HEALTH DEPARTMENT,
TOWN HALL,
JARROW,
Co. DURHAM
AUGUST, 1958.

#### To the Mayor, Aldermen and Burgesses of the Borough of Jarrow.

YOUR WORSHIP, LADIES AND GENTLEMEN,

I have pleasure in submitting the Annual Report of the Medical Officer of Health on the health of the Borough and the work in the Health Department for the year 1957.

The health statistics are set out in detail in the body of the Report; there are, however, several features on which I should like to comment.

The principal vital statistics show no significant change compared with 1956. The population of the Borough increased during the year by 100 to 29,240 and the natural increase, excess of births over deaths, was 236. The Birth Rate showed a slight reduction to 20.55 but the Standardised Rate of 18.2 (i.e. corrected for age structure and sex of the population) exceeds the figure of 16.1 for England and Wales. The Death Rate of 11.9 was slightly less than in 1956 but the standardised Rate of 14.8 is well above the figure of 11.5 for England and Wales. Heart Disease and Cancer again accounted for approximately half of the deaths during the year, and Respiratory Disease was again an important cause of death especially amongst men.

The Still Birth Rate and Infant Mortality Rate show little change compared with 1956,

An important development in the field of Preventive Medicine has been the increased scope of immunisation against poliomyelitis; during the year more than 1.300 people, mostly children, received injections.

In the environment sphere, pollution of river and atmosphere, continue to give cause for concern,

Atmospheric pollution, which results in dirt, nuisance, and a proved menace to health, must not nowadays be accepted as inevitable in an urban or industrial area. During the year approximately 60 tons per square mile of insoluble dirt, ash, etc., fell in the area of the Borough; this takes no account of volatile contaminants, notably sulphur dioxide which is well known as a respiratory irritant and is an important contributory factor in the high incidence of respiratory disease in industrial areas.

The Clean Air Act of 1956 gives Local Authorities powers to deal with this problem but legislation itself cannot be effective without the resoperation and support of both industrialists and householders. The putrid condition of the River Tyne is totally unacceptable in a civilised community and the difficulties of dealing with this problem have increased greatly with the neglect of many years. In the course its last few miles the river receives untreated sewage from a population of approximately 800,000. The final solution of this vital problem must depend on co-operation amongst the local authorities in the Tyneside Conurbation and also on generous financial assistance from the Government.

Poliomyelitis and Cancer of the Lung are worthy of comparison as public health problems. The mortality in recent years from these two diseases in England and Wales is shown in the following Tables:—

Year	Deaths from Poliomyelitis	Deaths from Lung Cancer (to nearest 1,000)
1949	643	11,000
1950	734	12,000
1951	191	13,000
1952	275	14,000
1953	320	15,000
1954	112	16,000
1955	241	17,000
1956	114	18,000
1957	225	19,000

Cancer of the Lung, a terrible and mortal disease, occurs 13 times more frequently amongst light cigarette smokers (i.e. smoking less than 14 cigarettes per day) than amongst non-cigarette smokers; for heavy cigarette smokers (i.e. smoking more than 25 cigarettes per day) the liability is increased to 40 times that of non-cigarette smokers. This appalling toll of death and suffering could be almost eliminated in a generation, if only public and official concern and effort could be matched with that at present devoted to the prevention of Poliomyelitis, a trivial problem in comparison. The benefit which a child receives from parents and others by example and education regarding the danger of cigarette smoking far exceeds the value of immunisation against poliomyelitis.

In conclusion, I wish to record my appreciation of the assistance and co-operation I have received from Chairmen, Members of the Council, other Officials and my Staff in the Health Department.

> T. C. FALCONER, Medical Officer of Health

#### SECTION A.

#### Statistics of the Area.

#### (1) General Statistics.

Area of the Borough (including 260 acres of inland water) 1,985 acres.

Estimated Resident Population: 29,240.

No. of inhabited houses: - 9,078.

No. of Council houses: -3,993.

Estimated number of sub-standard houses: -976.

House density (persons per house): -3.2.

House density (houses per acre): -5.3,

Rateable Value: -£245,410.

Sum represented by a Penny Rate: -£1014,303.

#### (2) Physical and Social Conditions.

#### (a) Description of the Area.

The Borough of Jarrow is roughly rectangular in shape. The East and West boundaries are contiguous with those of South Shields County Borough and Hebburn Urban District respectively, while the Newcastle Sunderland Railway line delineates Jarrow from Boldon Urban District.

The River Tyne forms the northern boundary. The water-front is about 2 miles long and contains a large steel works, ship building and repair yards and an oil wharf. The eastern boundary is formed by the Jarrow Slake where timber yards occupy 150 acres. A vehicular ferry and pedestrian tunnel link Jarrow with Wallsend, Future development envisages a large vehicular tunnel linking Durham County with Northumberland, near this pedestrian tunnel.

The houses adjoining the riverside works are sub-standard and are being considered for slum clearance. Because of shortage of land for re-housing in the Borough, much of this area will need to be cleared and re-developed.

The houses in the remaining two-thirds of the Borough have been built in this Century. The population density and house density of this area is approximately about half that of the northern third of the Borough.

#### (b) Employment.

Mr. J. J. Thompson, Manager of the Employment Exchange, has kindly supplied the following information relating to Employment, Unemployment, Disablement and Rehabilitation,

Estimated Numbers of Employees in the Area of Jarrow and Hebburn,

Industry or Group.	Males.	Females.	Total
Electrical Engineering	5,843	1,744	7,587
Shipbuilding, Shiprepairing and Marine Engineering	5,757	203	5,960
Light Electrical Engineering	972	782	1,754
General Engineering	1,332	297	1,629
Metal Manufacture	1,395	122	1,517
National & Local Government			
& Professional Services	772	645	1,417
Distributive Trades	409	891	1,300
Building & Civil Engineering	1,213	19	1,232
Constructional Engineering	791	17	808
Chemicals and Dyes	507	214	721
Catering	100	601	701

Transport	272	29	301
Manufacture of Food & Drink	111	159	270
Miscellaneous	1,040	523	1,563
Totals	20,764	6,368	27,132

#### (c) Unemployment.

During the first quarter of the year the average number of unemployed men and women registered as unemployed was approximately 700,

There was a gradual decrease throughout the year and in the last quarter the average was 550. This compares favourably with the figures for the previous year.

#### (d) Disablement and Handicapped Persons.

The following persons in Hebburn and Jarrow are registered as disabled within the meaning of the Disabled Persons (Employment) Act, 1944.

LARROW.

	Men.	Women.
Surgical	 158	27
Medical	 182	31
Psychiatric	 15	2

#### (2) LABORATORY FACILITIES.

Pathological and bacteriological specimens requiring examination are sent to the Public Health Laboratory, Newcastle General Hospital. Hereunder is a summary of the investigations carried out and the results obtained:—

	Positive	Negative.	Total.
Tuberculosis Sputum	. 14	2	16
Enteric, Dysentery & Food Poisoni	ng		
Groups	30	61	91
Total	44	63	107
	the state of the state of the	Market Springer Street, Springer Springer, Spr	Mary Management and

The Comparative Total for 1956 was 1,093.

## (3) NATIONAL ASSISTANCE ACT 1948. NATIONAL ASSISTANCE (AMENDMENT) ACT 1951.

Section 47—Removal to suitable premises of persons in need of care and attention.

No action was necessary under this Section of the Act.

During the year visits were made by the Medical Officer of Health to a number of old people in the Borough and where necessary arrangements were made for admission to hostel or hospital, or the services of a home help were provided.

#### Section 50-Burial and Cremation of the Dead.

Applications were made for the burial of one aged person. Arrangements were made for the burial at a cost of £17.5s.

#### (4) REFUSE REMOVAL AND DISPOSAL.

The Borough Engineer has kindly supplied the following details of this service which is under his control:—

#### Refuse Collection.

No, of premises from which refuse is collected10	),239
Total refuse disposed of14	,639 tons
Methods of disposal—	
Controlled tipping	98%
Separation and incineration	2%
Street Cleansing.	
Mileage of streets cleansed	45
Frequency of cleansing—	
At least once a day	11%
Three to five times weekly	11%
Twice weekly	16%
Once weekly	26%
Once fortnightly	36%
	4,833
Percentage of street cleansing done by	
mechanical means	51%
Weight of street and gulley refuse	1,965 tons

#### (5) RODENT CONTROL.

## The Prevention of Damage by Pests Act, 1949. The Prevention of Damage by Pests (Application to Shipping) Order, 1951.

One full-time Rodent Operator has been employed during the year, Another operator was engaged from 25th November, 1957. The work is carried out under the supervision of the Chief Public Health Inspector,

This service is free to householders but a charge is made for business premises.

The following is a summary of the work completed during the year: No. of complaints received and investigated No. of visits to premises 701 No. of business premises treated . 20 No, of residential premises treated 171 No. of allotments treated ..... 8 No. of premises surveyed where treatment not necessary... 59 No. of sites surveyed where treatment not necessary ...... 5 No. of 3rd party premises treated and cost charged ....... 20 Total cost charged £22 15s. 1d.

#### Sewer Maintenance Treatment.

Two sewer maintenance treatments were carried out: -

Treatment No.	No. of Man- holes Baited.	No. of Man- holes showing Pre-bait takes	No. of Man- holes showing Poison Bait takes.
25	291	140	116
26	292	171	101

#### Corporation Tip.

Two treatments were carried out: -

Treatment	Points showing Pre-	Points showing
No.	bait Takes.	Poison Bait Takes
3	26	18
4	36	30

#### No. 2 Quay.

One treatment was carried out :-

Treatment	Points showing Pre-	Points showing
No.	bait Takes.	Poison Bait Takes.
23	27	20

#### Corporation properties treated other than tips and sewers

#### B. NATIONAL HEALTH SERVICE ACT, 1946. (PART III).

The following personal health services are provided by Durham County Council and are administered through No. 2 Area Health Sub-Committee on which the Borough is represented by five members.

### CARE OF MOTHERS AND YOUNG CHILDREN. Section 22.

The following clinics are held weekly:-

#### Ante-Natal.

Sessions: Walter Street Clinic—Alternate Thursdays 9 a.m.—4 p.m Gordon House—Alternate Mondays 1-30 p.m.

> —Tuesday, Wednesday & Friday 1-30 p.m. (for Danesfield Bookings).

The following table shows the number of expectant mothers who attended the clinics and the number of visits which these mothers paid to the clinics during the year:—

			No. of Mothers.	No. of Attendances
Gordon	House	 	37	125
Walter	Street	 	147	519
	Total	 	184	644

#### Child Welfare.

#### Sessions:

Walter Street Clinic-Monday &	Tuesday	 	1-30 p.m.
Simonside Clinic-Wednesday		 ***	1-30 p.m.

The following table shows the number of infants and toddlers who attended the clinic and the number of visits these children made to the clinic throughout the year:—

Centre	No	. of Child	ren	Attendances			
	Under	1-2	2-5	Under	1-2	2-5	
	1 year	years	years	1 year	years	years	
Walter Street	321	93	131	2543	346	349	
Simonside	190	41		20	149	200	
Totals	511	134	195	2563	495	549	

#### Post-Natal.

Session: Walter Street Clinic-Alternate Thursdays 1-30 p.m.

16 mothers attended the clinic on one or more occasions. The total number of attendances during the year was 32.

#### Birth Control.

Session: Walter Street Clinic—Alternate Thursdays 1-30 p.m. Advice was given to 88 mothers.

#### Artificial Sunlight Clinic,

#### Sessions:

Walter Street Clinic-Monday & Friday 9 a.m. & 1-30 p.m.

175 mothers and children attended the clinic during the year. The total number of attendances during the year was 1,465.

#### MIDWIFERY. Section 23.

There are five County Midwives in Jarrow. No Midwives practice privately in the area. During the year they attended 263 confinements which represents 43.76% of the total births. Last year 32.66% of expectant mothers had their babies at home.

#### Domiciliary Midwifery,

at delivery .	13	83	54	123	151				
Total	20	06	57	136	167				

#### HEALTH VISITING. Section 24.

Four health visitors serve the Borough. The following domiciliary visits were paid during 1957:—

Maternity and Chil	d Welfar		6,272
Tuberculosis			1,061
Mental deficiency			188
Schools			48
General Health			6
Aged People			31
			7,606

The percentage of ineffective visits was 13.2%...

#### HOME NURSING. Section 25.

Two whole-time nurses were employed during the year They made the following visits:—

			Cases.	Visits.
Medical			197	5,807
Surgical			95	2,224
Tuberculos	sis		8	309
Maternal o	complicati	ons	2	26
Infectious	Diseases		1	15
Others				84
			303	8,465

### VACCINATION AND IMMUNISATION. Section 26.

The following tables give the number of children vaccinated and immunised at the clinics and by the doctors in the Borough:—

	V.	CCIN	ATION.	RE-VACCINATION.					
Under 1 year	1-5	5-15	15 & over	Total	1-15	15 & over	Total		
201	19	6	11	237	5	21	26		

DIPHTHERIA IMMUNISATION: Session—Walter Street Clinic— Friday 9-30 a.m.

Primary Immunisations.							Re-inforcing injections.						
Und 1 yea		1	2	3	4	5-9	10-14	Total	3	4	5-9	10-14	Total
160	6	105	28	12	14	12	1	338		57	70	-	127

#### IMMUNISATION ACAINST POLIOMYELITIS

In 1956, when immunisation against poliomyelitis was first commenced, the vaccine was in short supply and immunisation could be offered only to children born in certain months in the years 1947 to 1954 inclusive. The scoply position, however, improved during 1957 and vaccine from a second British manufacturer became available. In accordance with instructions received from the Ministry of Health in May, 1957, the eligible groups were extended to include children born in the years 1947 to 1954 inclusive who had not hitherto been registered and also children born in the years 1955 and 1956. In November, 1957, the offer of vaccine was further extended to include children born in the years 1943 to 1946 inclusive and children born in 1957 who had attained the age of six months. At the same time, other categories who became eligible included expectant mothers. Medical Practitioners and their households, Ambulance drivers and their families etc.; these categories were not, however, dealt with until early 1958.

During the year 1957 the complete course of two injections was given to 1076 children and 277 children received one injection.

#### INFLUENZA VACCINE

In November, 1957, a supply of vaccine designed to give protection against Asian type influenza was received; vaccination was offered to general practitioners, ambulance drivers, health visitors, district nurses, and midwives, and the offer was later extended to include domestic helps.

#### AMBULANCE SERVICE. Section 27.

The Borough of Jarrow is served by the Hebburn Ambulance Control which is situated at 1, St. John's Avenue, Hebburn. Telephone 32157.

The Control is manned by four clerk-telephonists maintaining a 24-hour service. No. 2 Health Area is covered primarily by vehicles from the Hebburn Depot which has an establishment of one head driver, 28 drivers and 8 ambulances, of which 2 at present are radio-controlled.

It is intended to build a new depot at Hebburn and also to set up a Co-ordinating Control Centre near Durham. This should ensure a more efficient service.

The Hebburn Depot serves the population in the Borough of Jarrow, the Urban Districts of Felling, Hebburn, Boldon and Washington and part of Sunderland Rural District. The present population is 125,000 persons of which about two-thirds live on the river side in Jarrow, Hebburn and Felling.

The table below gives details of the work done by Hebburn Depot during the year:—

C. II.	Pers	sons carried	1.	
Calls.	Stretcher.	Sitting	Total.	Mileage.
11.329	5,614	22,572	28,186	164,320

## PREVENTION OF ILLNESS, CARE and AFTER CARE. Section 28.

Cases discharged from hospital and requiring after-care are treated by the home nurses or supervised and advised by the health visitors. Sick room equipment such as urine bottles, bed pans, bed rests, air cushions, mattresses and rubber sheeting, can be had on loan.

### DOMESTIC HELP SERVICE. Section 29.

67 home helps were employed in the Borough during the year and they attended 88 cases. In 1957 there were 26 new cases provided with home helps. The following types of cases were served:—

Old Age I	ensioners		110
Sickness			4
Tuberculos	sis		
Maternity			
			114

#### C. HOSPITAL SERVICES.

The local hospital services are administered by the South Shields and District Hospital Management Committee on behalf of the Newcastle Regional Hospital Board. The following hospitals serve this area:—

Hospital.	Type.	No. of Beds.	Departments.	Clinics.	
Palmer Memorial,	General 25		General Surgery E.N.T. Dermatology Casualty	General Surger Medical Dermatology E.N.T.	
Primrose Hill,	CHRONIC & LONG TERM SICK	24	Chronic Sick	_	
Danesfield	MATERNITY	15	Obstetrics	Ante-Natal	
Ellison Hall Infy.,	General	27	General Surgery E.N.T. Casualty	General Surgery	
Hebburn Hospital,	CHRONIC & LONG TERM SICK	24	Chronic Sick	_	

Infectious Diseases cases are admitted to Sheriff Hill Hospital, Gateshead and Walkergate Hospital, Newcastle. Surgical and medical cases are treated at the Ingham Infirmary and the General Hospital, South Shields. A Geriatric Unit at the latter hospital admits chronic sick cases from the Borough.

#### CLINICS.

#### Chest Clinic.

This clinic is situated at Homer Villa, St. John's Terrace, Jarrow, and is controlled by the Regional Hospital Board. The times of the clinics are as follows:—

#### Venereal Diseases Clinic.

The clinics at Newcastle and South Shields serve this area. The times of attendances are as follows:—

#### South Shields Clinic, Stanhope Road.

#### Newcastle Ceneral Hospital.

Males & Females: Monday to Friday—9-30 a.m. to 12 noon and 2 p.m. to 7 p.m.

Persons residing in Jarrow treated at V.D. Clinics.

#### Mass X-Ray.

I am indebted to Dr. Marienfeld for the following figures :-

#### Mass Miniature Radiography held in Jarrow Area-1957

	Males.	Females.
Total Miniatures	1607	2012
Total Large Films	43	54
Total referred to Chest Clinic	13	18

#### Blood Transfusion.

The Centre for this area is situated in Newcastle. Regular blood donor sessions are held in the region served by the Newcastle centre.

Mr. G. Tait Hunter, the Regional Donor Organiser, has kindly given the following information about sessions held in Jarrow during 1957:—

No. of sessions held in Jarrow	4
No. of Donors attending (May)	194
No. of donors attending (November)	191
Panel strength at 31/12/57	304
New donors 1957	47

#### D. EXECUTIVE COUNCIL.

There are fourteen doctors practising within the Borough; there are seven practices including three partnerships. The Simonside Housing Estate is served by the privately owned surgery premises in Perth Avenue which are shared by the doctors in the town.

#### OTHER LOCAL HEALTH AUTHORITY SERVICES.

#### (1) Distribution of Welfare Foods.

The following amounts of Welfare Foods were distributed during 1957:—

#### Walter St. Clinic. Simonside Clinic.

National Dried Milk	25.018	5,658
Cod Liver Oil	4,133	835
Vitamin Tablets	1,230	182
Orange Juice	19,356	4,456

#### Issuing Sessions: -

Walter Street: Monday 9-30 till 12. 1-30 p.m.

Tuesday 1-30 p.m. (Clinic mothers only).

Friday 1 p.m.

Simonside: Wednesday 1-30 p.m.

#### Report of the Chief Public Health Inspector.

Public Health Inspectors' Office, Fown Hall, Jarrow.

TO THE MEDICAL OFFICER OF HEALTH.

SIR,

In writing the Report for 1956, I thought it was to be my last report, but, the Council having retained my services for three months, I have pleasure in presenting the report of the work carried out by the Public Health Inspector's Department during the year 1957.

It will be noted that in some items the number of visits have changed perceptibly from those of 1956. This has been brought about by the Clearance Areas dealt with not being as large as those Areas in the previous year, nor was the work in relation to Food Hygiene so great as to the number of premises visited, but the actual work carried out was more apparent. Difficulty has again been met in enforcing the provisions of the Food Hygiene Regulations, 1955, in relation to small lock-up shops and combined house-shops.

The work for the immediate future will be the carrying out of the Council's Slum Clearance Programme; the provisions of the Clean Air Act and the continued work in relation to the Food Hygiene Regulations 1955.

There is still need for an additional Public Health Inspector so that the number of Inspectors will be equal to those employed in 1936.

> ROBT. C. THOMPSON, Chief Public Health Inspector.

#### SECTION C.

#### Sanitary Circumstances of the Area.

WATER SUPPLY.—The Sunderland and South Shields Water Company supplies the Borough with a piped supply of water which is constant in quantity and quality.

Service pipes are laid on to all premises within the Borough, but many of the houses in the old part of the town have the supply to a tap in the yard only.

No complaints in relation to the water supply have been received during the year,

C. A. Serpell, Esq., B.Eng., M.I.C.E., M.I.W.E., Engineer, of the Sunderland and South Shields Water Company has supplied the following summary of the bacteriological water examinations made in the Company's laboratory during 1957, which includes all the various sources which may supply Jarrow with water.

		Coliform Percentages					
		No. of Samples	Percentages Negative in 100 ml.	Percentage Positive in 100 ml			
Wells and oth	ier						
sources		225	92.4	7.6			
Reservoirs		99	88.9	11.1			
Taps		79	97.5	2.5			

In only 2% of all samples tested was there more than 1 coliform organism per 100 ml.

The whole of the water supplied by this Company is chlorinated.

#### BACTERIOLOGICAL EXAMINATIONS

Reports on Samples of Water submitted to the Public Health Laboratory.

No. of	Sample	No. o	f Coliform	Bacilli	MacConkey	2 days 37	C.
4	57			Nil per	100 ml.		
5	57			Nil per	100 ml,		
6	57			Xil per	100 ml.		
7	57			Nil per	100 ml.		
8	57			Nil per	100 ml		

The following Samples Nos. 2/57 and 3/57 were submitted to the Public Analyst who found as follows:—

Samples Nos. 2 57 & 3 57—Taken at 49 Thames Avenue, Calf Close Lane Estate.

Sample No. 2 57				Parts per 100,000
Chlorine as Chlorides				3.7000
Nitrogen as Nitrates				0.1552
Ammonia				0.0041
Albuminoid Ammonia				0.0048
Oxygen Absorption				0.0594
Injurious Metals				None
Total Solid Matter dried @	100°	C.		38.0000
pH value of Sample				7.5
Temporary Hardness				14.2 Degrees
Permanent Hardness				10.7 Degrees
Colour of Sample on H	lazen !	Scale		5
Appearance of Sample	in 2 fe	oot tube		Not quite Clear
Odour when heated to	50° C			None

#### MICROSCOPICAL EXAMINATION

Satisfactory.

#### BACTERIOLOGICAL EXAMINATION-Sample No. 3 57

Number of colonies on Nutrient Agar @ 37° C, after 72 hours—1 per ml. Number of colonies on Nutrient Agar @ 20-22° C, after 72 hours— 0 per ml.

Presumptive B. Coli Test @ 37° C. after 72 hours—Negative in 100 ml. Clostridium Welchii Test @ 45° C. in 40 ml.—Negative.

#### OBSERVATIONS

The chemical analysis of this sample affords no evidence of contamination by drainage associated with excessive nitrogenous constituents such as are usually associated with sewage, the microscopical examination shows that it is free from any contamination by matters derived from the surface and the bacteriological examination leaves no doubt that the supply represented by this sample is of the highest order of bacterial purity, consequently it is of good and wholesome quality for all domestic purposes.

Sample No. 10 57-Taken at 22, Ribble Walk, Primrose

			Pa	irts per 100,000
Chlorine as Chlorides				3.5500
Nitrogen as Nitrates				0.1221
Ammonia				0.0017
Albuminoid Ammonia				0.0055
Oxygen Absorption				0.0522
Injurious Metals				None
Total Solid Matter dried @	100	( .		40,0000
pH value of Sample				7.7
Temporary Hardness			15	.1 Degrees
Permanent Hardness			1.0	.7 Degrees
Colour of Sample on 1	lazen	Scale		3
Appearance of Sample				Not quite bright
Odour when heated to				one

#### MICROSCOPICAL EXAMINATION

Satisfactory.

#### BACTERIOLOGICAL EXAMINATION

Number of colonies on Nutrient Agar @ 37° C.	
after 72 hours	1 in 2 ml.
Number of colonies on Nutrient Agar @ 20-22°	
C, after 72 hours	3 in 2 ml,
Presumptive B. Coli Test @ 37° C. after	
72 hours	Negative in 100 ml.
Clostridium Welchii Test @ 45° C, in 40 ml	Negative
Residual Chlorine	None

#### **OBSERVATIONS**

The chemical analysis shows that this sample represents a supply free from excessive proportions of nitrogenous constituents, such as are usually associated with undesirable drainage, and there is no evidence of contamination by undesirable matters derived from the surface. The bacteriological examination shows that the sample is of a very high order of purity consequently the supply is of good and wholesome quality for human consumption.

Sulphur Dioxide (etc.) in air, measured by the mean rate of sulphation of a standard 'lead peroxide candle' exposed in the approved louvered box. The amounts are expressed as 'milligrams of sulphur trioxide fixed day per 100 square centimetres of Batch "A" standard lead peroxide"

Authority was given by the Council to purchase an additional Deposit Gauge and Lead Peroxide Candle. This will, however, not come into use until early in 1958.

"Prior Approval" was granted to Messrs. Shell Mex and B.P. Ltd., for the erection of boilers at their Jarrow Intsallation, Short Row, Jarrow

General Dealers	59	
_		199
No. of visits to food premises		353

#### The Food Hygiene Regulations 1955,

Many of the occupiers have complied with Regulations but there still remains a number of the smaller type of shop, especially the houseshop, where the full requirements of the Regulations have not been complied with.

#### The Ice Cream (Heat Treatment, etc.) Regulations, 1947-1952.

There are two premises registered for the manufacture of ice cream, and one of these was not in use during the year.

There are 52 premises registered for the sale of ice cream.

#### Report on Bacteriological Examination of Samples of Ice Cream.

16 samples of Ice Cream were submitted for the Methylene Blue Test and were graded as follows:—

Provisional	Grading.	No. o	Samples.
1			10
2			2
3			1
4			3

Letters of warning were sent to the Manufacturers/Vendors of the samples in Grade 4.

#### The Food and Drugs Act 1955.

The following table gives details of samples purchased under the Act and submitted to the Public Analyst and the results of his analyses:—

		samples s

\*One of these samples of Butter was submitted because of the taste.

The Analyst reports as follows:

"The complaint about the taste of the Butter represented by this sample has some foundation, for it appears to have been reconditioned to judge by the taste, but it is undoubtedly, genuine Butter."

†This Cream Cake was submitted to the Analyst because of a complaint of a foreign substance in it. The Analyst reports as follows:

"The foreign substance undoubtedly has been derived from a portion of rabbit skin to which the fur adheres, and it certainly is not in any way related to a mouse or other similar rodent, consequently there is no doubt that the cake represented by this sample is not fit for human consumption."

A letter was sent to the firm by the Town Clerk.

††Following the receipt of the County Analysist's Certificate, in relation to a sample of Prunes in Syrup purchased in this Borough, wherein it states: "This sample contained—'Tin—400 parts per million'."

Observations: "I am of the opinion that this sample contained an excessive amount of tin. Foodstuffs should not normally contain more than 250 parts per million of tin," the vendors of the prunes were requested by the Council to withdraw the remaining stock from sale. Not only did they stop the sale in the local store, but at all their stores throughout the country.

After protracted correspondence with the canners concerned, and their legal representatives who made the request, six tins of Prunes were purchased at the local Store; three tins were sent to the representatives of the canners for analysis which proved to be satisfactory, and the other three tins were sent to our Analyst who reports as follows:—

"Prunes in Syrup Nos. 39/57, 40/57 & 41/57-Informal."

In the case of Samples Nos. 39 57, 40 57 and 41 57 tests for contamination by Copper, Lead, Tin and Zine were carried out and the result was to show that not one of these samples was contaminated in these beyond a trace of copper which did not exceed 1 part per million in any case. In other respects the Prunes were of sound and wholesome quality."

The Council withdrew the request that the remaining stock be withdrawn from sale.

Mr. Angus Graham, Chief Inspector, Weights and Measures Department, Shire Hall, Durham, has kindly supplied a detailed list of the lifty-six food samples taken by his Staff in the Borough of Jarrow. All the samples were of genuine quality with the exception of Sample of Prunes which was found to contain 400 parts per million of tin, and two samples of milk. The necessary action has been taken.

#### Artificial Cream.

There are no registered premises in the Borough. There is a firm producing confectionery filling and these premises have been inspected periodically. A sample of this product was submitted for the Methylene Blue Test and was placed in Grade 1.

### The Public Health (Preservatives, etc., in Food) Regulations, 1925 to 1953.

The samples submitted to the Public Analyst complied with these Regulations.

#### SECTION F.

# Prevalence and Control of Infectious and other Diseases.

The total number of Infectious Diseases notified during 1957 was 1.094 compared with 832 in 1956. The only infectious disease showing a substantially increased number of notifications compared with the previous year was Measles (+663); the two diseases with the most significant reduction in incidence were Dysentery (-173) and Whooping Cough (-207).

#### Measles.

The Borough was amongst the first areas to be affected by the epidemic which began on Tyneside in December, 1956; in this month there were 121 notifications, and the following month, in January, 1957, notifications reached a peak of 508 after which the epidemic rapidly waned; however, few cases required admission to hospital and serious complications were rare.

#### Dysentery.

It is pleasing to record a substantial reduction in the number of notified cases of Dysentery to 14 compared with 187 the previous year. This, however, is no case of complacency as Sonne Dysentery continues to be endemic throughout Tyneside, The mild nature of the symptoms results in many cases not being diagnosed, with the resultant risk of spreading the infection.

#### Whooping Cough.

During the year only 54 cases were notified compared with 261 in 1956. There is little doubt that the fact that increasingly large numbers of children are now being immunised against this disease, is significant in the reduced incidence.

#### Puerperal Pyrexia.

There were 32 cases notified in 1957 compared with 13 in 1956. Nearly all these cases occurred in Danesfield Maternity Hospital. I am pleased to report that this does not represent a true increase in the incidence of this disease; it may be recalled that in my Annual Report of the previous year reference was made to the serious difficulties which had arisen owing to failure to notify cases. The increase in the number of notifications is due to the realisation of the vital need to notify such cases without delay; this has enabled me to co-operate more effectively in controlling this infection.

#### Influenza.

The epidemic of Asian Influenza which began in the Far East early in 1957 eventually reached the United Kingdom in the latter part of the year. Although Influenza is not a notifiable disease, it was possible to assess approximately the extent of the outbreak in the Borough from general practitioners and Ministry of National Insurance returns. Fortunately the nature of the illness proved to be less severe than expected with few complications.

#### Tuberculosis.

The number of new cases of Pulmonary Tuberculosis notified during 1957 was 42 compared with 66 in 1956. It is of interest to record that the reduction in incidence was greatest amongst older men, the same category in which there had been a substantial increase in 1957.

The table below shows the incidence of new cases and of deaths from tuberculosis over the last 20 years.

Year.	Respira	atory.	All ty	pes.
rear.	New Cases.	Deaths.	New Cases.	Death

#### APPENDIX I.

# Diseases of Animals Act, 1950, and the Agriculture Act, 1937, (Part 1X).

#### To the Chairman and Members of the Health Committee.

MR. CHAIRMAN, LADIES AND GENTLEMEN,

The following is a summary of the work carried out under these Acts and Orders made thereunder, during the year 1957.

I am,

Your obedient Servant,

ROBT. C. THOMPSON,

Local Inspector under the Diseases

of Animals Act.

#### Foot and Mouth Disease.

The Foot and Mouth Disease Order, 1928—1938.

The Foot and Mouth Disease (Controlled Areas Restrictions)

General Order 1938.

The Foot and Mouth Disease (Infected and Controlled Areas Restrictions)
(Amendment) Order 1956.

Notice was received of suspected Foot and Mouth Disease at S. Mallam's piggery, Saltgrass, Jarrow. The necessary action was taken and the pigs were examined by a Veterinary Inspector who issued a "Certificate of Suspected Disease" of Foot and Mouth Disease, on 14th March, 1957 in relation to ten pigs, and applied movement restrictions on a radius of five miles which on the same day was extended to ten miles of the Infected Place.

These Emergency Restrictions on Declaration of the Infected Area were withdrawn when the Minister of Agriculture, Fisheries and Food made the Foot and Mouth Disease (Infected Areas) Special Order No. 15—1957, making a "Declaration of Foot and Mouth Disease Infected Area around Jarrow, Co. Durham."

In all 100 pigs (including 10 pigs from a nearby piggery) and four young beasts were slaughtered and buried on the premises.

The Foot and Mouth Disease (Infected Areas) Special Order No. 16—1957 contracted the Area on the 29th March, 1957 and revoked Order No. 15 on 15th April, 1957 which freed the Area.

The premises were thoroughly cleansed and disinfected.

A person was reported for having moved a goat within two miles of the "Intected Place."

#### The Movement of Animals (Records) Orders 1925

The said person was reported for moving a goat from premises to premises and not keeping a record of the Movement in the prescribed form.

The following Orders came into operation during the year: -

The Foot and Mouth Disease (Infected Areas) Special Orders 1957, Nos. 1 to 95 inclusive.

The Foot and Mouth Disease (Controlled Areas) Orders Nos. 1 and 2 1957.

The Calves (Feeding in Transit) Order 1957.

The Foot and Mouth Disease (Packing Materials) Orders 1925— 1926.

The Diseases of Animals (Waste Food) Order 1957.

This Order came into force on the 1st June, 1957 and revoked several Orders dealing with the Boiling of Animal Foodstuffs and Disinfection of Road Vehicles, etc.

These Orders are designed to prevent the spread of Foot and Mouth Disease, and have been brought to the Notice of persons concerned.

#### Tuberculosis Orders, 1938-1946.

No Notice relating to a case of tuberculosis has been received during the year.

#### Area Eradication Plan for Tuberculosis

The following Orders came into operation during the year :-

The Tuberculosis (Southern England Attested Area) Order 1957.

The Tuberculosis (North West England Attested Area) Order 1957.

The Tuberculosis (Wales, West, Central, Forth and South West Scotland Attested Area) Order 1957.

The Tuberculosis (Southern England Eradication Area) Order 1957.

The Tuberculosis (Yorkshire Eradication Area) Order 1957.

The Tuberculosis (North of Scotland Eradication Area) Order 1957.

In the Ministry of Agriculture, Fisheries and Food, and the Department of Agriculture for Scotland Report on the Animal Health Services in Great Britain, 1955, it is stated that, "In the 20 years of work under the Attested Herds Scheme, the stage has been reached when nearly two-thirds of the cattle in the country are in Attested Herds, and there is every reason to hope that by the early 1960's bovine tuberculosis in Great Britain will, for all practical purposes, be a thing of the past."

#### Anthrax Order of 1938.

No case of Anthrax has been notified during the year.

A circular letter was received from the Ministry requesting the assistance of the Local Authority in drawing the attention of Stock Owners to the importance of reporting to the police any cases of sudden death among their animals (especially cattle) if there is any possibility that the cause of death was anthrax.

A letter, enclosing a copy of the leaflet—"Anthrax—Animal Health Leaflet No. 30" and a letter enclosing a copy of Form A.N. 10 relating to Anthrax, was sent to all Stock-owners in the Borough calling their attention to the requirements of the Order and the need for speedy notification of all animals suspected of having died from Anthrax.

#### Swine Fever.

#### Swine Fever Orders of 1938-1955

#### Swine Fever (Infected Areas) (Restrictions) Order 1956.

Notice was received that swine (breeding sows) had been moved from a piggery in this Borough to a piggery in East Boldon and back.

It was later found out that the swine at the piggery at East Boldon had swine fever and the premises were declared to be an "Infected Place." Because of this exposure to infection Notice Form B was served on the owner of the swine, placing his premises in this Borough under Movement Restrictions.

All the other swine on the premises were examined by a Veterinary Inspector and were found to be free from disease.

#### The Piggery, The Dene, Hedworth, Jarrow.

These premises were declared to be an "Infected Place" on June 7th, 1957. Twelve pigs died and were buried on the premises. Seventeen pigs were moved for slaughter under licences granted by the Ministry, leaving eleven pigs on the premises.

The Notice was withdrawn on 28th August, 1957 and the premises cleansed and disinfected.

#### The Movement of Animals (Records) Order 1925.

During the visits to Stock Keepers Premises the Records of Movement Books have been checked.

# The Warble Fly (Dressing of Cattle) Order, 1948. Compulsory Treatment of Infected Cattle.

The Ministry distributed a copy of the leafflet "Warbled Cattle" to every cattle owner in England and Wales, and a "brief dressing" reminder was distributed in April. No case of warbled cattle in the Borough has been notified.

I sent a letter to each tarmer in this Borough calling attention to the requirements of the above Order.

#### Fowl Pest.

#### The Fowl Pest Order of 1936-1947.

#### The Fowl Pest (Infected Areas) (Restrictions) Order 1956.

There has been no reported case of Fowl Pest in the Borough during the year. In April a circular letter was received from the Ministry stating the "Future Policy towards Fowl Pest."

#### Importation and Exportation

The following Orders came into operation during the year: -

The Importation of Horses, Asses and Males Order 1957.

Prohibition of Landing of Animals, Carcases and Animals Products, and Hay and Straw from the Channel Islands Order, 1957.

Prohibition of Landing of Animals, Carcases and Animals Products, and Hay and Straw from the Channel Islands (Revocation) Order 1957.

Prohibition of Landing of Animals, Careases and Animal Products, and flay and Straw from the Channel Islands (Revocation No. 2) Order 1957.

The Exported Cattle Protection (Amendment) Order 1957,

#### The Colorado Beetle.

The Ministry of Agriculture, Fisheries and Food, in April requested the Local Authority to assist in a campaign against the Colorado Beetle.

These beetles are a serious potential menace to potato growers.

I sent letters, posters and showcards to those persons who are potato growers or have any interests with growers, in the Borough.

#### APPENDIX II.

#### Report on Shops Act 1950, for the Year 1957.

#### To the Chairman and Members of the Health Committee.

#### MR. CHAIRMAN, LADIES AND GENTLEMEN,

I have the honour to submit my twentieth Annual Report for the year ended 31st December, 1957.

#### SHOPS ACT, 1950.

In the administration of the above Act, 430 shops are subject to inspection.

There are 33 unoccupied shops—11 being derelict—in the Borough.

All local Orders made by the Council continue in force.

There were no extensions of hours during the Christmas period.

Many shops are being closed before the statutory closing hours. There have been no prosecutions during the year.

I am.

Mr. Chairman, Ladies and Gentlemen,

Your obedient Servant,

ROBT. C. THOMPSON, Chief Shops Inspector.

#### Summary of Work done during 1957.

No. of visits to shops during the year	38
No. of infringements of the Acts, etc.	2
No, of warnings to shop-keepers	2
No, of interviews with shop-keepers at office	10

#### The appended tables show:-

- Principal Act and Regulations administered by the Department.
- z. The nature of the infringements of the Shops Acts,
- 3. Types of business carried on in 'Shops' under the Acts.

#### TABLE No. 1.

The principal Act and Regulations administered by the Department are as follows:—

Shops Act, 1950.

Shops Regulations, 1912.

Shops Regulations, 1913.

Shops Regulations, 1937.

Shops Regulations, 1939.

Shops (Procedure for Jewish Tribunals) Regulations, 1937.

Local Orders made by the Council:-

Jarrow Shops Half Holiday Order, No. 1.

Jarrow Shops Half Holiday Order, No. 2.

Jarrow Shops Half Holiday Exemption Order, No. 1.

Jarrow Butchers Weekly Half Holiday & Closing Order, 1920.

Jarrow (Extended Area) Shops Weekly Half Holiday Exemption Order, 1937.

Jarrow (Extended Area) Shops Weekly Half Holiday Order, 1937.

Jarrow (Extended Area) Shops Extension & Weekly Half Holiday Order, 1937.

Jarrow (Extended Area) Butchers Shops Closing Order, 1937.

#### TABLE No. 2. Infringements of the Shops Act, 1950.

No.	of shops visited	38
No.	of visits to shops	38
No	notice re provision of seats exhibited or delivered to female assistants	2
		0
