**Kingsbridge Rural District Council**

**REPORT**

of the

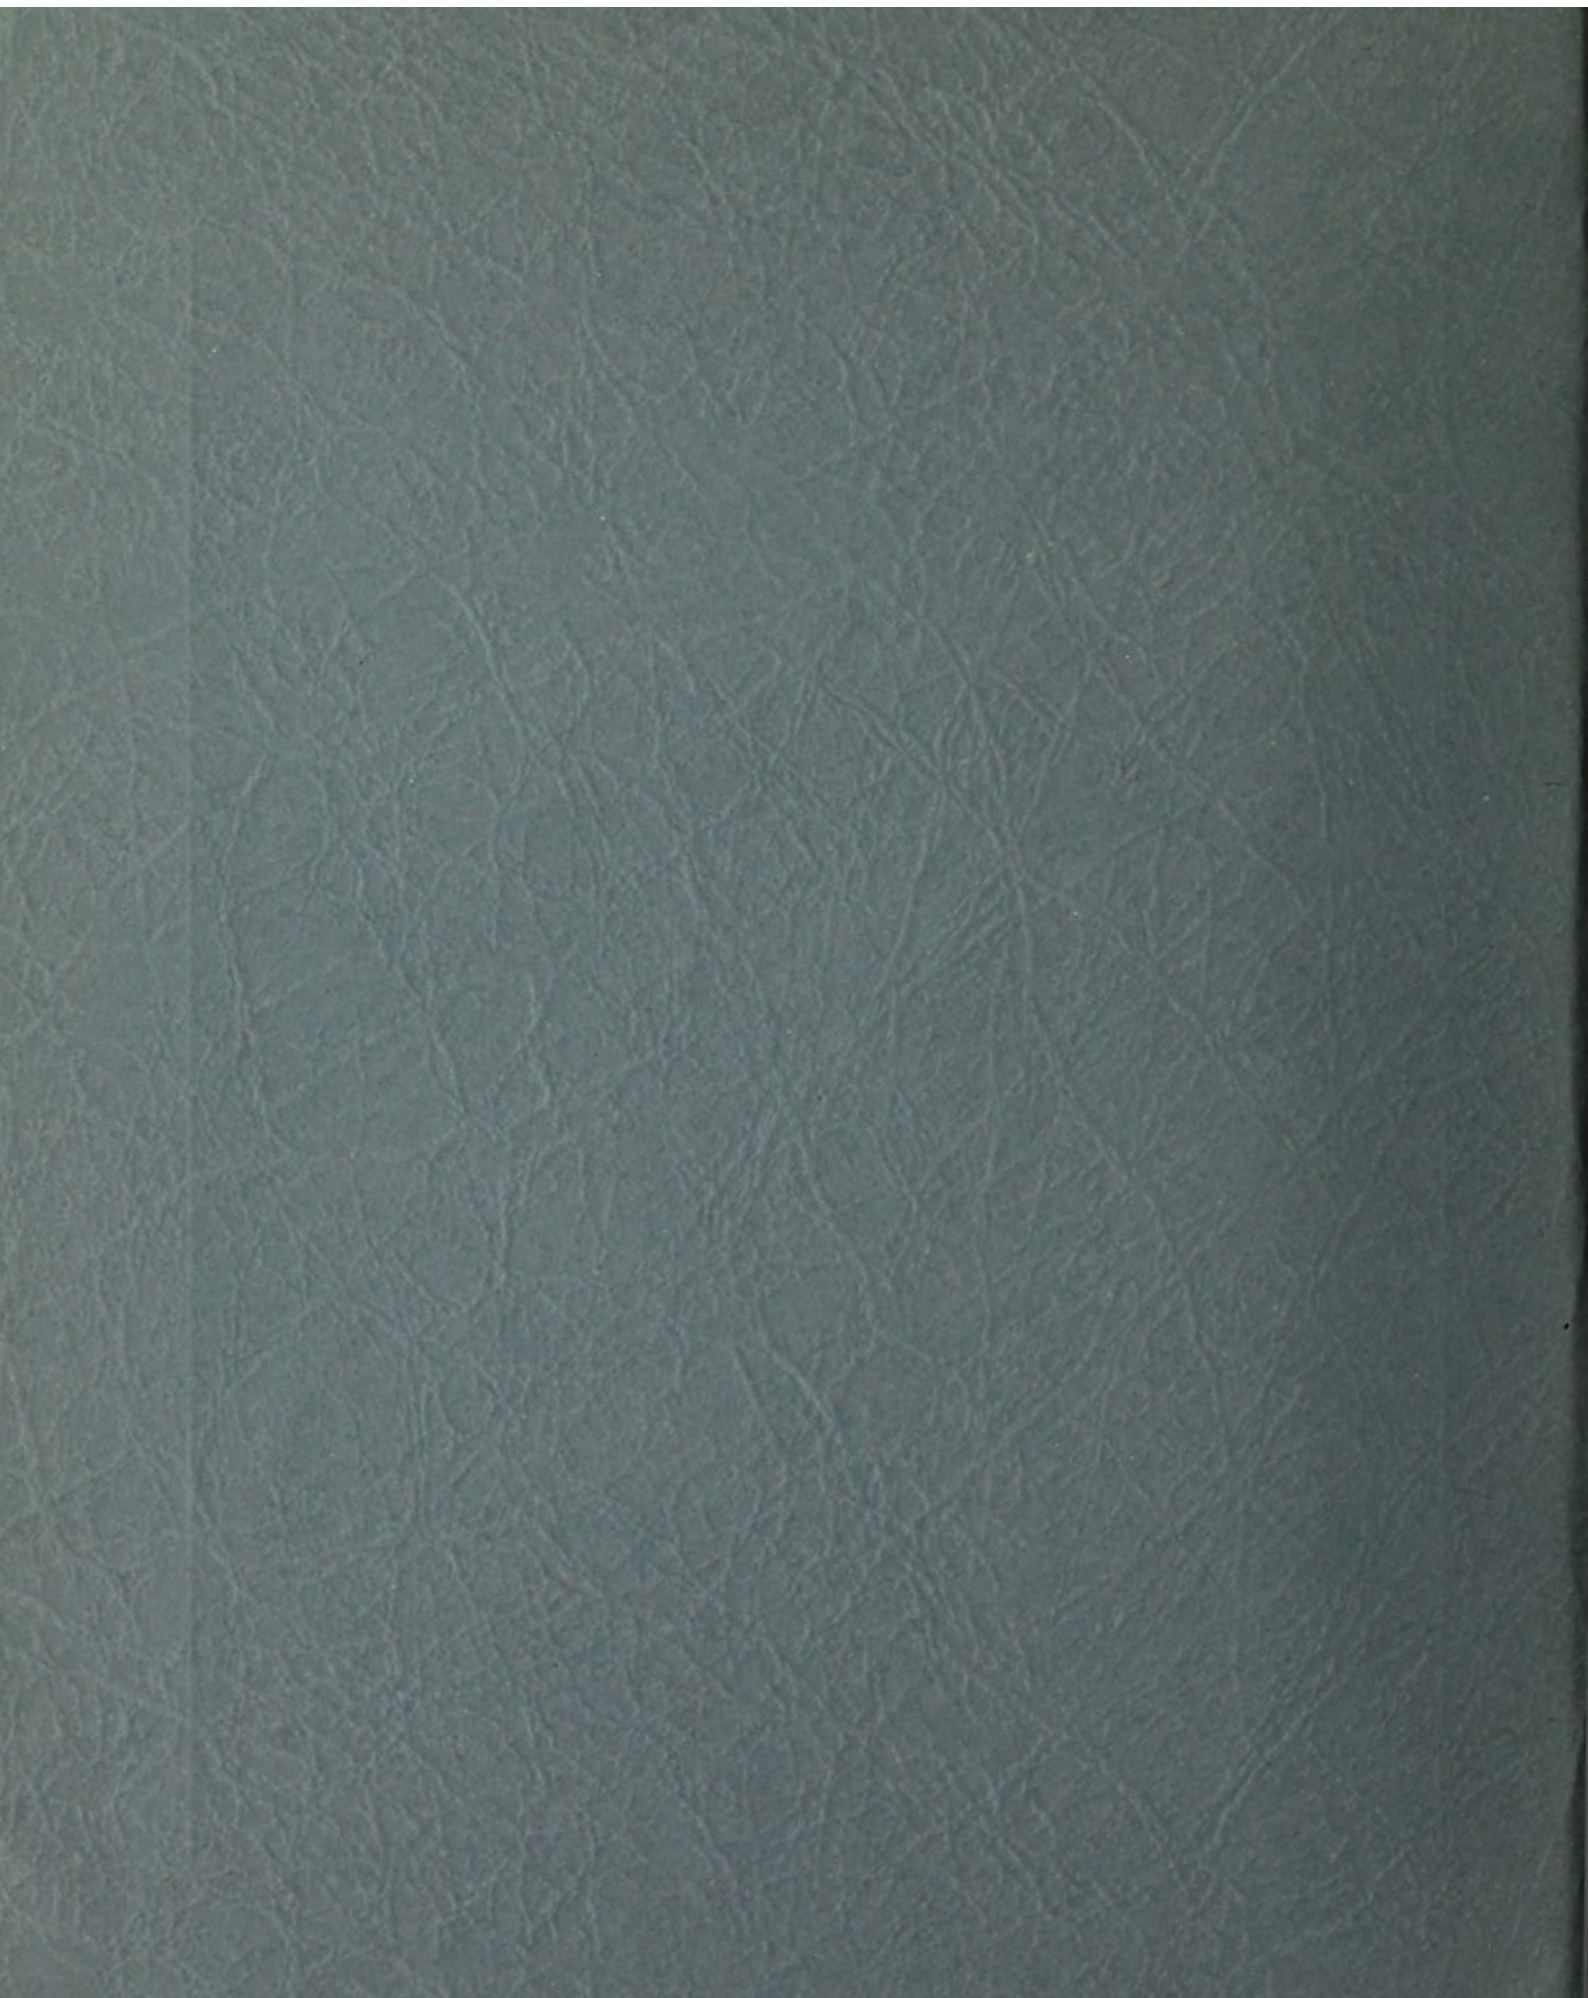

**Medical Officer of Health**

and

**Chief Public Health Inspector**

**for the Year, 1966**

ANNUAL REPORT ON THE HEALTH OF THE AREA DURING 1966

Mr. Chairman, Ladies and Gentlemen,

I present, herewith, the Annual Report on the health of the area during 1966, drawn up in accordance with the requirements of Ministry of Health Circular 1007 dated January, 1967. Included in this Report is the

**KINGSBRIDGE RURAL DISTRICT COUNCIL**

During the year your Medical Officer of Health, Dr. R. B. Walker, resigned and emigrated to Canada and had been Medical Officer of Health for eleven years. The undersigned was appointed Acting Medical Officer of Health

**HEALTH DEPARTMENT**

Council Offices, Manor House, Kingsbridge, S. Devon.  
Telephone: Kingsbridge 2246/7.

The Registrar General estimated that the mid-year population increased by 210 persons to a total of 11,800 persons, mainly by inward migration into the area.

**STAFF**

Medical Officer of Health: R. B. WALKER, M.R.C.S., L.R.C.P., D.P.H.  
(Resigned October, 1966)

Acting Medical Officer of Health: JOHN WILDMAN, M.R.C.S., L.R.C.P., D.P.H.  
(Appointed November, 1966)

Deputy Medical Officer of Health: W. H. COWPER, M.B., B.CH., B.A.O.

Chief Public Health Inspector: D. J. COLE, M.R.S.H., M.A.P.H.I.

Additional Public Health Inspector: C. H. BRICE, M.A.P.H.I.

Clerical Assistant: MRS. S. M. HINGLEY.

Provisions of Health Services for the Area

The personal health services are provided by various Bodies, by far the greater part being under the control of the Regional Hospital Board, Devon County Council and the Local Executive Council. The environmental health services are controlled by the District Council.

The Public Health Laboratory Service has a laboratory in Plymouth for the investigation of communicable diseases and the examination of milk, water, ice cream, foodstuffs, etc.

The Devon County Health Handbook gives details of the health and allied social services in the County of Devon. Much of its information refers to the County as a whole, but there are details of the various services provided in this district.

## KINGSBRIDGE RURAL DISTRICT COUNCIL

### ANNUAL REPORT ON THE HEALTH OF THE AREA DURING 1966

Mr. Chairman, Ladies and Gentlemen,

I present, herewith, the Annual Report on the health of the area during 1966, drawn up in accordance with the requirements of Ministry of Health Circular 1/67 dated January, 1967. Included in this Report is the Report of your Chief Public Health Inspector.

During the year your Medical Officer of Health, Dr. R. B. Walker, resigned and emigrated to Canada. He had been Medical Officer of Health for eleven years. The undersigned was appointed Acting Medical Officer of Health on 1st November, 1966.

#### Vital Statistics

The Registrar General estimated that the mid-year population increased by 210 persons to a total of 11,810 persons, mainly by inward migration into the area.

Births and Deaths were almost equal and their Rates compared very favourably with the National Rates.

A total of 86 deaths (54%) was due to diseases of the heart and circulation and 30 deaths (19%) were due to cancer. One third of the cancer deaths were due to lung cancer, and one cannot help thinking of the connection between cigarette smoking and lung cancer.

#### Notifiable Diseases

Very few infectious diseases were notified, the largest number being 11 cases of measles. There were no cases of food poisoning.

#### Provisions of Health Services for the Area

The personal health services are provided by various bodies, by far the greater part being under the control of the Regional Hospital Board, Devon County Council and the Local Executive Council. The environmental health services are controlled by the District Council.

The Public Health Laboratory Service has a laboratory in Plymouth for the investigation of communicable diseases and the examination of milk, water, ice cream, foodstuffs, etc.

The Devon County Health Handbook gives details of the health and allied social services in the County of Devon. Much of its information refers to the County as a whole, but there are details of the various services provided in this district.

Water Supply

Water is supplied by the South West Devon Water Board. The sources remain the same being chiefly for this district from the Avon Reservoir, with additional water on occasion from the Ranney Works on the River Dart.

The water is treated by flocculation and filtration. It is chlorinated and the pH is adjusted. The quality is of a high standard and it is adequate in quantity for the needs of the district.

Copies of reports of all samples taken by the Board are forwarded to this department. We are grateful for all the information passed to us by the Board.

Samples of water are taken in schools by the County Public Health Department. Copies of these reports are received.

There are a number of small private supplies. Inspection of these and sampling of the water is carried out as necessary.

The amount of fluoride present naturally is negligible.

National Assistance Acts, 1948 and 1951

No action was necessary under section 47 of the 1948 Act, or under the (Amendment) Act, 1951, for the removal and detention of persons in need of care and attention.

No burials took place under section 50 of the 1948 Act.

Notifiable Diseases  
JOHN WILDMAN,

Medical Officer of Health.

ANNUAL REPORT

OF

THE CHIEF PUBLIC HEALTH INSPECTOR

FOR THE YEAR 1966

Mr. Chairman, Ladies and Gentlemen,

Herewith I submit my report on the work of the Public Health Department during the year ended 31st December, 1966.

SEWERAGE

CHALLABOROUGH. Conditions remain most unsatisfactory at Challaborough and steps have been taken to improve one private system dealing with a number of properties. It is hoped that the scheme proposed by the consultants will not be unduly delayed as a major sewerage scheme is urgently needed.

FROGMORE AND CHILLINGTON. The scheme for extending sewers at Chillington and Frogmore and the enlargement of the sewage works at Chillington should commence early in the New Year and be in operation in good time to cater for the proposed new school and housing development.

SOUTH POOL. The scheme of sewerage and sewage disposal at South Pool has now been completed and is functioning satisfactorily.

BIGBURY-ON-SEA. Maintenance of the sea outfall has been delayed pending the construction of a new outfall in conjunction with the Challaborough scheme.

LODDISWELL. Although a scheme for Loddiswell has been prepared for some considerable time no progress has been made in starting the necessary works. The disposal works remain unsatisfactory due to overloading and insufficient treatment.

STOKE FLEMING. The consultants have been asked to prepare a scheme for extending sewers and treating sewage discharged through the sea outfalls at Stoke Fleming. There will probably be some delay in finalising a scheme pending the publication of the development plan for this village.

WEST ALVINGTON. In view of the proposals of the Urban District Council to construct a sewage disposal works for Kingsbridge, consideration was given to the possibility of draining the sewage from West Alvington to Kingsbridge for treatment. The existing works at West Alvington are obsolete and overloaded. Agreement has been reached in principle by the two Authorities and in due course consultants will be asked to prepare a scheme for gravitating sewage from West Alvington, and for catering for the development at Tacket Wood, en route to the Kingsbridge trunk sewer.

WEST BUCKLAND. The consultants have been asked to submit proposals for dealing with this area. The topography of the area presents difficulties particularly regarding a disposal works site, and it is probable that ultimate proposals will include for the pumping of sewage from this area to Thurlestone.

This in turn may lead to proposals to utilise the South Milton site for treatment purposes thereby disposing of a crude sea outfall at Thurlestone. I am quite convinced that in general a policy of grouping adjoining districts for sewage purposes will prove more efficient, and, in the long term, more economical.

MAINTENANCE. Two mobile gangs are employed in maintaining sewers and sewage disposal systems. This seems the only practical way of dealing with maintenance, but because of the number of works and the fact that they are so scattered, a great deal of time is, of necessity, wasted in travelling, and on occasions when breakdowns occur, the service is stretched to breaking point. In the advent of more works coming into operation it will become necessary to employ an additional gang.

### HOUSING

Progress in dealing with unfit houses has been maintained, the numbers represented being similar to last year. The increase in the number of houses demolished was due to the clearance of an area at Frogmore.

Apart from Malborough, where action is to be taken shortly to represent a number of dwellings, unfit houses still in existence are scattered and few in number, and the families displaced arising from formal action on these properties could be re-housed through casual vacancies occurring in Council property.

The number of unfit houses made fit was precisely the same as the previous year. The demand for such properties remains as keen as ever and every assistance is given in an endeavour to bring such properties up to standard and thereby retain the character of the villages and hamlets.

### IMPROVEMENT GRANTS

The number of applications for discretionary and standard grants show a marked decline during the year, although the number of grants paid almost doubled.

There is still a great deal of work to be done in providing modern amenities in properties throughout the district and I hope this can be accomplished by persuasive means rather than by formal action.

## MEAT INSPECTION

There was a substantial increase in the number of carcasses inspected with a resultant increase in the number of visits having to be made to the slaughterhouses. Fortunately the quality of animals killed is extremely high and the percentage affected by disease relatively small.

## MOVEABLE DWELLINGS

Due to lack of staff very little work was done in connection with caravan sites.

One large site is in existence at Beesands where due to legal arguments, site licence conditions have not been enforced. I think it is high time the issues were resolved one way or the other so that official action can be brought under the provisions of the Caravan Sites and Control of Development Acts, to enable this site to be brought up to the high standard of other sites in the district.

## REFUSE COLLECTION AND DISPOSAL

The amount of refuse collected per annum continues to rise. This can be attributed to the increase in the number of houses built every year, and the inescapable fact that the quantity of refuse per house is also steadily increasing. When one considers that a number of goods have three separate wrappings this is not surprising.

The tips at Fuge and Hangman's Cross are rapidly approaching saturation point and conditions at the latter are far from satisfactory.

A report will be submitted in due course on the whole problem of collection and disposal and I think it is only fair to indicate that the cost of this service is bound to rise if a weekly service is to be maintained and disposal is to be carried out in a proper manner.

## LITTER

The collection and disposal of litter still remains a challenge. I believe that conditions are improving slowly but a problem will always remain as long as the general public are apathetic and blatantly indifferent to the spoilation of the beaches and countryside.

## GENERAL ADMINISTRATION

The number of inspections made during the year showed a marked fall. This was due to my prolonged illness and I would like to take this opportunity of recording my appreciation to the Council and Staff for their kindness and consideration during my illness. I think that Mr. Brice and Mrs. Hingley coped manfully during my absence and I know they received the full support of other departments, particularly that of the Clerk's.

It would be unfair to criticise the lack of work done, particularly in certain fields such as Food Hygiene, and more particularly when, during the year, a successful prosecution was taken under the provisions of the Food Hygiene Regulations on the proprietors of a guest house at Bigbury-on-Sea, which resulted in fines totalling £49 8s. 0d. being imposed, but this was an isolated case and there still remains a tremendous amount of work to be done in connection with all food premises.

Sewerage and sewage disposal is another section administered by the department which really needs more time devoted to it. I think it fair to point out that the office and technical staff has remained the same for the past eighteen years whereas the outdoor staff controlled by the department has increased from six to sixteen. This does reflect on the much greater volume of work done, quite apart from such things as Improvement Grants and Caravan Sites which are administered by the office staff.

Arising out of this I would like to sow the seed in members minds that the time is approaching when consideration should be given to the employment of additional help; not necessarily a qualified Public Health Inspector, but possibly a technical assistant.

I am, Ladies and Gentlemen,  
Your obedient Servant,

D. J. COLE,

Chief Public Health Inspector.

October, 1967.

INTERNATIONAL CERTIFICATES OF VACCINATION

In accordance with the requirements of the World Health Regulations certificates of Small pox and Cholera vaccinations in respect of persons travelling abroad were authenticated by the Public Health Department.

MEAT INSPECTION

During the year 431 visits were made to slaughterhouses.

The following carcasses were inspected:

Cows	..	..	..	..	11
Heifers	..	..	..	..	55
Steers	..	..	..	..	228
Calves	..	..	..	..	79
Sheep	..	..	..	..	2814
Pigs	..	..	..	..	165
Total					<u>3352</u>

The total weight of meat condemned was 2 tons 6 cwts. 17 lbs.

Diseased meat, etc. is collected by arrangement and converted into glues and fertilisers.

The income from meat inspection charges amounted to £115 9s. 6d.
