ANNUAL REPORT

OF THE

Medical Officer of Health

FOR THE YEAR

1937

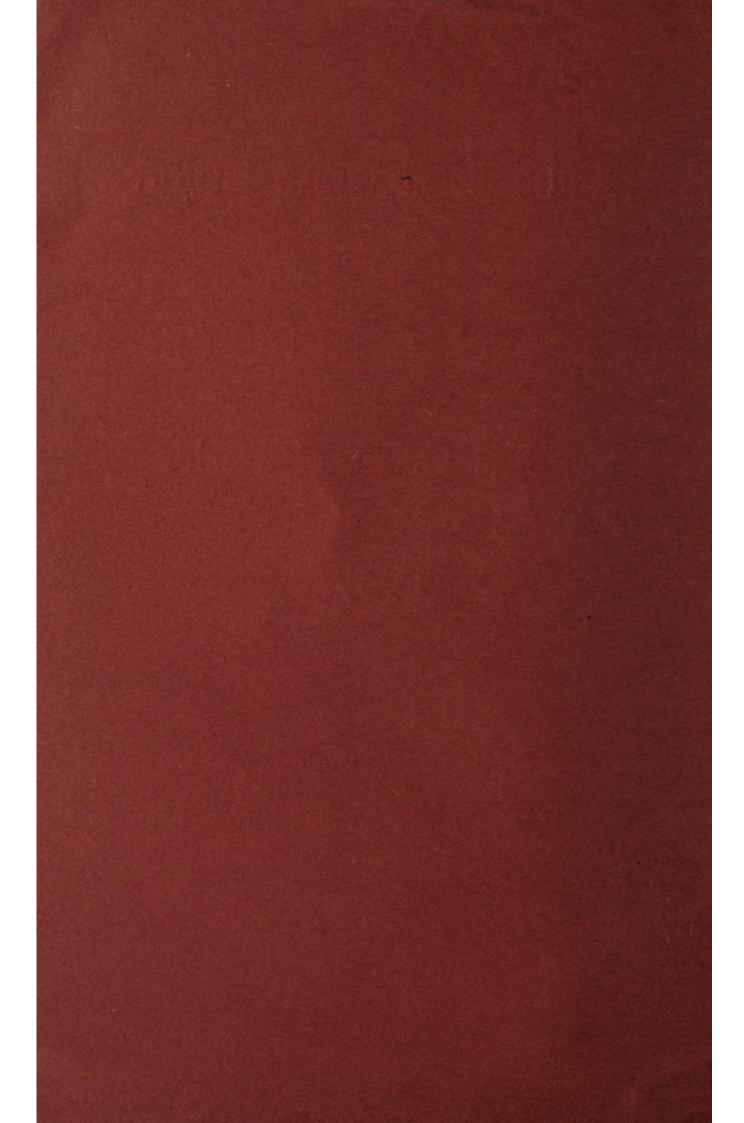

BY

WILLIAM JAMES BUTCHER,

M.R.C.S., L.R.C.P., D.P.H. Barrister-at-Law

WORTHING:

The Southern Publishing Co., Ltd., 7, Bath Place.-B643

Littlehampton Urban District Council

"MILL HOLT,"
HILLSIDE AVENUE.

WORTHING.

April, 1938.

GENTLEMEN,

I beg to submit to you my Annual Report for the year 1937, which has been compiled in accordance with the requirements of Circular 1650, issued by the Ministry of Health on the 4th October, 1937.

The rates for 1937 as compared with the average rates for the last six years are as follows:—

		Avera	ige, 1931-36.	1937.
Birth Rate, per 1,000 pop	pulatio	n	14.2	15.2
Death Rate, per 1,000 po	pulatio	on	12.7	12.2
Corrected Death Rate,	per	1,000		
population			-	10.4
Infantile Mortality Rate	e, per	1,000		
births			54	36

These rates have been calculated on the estimated resident population for the mid-year 1937 supplied to me by the Registrar General.

The Corrected Death Rate (10.4) is obtained by multiplying the uncorrected rate by the factor of correction for Littlehampton, viz., 0.85. The corrected death rate represents what the death rate for Littlehampton would be if the population contained proportionately the same number of males and females in each of the age groups as enumeration in 1931 census revealed in England and Wales as a whole. The factor of correction being less than 1, indicates that the population of Littlehampton consists of a larger proportion of people at the ages at which death is more likely to occur than does the population of England and Wales as a whole.

The various mortality rates of the district during the past year as compared with the corresponding rates for England and Wales and the urban and rural districts of West Sussex are shown in a comparative table on page 4.

I am, Gentlemen,

Your obedient Servant,

WILLIAM JAMES BUTCHER.

The Chairman and Members of the

Littlehampton Urban District Council.

NATURAL AND SOCIAL CONDITIONS OF THE DISTRICT.

Littlehampton is a small town situated on the South Coast, about half-way between Worthing and Bognor. It is here that the River Arun, coming down from Pulborough through Arundel, enters the sea, and has given the town the facilities of a port for many centuries.

The underlying geological stratum is brick-earth.

Industrial employment is chiefly in connection with fishing, boat building, brick making and engineering. The letting of apartments to, and the catering for the needs of visitors, provide the main source of income to many of the inhabitants. There are also a number of farms in the district.

GENERAL STATISTICS.

Area (acres), 2,720.

Resident Population (1937), estimated by Registrar General, 11,130.

Population (1931) Census, 10,178.

Rateable Value (1937), £122,180.

Sum represented by 1d. Rate, £465.

No. of inhabited houses end of 1937 according to Rate Book-3,523.

EXTRACTS FROM VITAL STATISTICS OF THE YEAR.

Live Births-Total, M. F. 75) Birth Rate per 1,000 of the Legitimate ... 162 estimated resident population, Illegitimate Stillbirths 1 Rate per 1,000 total (live and 5 still) births, 28.8. Deaths 136 56 80 Death Rate per 1,000 of the estimated resident population,

Deaths from diseases and accidents of pregnancy and childbirth:-From sepsis—None. From other causes—None.

Death Rate of Infants under one year of age:

All Infants per 1,000 live births, 36.

Legitimate Infants per 1,000 legitimate live births, 37.

Illegitimate Infants per 1,000 illegitimate live births Nil.

Deaths from Cancer (all ages), 31.

Deaths from Measles (all ages), None.

Deaths from Whooping Cough (all ages), None.

Deaths from Diarrhoea (under 2 years of age), None.

Particulars of any unusual or excessive mortality during the year which has received or required comment:—

There has been no unusual or excessive mortality during the year.

Comparative Statistics, 1937.

	1	England and Wales.	West Urban.	Sussex Rural.	Littlehampton U.D.
Birth Rate		14.9	13.3	14.6	15.2
Death Rate		12.4	13.8	11.8	12.2
Infantile Death Rate		58	46	45	33
Pulmonary Tuberculosi	s				
Death Rate		0.58	0.5	0.3	0.75
Zymotic Death Rate			0.07	0.08	0.0
Cancer Death Rate		1.6	2.2	1.7	2.8
Maternal Mortality Ra per 1,000 births	te,	3.1	0.5	3.5	0.0
Scarlet Fever—Incider Rate per 1,000 pop lation				_	2.6
Diphtheria — Incider Rate per 1,000 por lation				_	0.27
Enteric Fever—Incider Rate per 1.000 pop lation				-	0.18

EXCEPTIONAL CAUSES OF SICKNESS.

No special causes of sickness or invalidity have evidenced themselves during the past year.

INFANTILE MORTALITY.

The causes of death and the ages of the six children who died under one year of age are as follows:—

Cause of Death.	Age.	Sex.	Remarks.		
1. Broncho Pneumonia.	9 months.	М.	Clean home. Child had every care.		
2. Congenital Hypertrophy of Pylorus. Operation.	8 weeks.	М.	Mother's health only fair. Child died in hospital.		
3. Prematurity.	12 hours.	F.	Mother's health good. Moved into new house prior to birth of child and probably over- worked.		
4. Asphyxsia Pallida Neonatorum.	30 mins.	F.	Home conditions excellent. Mother's health good.		
5. Gastritis.	3 weeks.	F.			
6. Prematurity.	1 month.	F.	Clean home. Mother's health good. Child had every care.		

GENERAL PROVISION OF HEALTH SERVICES IN THE AREA. Public Health Staff.

The Public Health Staff consists of the Medical Officer (the Littlehampton Urban District Council is one of the Authorities comprising the West Sussex Southern United (M.O.H.) Districts) the Senior Sanitary Inspector (Mr. McGarry), and an additional Sanitary Inspector (Mr. Aze).

As already stated the Council have an arrangement with the local District Nursing Committee whereby the pursing of all cases of Measles and German Measles is undertaken by the District Nurses.

Professional Nursing in the Home.

- (a) General. The Littlehampton District Nursing Association employ four nurses, two of them do general district nursing.
- (b) For Infectious Diseases the Local Sanitary Authority pay an annual fee of £50 to the Local District Nursing Association so that the services of the nurse shall be available to visit and provide nursing services to all cases of Measles and German Measles that come to the knowledge of the Medical Officer of Health through the schools, or to the knowledge of the nurses themselves in the course of their duties.

Grants are made by the County Council to the County Nursing Association for various Nursing Services, including Child Welfare work, School Nurses' work, Tuberculosis health visiting, and as subsidies to provide Nurse-Midwives in areas which would otherwise be without a Midwife.

Midwives.

There are six Midwives practising in the District, four in private practice, and two District Nurses.

Maternity.

A Maternity and Child Welfare centre is provided by Her Grace the Duchess of Norfolk at 20a South Terrace, Littlehampton.

The following meetings are held at 20a South Terrace:-

Thursdays, 2.30—4.30.

Fridays, 2.30—4.30.

Wednesdays, 2.30—4.30 for needlework in winter only.

A medical practitioner is in attendance every fourth Thursday.

A centre is also held once a month at Wick Church Hall, with a medical practitioner in attendance.

School Clinics.

A School Clinic for minor ailments is held at the Church Army Hall every Monday at 10.30 and at St. Catherine's R.C. School every Wednesday at 10.30. These Clinics have been in the charge of Nurse Bosworth. The Assistant School Medical Officer attends fortnightly at the Church Army Hall and monthly at St. Catherine's R.C. School.

Temporary Dental Clinics are held periodically at Littlehampton and Lyminster for the treatment of children with decayed teeth.

Ear Clinics are held from time to time at the Sussex Throat and Ear Hospital, Brighton, and appointments are made for children suffering from ear disease to attend.

Orthopaedic Clinics

These are held at Granville House, Arundel, to which Littlehampton school children are taken by appointment for treatment of crippling defects. The Orthopaedic Nurse supervises children who have been prescribed exercises at these Clinics.

Tuberculosis Clinics.

The West Sussex County Council hold a Tuberculosis Clinic at the Worthing Hospital on Mondays at 10.30 a.m., and at 4, Chapel Street, Chichester, on Tuesday, at 10 a.m., both of which are available to the residents of Littlehampton. Appointments for first attendance should be made through the County Medical Officer, County Hall, Chichester.

Venereal Diseases.

The West Sussex County Council have made arrangements entitling residents of the County to attend the Clinics for Venereal Diseases held at the following Hospitals:—

Worthing Hospital—Wednesdays, women 3—4, men 4—5; Fridays, women 5—6, men 6—7.

The Royal Portsmouth Hospital, for men on Tuesdays and Thursdays, 10 a.m. to 12 noon and 5 p.m. to 7 p.m., Wednesdays at 4 p.m.; and for women on Mondays, 3.30 p.m. to 5.30 p.m., Wednesdays, 2 p.m. to 4 p.m., Fridays 10 a.m. to 12 noon.

Hospitals Provided or Subsidised by the Local Authority or by the County Council.

1.—Tuberculosis.

i. Aldingbourne House Sanatorium, near Chichester, the property of the West Sussex County Council, 70 beds (Adults 61, Children 9).

- ii. A Tuberculosis Pavilion at the Worthing Isolation Hospital, Swandean, Durrington, near Worthing. This Pavilion has been provided by and is under the control of the West Sussex County Council, 12 beds.
- iii. The West Sussex County Council have an agreement with the Royal West Sussex Hospital, Chichester, to receive patients suffering from Surgical Tuberculosis at a fee of 2½ guineas per week. Beds are also retained as required at the Lord Mayor Treloar Hospital and College, Alton, Hants, and at the Royal Sea Bathing Hospital, Margate.

2.—MATERNITY.

The West Sussex County Council have entered into agreements with :—

- The Sussex Maternity and Women's Hospital, 79-80, Buckingham Road, Brighton, for the reception of abnormal cases.
- (2) The East Sussex County Council for the reception of normal cases at Southlands Hospital, Shoreham-by-Sea when the home circumstances are unsatisfactory.
- (3) The Worthing Hospital for the reception of abnormal and other cases in the Maternity Home.
- (4) The Brighton Corporation for the reception of cases of Puerperal Pyrexia and Puerperal Fever.

3.- CHILDREN.

The West Sussex County Council have an agreement with the Royal Alexandra Hospital for Sick Children, Dyke Road, Brighton, whereby two cots are reserved for the admission of children under one year requiring in-patient treatment.

4.-FEVER.

The Littlehampton Urban District Council have their own Isolation Hospital at Wick, a mile and a quarter from the town. It consists of two brick pavilions, one containing 12 beds with convalescent wards above, the other a cubicle block of 6 beds;

a third block comprises a disinfecting chamber, laundry and mortuary. A cottage (originally used for isolation purposes) is used as the administrative block, being permanently occupied by a man and his wife who act as caretakers. Nurses are engaged as and when required.

5.—SMALLPOX.

The West Sussex County Council have undertaken responsibility for the isolation of cases of Smallpox, and have made arrangements with the Brighton Corporation for their reception into the Brighton Smallpox Hospital at Fulking.

Institutional Provision other than under the Public Assistance Committee, for Unmarried Mothers, Illegitimate Infants and Homeless Children—None.

Ambulance Facilities.

- (a) FOR INFECTIOUS CASES. The Littlehampton District Council have their own Motor Ambulance, which is kept at the Isolation Hospital.
- (b) There is available for Littlehampton and District a new motor ambulance with all the latest equipment. This ambulance is worked by the St. John's Ambulance Brigade. Application for its use must be made to Superintendent A. G. King, No. 57a East Street, Littlehampton. The rule for payment is as follows:—"That fees shall be charged for the service of the ambulance to those whose circumstances admit of payment, such fees to be fixed by the Committee, and used for the upkeep, repair and expenses of the ambulance."

LEGISLATION IN FORCE.

No Local Acts, Special Orders, General Adoptive Acts or Byelaws relating to the public health have come into force during 1937.

PREVALENCE AND CONTROL OF INFECTIOUS DISEASES Infectious Diseases Generally.

SCARLET FEVER.

Sporadic cases occurred during the year. Of the 18 cases in L'hampton 2

September and October, 14 occurred among children at the Franciscan Convent.

Jan.	Mar.	Apr.	May.	June.	Aug.	Sept.	Oct.	Nov.
					1			

DIPHTHERIA.

Only three cases were notified during the year—one each in May, July and September.

No return cases of either Scarlet Fever or Diphtheria occurred.

No use has been made of the Dick or Schick tests.

The following figures indicate the use that has been made of the facilities for the examination of pathological specimens.

	Total.	Positive.	Negative.

One person died from Tuberculosis who had not been notified during life. The doctor in attendance stated that he thought the case had been notified by his predecessor.

PUBLIC HEALTH (Prevention of Tuberculosis) REGULATIONS, 1925.

It has not been necessary to serve any notice under these Regulations which prevent persons suffering from Tuberculosis taking part in the production of milk.

PUBLIC HEALTH ACT, 1925, SECTION 62.

No action has had to be taken by the Council under this section, which gives power to Sanitary Authorities to apply in special cases for a magistrate's order for the removal of Tuberculous persons to an Institution for isolation.

SANITARY CIRCUMSTANCES OF THE AREA.

Improvements during the year include :-

Water.-Extensions of mains were made as follows :-

Parkside Estate						324 yards.
Tennyson Avenue)					
Milton Avenue	}					440 yards.
Milton Close	J					
St. Flora's Road						56 yards.
Hill Road						180 yards.
New main from	Burph	nam to	Bats	worth	Park	
(not in commis	sion)					2½ miles.

Sewers.

The sewerage scheme in the Lyminster area, north of the town, is now completed. 9in. sewers have been laid to connect up with the sewerage system of the town. The area served by this new sewer previously depended on cesspool drainage. The sewerage scheme in the Eastern area, which includes Harsfold Road, Cove Road, Hawley Road, Hendon Avenue and the Sea Front, is now in progress. The area in question is at present dependent upon cesspool drainage.

Rivers and Streams.

Observations are kept on the river Arun as it passes through the town to prevent offal and waste materials being thrown into the river.

Swimming Baths.

There are no swimming baths or pools in the district.

SANITARY INSPECTION OF THE AREA.

The report of the Senior Sanitary Inspector is printed from page 15 to the end of this report, and contains a detailed account of the sanitary inspections made during the past year.

SCHOOLS.

There are six Elementary schools in the district—four in Littlehampton and two in Wick. All are provided with water closets and with the town water supply.

HOUSING.

HOUSING STATISTICS, 1937.

Number of new houses erected during 1937.

Name of Parish	Total	Private Enter- prise	By the Local Authority	By other bodies or persons
Littlehampton	58	30	28	0
Wick	25	25	0	0
Rustington	15	15	0	0

modation improved or repaired,	
and rooms repaired and cleansed 96	8
Ice cream premises—cleansed, repaired,	
dirty and uncovered containers, etc. 88	18
Shops Act, 1934—contraventions 21	-

Housing.

Details showing the number of houses inspected and the action taken under the Housing Acts and Public Health Acts for the remedy of defective or unsatisfactory conditions of dwelling houses are to be found at the end of the report of the Medical Officer of Health. It will be seen that 408 houses have been inspected under the Housing Acts and Public Health Acts for defective or unsatisfactory conditions.

Housing (Rural Workers) Act, 1926.

During 1937, in no case was application made to the County Council for assistance for improvements under the above Act.

Tents, Vans, Sheds, and similar structures.

There are two camping sites in the district, one on the west side of the River Arun, where camping takes place in the summer months only, and the other at the north end of the district, where caravans pull-in all the year round.

149 inspections had been made and the following defective or unsatisfactory conditions were observed:—

Overcrowded condition of caravan		 	1
Overcrowded condition of site		 	3
Sanitary conveniences in need of clear	nsing	 	6
Insanitary camping sites		 	1
No proper sanitary accommodation		 	1
No proper accommodation for refuse		 	1

The Public Health Act, 1936, which came into force on October 1st, 1937, provides for the licensing of camping sites. No licences were issued during 1937, but particulars are being obtained with a view to licences being considered.

Dairies, Cowsheds and Milkshops.

At the end of 1937 there were seven cowkeepers, all of whom sold their milk by wholesale.

There were eight retailers of milk on the register, and milk and cream were sold from nine premises.

The approximate number of milking cows in the district is 193.

174 inspections were made during the year, and 30 contraventions of the regulations, as detailed below, were observed :—

Want of new hopper type wind	ows		 	6
Dirty condition of ceilings, wall	ls, floo	rs, etc.	 	22
Defective condition of drain			 	1
Cesspool in need of emptying			 	1

All these requirements were carried out.

Milk (Special Designations) Order, 1936.

The following licences were granted during 1937 under the Milk (Special Designations) Order, 1936:—

To retail "Tuberculin Tested" milk	4
To bottle and retail "Tuberculin Tested" milk	1
To retail "Tuberculin Tested" milk (Supplementary)	1
To pasteurise and retail as "Pasteurised"	2
To retail " Pasteurised " milk (Supplementary)	2

Thirty-nine samples of designated milks have been sent for bacteriological examination, and 16 samples (four of "Tuberculin Tested" and 12 of "Accredited") fell below the standard prescribed by the Order.

Three samples of "Pasteurised" milk were also sent for examination by the Phosphatase Test and in one case the sample showed evidence that the milk had not been properly pasteurised.

Clean Milk Production.

During 1937, 61 samples of milk were taken for bacteriological examination—39 of designated milks, and 22 of ordinary milk.

The following tables give the number of samples which did not satisfy the Methylene Blue Test and also the number which failed the Coli Test:—

PRODUCED IN LITTLEHAMPTON.

Grade of milk.	No. of samples.	No. which did not satisfy the Methylene Blue Test.	No. which failed the Coli Test.
"Accredited "	10	4	5
"Tuberculin Tested"	5	3	3
Ordinary	8	2	2

PRODUCED AND SENT IN FROM OUTSIDE THE DISTRICT.

Grade of milk.	No. of samples.	No. which did not satisfy the Methylene Blue Test.	No. which failed the Coli Test.
" Accredited "	13	2	4
"Tuberculin Tested"	6	-	-
Ordinary	14	2	3

Five samples of "Pasteurised" milk pasteurised in Littlehampton were taken, and in each case the sample complied with the prescribed conditions of the Order. The average number of bacteria per ml. of these five samples was 35,680.

The following tables show, for the years 1926 to 1937 inclusive, the number of samples which failed to comply with the prescribed conditions and of these the number which failed the Coli Test. (The standard for "Accredited" milk is taken for ordinary milk.)

PRODUCED IN LITTLEHAMPTON.

Grade of milk.	No. of samples.	No. which did not comply with the prescribed conditions.	No. of these which failed the Coli Test.
" Accredited "	62	16	14
"Tuberculin Tested"	6	4	3
" Pasteurised "	23	2	
Ordinary	170	45	38

PRODUCED AND SENT IN FROM OUTSIDE THE DISTRICT.

Grade of milk.	No. of samples.	No. which did not comply with the prescribed conditions.	No. of these which failed the Coli Test.
"Accredited "	20	12	10
"Tuberculin Tested"	52	6	4
" Pasteurised "	3	3	3
Ordinary	226	100	81

From 1926 to 1937 inclusive, the number of samples of ordinary milk which gave results equal to the standard for "Accredited" milk were as follows:—

Produced in Littlehampton ... 127 or 74.7 per cent.

Produced and sent in from outside the
district 128 or 57.7 per cent.

Eleven samples have been taken and sent to the Lister Institute of Preventive Medicine for examination for the presence of Tubercle Bacilli. When the results of examinations of samples of milk show evidence of Tubercle Bacilli, particulars are forwarded to the West Sussex County Council, for action under the Tuberculosis Order, 1925.

Two cases have been reported during the year.

Where a sample is found to be in any way unsatisfactory on examination, the matter is taken up with the producer or retailer, and should the milk be from an outside district, the information is passed on to the Local Authority concerned.

Twenty-eight sediment tests were made and the results were classified as follows:—

Clean, 21; Fairly clean, 6; rather dirty, 1.

Steam for sterilising churns, cans, measures, etc., is now in use at four dairies and six farms, the remainder sterilising by means of boiling water.

Cream.

Five samples of cream have been taken and sent to the Public Analyst for bacteriological examination during 1937, and the results of the examinations showing the average number of bacteria per ml. and indications as to the presence of Coliform Bacilli, are given below.

1937.

	Average	Presence of
No. of	No. of bacteria	Coliform Bacilli
Samples.	per 1 ml.	in 100th m!.
5	795.400	4

In these samples the bacterial counts ranged from 1,000 per ml. to 2,700,000 per ml.

The following table gives the results of the examinations for the years 1930 to 1937 inclusive:—

	Average	Presence of
No. of	No. of bacteria	Coliform Bacilli
Samples.	per 1 ml.	in 100th ml.
63	329,693	31

With reference to the five samples of cream taken during the year, the Public Analyst reported the following results on testing for fat:—

2 samples with 60%. 1 sample with 58%. 1 sample with 57%. 1 sample with 55%.

SLAUGHTER HOUSES AND BUTCHERS' SHOPS.

Public Health (Meat) Regulations, 1924.

There are four slaughter houses in the district, three of which are licensed for a period of three years, and one for a period of twelve months.

During the year, 643 visits were paid to slaughter houses and butchers' shops, and the following defects were observed, all of which were remedied.

SLAUGHTER HOUSES :-

Obstructed condition of dra	ins	 	 1
Defective W.C		 	 1
Defective W.C. cistern		 	 1
W.C. in need of cleansing		 	 1
Dirty condition of yards		 	 4
Manure pit in need of empty	ying	 	 1
Need of cleansing		 	 1
Dirty condition of lairs		 	 1

FOOD PREPARATION PREMISES :-

Dirty condition of floor		 	 1
Uncovered dustbins		 	 3
Dirty condition of yards		 	 2
Want of new refrigerators		 	 2
Sausage room in need of cle	ansing	 	 1

Carcases Inspected.

In this district, each master butcher delivers a card to the office on the morning of any day on which he intends to slaughter, giving the requisite three hours' notice and the number of animals he proposes to slaughter.

The following carcases have been inspected during the year:—Bovine 371; Sheep and Lambs 1,208; Pigs 1,126; making in all a total of 2,705.

The following were surrendered during the year :-

The following were sufferidered during the year :-	-	
	Cwts.	lbs.
Tuberculosis. 6 pigs (whole carcases and all offal); 44 pigs' heads; 42 lbs. pork; 67½ lbs. pork offal; 1 ox (whole carcase and all offal); 2 ox heads and tongues; 1 calf (whole carcase and all		
offal); 30 lbs. beef offal; total weight, 2,321 lbs.	20	81
Abscesses. 26 lbs. beef; 81 lbs. beef offal; 2 lbs. mutton; 4 lbs. mutton offal; total weight,		
113 lbs	1	1
Cirrhosis. 13 pigs' livers; total weight, 41 lbs		41
Cysts. 17 sheep's livers; 4 pigs' livers; total weight,		
46 lbs		46
Distoma Hepaticum. 21 ox livers (whole); 13 ox		
livers (part); 10 sheep's livers; total weight,	9	,
337 lbs	3	1
Pleurisy. 13 lbs. beef; 49 lbs. beef offal; 87 lbs. pork offal; total weight, 149 lbs	1	37
Pneumonia. 5 sets pigs' lungs; total weight, 10 lbs.	010	10
Peritonitis. 22 lbs. pork offal; total weight, 22 lbs		22
Congestion. 8 lbs. pork offal; total weight, 8 lbs		
		8
Bruises and Injury. 1 sheep (whole carcase and all offal); 4 lbs. pork; total weight, 46 lbs		10
Pericarditis. 2 pigs' hearts; 1 sheep's heart; total		46
weight, $2\frac{1}{2}$ lbs		21/2
Necrosis. 10 pigs' livers; total weight, 30 lbs		30
Actinomycosis. 1 ox head and tongue; total weight,		30
35 lbs		35
Blood Engorged. 2 lbs. pork offal; total weight, 2 lbs.		2
Decomposition. 131 lbs. chilled beef; total weight,		-
131 lbs	1	19
Total weight, 3,293½ lbs	29	451
	-	

The following table is a summary of the number of animals killed and the amount of meat surrendered:—

	Carcases I	nspect	ed		
	and cond	emned	1.		
	Cattle, ex- cluding cows.	Cows		Sheep and Lambs.	l Pigs.
Number killed	-225	0	146	1,208	1,126
Number inspected All diseases except T.B.—	225	0	146	1,208	1,126
Whole carcases condemned Carcases of which some part	0	0	0	1	0
or organ was condemned Percentage of the number inspected affected with	45	0	0	31	65
disease other than T.B Tuberculosis only—	20.0%	0%	0%	2.6%	5.8%

1937.	371	1,208	1,126	2,705	29	451

All condemned meat, etc., is burnt at the Council's Refuse Destructor.

Under the Slaughter of Animals Act, 1933, it is required that all animals should be effectually stunned with a mechanically operated instrument, and no difficulties have been experienced. Cash Captive Bolts are used, and a spare one is kept in my office. An Inspector for the Royal Society for the Prevention of Cruelty to Animals resides in the district and he is only too pleased to be of any assistance to the butchers.

The following tables show the prevalence of Tuberculosis found in animals slaughtered in Littlehampton from 1926 to 1937 inclusive :-

Bakehouses.

There are seven bakehouses in the district, two of which are underground.

Fifty inspections have been carried out, and the following unsatisfactory conditions were noted :-

Walls and ceilings in need of cleansing All the defects were remedied.

Mosquitoes.

Three complaints respecting mosquitoes were received during the year. The Council have purchased the Mewsbrook Area, where trouble with mosquitoes has been experienced during the past, and work is in progress for laying the area out as pleasure grounds.

Rats and Mice (Destruction) Act, 1919.

Twenty-three complaints were received and dealt with during the year. In some cases rat bait was supplied free of charge to occupiers of affected premises, while gassing operations were also carried out with successful results. The worst case was where there were ten bungalows found to be infested with rats. The drains were examined and found to be defective. The necessary work was carried out and the premises are now free from rats.

Advice and assistance are given in all cases.

Fried Fish Shops.

There are five fried fish shops in the district, three of which are licensed yearly under an Order made in October, 1934, under Section 112 of the Public Health Act, 1875, as amended by Section 51 of the Public Health Acts Amendment Act, 1907.

Forty-seven visits have been paid to fried fish shops, and the following defective or unsatisfactory conditions were found, and in each case the work was carried out:—

Obstructed drains				 1
Yards in need of cleansing				 3
Want of new dustbin				 1
Fish and potato premises in	need	of clea	nsing	1

Restaurants, Cafes, and Refreshment Rooms.

There are 54 premises on the register, and 93 inspections have been made. The following defective or unsatisfactory conditions were found, and in each case the necessary work was carried out:—

Want of additional dustbins			 7
Premises in need of cleansing			 11
Accumulations of refuse			 2
Want of additional sanitary conv	enience	es	 3
Obstructed condition of drains			 2

Defective flushing cistern of	W.C.				1
Yard in need of paving					1
Yards in need of cleansing					4
Defective drains					2
Want of additional inspection	n chan	bers a	nd gull	ies	5
Want of town's water					1
Want of sanitary sink					1
Defective sink					1
Want of additional storage a	ccomm	odatio	n		1

Ice Cream.

During the year there were 30 premises at which ice cream was prepared, stored or offered for sale, and in connection with these premises, 67 inspections were made. At many of the premises and particularly in the case of stalls and vehicles, the ice cream was sold in sealed cartons.

The following defective or unsatisfactory conditions were found and in each case the necessary work was carried out :-

Want of town's water		 	1
Want of sanitary sink		 	1
Want of properly trapped gully		 	1
Walls in need of repair		 	1
Windows in need of repair		 	2
Want of additional ventilation		 	1
Defective doors	100000	 	1
Premises in need of cleansing			4
Accumulations of refuse		 	
		 	3
Want of additional dustbins		 	2
Yards in need of cleansing		 	1

Sixteen samples of ice cream were taken and sent for bacteriological examination during the year and the results are given as follows:—

No. of samples.	Average number of bacteria per 1 ml.	Presence of Coliform Bacilli in 100th ml.
16	227,832	8

In 1937, the bacteria per ml. varied from 800, which was the lowest, to 2,340,000. Of the 16 samples there were 13 with a bacterial count lower than that allowed for "Accredited" milk.

From 1926 to 1937 inclusive, 155 samples of ice cream were taken, and on bacteriological examination revealed the following:

No. of samples.	Average number of bacteria per 1 ml.	Presence of Coliform Bacilli
8	Uncountable	in $\frac{1}{100}$ th ml.
147	176,867	62

Food Stores and Shops.

All premises where food is prepared or stored are periodically visited, and the conditions found were generally satisfactory.

In addition to the food surrendered as specified in a previous table, the following were surrendered as unfit for food:—

39 tins of fruit.

86 tins of baked beans.

Shell Fish.

Two beds of shell fish exist in the district, one small bed at the mouth of the River Arun which is not used, and a large bed approximately three quarters of a mile wide east of the mouth of the River. From the latter winkles are collected and sold locally, but not sent out of the district to any other market. No other shell fish is marketed in the district.

Food and Drugs (Adulteration) Act, 1928.

The following table shows the number of samples taken by the County Council (who are the administrative authority for the Act), and the number of these which were genuine and the number which were not genuine:—

New Milk	No.	Analysed. 17	Genuine. 17	Not Genuine.
Butter		2	2	100/ - 3
Ice Cream		1	1	-
Sausages .		1	1	-
Meat Pie		1	1	
Halibut Liver Oil		1	1	
Raisins		1	1	
Ground Almonds		1	1	

Smoke Abatement.

Six observations of 30 minutes' duration have been made, and no nuisance was observed.

There are six chimney stacks in the district, three of which are in connection with laundries, one at the refuse destructor, one at the gas works, and one at the saw mills. Littlehampton is free from pollution of the air by smoke.

Rag Flock Acts.

No premises have been found where rag flock is in use or on sale.

Disinfection.

During the year, 218 rooms have been disinfected, and at the Isolation Hospital, the following articles were disinfected in the steam disinfector:—mattresses 9; pillows 31; bolsters 4; quilts 5; blankets 21; sheets 17; beds 1; bed covers 1; towels 13; miscellaneous clothing 144; making in all a total of 246.

Eradication of Bed Bugs.

Twelve non-Council houses were found to be infested with bed bugs and were disinfested by the Council by the use of Suphur Dioxide and liquid vermicides. No house has been disinfested by Hydrogen Cyanide, nor has it been found necessary to disinfest the furniture of prospective tenants of Council houses.

Sanitary Accommodation.

The approximate number of water closets in the district at the end of the year was 3,574.

There are 41 pail closets in use, but these are situated at Toddington and other parts of the district, which up to the present have not been sewered.

There are 100 houses at Toddington, Lyminster, Courtwick and the eastern parts of the district, which are not connected to the public sewers but to cesspools, but the scheme for sewerage in the Lyminster area is now completed and 11 houses have been connected to the sewer and 7 others are in progress. The scheme for the eastern area is now in progress.

House refuse is collected twice weekly in certain parts of Littlehampton in the summer months, and once weekly in the winter; while at Wick the collection is once weekly throughout the year. At hotels and large boarding houses the collections are once a day if necessary. The work of collecting house refuse is done by covered carts and lorries, and the refuse is disposed of by controlled tipping on the West side of the River Arun.

Public Conveniences.

During the year, visits have been paid to conveniences and urinals, both public and those attached to licensed premises.

There are six public conveniences (four ladies' and five gentlemen's), and these have been maintained in a satisfactory condition during the year.

Shops Act, 1934.

Twenty-four inspections have been made under the above Act, and the conditions found were generally satisfactory.

Sunshine and Rainfall statistics.

I wish to express my gratitude to the Members of the Public Health Committee and to Capt. North, the Chairman of the Committee, for assistance and co-operation given me during the year.

To Dr. Butcher, Medical Officer of Health, I am greatly indebted for the valuable guidance and assistance rendered during my five years in charge of the Public Health Department.

To my colleagues, Mr. Roberts, who resigned in July, and his successor, Mr. Aze, I am grateful for their loyal support. Also to my clerk, Mr. K. C. Davis, I am grateful for the conscientious manner in which he has carried out his duties during the five years he has been with me.

I am, Mr. Chairman and Gentlemen,
Your obedient Servant,
J. L. McGarry.
