PROVISION OF ANTITOXIN - Medical men practising in the district can obtain a free supply of Diphtheria Antitoxin and Scarletinal Serum. Material is also supplied for the immunisation of children of the district against Diphtheria free of cost.

THE SOUTH HAMS COTTAGE HOSPITAL provides 16 beds for patients from Kingsbridge and the surrounding district:-

ISOLATION HOSPITAL - None in the district, but by arrangements with the Kingsbridge Rural District Council and with the Plymouth City Council, infectious cases requiring hospital treatment may be sent to the Modbury Auxiliary Isolation Hospital and the Swilly Isolation Hospital, Plymouth, respectively.

The arrangements referred to are provisional only, pending the completion and adoption of a Scheme under Section 63, of the Local Government Act, 1929, for the provision of hospital accommodation for this part of the Administrative County and which Scheme is in the course of preparation.

Diphtheria Immunisation. Clinics are regularly held for the protection of children against Diphtheria.

Diphtheria. I would again emphasise that in the treatment of Diphtheria, serum should be given at the earliest possible moment, and preferably in one adequately large dose.

The doctor should never wait for the laboratory report before giving antitoxin if he considers on clinical grounds that the patient may be suffering from Diphtheria.

Every attempt should be made by means of bus or passenger train services, special messenger, or by personal delivery to ensure that the swab reaches the laboratory in as short a time as possible after it is taken.

It is important to obtain immediate medical advice in cases of suspected Diphtheria.
