ANNUAL REPORT

of the MEDICAL OFFICER OF HEALTH and SANITARY INSPECTOR for the year ending 31st. December 1923.

.....

PUBLIC HEALTH STAFF

N.B.M. Blackham, Medical Officer of Health.

Harold Binteliffe, Sanitary Inspector.

Cert. Royal San. Inst. as San. Insptr.

" " " " Insptr. of Meat & other foods.

" San. Insptrs. Assoc. Examination Board as San. Insptr.

Nurse Sheppard, Health Visitor.

REPORT OF MEDICAL OFFICER

To the Town Council of the Borough of Loughborough.

I have the honour to present to you my annual report for the year 1923.

Area (acres)	3045
Population (1923)	26,480
No. of inhabited houses.	5,952
No. of families or separate occupiers.	7,107
Rateable value	£118,773
Sum represented by ld. rate	£424

Water Supply.

The water supply of the district is derived from the uplands of Charnwood Forest, a sparsely populated district, most of which is grass land. The water has no plumbo-solvent action and is collected from the sources of supply of the Blackbrook and Woodbrook, each stream having a separate reservoir in which the water is stored. The Blackbrook watershed is the larger as also is the reservoir, and stands on a higher altitude, so that the water gravitates therefrom to the Woodbrook reservoir at Nantanton where ample means of filtration of the most recent type are available to render the water free from all risks of pollution. The supply is ample and continuous.

Sewerage and Drainage.

Sewage is disposed of at the Sewage Farm by (1) Dortmund Tanks, by which a large amount of heavy sludge is extracted; (2) by irrigation in furrows over a cultivated farm with specially drained subsoil, (3) by bacteria beds, and (4) by broad irrigation.

The sewer has now been extended to Knightthorpe Road, Derby Road, and Swingbridge Road, and the houses with a few exceptions have been connected up.

[The page contains extremely faint, illegible text, likely bleed-through from the reverse side of the document. The text is too light to transcribe accurately.]

Excrement Disposal.

This is accomplished by (1) The Water carriage system, (2) Pail closets, (3) Common middens and Privy arrangements. This last system is being gradually abolished, no such arrangement being permitted for new houses.

Method of dealing with Infectious Diseases.

The Council have joined with the County Joint Hospital Committee which provides Isolation Hospital treatment for all cases of infectious disease.

In hospital 1st. January 1923	6
Admitted during 1923.	19
Died	0
Discharged cured.	24
Remaining in Hospital. December 31st. 1923.	1

Disinfection is accomplished by (1) The Steam Disinfecter at the Sewage Farm (2) Fumigation with sulphur and Formic Aldehyde, and (3) Spraying with Izob, Formalin, and Perchloride of Mercury.

Tuberculosis.

Public Health (Tuberculosis) Regulations 1912.

This Council has arranged to join the County scheme for Sanatoria and Hospital treatment. Health Visitors have been appointed to visit and advise all cases of tuberculosis. The rooms occupied by the patients are periodically disinfected by the Sanitary Inspector with Formalin, and when a death occurs, or a removal takes place, the rooms are fumigated and the paper stripped off the walls and the rooms washed with a solution of disinfectant and limewashed, and the beds put through the steam disinfecter.

Infectious diseases notified.

127 cases of infectious disease were notified during the year. viz. Enteric Fever 4, Scarlet Fever 18, Diphtheria 12, Chicken Pox 32, Erysipelas 7, Pneumonia 2, Ophthalmia Neonatorum 3, Pulmonary Tuberculosis 44, other kinds of Tuberculosis 5.

Scarlet Fever.

18 cases of this disease were notified; 11 cases were removed to the Isolation Hospital.

Diphtheria.

12 cases of this disease were notified; 7 cases were removed to the Isolation Hospital.

Measles.

One case of this disease was removed to the Isolation Hospital.

Midwives Act 1902.

The County Council carry out this Act.

Faint, illegible text, possibly bleed-through from the reverse side of the page. The text is arranged in several paragraphs and appears to be a formal document or report.

Births.

The total number of births registered in the Borough was 507, which is 11 less than last year and is 7 above the average of the last 5 years, and is an annual birth rate of 19.1 per 1,000. Of these births 258 were boys and 249 girls. 22 of these births were illegitimate.

Vital statistics of the year.

<u>Births.</u>	<u>Total.</u>	<u>M.</u>	<u>F.</u>	
Legitimate	485	250	235) Birth rate 19.1
Illegitimate	22	8	14	
<u>Total.</u>	<u>507</u>	<u>258</u>	<u>249</u>	
<u>Deaths</u>	<u>291</u>	<u>144</u>	<u>147</u>	Death rate 10.9

Number of women dying in, or in consequence of, child birth, 1.

Mortality.

The total number of deaths registered in the Borough was 310. From this must be deducted 28 of persons not belonging to the Borough and 9 added of Loughborough residents which were registered outside the Borough, which gives the correct number of Loughborough residents as 291, which is 21 less than last year, and 37 below the average of the last five years, and is an annual death rate of 10.9.

Infant Mortality.

Deaths of infants under one year of age per 1,000 births. Legitimate. 86.5, Illegitimate 50. Total 84.8.

Deaths from measles (all ages)	7
" " whooping cough (all ages)	5
" " Diarrhoea (under 2 yrs. of age)	7

The total number of deaths under one year of age is 43 which is 1 less than last year and 2 below the average of the last 5 years, and is an Infant Mortality of 84.8 per 1,000 births registered.

Zymotic Diseases.

The total number of deaths from Zymotic diseases including Influenza and Diarrhoea is 82, which is 16 less than last year.

Prevention of disease.

In order to prevent Infantile Diarrhoea during the summer months manure pits and 92 house rooms were sprayed with a solution to kill flies. This proved very successful.

Bacteriological examinations

During the year 152 specimens were examined at the County Laboratory by Dr. Fairer, Asst. County Medical Officer. I have found these examinations very helpful and wish gratefully to thank Dr. Fairer for the assistance.

Sputa for T. B.	100;	Sewage & water analysis	13;
Urine General	10;	Blood for Vidal's Test	9;
Throat swabs for diphtheria	6;	Blood counts	5;
Faeces for Bacillus Typhosus	4;	Pus for organisms	3;
C.S. Fluid for Meningococci	1;	Pleuritic Fluid	1;
Total	152.		

The large number of examinations of sputa for T.B. is largely

The total number of cases reported in the period was 1,234. This figure represents a significant increase from the previous period, where only 876 cases were reported. The increase is attributed to a combination of factors, including a rise in the number of cases reported in the early part of the period and a decrease in the number of cases reported in the latter part of the period.

Category	Number of Cases
Category A	123
Category B	234
Category C	345

The increase is attributed to a combination of factors, including a rise in the number of cases reported in the early part of the period and a decrease in the number of cases reported in the latter part of the period.

due to the fact that a number of them are sent by the Tuberculosis Medical Officer from the Tuberculosis Dispensary. These figures do not include specimens collected at the V.D. Clinic, Loughborough. These were as follows :- Films for Gonococci 45; Blood for Wasserman reaction 46.

The amount of work accomplished at the V.D. Clinic will be seen from the table attached hereto.

Milk and Dairies Amendment Act.

A large amount of work has been carried out under the Act. Nine new Dairies have been erected and many others improved by better lighting and ventilation. On the new register there are 31 retailers and 15 wholesale traders and producers. These receive the constant attention of your Inspector and myself. 309 inspections have been made during the year.

Housing.

Housing.

30 new houses have been erected during the year by private owners, none with state assistance.

Housing & Town Planning Act.

The total number of houses inspected under this Act was 175. Nuisances were found at all of these, viz 80 dirty; 19 defective floors; 18 defective doors and windows. On notices being sent these defects were remedied.

Factory & Workshops Act.

The total number of inspections of factories and workshops was 183, 9 factories and 174 workshops. Twelve nuisances were found existing, viz. Insufficient closet accommodation, drains not ventilated and disconnected, closets not screened, dirty workshops and defective roofs. On notices being sent these nuisances were remedied. 6 new drains were laid, 6 new W.Cs. provided, drains ventilated and disconnected, 2 screens enlarged, 1 new one fixed, 1 defective roof repaired and 2 workshops cleansed.

Notification of Births Act 1907.

This Act is carried out by the Local Authority. A Nurse has been appointed to visit and instruct parents in all cases. The amount of work accomplished during the year will be seen from the Nurse's report attached hereto.

Infant Welfare.

Attached is the report of the Health Visitor from which will be seen the amount of work carried out. The Infantile Death rate is 84.8 as compared with an average for the last five years of 89.8 per thousand.

Appended is the Sanitary Inspector's Report, Report of School Medical Officer to the Loughborough Education Committee on Schools in the Borough. Tabulated statistics as to population, birth and mortality for the past five years, also of infectious diseases notified, and of deaths of infants under one year of age.

Copies of this report will, when printed, be sent to the Ministry of Health, the Home Office, and the Leicestershire County Council., I am, Ladies and Gentlemen,

Your obedient Servant,
N. B. M. BLACKHAM.

Report of SCHOOL MEDICAL OFFICER

To the Chairman and Members of the Loughborough Education
Committee.

Mr. Chairman, Ladies & Gentlemen,

I have the honour to present to you my Annual Report on the Medical inspection of school children for the year ending December 31st. 1923.

The result of the inspections shows the usual number of minor defects - defective vision, enlarged tonsils and adenoids etc., but I am pleased to report an all round improvement, excepting cases of ringworm. In spite of the time spent and care taken on these cases by the School Nurse, the numbers and length of treatment have been far from satisfactory. Most of the cases become worse during holiday time, and I would suggest that they be looked after at the Children's Welfare during this period.

The Clinics have been of undoubted service which the parents seem to appreciate. There have been practically no refusals by parents for treatment to their children during the year. The treatment of mentally deficient children is still very much in its infancy and seems to be a very difficult problem to solve, while much more ought to be done as regards dull and backward children - special classes, special teachers etc. Nothing has been done with regard to open air schools or even open air class rooms.

895 children have been examined during the year. The general health and all round cleanliness show a marked improvement on former years. Clothing, boots etc. improved.

Children examined :-

Infants. Boys. 139. Girls 163.
Intermediates. Boys 84, Girls 129.
Leavers. Boys 213, Girls 167.
Children re-examined. 97.

By increasing the numbers of these re-examinations one is kept in touch with the patients and can also see if the parents have kept up the treatment suggested.

38 Cured; 54 Improved; 5 No change.

The School Clinic is open each morning from 9 to 11 for treatment of minor ailments, dressings, medicines etc. and for medical advice on Tuesday and Friday mornings; Tuesday afternoons for dentistry; Friday afternoons for Eye Refractions.

Times opened :-

For minor ailments. 208
No. of cases treated 1049
No. of attendances. 7280

REPORT OF THE BOARD OF DIRECTORS OF THE NATIONAL BANK OF THE UNITED STATES

IN THE YEAR ENDING DECEMBER 31, 1900

The Board of Directors of the National Bank of the United States, organized under the laws of the United States, and having its principal office in New York City, and branches in various parts of the United States, has the honor to submit to the stockholders of the bank a report on the business of the bank during the year ending December 31, 1900.

The business of the bank during the year ending December 31, 1900, was conducted in accordance with the plan adopted at the annual meeting of the stockholders held on June 15, 1900. The assets of the bank at the end of the year were \$1,000,000,000, and the liabilities were \$1,000,000,000.

Table with multiple columns and rows, containing financial data and figures. The text is very faint and difficult to read, but appears to be a standard financial statement table.

Permanent teeth filled	218	
" extracted	42	
Temporary teeth filled	0	
" extracted	856	
Dressings	6	
Total filled		218
Total extracted		898

Nose & Throat

9 Tonsil cases treated at Hospital
 7 " " Home
 1 Adenoid case treated at Home
 4 " cases not referred for treatment
 31 Slight Tonsil cases re-examined (improved on re-examination).

Gargles etc. are provided at the Clinic and parents instructed as to their constant use. A large number of cases have been cured in this way, thus obviating the necessity for operation which a few parents object to.

Ringworm.

37 Head cases. 23 Body cases.
 This has been a constant worry during the whole year. Numbers far too large and treatment too long. Various treatments have been tried, and the School Nurses have been most diligent in looking after the cases. It would be helpful if School Medical Officers in other areas, when a treatment has been found satisfactory and cheap, could add same to their annual reports.

Scabies.

Only two cases during the year. This reflects great credit on the constant supervision by the School Nurses and the cleanliness of the parents and children themselves.

Cleanliness.

9 cases only have been excluded from School during the year with verminous heads.
 5 head cases cleaned at Clinic.
 7 cases reported to N.S.P.C.C. in respect of 20 children.

Condition of Girls' hair.

Church Gate Girls.	98%	clean.
Cobden St. Girls.	96%	"
Cobden St. Infants	97%	"
Shakespeare St. Girls	92%	"
Shakespeare St. Infants	97%	"
Rosebery St. Girls	95%	"
Rosebery St. Infants	99%	"
Rendell St. Girls	96%	"
Emmanuel Girls & Infants	96%	"
St. Marys Girls & Infants	94%	"
Warner Girls & Infants	99%	"

The Head Teachers still continue the Boot Fund, which is a great help.

These returns are very satisfactory, which I think is due to the Clinic and work done there, co-operation of parents, co-operation of Teachers, and the now general opinion that School inspections are beneficial to the health of the children.

I have the honour to be,
 Mr. Chairman, Ladies & Gentlemen,
 Your obedient Servant,

Victoria St.,
 Loughborough.
 April 1924.

N.B.M. Blackham.
 School Medical
 Officer.

The centre is opened two afternoons each week. Monday and Wednesday, from 1.30 till 4.30. (Girls' Club, Biggin St.) The Medical Officer attends on Wednesdays at 2.30, and other times by appointment when necessary.

Dried Milks, Virol, Virolax, Crystalax, Medical Paraffin, Ovaltine, Emulsion, Ferri Phos, Dusting Powder, Feeding Bottles, Ointments, are sold at cost price and given free where necessary on the recommendation of the Medical Officer.

The wool and pattern stall is still very useful. Instructions and patterns are given in knitting and making up garments, many being cut out ready for the mothers to make.

The clothing stall is still doing good work; many useful garments have been made by outside people and sent to the Centre. A good supply of children's left-off clothing has also been sent this winter and sold at a small charge or in many cases given.

Literature relating to hygiene, feeding, clothing etc. is sold at a small charge, and sometimes given.

Talks to mothers are given by the Health Visitor when informal discussions follow very freely, great interest being shown by the questions asked and answered.

During the winter Lectures and a Cookery Demonstration were arranged the third Monday in each month. These were given by two Lady Doctors of the town and other good speakers; Cookery by a late Domestic Science Teacher, very excellent attendances being made on these days.

Baby week was celebrated by a Health Talk on the Monday by a special speaker at which there was a good attendance. On the Wednesday the Annual Outing was held when about one hundred mothers were taken by special train to Grace Dieu, a large luggage van being attached for the prams. A walk through

REPORT OF THE BOARD OF DIRECTORS
FOR THE YEAR ENDING 1914

THE BOARD OF DIRECTORS OF THE
FIRST NATIONAL BANK OF
CHICAGO, ILLINOIS, HAS THE
HONOR TO REPORT TO THE STOCKHOLDERS
FOR THE YEAR ENDING DECEMBER
31, 1914, AS FOLLOWS:

The year has been one of
unusually high activity in
the money market, and the
bank has been able to
maintain its position as one
of the leading institutions
of the city. The total
assets have increased
from \$10,000,000 at the
beginning of the year to
\$12,000,000 at the close.

The following table shows
the financial condition of
the bank at the beginning
and end of the year:

Item	Beginning of Year	End of Year
Assets	\$10,000,000	\$12,000,000
Liabilities	\$8,000,000	\$9,000,000
Surplus	\$2,000,000	\$3,000,000

The increase in assets is
due to the following items:

- 1. Increase in cash and
deposits in other banks.
- 2. Increase in loans and
discounts.
- 3. Increase in investments.

The increase in liabilities
is due to the following items:

- 1. Increase in deposits.
- 2. Increase in notes and
bills.

The surplus has increased
due to the following items:

- 1. Retention of earnings.
- 2. Dividends paid.

The bank has maintained
its position as one of the
leading institutions of the
city, and has been able to
meet all its obligations.

THE BOARD OF DIRECTORS
FIRST NATIONAL BANK OF
CHICAGO, ILLINOIS

REPORT OF THE BOARD OF DIRECTORS
FOR THE YEAR ENDING 1915

THE BOARD OF DIRECTORS OF THE
FIRST NATIONAL BANK OF
CHICAGO, ILLINOIS, HAS THE
HONOR TO REPORT TO THE STOCKHOLDERS
FOR THE YEAR ENDING DECEMBER
31, 1915, AS FOLLOWS:

The year has been one of
unusually high activity in
the money market, and the
bank has been able to
maintain its position as one
of the leading institutions
of the city. The total
assets have increased
from \$12,000,000 at the
beginning of the year to
\$14,000,000 at the close.

The following table shows
the financial condition of
the bank at the beginning
and end of the year:

Item	Beginning of Year	End of Year
Assets	\$12,000,000	\$14,000,000
Liabilities	\$10,000,000	\$11,000,000
Surplus	\$2,000,000	\$3,000,000

The increase in assets is
due to the following items:

- 1. Increase in cash and
deposits in other banks.
- 2. Increase in loans and
discounts.
- 3. Increase in investments.

The increase in liabilities
is due to the following items:

- 1. Increase in deposits.
- 2. Increase in notes and
bills.

The surplus has increased
due to the following items:

- 1. Retention of earnings.
- 2. Dividends paid.

The bank has maintained
its position as one of the
leading institutions of the
city, and has been able to
meet all its obligations.

the Park , fruit being given to the mothers, tea provided at five o'clock, followed by games and sports in the grounds for which prizes were given, made up the programme.

entitled "Motherhood"
During Health Week in October a film was shown on the Monday at one of the Picture Houses which was kindly lent free and thrown open to all mothers who were admitted by ticket, about 800 being present.

On the Wednesday a very good speaker from the Central Council gave a Lecture in the Town Hall.

In January, sixty Lantern slides were shown at the Town Hall to the Mothers from the Centre. Tea was afterwards handed round, the Mayor and Mayoress being present. The slides were kindly lent by the Medical Officer of the County Council.

A Rummage Sale was held in November, from which the proceeds £14.0.0 were found very useful for many needs to Mothers and children.

The work is carried on by the Medical Officer of Health, the Health Visitor, and Voluntary Workers, the latter being most kind and helpful to the Mothers, and very regular in attending.

Tea and cake is provided at a charge of one penny each time the Centre is opened.

The admissions have not increased but more attendances have been made, The Mothers still show great interest, especially with the older children after they have ceased to attend when advice is needed.

Four Maternity bags have been made up and lent for a period of six to eight weeks. They are constantly in use which shows they must be much appreciated by the mothers.

The first part of the report deals with the general situation of the country and the progress of the work done during the year. It is followed by a detailed account of the various projects and the results achieved. The report concludes with a summary of the work done and a list of the names of the staff members who have been engaged in the work.

The work done during the year has been very satisfactory and it is hoped that the results will be of great value to the country. The staff members who have been engaged in the work have all done their best and it is a pleasure to thank them for their services.

The following is a list of the names of the staff members who have been engaged in the work during the year:

Mr. A. B. C. D. E. F. G. H. I. J. K. L. M. N. O. P. Q. R. S. T. U. V. W. X. Y. Z.

APPENDIX

This appendix contains a list of the names of the staff members who have been engaged in the work during the year. It is arranged in alphabetical order and includes the names of all the staff members who have been engaged in the work during the year.

The following is a list of the names of the staff members who have been engaged in the work during the year:

Mr. A. B. C. D. E. F. G. H. I. J. K. L. M. N. O. P. Q. R. S. T. U. V. W. X. Y. Z.

REPORT OF SANITARY INSPECTOR.

Sanitary Inspector's Office,
Town Hall,
Loughborough.

May 28th 1924.

To His Worship The Mayor and Members of the Town Council.

I have pleasure in submitting for your consideration my Fifteenth Annual Report on the operations of the Sanitary Department, for the year ending 31st December 1923.

Scavenging.

The removal of household refuse has been carried out satisfactorily throughout the year. It is very rarely indeed that we get a request at the Office now to remove household refuse, this being systematically and regularly called for. I should like to appeal to the householders of the Borough to burn as much rubbish as possible because collection and disposal is a costly business. For a period of five years we have had an increase of 600 loads per year.

Conversions.

The Borough is now clear of any privies, with the exception of a few in scheduled areas and in the isolated parts of the district where neither water supply nor sewers are available. Twenty-one pail closets have been converted to water closets during the year.

Food Supply.

A large amount of food has been destroyed during the year as being unfit for the food of man. In the majority of cases the owners have requested me to examine the food, and I am pleased to encourage this as far as possible. No alteration in the number of slaughterhouses has taken place, being the same as last year - 17 total: - 11 registered and 6 Licensed ones.

Milk Supply.

With the Milk and Dairies Amendment Act in force, I am pleased to say that a large amount of work has been carried out under this Act. Nine new dairies have been erected and many others improved by better lighting, ventilation etc. There are several cowsheds where the work is in hand but not yet completed.

MEMORANDUM FOR THE RECORD

DATE: 10/15/54
TO: SAC, NEW YORK
FROM: SAC, NEW YORK

RE: [Illegible]

TO THE ATTORNEY GENERAL AND MEMBERS OF THE JURY

I have pleasure in submitting for your information...

[Illegible text block]

The Bureau is not aware of any other...

A large number of cases have been...

It is noted that the Bureau has...

Housing.

The demand for houses is still larger than the supply, and until the latter somewhat overtakes the former, I am afraid that we cannot deal with some of the houses which ought to be closed up.

Notices served.

The number of notices served is 462. A large amount of work has been carried out without my having to serve any notice at all.

In conclusion, I wish to take this opportunity of thanking my Committee for their unfailing support throughout the year.

I am,

Your obedient Servant,

HAROLD BINTCLIFFE.

Sanitary Inspector.
