Annual Report

For the Year, 1895.

TOWN HALL,

JANUARY 28TH, 1896.

GENTLEMEN,

The returns of Deaths (Form A) and of new cases of **Deaths** infectious sickness (Form B) I herewith hand you duly completed.

During the year there have been 637 Births, or 25·48 in the **Births** thousand. Males 334. Females 303.

Below I have tabulated the Birth and Death Rates for the years 1886 to 1895, inclusive, which method I hope is easy for the purpose of comparison.

The total number of Deaths from all causes, diseases, and **Mortality** ages, which have been registered, is 471. The number in each sex being 255 males and 216 females.

74 Deaths have occurred in the Workhouse.

33 „ „ „ „ Infirmary.

There have been 32 inquests held during the year.

Inquests

The ages at which the Deaths have taken place during the year, are as follows:—

Under 1 year	104
Between 1 and 5 years	41
„ 5 „ 15	„	...	14
„ 15 „ 25	„	...	27
„ 25 „ 65	„	...	134
„ 65 and upwards	151

The Death Rate per thousand for the year is 18·88.

NOTE:—*Excluding Deaths of persons in Public Institutions from other localities, the Death Rate would be 17·60.*

Compared with the last nine years the Birth and Death Rates are as follows:—

<i>Birth Rate.</i>				<i>Death Rate.</i>			
1886	26.01	1886	17.6
1887	30.48	1887	16.92
1888	28.3	1888	17.05
1889	26.01	1889	16.8
1890	26.9	1890	17.23
1891	25.16	1891	18.13
1892	26.96	1892	19.12
1893	26.72	1893	17.24
1894	25.64	1894	15.64
1895	25.48	1895	18.88

Zymotic Diseases.

The Deaths from the principal Zymotic Diseases during last year and the eight previous years have been as follows:—

DISEASES.	1887	1888	1889	1890	1891	1892	1893	1894	1895
Small Pox ...									
Scarlet Fever ...	1		1	1		1	3	1	
Typhoid Fever ...		2	2	1	1	2	2	1	
Measles ...	37	2	18	5	3	13	4	15	1
Diphtheria ...	5	3	2	1	12	4	5	4	2
Diarrhoea ...	16	19	24	15	15	14	24	4	11
Whooping Cough ...		5		6	5	15			4
Totals ...	59	31	47	29	36	49	38	25	18

Scarlet Fever.

Scarlet Fever.—Known Cases, 140; Deaths 0.—This disease has continued with us from last year and has been confined to no particular part of the Borough. I am pleased to say we have not had half so many cases as last year.

Typhoid Fever.

Typhoid Fever.—Known Cases, 4; Deaths, 0.—All these cases were of a mild character, and in no instance have we been able to find any specific cause to give rise to this disease.

Diphtheria

Diphtheria.—Known Cases, 25; Deaths, 2.—The cases of Diphtheria have been one less than last year, and the deaths only two. Many of the cases reported have been of a very mild type.

The surrounding of all these cases have been thoroughly investigated, but we have failed to find any specific cause.

Small Pox.—*Known Cases*, 1; *Deaths*, 0.—We have had one **Small Pox** case of Small Pox removed to the Hospital from the Workhouse, (Mrs. Raven, wife of the Porter.)

I have no doubt the disease was contracted by coming in contact with tramps.

Measles.—*Known Cases* 31; *Deaths*, 1—There have been a **Measles** few isolated cases during the year.

During the year I have received and treated in the Borough **Borough Hospital** Hospital 107 cases of Scarlet Fever and one case of Small Pox. Of the Scarlet Fever cases 96 belonged to the Borough, 2 to Stourport, 7 to the Rural District Council, and 2 to the Workhouse.

The Staff at the Hospital varies according to number of Patients. On Dec. 31st, the Staff consisted of the following — Medical Superintendent, Matron, two Probationer Nurses, one Temporary Nurse, Cook, Gardener, and Laundrywoman. Patients in Hospital on December 31st., 18.

The Staff at the Hospital has at times during the year had a great deal of extra work, but I am pleased to say they always perform their duties cheerfully and efficiently, however much taxed.

The Slaughterhouses, Bakehouses, Lodginghouses, Work- **Slaughter-**
shops, Milkshops and Cowsheds have been regularly inspected, **houses,**
and on the whole found clean. **Bake-**
houses, &c,

Our water supply has continued to be satisfactory.

**Water
Supply**

The tables appended to this report I hope will be found **General**
ample for placing before you the amount of sanitary work which **Remarks.**
has been carried on during the year.

The prosecutions found necessary to be taken before the magistrates this year have been only five, which shows we are able to get through a large amount of work, the major portion of which is aggressive—with a small amount of friction.

Allow me again at the end of another year, to thank the Chairman and Members of the Health Committee for the support they have given me in the carrying out of my duties. I am pleased to say that on the whole things have worked very smoothly.

I am, Gentlemen,

Your obedient servant,

DAVID CORBET,

Medical Officer of Health.

To the Chairman of the Health Committee—
Mr. Councillor T. Pensotti.

TABLE A.

TABLE OF DEATHS

During the year 1895, classified according to Diseases, Ages, and Localities.

Mortality from all Causes at Subjoined Ages.										Mortality from subjoined causes, distinguishing Deaths of Children under Five Years of Age.
