Chairman of the Housing and Health Committee: Councillor P. J. Hopkinson

PUBLIC HEALTH OFFICERS OF THE COUNCIL

Medical Officer of Health: N. V. Hepple, M.D., B.S., B.Hy., D.P.H.

Deputy Medical Officer of Health: Isobel B. Alexander, M.B., Ch.B., D.P.H.

Public Health Inspector: J. D. Andrews, M.A.P.H.I., A.M.I.P.C.

> Technical Assistant: J. B. Cahill

Clerk/Typist: Mrs. E. Clarkson Telephone Number: Knaresborough 2264 Knaresborough House, Knaresborough.

To the Chairman and Members of the Knaresborough Urban District Council.

Mr. Chairman, Ladies and Gentlemen,

I have the honour to present for your consideration the Annual Report for 1972 on the work of your Health Department and the health of your district.

The report also contains information on the health services provided by the County Council for the area.

The post of Medical Officer of Health disappears at the end of March, 1974, with the reorganisation of local government and the health services. The latter become the responsibility of the Regional and Area Health Authorities which are soon to be established. The new local government authorities will continue to need medical advice, and arrangements will be made for this to be provided by an officer of the health authority.

A notable feature has been the complete absence of infant deaths during the year. While one cannot anticipate that this happy state of affairs will be repeated each year, it is an indication of the high state of efficiency of modern maternity and child care services.

I am grateful to my colleagues and to the members of the Council for much help and kindness.

I have the honour to be,

Mr. Chairman, Ladies and Gentlemen,

Your obedient servant,

N. V. HEPPLE,

Medical Officer of Health.

STATISTICS

Registrar General's estimate of population (mid 1972)		11,770
Area (in acres)		2,488
Number of inhabited houses, March 31st, 1972	1	4,063
Rateable value, March 31st, 1972		£364,529
Sum represented by a penny rate, March 31st, 1972		£3,516

SOCIAL CONDITIONS OF THE AREA

Knaresborough is an inland holiday resort on the banks of the Nidd and is a centre for the Yorkshire Dales. Its Castle and boating facilities have a special attraction for the day visitor. It has one of the largest weekly open-air agricultural produce and general markets in the North of England.

During the summer catering is one of the principle trades in the town. There are also a number of small industries including the manufacture of plastic goods, raincoats, shirts, and sports clothes, two linen and cotton weaving mills, a saw mill, and a boat building and repair factory.

NOTES ON VITAL STATISTICS

Births

The birth rate of 14.5 was lower than in 1971 and lower than the national rate of 14.8.

Deaths

The death rate of 10.6 was higher than the previous year. The rate for England and Wales was 12.1.

The principal causes of	death we	re as fo	ollows:		
Cerebrovascular disease	211.12				51
Ischaemic heart disease					29
Malignant neoplasms,	leukaemi	a, incl	uding	neo-	
plasms of lymphatic an					24
Pneumonia, bronchitis,					15
Heart diseases (excepting					13

Together these groups accounted for almost three-quarters of the deaths from all causes.

Natural Increase of Population

The number of deaths exceeded the number of births by 14.

Infantile Mortality

No child died under the age of one year.

Maternal Mortality

No mother has died in Knaresborough as a result of childbirth for many years.

GENERAL PROVISIONS OF HEALTH SERVICES FOR THE AREA

1. Public Health Officers of the Authority

The names and qualifications are set out on page 3.

2. Health Services Laboratory Facilities.

Any special investigation into outbreaks of infection and the isolation and typing of virus is undertaken by the Public Health Laboratory at Seacroft Hospital, Leeds. The routine bacteriological examination of clinical material, such as throat swabs, is done at the laboratory of the Harrogate General Hospital.

Samples of milk and other food stuffs, including ice-cream, are taken for bacteriological examination to the Public Health Laboratory at Seacroft and this laboratory also undertakes the bacteriological examination of the public water supply for the Claro Water Board.

The chemical analysis of the public water supply is carried out for the Claro Water Board by Messrs. T. Fairley & Partner, Leeds.

REMOVAL TO SUITABLE PREMISES OF PERSONS IN NEED OF CARE AND ATTENTION

No action was taken during 1972.

‡2 Phys. Hand/Esn. 1 Esn./malad

F. Audiometry

Routine testing of school children from the age of seven years was continued by health visitors who have received special training in the use of the pure-tone audiometer. 1,421 school children in this group were tested in 1972, of whom 41 were referred for further investigation.

Deafness testing in infancy is also carried out by the health visitors. Stage 1 appointments are issued at $6\frac{1}{2}$ months and are repeated for those who fail to attend. Stage 2 appointments are issued at 18 months for failed to attend and failed on test Stage 1. Stage 3 appointments are issued at 30 months for failed to attend and failed test on Stage 2. Stage 4 appointments are issued at 4 years 6 months for failed to attend and failed test on stage 3. A further appointment is made for those children who fail to keep the first appointment for 4 years 10 months.

4. SPEECH THERAPY

207 new cases were treated during the year and the treatment of 153 others was continued. Most of the treatment is carried out in schools but the Speech Therapists attend Dragon Parade Clinic, Harrogate, and Alma House Clinic, Ripon, and 140 domiciliary visits were made.

5. CARDIAC CLINIC

During 1972 ten sessions of the Cardiac Clinic were held when 95 children made a total of 100 attendances. There were twelve new cases, eight of whom had been discovered to have heart defects at routine school medical examination while two had been referred by another consultant. Only two babies were referred to the Clinic by their family doctors as Dr. Clarke prefers to see infants with heart defects at his Paediatric Clinic. It follows inevitably that, as older children are discharged and fewer babies come to the Clinic, the number of patients gets less and Cardiac Clinics can be held only at infrequent intervals.

During the period under review four children were transferred to the Adult Cardiac Clinic at Harrogate Hospital, four left the area and twelve were returned to the care of their own doctors.

6. CHILD GUIDANCE CLINIC

150 new cases, 116 boys and 34 girls, were seen during 1972. 142 of these cases were referred from this Division as follows:—

				Boys	Girls	Total
Divisional Me	dical	Officer	 	40	11	51
General Pract	itione	rs	 	16	7	23
Head-teachers	ollen	1.100	 	13	2	15
Paediatrician		0.00	 	27	6	33
Parents			 	7	2	9
Others			 br	6	5	11
				109	33	142

Dr. Elizabeth Gore, the Consultant Psychiatrist, reports below:

"As this is the last Annual Report I shall prepare in respect of the Harrogate Child Guidance Clinic, I am prepared to enjoy the luxury of 'blowing my own trumpet' to the extent of admitting a measure of satisfaction in the work which has developed at the clinic both in spread and in depth. With two provisos. The first that the clinic which I took over in 1960 from Dr. Jack Kahn (although only operating one day per week) had already established a close liaison with the community and those caring for the children referred to us. Secondly, it is, of course, the members of the clinic team as a whole who are responsible for the growth and achievements of the clinic.

1972 proved to be a "bumper year" in respect of new referrals seen (150 cases, 116 boys and 34 girls) and the scope of the work done. The fact that we have had 2 Psychologists working between them 9 sessions per week, and for the most part of the time 3 Social Workers in training, in addition to full time Psychiatric Social Work Supervisor, has meant that we have, I think, been able to offer a very good service to the cases referred to us. The members of the team, particularly the Psychologists, but in some cases where appropriate, the Social Workers also, have been utilised in treatment of individual children and the families. In some cases the Psychiatric Social Worker has seen a group of mothers while the same mothers were being seen individually by student Social Workers. This and other similar arrangements have meant that these families have received speedier and more efficient help.

We have continued to have large numbers of visitors to the clinic particularly from Head Teachers and other teachers, and I think this has been one of the very useful aspects of the work here, also we have been able to have a closer contact with Family Doctors and with the Paediatrician. Students from the Institute of Education in Leeds have been able to contribute to our discussions from their own experience.

In spite of accommodation difficulties the work of the Remedial Teacher has flourished. A greater problem than accommodation has really been the amount of work which could well justify an additional teacher, since the work is so important as it often does away with the necessity of a child going away from home

I would like to thank my colleagues at the clinic, both past and present, for the high standard of work which they have always maintained and for their constant support and loyalty to me, and the reliable and devoted secretaries, particularly Mrs. Ramsbottom who has also left the clinic this year, and to Miss Griffin, Chief Nursing Officer, for her help and co-operation. I would also like to bid a regretful farewell to Dr. Hepple and my other good friends at the Health Department in Harrogate.

I hope that the clinic will continue to flourish. It is most important that the work should be carried on".

7. CARE OF MOTHERS AND YOUNG CHILDREN

(e) Routine Tests on Young Babies

One type of mental handicap is caused by an inability to metabolise one of the amino acids in food. In order to prevent damage to the brain of these children it is essential to find them within the first weeks of life and give them a special diet. All babies therefore have a routine blood test on their sixth day in order to exclude this disability. This is carried out either in the maternity hospital or at home by the domiciliary midwives. No positive cases were discovered during the year.

Congenital dislocation of the hip is a crippling deformity which is largely prevented by early ascertainment and treatment Fortunately there is a simple test—the Ortolani test—which can be carried out by nursing and medical staff when young babies are first seen.

Six children were referred for specialist opinion during 1972. Two of these were confirmed as cases and two were referred for further investigation. The remaining two children were found not to have dislocated hips.

(f) Dental Care

The arrangements for dental treatment of expectant and nursing mothers continue.

(g) Care of Premature Infants

A premature infant can be defined for practical purposes as one which weighs $5\frac{1}{2}$ lbs. or less at birth.

These small infants are particularly liable to damage from cold and feeding difficulties and need special care. The County Council provides specially heated incubater cots for ambulance transport of these children.

During 1972 there were 83 live births and 13 stillbirths of infants of $5\frac{1}{2}$ lbs. or less born to mothers normally resident in the division. 70 of these survived over twenty-eight days and 13 died in the first four weeks.

(h) Inspection of Children at Day and Residential Nurseries and County Children's Homes

Medical inspections and immunisation are carried out at the day and residential nurseries and county children's homes by the medical staff of the Department. In addition all the children are examined on admission and discharge and any medical problems dealt with.

8. MIDWIFERY

The midwifery staff of the Division consists of 1 Nursing Officer (Home Nurse Midwife), 5 whole-time midwives and 9 midwives who are also home nurses.

In addition to attending 15 home confinements, the midwives visited 1,371 hospital and maternity home patients who went home before the tenth day. 288 of these patients were discharged home within two days, 714 were discharged within three to seven days and 369 within eight or more days. Twice daily visits are made during the first three days of puerperium and daily visits thereafter, up to the tenth day.

Owing to the shortage of accommodation in the maternity units of the Harrogate and Ripon Hospitals and the York Maternity Home, applications for maternity beds made on social grounds are investigated by the domiciliary midwives.

The Obstetric Flying Squad from the Harrogate Hospital was called out on 1 occasion during the year.

Analgesia

Analgesia was administered by County Council midwives to domiciliary patients as follows:—

Trilene			4
Pethidine			2
Trilene and	Pethidine		6

9. HEALTH VISITING

2 Nursing Officers (Health Visitor), 19 full-time health visitors, 2 part-time health visitors, 4 full-time assistants to health visitor and 5 part-time assistants to health visitor were employed in the Division at the end of the year. All the full-time health visitors are attached to general practitioners.

1 of the full-time health visitors and 1 part-time health visitor do tuberculosis visiting and maintain liaison between the Health Department and the chest physicians. Another is largely occupied with the admission and discharge of elderly people to hospitals, old people's homes and Part III accommodation, working closely with the Geriatric Unit at Knaresborough Hospital.

Like the rest of the nursing staff, the health visitors work under the general direction of the Divisional Nursing Officer.

10. HOME NURSING

14 home nurses, 4 part-time home nurses, and 9 home nursemidwives were nursing in the Division at the end of the year. Almost all the Home Nurses are attached to General Practitioners.

	(iii) Not ascertained		32
	(c) Percentage positive		6.12%
4.	Vaccination		
	No. vaccinated following negative Heaf Test		852

12. PREVENTION, CARE AND AFTER-CARE OF TUBERCULOSIS

The Chest Physicians hold sessions once a week at Scotton Banks Hospital, twice a week at Harrogate General Hospital and once a week at Ripon and District Hospital. The health visitors who do tuberculosis visiting attend the clinics at the Harrogate and Ripon Hospitals.

During the year 11 new cases were added to the Register. 5 males and 4 females were cases of pulmonary tuberculosis, 1 was diagnosed as renal tuberculosis, and the other was the three year old daughter of a transfer in and she was diagnosed as tubercular meningitis. Three of the cases were relapses after many years and four of the cases had positive sputum.

As a result of these notifications 134 contacts were seen at the Chest Clinics and none were found to have active disease. 84 were given B.C.G.

17 names were removed from the Register during the year. 7 of these recovered, 5 were transferred to other areas and 5 died, 3 of them from non-tuberculous conditions.

The Chest Physician remarks as follows:-

"One can say that this is a satisfactory state of affairs, but it is somewhat disquieting that 3 patients relapsed after previous treatment but the extent of their drug treatment was none or minimal. As far as I know there are no chronic, positive, drug resistant cases".

13. CERVICAL CYTOLOGY

A screening test for the detection of cancer of the cervix is offered to all married women. 71 sessions for this purpose were held at the Clinic, Dragon Parade, Harrogate, 18 sessions at Alma House Clinic, Ripon, and 1 session at the Health Centre, Pateley Bridge.

1,059 women attended the Harrogate sessions, 246 women attended the Ripon sessions and 20 women attended the Pateley Bridge session. There were 4 positive smears.

It is desirable to repeat the smear test at least every five years and in certain circumstances possibly each year. Women over the age of thirty, especially those with large families and particularly those in the lower income groups are the ones most at risk. There are still large numbers of women in these groups who have never come forward for a test.

14. CHIROPODY

Much pain and disability is associated with minor foot ailments, many of which are amenable to treatment. The chiropody service provides this for old people, expectant and nursing mothers, and for the physically disabled.

Periodic sessions are held in Harrogate, Ripon, Knaresborough, Pateley Bridge, Boroughbridge, Poppleton, Nun Monkton, Whixley, Green Hammerton, Kirk Hammerton, Bishop Monkton, Burton Leonard, Kirkby Malzeard, Grewelthorpe and Great Ouseburn. Many of these are organised by voluntary associations on behalf of the department, and I am very grateful to those who undertake this valuable voluntary work.

There is also a domiciliary service for those who are unfit to attend a clinic session.

The chiropodists work part-time and the demand for their services tends to outstrip the service available.

15. REGISTRATION OF NURSING HOMES

There were 14 registered nursing homes with a total of 304 beds in the Division at the end of the year. Seventeen visits of inspection were made. There is also 1 nursing home registered under the Mental Health Act which has 9 beds, and which was also inspected during the year.

16. REGISTRATION OF OLD PEOPLE'S HOMES

The 27 old people's homes registered in the area were visited by the Divisional Medical Officer in conjunction with the Divisional Welfare Officer.

17. MEDICAL EXAMINATION OF STAFF, etc.

A total of 527 medical examinations of staff, etc. were carried out during the year. New members of the West Riding staff are medically examined only if they have a significant medical history or are over forty-five years old, a policy which reduces work for the medical staff.

The medical examinations carried out were in the following categories:-

West Riding County C	ouncil					84
District Councils in the	Divisio	n				83
Other Authorities						7
Applicants for Training	g College	s				140
Employment of Childre	n (includ	ling in	enterta	inment	s)	76
School Meals Staff						137

18. HEALTH EDUCATION

The interest in health education has been well maintained and all our normal activities have continued. The interest shown by schools varies according to the head teachers, the health visitors and pressure of work but our contact with Granby Park School has improved due to Miss Gath, health visitor, and Mr. Therman, master with special responsibility for outside interests.

During the year we gave a course of eight lectures to housemothers and wardens of old people's homes on home nursing and first aid. The lectures were given by a health visitor and a district nurse.

We have given lectures, courses of lectures and demonstrations to the St. John Ambulance Brigade and the Red Cross on home nursing, welfare and hygiene, and to nursing cadets on mothercraft, as well as acting as examiners on these subjects. I am pleased that a district nurse has taken part in this programme.

Brownies have again been very active in taking the home safety badge. In December we had a Home Safety competition for four Brownies from each of six packs and this was very encouraging as they showed a very high standard of knowledge.

One enterprising health visitor has started a weekly slimming session in the evenings at Pateley Bridge. In Ripon one session in each relaxation class is given in the evening to both husbands and wives

A new avenue of teaching had been in the Maternity Unit of Ripon Hospital where a talk is given each week to newly delivered mothers on feeding and care of the baby at home.

The number of requests for information on drug addiction grows and films and talks have been given to such groups as schools, parent-teacher associations, youth clubs and the Army Apprentice School. We have also given a course of talks to the children at the American Camp and we are hoping this will become a yearly event. The talks included such topics as drug addiction, smoking, V.D., etc.

Health education is a very time-consuming subject—not only in time spent giving the talks but also in preparing them—and with the pressure of work at the present time, health education opportunities are lost for this reason.

AMBULANCE SERVICE

This is a separate service in the West Riding. There is an Ambulance Station in Harrogate and Sub-depots in both Ripon and Pateley Bridge. These are all in charge of the Station Officer. Communication is maintained by short wave radio.

Measles

144 cases of measles were notified in 1972 compared with 38 in 1971. This gave a notification rate of $12 \cdot 2$ per thousand population.

Infective Jaundice.

3 sporadic cases occurred during the year, giving a notification rate of 0.25 per thousand population. There were 11 cases in 1971.

Poliomyelitis

No notifications were received for the twentieth year in succession.

Food Poisoning.

The 2 notifications were in respect of a man and wife who were infected with Salmonella (Group B) while on holiday in Spain and became ill on their returh. The notification rate was 0.17 per thousand population.

Tuberculosis

No new cases of pulmonary tuberculosis were notified during the year. 3 cases were removed from the Register, 1 recovered, 1 left the area and 1 died.

The following table gives details from the Tuberculosis Register:

	Pulm	onary	Non-Pu	Imonary	Tatal

ANNUAL REPORT OF THE PUBLIC HEALTH INSPECTOR FOR THE YEAR 1972

To the Chairman and Members of the Knaresborough Urban District Council.

Mr. Chairman, Ladies and Gentlemen,

I have pleasure in submitting my Annual Report on the Public Health and Cleansing Services for the year 1972.

Improvement grants have again taken up much of our time and, it seems, will continue to do so until the 75% grant finishes in June 1974. There should, by then, be very few sub-standard houses in the district.

Refuse collection has generally gone well, but the usual problems have again been encountered at Bank Holiday times. It is obviously impossible to fit five days' work into three days and the difficulty is increased by the extra trade refuse produced at such times. Unfortunately, it is always the shortcomings of a system which people notice while the excellent job the men do over the rest of the year passes without comment.

Mr. Cooper resigned in June after six years' service, but his place has been most ably filled by Mr. Cahill, while Mrs. Clarkson, who also joined us in 1972 has been of very great assistance.

I am grateful to the members of the Council and Dr. Hepple for their help during the year.

I am Mr. Chairman, Ladies and Gentlemen,

Yours faithfully,

J. D. ANDREWS, Public Health Inspector.

CIRCUMSTANCES OF THE AREA WATER SUPPLY.

The Claro Water Board, of which the Council is a constituent member, is responsible for the supply and distribution of water throughout the area.

The following table shows details of water samples taken in the area and submitted for bacteriological analysis:—

	dis contrits	Probable No	o. per 100ml.	action as a second
Source of Supply	No. of Samples	Coliform bacilli	Bact-Coli (Type 1)	Result
Public Supply	21	Nil	Nil	Satisfactory

During the year mains extensions were provided to the following sites:—

Stockdale Close Halfpenny Lane

HAIRDRESSERS AND BARBERS

3 visits were paid to hairdressers' premises registered under the West Riding (General Purposes) Act. They were found to be satisfactory.

NOISE ABATEMENT ACT, 1960

5 visits were paid in respect of 1 alleged noise nuisance. No statutory action was necessary.

RODENT CONTROL TABLE

DISINFESTATION

During 1972 a total of 25 premises were cleared of insects (mainly wasps) by this Department. Visits were also paid to 5 other premises to give advice to householders regarding other types of infestation.

MOVEABLE DWELLINGS

28 routine visits were paid to caravan sites during year. The following shows the sites licensed:—

The Close, Manse Lane	 1 Caravan
Homestead Camping Site, Wetherby Road	 35 Caravans
Lido Camping Site, Wetherby Road	 200 Caravans
Lorrisholme Camping Site, York Road	 45 Caravans
Nidderdale Camping Site, York Road	 30 Caravans
Riversmead, York Road	 7 Chalets

SMOKE ABATEMENT

Dur to a breakdown of the volumetric sampling machine, readings were not taken during the summer period of 1972. This means that the figures for the year are artificially high. Average figures for the months when readings were taken were 74.25 micro-grammes/cubic metre of smoke and 58.5 microgrammes/sublic metre of sulphur dioxide.

Towards the end of the year, a second machine was installed Castle School, Stockwell Road, in order to give a more accurate picture of conditions in the centre of the town.

HOUSING ACT, 1969

Standard Grants-4 applications were received during the year.

Discretionary Grants-113 applications were received.

95 properties were completed and £42,943 was given in respect of these houses.

Grant applications are still being made in large numbers, especially with the introduction of the 75% grant in March, 1972. No doubt, these applications will start to fall off towards the end of 1973 and it is already becoming apparent that most properties lacking basic facilities are now up to standard.

FOOD INSPECTION AND HYGIENE

The following table gives the types and numbers of the food premises in the district:—

Description of Premises	Total number of Premises (i)	No. of Premises which comply with Reg. 16 (ii)	No. of Premises to which Reg. 19 Applies (iii)	No. of Premises which comply with Reg. 19 (iv)

MEAT

Butchers' Shops

18 inspections of Butchers' Shops were made during the year. There are 22 premises registered for the preparation or manufacture of sausages and other "made up" foods.

Slaughterhouse

Routine inspections were carried out at the slaughterhouse during the year. These small premises served only one butcher and during the year some minor improvements were made.

Slaughter of Animals Act, 1958

5 Slaughterman's licences were issued during the year.

Meat Inspection

149 visits were made to the slaughterhouse for this purpose and 100% inspection was carried out.

Produce Market

The market was visited 25 times during the year.

Unsound Food

615 lbs. of food was voluntarily surrendered and condemned as unfit for human consumption. This comprised 314 lbs. canned meat and 301 lbs. other foods.

PUBLIC CLEANSING 1st April, 1971 — 31st March, 1973

Collection of Refuse

Refuse was collected from 4,780 properties within the town.

Collection Vehicles

The vehicles have generally worked satisfactorily, although the older Pakamatic is now in its eighth year of operation and cannot be expected to give service for very much longer.

Refuse Disposal

The tip at Water Lane was filled by September, 1972, and tipping at Harrogate started. This has meant longer hauls for the vehicles, but has been quite successful. Two skips were sited under the railway bridge at Bar Lane for use by the public for garden refuse, etc., but, as it is impossible to give the site proper supervision, problems of misuse have been encountered.

Civic Amenities Act, 1967-Abandoned Vehicles

Five vehicles were dealt with during the year. All were removed by the owners after action by this department. APPENDIX Carcases and Offal Inspected and Condemned in Whole or in Part
