Dry Dock Co. Ltd., dock reported that sheep were on board the vessel. The vessel was visited. There was no contravention of the above Order. A copy of Form No. 812 T.A.—Notices to Masters of vessels was sent to the Master of this vessel.

## X. Report on Shops Acts (1912-1938) for the Year 1945.

#### To the Chairman and Members of the Health Committee.

MR. CHAIRMAN, LADIES AND GENTLEMEN,

I have the honour to submit my eighth Annual Report for the Year ended 31st December, 1945.

#### Shops Acts, 1912-1938.

In the administration of the above Acts, 407 shops are subject to inspection.

There are 130 unoccupied shops,

In accordance with the Regulations made under the Defence (General) Regulations 60 AB, the closing hours for shops in the Borough were fixed from the 4th November, 1945, to 2nd March, 1946, as 7-30 p.m. on the late day and 6 p.m. on other days, except 1 p.m. on the early closing day. There are certain exceptions and these shops are permitted to remain open until 9 p.m. on the late day and 8 p.m. on other days.

The Council made an Order regarding barbers and hairdressers under which the closing hours were fixed at 8 p.m. on the late day, 7 p.m. on other days except 1 p.m. on the early closing day.

There were no extensions of hours during the Christmas period.

There are a large number of shops being closed at an earlier hour than the statutory closing hours.

One of the Shops Inspectors resigned 31st August, 1945, and had not been replaced at the end of the year.

I am,

Mr. Chairman, Ladies and Gentlemen,
Your obedient Servant,
ROBT. C. THOMPSON,
Chief Shops Inspector.,

#### Summary of Work done during 1945:-

No, of visits made to shops during the year	93
No. of infringements of the Acts, etc.	66
No. of letters of instruction sent	20
No. of interviews with shop-keepers at office	4

The appended tables show: -

- Principal Acts and Regulations administered by the Department.
- 2. The nature of the infringements of the Shops Acts.
- 3. Types of business carried on in 'Shops' under the Acts.

#### TABLE No. 1.

The principal Acts and Regulations administered by the Department are as follows:—

Shops Act, 1912.

Shops Act, 1913.

Shops (Hours of Closing) Act, 1928, as amended by Section 60AB of the Defence Regulations, 1939.

Shops Act, 1934, as amended by the Young Persons (Employment) Act, 1938, Part 2.

Shops Act, 1936.

Retail Meat Dealers Shops (Sunday Closing) Act, 1936.

Shops (Sunday Trading Restrictions) Act, 1936.

Young Persons (Employment) Act, 1938.

Shops Regulations, 1912.

Shops Regulations, 1913.

Shops Regulations, 1937.

Shops Regulations, 1939.

Shops (Procedure for Jewish Tribunals) Regulations, 1937.

#### Local Orders made by the Council:-

Jarrow Shops Half Holiday Order, No. 1.

Jarrow Shops Half Holiday Order, No. 2.

Jarrow Shops Half Holiday Exemption Order, No. 1.

Jarrow Butchers Weekly Half Holiday & Closing Order, 1920.

Jarrow (Extended Area) Shops Weekly Half Holiday Exemption Order, 1937.

Jarrow (Extended Area) Shops Weekly Half Holiday Order, 1937.

Jarrow (Extended Area) Shops Extension & Weekly Half Holiday Order, 1937.

Jarrow (Extended Area) Butchers Shops Closing Order, 1937.

### TABLE No. 2.

### Infringements of the Shops Acts, 1912-1938.
