Annual Report.

FOR THE YEAR, 1913.

TOWN HALL.

February 23rd, 1914.

To the Chairman and Members of the Health Committee.

GENTLEMEN,

I beg to present to you my second Annual Report upon the Health and Sanitary conditions of the Borough.

Social Conditions of the Borough.

The following figures will be of interest:-

Acreage of Borough ... 2496 acres

Population at Census ... 27544

Density of Population ... 11.03 per acre Inhabited Houses ... 6380 (estimated)

Subsoil. The Town is situated in a hollow, the subsoil is formed by beds of the new red sandstone series, partly a soft sandstone rock, partly loose incoherent gravel.

In the bottom of the valley near the river there is a bed of superficial clay.

Height above Sea Level. The Bull Ring is the lowest part of the Town, being 110 feet above sea level. Lea Bank Avenue is the highest, being 265 feet above sea level.

Industries. The chief industry is the manufacture of carpets. There are over forty factories and workshops in the Borough carrying on the trades of Carpet Manufacturers, Worsted and Yarn Spinners, Iron and Brass Founders, Millers, Brewers, Tanners, Chemical, Dry Soap and Oil Manufacturers. Trade has been good during the year and the number of unemployed is very few.

Poor Law Relief. The amount of Poor Law relief for the year has been £1655 16s. 0d.

Old Age Pensioners The number of Old Age Pensioners, week ending September 30th, 1913, was 703, males 269 and females 434. The estimated total amount paid during the year to Old Age Pensioners was £8944.

Public Institutions.

Kidderminster Infirmary and Children's Hospital. This Institution is supported by voluntary contributions.

In-Patients admitted during the year.

Adults	 458	$\begin{cases} 204 \\ 254 \end{cases}$	belonging	to Kidderminster. to the Country.
Children	 190	$\left\{\begin{array}{c}111\\79\end{array}\right.$	belonging	to Kidderminster. to the Country.

Out-Patients admitted during the year.

Anæsthetics administered 758.

There were 705 teeth extracted under anæsthetics.

The income during the year has been £2492 Os. 1d.

The expenditure ,, ,, £3236 4s. 0d.

Showing a deficit of ... £744 3s. 11d.

The Borough Infectious Hospital. The Scarlet Fever Hospital is the property of your Council, and is situated near the Stourport Road, about 1½ miles from the centre of the Borough.

Special arrangements are made for admitting patients from the following Districts:

Rural District of Kidderminster, Martley Rural District, Stourport Urban District, Bewdley Borough.

Admissions during the year: 24 from the Borough, and 6 from the Districts.

The Small Pox Pavilion is situated about 170 yards away from the Scarlet Fever Pavilions, and is enclosed with a fence of sheet iron.

Workhouse. The Workhouse for the Borough and surrounding Parishes is situated in Sutton Road.

The Inmates on December 31st, 1913, numbered 315, of these there were classed as sick 138.

There is a special Ward for Phthisical Patients.

Tuberculosis Dispensary. The number of patients attending during the year have been very few.

Nursing Institution. Established on a civic basis, and supported by voluntary contributions for the purpose of supplying the sick poor with Queen's Nurses. Excellent work is being done by these District Nurses.

Health Missioner. During the year an arrangement has been made with the Kidderminster Nursing Institution, to supply a Nurse as Health Visitor. This arrangement is working very well. A copy of her report for 1913, will be found on page 43.

Charities.

Guild of Help. This is a good example of organized charity, and is doing good work, especially in helping poor people to obtain Hospital or Convalescent notes.

Witnell's Alms and Clare's Charity. This combined charity finds shelter for eight old people in the almshouses, and also gives them a weekly allowance.

The gross income of the charity is £259 per annum.

Banks' Charity. This consists of six almshouses situated in Broad Street, and accommodates twelve old people.

Park and Open Spaces.

Brinton Park. There is a Public Park in the Borough known as Brinton Park which contains 30 acres. There is a Bowling Green, and facilities are afforded for games for children.

A small portion is reserved for model gardens, which are cultivated by children living in the Borough.

The Park is well kept and continues to attract large numbers of the public during the summer months.

Open Spaces. I still urge the necessity of open spaces to be used as playgrounds for children, and regret that the two existing spaces have not been added to during the year.

Markets.

Retail Market. This market is large, efficiently lighted and well looked after by the staff of your Committee.

Cattle Market. The Cattle Market is one of the largest in the Midlands, and is well patronized by Farmers and Dealers. I must again repeat I sympathize with complaints from owners of animals as to the want of covered accommodation. The condition of animals intended for human food is not improved by being brought out of a warm stall and kept for hours in the open, exposed to all weathers.

VITAL STATISTICS.

Births. During the year there have been registered 598 births.

Males, 299 An increase of 50 on the year 1912.

Four of these (3 illegitimate and 1 legitimate) were transferred by the Registrar General to other districts making a nett total of 594

Nett rate per 1000 of population 21 44

Nett rate per 1000 of population, 1912, for the County of Worcester 22.5

Illegitimate. The number during the year of illegitimate births has been 24.

Males, 15 A rate of 4.01 for every 100 births registered in the district.

Seven of these births occurred in the Workhouse.

The occupation of the mothers was as follows:

Charwoman	 	1
Domestic Servants	 	7
Mill Hands	 	14
Laundress	 	1
Field Worker	 	1

The number of illegitimate births registered in 1912 was 32.

Still Births. The Cemetery Superintendent informs me that there have been eleven still births interred during the year, 5 certified by medical men, 6 by midwives.

Deaths. The total number of deaths (residents and non-residents) from all causes registered in the district during the year has been 389.

Males, 197; Females, 192; rate per 1000, 14:04.

Deaths—continued. Deaths in the Workhouse, 56:—Residents, 40; Non-residents, 16.

Deaths in the Infirmary, 48:—Residents, 21; Non-residents, 22.

The ages at which the deaths have taken place during the year are as follows:—

Under 1 year			75
Between 1 to 2 years			14
" 2 and 5 "			9
,, 5 ,, 15 ,,		***	11
,, 15 ,, 25 ,,			17
,, 25 ,, 45 ,,			44
,, 45 ,, 65 ,,			80
,, 65 and upward	8		139
			389
			-

Transferable Deaths. Fourteen Kidderminster Residents having died in other districts have been notified to us by the Registrar General, and have been included in our tables.

Forty-five Deaths of Non-Residents have occurred in Kidderminster, these have been transferred to other Districts.

Total number	of deaths	of residents,	1913	 358
,,	,,	,,	1912	 313

Nett Death Rate. The nett death rate for residents in the Borough of Kidderminster during 1918, has been 12.92 per 1000 of the population, against 12.82 for 1912.

The nett death rate for England during 1912, was 13.3.

Inquests held during 1913.

3.	OTHERS.	Suicide during	Tempo	rary	
		Insanity			1
					17
					-

Marriages. The number of marriages which took place in the Borough in the year 1913 was 294.

The number during 1912 was 283.

Infantile Mortality. The number of children under one year of age that have died during 1913 have been 72, which is equal to a death rate per 1000 births of 120.40.

For the year 1912 it was 55, equivalent to 100.91.

The average for the past ten years has been 136.23.

The following Table shows the ages at which the deaths of the infants under 1 year occurred:—

Under 1 Week	1-2 Weeks	2-3 Weeks	3-4 Weeks	Total Under 1 Month	1-3 Months	3-6 Months	6-9 Months	9-12 Months	Total Deaths under I year
9	6	4	4	23	13	21	9	6	72

Bronchitis. Bronchitis was the cause of 5 deaths, this is much lower than last year.

Diarrhœa and Enteritis. Twenty-three deaths occurred from Diarrhœa and Enteritis. The number during 1912 was 4.

NATURAL INCREASE OF POPULATION.

Excess of Births over Deaths since 1894.

Year	Total Births	Total Deaths	Excess of Births over Deaths
1894	641	391	250
1895	637	471	166
1896	614	398	216
1897	617	427	190
1898	568	394	174
1899	571	436	135
1900	600	542	58
1901	622	496	126
1902	622	433	189
1903	637	414	223
1904	627	469	158
1905	590	395	195
1906	615	374	241
1907	550	336	214
1908	522	364	158
1909	560	483	77
1910	503	389	114
1911	536	420	116
1912	548	348	200
1913	598	389	209

The excess of births over deaths, 1894 to 1903, was 1,727. During the latter ten years it has fallen to 1,682, showing a decrease of excess of 45 on the previous ten years.

Average Births per annum for the past 20 years, 553'9.

Average excess of births over deaths :-

1st 10 years	 172.7
2nd ,,	 168'2
And for the whole	 170'4

First 10 years was 2 above the average for 20 years.

Second 10 years 2 below the average.

Small Pox. No case of this disease has occurred in the Borough since 1904.

Hospital. We have one iron Pavilion, containing two wards, six beds in each ward, Nurse's Bed Sitting Room, Kitchen, Scullery, Larder, Out-Offices, Laundry, Ambulance House, Mortuary, and a wooden building for the use of staff.

This is a good building standing high up, in my opinion it would make an excellent Sanatorium for Tubercular patients. I should like to call the attention of the County Council and the National Insurance Committee to this fact.

Return by the Vaccination Officer for the Kidderminster Vaccination District

(which extends beyond the Borough Boundaries).

Births	Deaths Unvaccin- ated.	Vaccinated.	Unvaccinated.	Exemption Certificates.
617	57	190	87	283

I regret to see the growing tendency of the public for obtaining Exemption Certificates for their children.

Nothing in medicine is more certain than the fact that vaccination does protect more or less from small pox.

Diphtheria. Seven cases, generally of a mild type, were notified during the year, no deaths. No cause could be found in the sanitary surroundings.

Your Committee have passed a resolution authorizing the supplying of Diphtheria Antitoxin, free of charge, to medical men, for treatment of the poorer inhabitants of the borough, two lots of Antitoxin have been supplied during the year. Nine swabs were supplied for diagnostic purposes.

Erysipelas. Fifteen cases with no deaths.

The average number of cases notified during the last 10 years was 27.

Erysipelas—continued. Number of cases notified in January, 1; February, 2; March, 2; April, 5; May, 1; October, 1; November, 1; December, 2.

Scarlet Fever. We have had 33 Notifications of this disease for 1913, and no deaths, against 143 and 1 death in 1912.

From the Borough	24
From the Rural District of Kidder-	
minster	1
From Martley	4
From Bewdley	1
	_
	30
-included an over the country	

The monthly admissions from the Borough were:—
January (2); February (1); March (2); April (2); May (3);
June (2); July (0); August (4); September (6); October (5);
November (2); December (1).

Your Committee have now in hand the question of heating the wards at the Hospital. Typhus, Typhoid, Puerperal Fever. No Cases.

Measles. Eighty-five cases have come officially to our knowledge. This number represents only a small proportion of the cases that have occurred. Three deaths.

Whooping Cough. Three deaths, all under five years of age, 12 deaths less than 1912.

Diarrhœa. Thirty-two deaths.

Ophthalmia Neonatorum. Three cases.

Anthrax. One case.

Tuberculosis. Seventy-four cases of this disease have been notified during the year, viz: —

Pulmonary cases	 	48

Thickening Substances.

	Samples examined for thickening substance.	Samples in which thickening substance found.	Nature and amount of thickening substance found.
Cream	1	0	
Preserved Cream	3	0	

E. W. T. JONES, Public Analyst.

The details of samples submitted will be found in the Inspector's report.

Unsound Food. We have had twenty-four surrenders and five seizures of unsound food during the year, the total weight being 2744 lbs.

Sanitary Circumstances of the District.

Water Supply. The water supply of the Borough is derived from an Artesian Well 300 feet deep.

The analysis by the Borough Analyst showed it to be of good quality.

There is plenty of water and the supply has been continuous during the whole year.

All the houses in the Broadwaters district which was annexed to our Borough in 1912, were supplied by private wells, many of which must have drawn their supply from the surface, as upwards of 30 of the waters from the wells were analysed and in only two instances were the waters reported fit for drinking purposes. We have since caused every owner to lay on Town Water to his property.

The River Stour flowing through the centre of the town is free from any injurious pollution.

The sewers, although some are slightly deficient in fall, are well ventilated and with the care bestowed on them by your Borough Surveyor, are acting very efficiently.

Sewage Department.

The Borough Surveyor has kindly supplied me with the following information:—

Careful attention has been paid to the Flushing and Disinfecting of the Sewers. During the year 1,688 cart loads of water, equal to 506,400 gallons, being used.

The bed of the River Stour near the Post Office was cleaned out in May last; 53 loads of refuse were removed. From the Detritus Chamber at the Pumping Station 437 loads of refuse were removed, and 129 loads from the Manholes connected with the Sewers.

The sewage after gravitating to the Pumping Station in New Road, is pumped up to the farm on the Stourport Road.

Sewerage of added Areas. Part of the added area (Franche and Hill Grove Crescent) are already connected with our sewers.

During the coming year we hope that the sewering of Foley Park will be completed—the sanitary condition of that district is very bad.

Scavenging and Refuse Disposal. I would refer you to the Inspector's report for details.

The bulk of our household ashes and refuse is deposited on low lying land at Oldington Farm.

Court sweeping is done as circumstances permit by your department, much to the advantage of the residents in courts and large party yards; I am sorry to say some of whom are very lazy and dirty.

Schools. The school buildings have been inspected and have been found in good sanitary condition.

Food and Drugs Acts. Sixty-four samples have been submitted for analysis, and 60 found genuine.

Milk, 27 samples 1 adulterated
Butter, 9 samples all genuine
Miscellaneous Articles (28 samples) 1 Pearl Barley
3 adulterated 2 Gregory Powder

Inspection of District.

During the year I have inspected several parts of the Borough, both in company with the Housing Committee and also with the Sanitary Inspector.

The only matter calling for special attention is the cleansing and grooming of cows which in my opinion is a matter of urgency, I hope in the new Milk Bill, which will shortly be introduced into the House of Commons, some stringent provisions will be enacted to enable Local Authorities to insist upon the grooming of cows.

There is no doubt that the germs from the intestines (even of a healthy cow) when introduced into milk, manufactures a poison which acts as an irritant to the alimentary canal of a child.

I have personally visited some of the slaughter houses and their condition generally was fair, perhaps a little more limewashing would be better.

The inspection of meat and slaughter houses is carried on very efficiently by your Sanitary Inspector and his staff.

Bakehouses. During the year I have visited the bakehouses and found some of them in a satisfactory condition, others were not quite up to the standard of cleanliness desired.

Housing, Town Planning, etc., Act, 1909.

The work under this Act is proceeding in a satisfactory manner.

The Inspecting Officer under this Act has inspected 878 houses, particulars of which have been entered up in the register.

Details of the work generally will be found in the Inspector's report, page 56.

During the year we have dealt with thirty-seven houses for Closing Orders, the majority of them will be repaired and made fit for human habitation.

Voluntary Action. Seven Houses have been dealt with after interviews with the owners.

The Surveyor reports that the following Plans have been submitted and approved by the Parks and Buildings Committee:

Dwelling-Ho	ouses			48
Shops				3
Additions ar	nd Alteratio	ons to Hous	ses	20
Additions to	Carpet W	orks		4
Extensions t	o Iron Wor	ks		2

Club Room				1
Cow Shed				1
Sheds				5
Bakehouse				1
				-
		Total		92

Compared with 50 last year.

Housing, Town Planning, etc., Act, 1909: -continued.

Houses dealt with during the year 1913, for CLOSING ORDERS.

Houses and Localities.	Action Taken.
Waterloo Street, Nos., 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32.	Closing Orders served April 10th, 1913. Notices served on occupiers to quit. Houses still void December 31st, 1913.
Back Queen Street, 40, 41, 42, 43, 44.	Closing Orders served Dec. 18th, 1913.
Back of Back Queen Street, 1, 2, 3, 4, 5.	Closing Orders served Dec. 18th, 1913.
27, Queen Street and 1 house in 1 Court, Queen Street.	Closing Orders served Dec. 18th 1913. One house void.
Queen Street, 30, 32, 33, 34.	Closing Orders served Dec. 18th, 1913.
Back Queen Street, 14, 15, 16, 18.	Closing Orders served Dec. 18th, 1913.
House rear of 49, Queen St.	Closing Order served Dec. 18th, 1913.
1 and 2, houses rear of 45, Queen Street.	Closing Orders served Dec. 18th, 1913. Owner has promised demolition.
3, Queen Street, and 4, Sayces Yard, Stourbridge Road.	Closing Orders served Dec. 18th, 1913. Both houses void.
House rear of 300, Hurcott Road.	Closing Order served Dec. 18th, 1913.

The Eleven Closing Orders reported as not being complied with on December 31st, 1912, have since been complied with and the houses made fit for habitation.

Houses Voluntarily Closed after Interview with the Owners :-

Mill Street, 46 and 47.

4, house rear 299, Hurcott Road Mill Street, 82, 83, 84, 85. Purchased by the Council, Closed, have since been demolished for street improvement.

Closed, will be converted into a through house.

Closed, still void.

Dirty Houses. I have certified 69 houses that required cleansing and whitewashing as per section 46 of the Public Health Act, 1875, and 12 houses under section 5 of the Infectious Disease (Prevention) Act, 1890.

Total Sanitary defects and nuisances dealt with during the year, 3036.

The Housing Problem is becoming rather difficult to deal with. There are very few houses empty at a rent of 3/- or 3/6 per week, consequently we have had cases of overcrowding reported to us. All the houses built during the last two or three years have been houses of 5/- per week and upwards.

I am afraid the undesirability of the tenant has something to do with obtaining houses and is not altogether unconnected with the overcrowding problem.

I consider that altogether considerable improvement has been made in the habitable conditions of the houses of the working classes during the year, not only due to our action, but the better class Landlord is doing a great deal voluntarily.

I wish to express my thanks to your Sanitary Inspector and his staff for their generous help and courtesy.

In conclusion, I beg to thank the members of your Committee for their support extended to me in carrying out my duties as Medical Officer of Health for the Borough of Kidderminster.

I am, Gentlemen,

Your obedient Servant,

W. HODGSON MOORE.

Annual Report of the Medical Officer of Health for the Year 1913.

School Medical Officer's Report.

To the Medical Officer of Health, Kidderminster.

Dear Sir,

I beg to report as follows :-

The health of the school children during the past year has been very satisfactory, the average attendance being 3½ % higher than last year.

It has not been found necessary to close any of the schools, and epidemic diseases have been less prevalent.

A considerable number of cases of ringworm have occurred, and the disease is still prevalent.

Several cases of scabies have been treated, and impetigo contagiosa has also been troublesome. The School Clinic being now at work, I hope these cases will be more rapidly cured than in the past. The general cleanliness of the children continues to improve, though there is still much to be desired in this respect.

Yours faithfully,

J. C. GRIFFITHS,

School Medical Officer.

Health Missioner's Report.

To the MEDICAL OFFICER OF HEALTH.

During the year 1913 I have received 584 Notifications of Births, from the enlarged Borough. 542 cases were visited. 430 babies were breast fed. 41 babies were fed on breast and bottle. 31 babies were fed on bottle only. 4 babies were hand fed.

One hundred and eighty-three cases had doctors in attendance, during the time of confinement. 401 cases had midwives only. 2 births occurred in hospital. 11 births occurred in the Union Infirmary. 10 births of twins occurred during the year. 10 Still births occurred during the year.

Ninety-six mothers do other work in addition to their duties as housewives.

Sixty deaths occurred during the year amongst babies in the enlarged Borough. 7 died from Bronchitis and Pneumonia. 8 Premature births. 19 died from Diarrhæa and Asthenia. 5 from different forms of Tuberculosis. 2 from Scurvy and inanition. 19 from other causes. 15 were under one month old.

In the early part of the year there were 3 cases of Ophthalmia Neonatorum.

There has been several cases of Inflamed Eyes, a few days after birth, during the year. Keeping these cases under supervision and treatment for a few days, has resulted in every case clearing up satisfactorily, and I find the mothers only too anxious to follow out my instructions when they realize the serious consequences of neglect.

During the hot weeks of August and September, there was an epidemic of Diarrhœa, and 17 deaths occurred, 14 of these babies were fed on the bottle, 9 mothers had worked in addition to their housewifely duties; this disease might be helped a good deal if there was a proper supply of sterilized milk in sealed bottles, for the use of babies, the milk carried round in cans and taken into poorly ventilated houses, will not keep sweet 12 hours.

I had hoped to start a "School for mothers" during the last winter months, but I was unable to do so, it would be a great help and I hope it will be commenced next winter.

The question of housing is difficult, and I hear daily of men with large families, and a wage from 15/- to a £1, who cannot get a house large enough for what they can afford, at the most 3/6 per week, but I think that overcrowding in small houses is better than insisting on these people turning out and having to take at least temporary residence in model lodging houses, the moral atmosphere of which must be bad for children. Two families in one house is of rare occurrence.

- 62 cases of tuberculosis have been notified.
- 62 cases of tuberculosis have been visited.
- 22 deaths have occurred.
 - 8 received nursing treatment.
 - 9 have had sanatoria treatment.
 - 6 have left the town.
- 21 have improved, some are able to resume their ordinary work, and some light occupation.
- 18 have shown little or no improvement.
- 768 visits of supervision have been paid to babies and tuberculosis patients.

Patients seem to benefit greatly whilst receiving the sanatorium treatment, but the improvement very often is not permanent, owing to patients on returning home being unable to carry on the treatment for want of money; they seem to relapse quickly.

They do not go out and get enough fresh air and exercise, especially in cold weather, but sit over the fire, as they are unable to provide food to keep the body warm.

There are some cases of married men who have no income when the 27 week's Insurance is up.

One case I visit, a man with a wife and two young children, returned from a sanatorium had no income (when the Insurance ended) for nine weeks.

I thank the staff of the Health Department for all the help they have given me in doing my work.

Believe me,

Yours faithfully,

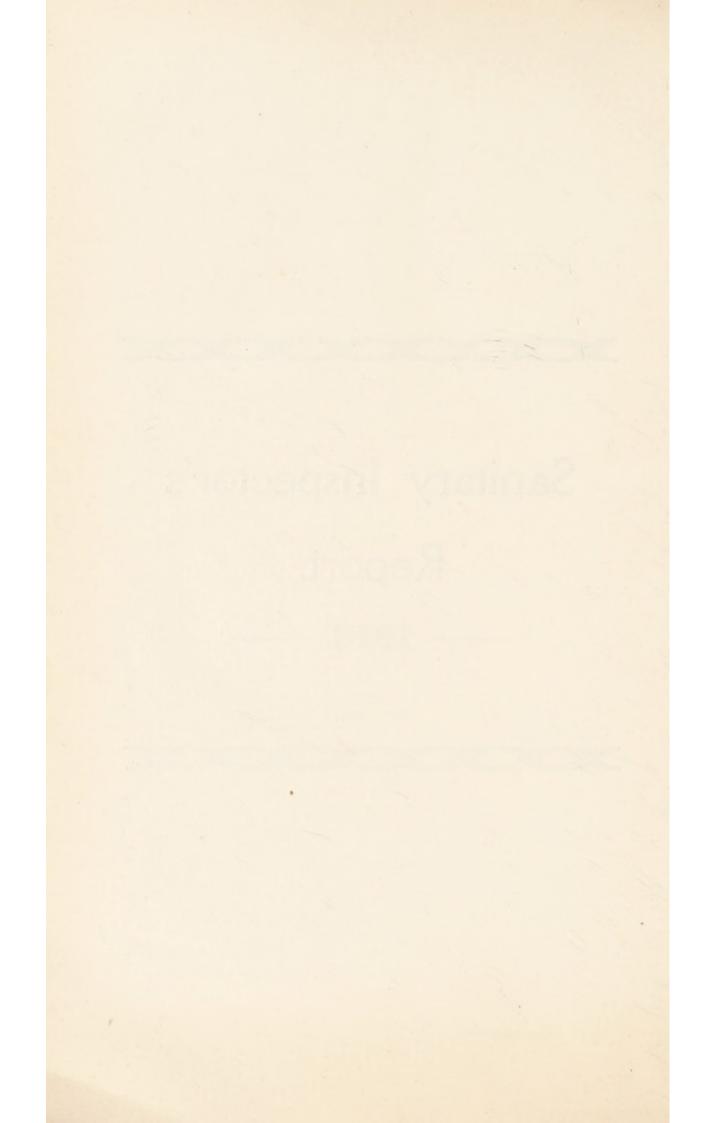

E. A, DICKENSON.

Sanitary Inspector's Report.

—— 1913. ——

Sanitary Inspector's ANNUAL REPORT.

For the Year 1913.

GENTLEMEN,

I have much pleasure in submitting my Annual Report on the work done in my Department for the Year ending December 31st, 1913.

Household Ashes and Refuse Collection.

Portable Receptacles emptied .			158,17	4
D 111			2,80

18 to 22, Fair Street] 3
98 to 102, George Street			1 3

Inpection of Canal Boats.

Number of Boats inspected 239
On the whole the cabins are kept clean and not overcrowded.
Very few women and children are met with in boats passing through this district.
In 15 instances the boats were worked by a man and his vife (only).
In 31 instances the boats had on board, man, wife and one or more children.
In 193 instances the boats were worked by men.
A readiness is always shown by the canal boat people to comply with the Local Government Board Regulations.
Infringements.
Cabins out of repair and leaking 2
Cabins require re-painting 4 Cabins require re-lettering and numbering 4
No magisterial proceedings were taken during the year.
All the infringements have been complied with by the means of circulars and letters.
Total boats on register showing 63
(a) Number of boats believed to be in use or available 61(b) Number of boats that cannot be traced 2
Number of boats registered in 1913 2
No cases of infectious disease occurred in any canal boat during the year.

Common Lodging Houses.

There are 9 houses, 3 are registered, and 6 are licensed. Authorised number of lodgers, 297. The houses are well conducted and kept clean.

Slaughterhouses.

We have twenty-four slaughterhouses on the register and in use, twelve being registered ones, and twelve being licensed. Each slaughterhouse is inspected, at regular and irregular times.

Notices served	for limewashing during the year	14
Notices served	to obtain compliance with Bye-laws	3

Bakehouses.

We have 47 bakehouses on the register, which are regularly inspected.

The bakehouses on the whole are kept clean, are well lighted and ventilated.

Limewashing	 	 13
Floors Cleansed	 	 5
Miscellaneous Notices	 	 3

Registered Purveyors of Milk.

Residents		 	53
Non-Residents		 	24
Registered duri	ing the year	 	12

Notices have been served during the year to secure compliance with the Regulations.

Cowsheds.

Notices served	for Limewashing	 ***	3
Notices served	for dirty Cowsheds	 	6

The Milkshops, Cowsheds, and Utensils, are regularly inspected as to cleanliness, etc.

The number of Cowsheds in the Borough is 29.

Factory and Workshops Act, 1901.

WORKSHOPS AND WORKPLACES UNDER INSPECTION:

Well Water.

BROADWATERS DISTRICT.

I submitted for analysis the well waters from thirty-seven properties in this area, all of which (excepting two samples) were reported by the County Analyst as being unfit for drinking purposes.

In each instance Town Water has been laid on, and the water from the wells discontinued being used for drinking purposes.

Mortuary.

One body was received into the Public Mortuary during the year.

Remarks.

I have to thank your Committee for the support they have given me in the work of my department during the year.

I am, Mr. Chairman and Gentlemen,

Your obedient Servant,

JOHN T. COWDEROY,
Sanitary Inspector.

To the Chairman, Vice-Chairman and
Members of the Health Committee.
