BOROUGH OF LOUGHBOROUGH.

Annual Report of the Medical Officer of Health  
for the Year 1943.

To the Mayor, Aldermen & Councillors  
of the Borough of Loughborough.

Your Worship, Ladies & Gentlemen,

I have the honour to present herewith my 7th Annual  
Report on the health of your Borough.

For security reasons, population figures and other  
statistics cannot be given, and the Report is condensed.  
Comment is made in the Report on points of note. In general,  
the work again shews an all round increase.

Special mention may be made here of the small number of  
cases of diphtheria during the year under review, a state of  
affairs which so far this year is being maintained. While  
the figures for diphtheria immunisation are satisfactory,  
there is no reason other than the apathy or unwillingness of  
the parent why they should not be better. There can be few  
who are unaware of the purpose of immunisation or the facilities  
which are offered.

I wish to thank the Health Committee and all members of  
the staff for their co-operation and support during the year.

I have the honour to be, Ladies & Gentlemen,

Your obedient Servant,

R. CAUTLEY HOLDERNESS

Medical Officer of Health.

WATER SUPPLY.

The water supply of the district is derived from the  
uplands of Charnwood Forest, a sparsely populated district.  
The water has no plumbo-solvent action, and after storage  
alone has a considerable degree of purity. Further purifi-  
cation is effected by passing through primary pressure  
filters, followed by slow sand filtration and finally by  
treatment with chloramine, thus giving a supply of satisfactory  
organic quality and a high degree of bacterial purity.

Regular bacteriological examinations of both raw and  
treated water are made and the results have been consistently  
satisfactory.

Not more than 0.2% of the houses in the district are with-  
out a piped supply. The supply was continuous throughout  
the year.

MATERNITY & CHILD WELFARE.

### Maternity Service.

There was a slight increase in the number of cases attended by the Municipal Midwives during the year. A third Midwife was appointed in February. Each nurse attended approximately 76 cases. The average number of ante-natal visits per case was increased from 6.1 to 7.6 and visits during the puerperium from 15.3 to 17.4

<u>Work of Municipal Midwives.</u>		<u>1942.</u>	<u>1943.</u>
Number of cases delivered:-	Midwifery	129	115
	Maternity	89	114
		<u>218</u>	<u>229</u>
Number of visits:-	Ante-natal	1335	1745
	during puerperium	3335	3986
		<u>4670</u>	<u>5731</u>

### Evacuation.

There was a further increase in the number of expectant mothers evacuated to Loughborough under the Government scheme. Four ante-natal clinics per week are held, and the following table shews the work carried out :-

<u>Ante-natal Clinic.</u>		<u>1942</u>	<u>1943.</u>
Number of women attending for the first time:-	Loughborough patients	113	155
	Evacuees	981	1045
Total attendances:-	Loughborough patients	474	577
	Evacuees	2991	3163
Cases referred to Dental Clinic		13	14

The number of Loughborough mothers attending the ante-natal clinic expressed as a percentage of the total deliveries increased from 51.8% to 67.6%.

### Child Welfare.

There has been an increase in the figures of attendances at the Welfare Centres as compared with 1942, and the total of 15,190 falls short of the 1941 figure (which was the highest ever recorded) by only 670.

The number of first attendances at the Welfare Centres of children under 1 year represents 76.7% of the corrected number of births, compared with 73.3% in 1942.

<u>Attendances at Welfare Centres.</u>		<u>1942.</u>	<u>1943.</u>
First attendances under 1 year		471	510
" " over 1 year		46	43
Other attendances under 1 year		7767	9199
" " over 1 year		6513	5438
		<u>14797</u>	<u>15190</u>
<u>Attendances at Minor Ailments Clinic etc.,</u>			
Number of children referred to clinic		124	133
Total number of attendances		910	1228
Children referred to Dental Clinic		17	23
Children referred to Eye Clinic		8	12
Children referred to Cripples Guild		21	30

The following table shows the results of the survey conducted in the month of August 1954. The total number of respondents was 100. The results are as follows:

Category	Number of Respondents	Percentage
Category A	45	45%
Category B	30	30%
Category C	25	25%
Total	100	100%

The following table shows the results of the survey conducted in the month of September 1954. The total number of respondents was 100. The results are as follows:

Category	Number of Respondents	Percentage
Category A	50	50%
Category B	25	25%
Category C	25	25%
Total	100	100%

The following table shows the results of the survey conducted in the month of October 1954. The total number of respondents was 100. The results are as follows:

Category	Number of Respondents	Percentage
Category A	40	40%
Category B	35	35%
Category C	25	25%
Total	100	100%

The following table shows the results of the survey conducted in the month of November 1954. The total number of respondents was 100. The results are as follows:

Category	Number of Respondents	Percentage
Category A	35	35%
Category B	40	40%
Category C	25	25%
Total	100	100%

The following table shows the results of the survey conducted in the month of December 1954. The total number of respondents was 100. The results are as follows:

### Home Visits by Health Visitors.

To children under 1 year-	first visits	1942 <u>620</u>	1943 <u>657</u>
	re-visits	1701	2204
To children 1 - 5 years	Visits	4110	4462
To expectant mothers -	first visits	120	115
	re-visits	<u>81</u>	<u>85</u>
		<u>6632</u>	<u>7523</u>

### Wartime Nurseries.

The two wartime nurseries continued in full occupation during the year, and a third was being erected at the end of the year. This latter will accommodate 50 children, giving a total of 115 places.

### NOTIFIABLE DISEASES. (see also table at end of report)

Diphtheria. 21 notifications of this disease were received (compared with 110 in 1942) All were admitted to Hospital. There was one death. In nine cases the diagnosis was not subsequently confirmed. This may at first sight appear to be a large proportion, but it is not always easy to make a certain diagnosis, particularly in view of the possibility of the disease being modified as a result of immunisation, and to wait for bacteriological confirmation of the diagnosis before instituting treatment may be courting disaster. It is frequently in the light of the progress of the case under treatment, coupled with the absence of the causal organism after repeated bacteriological examinations, that the diagnosis is revised. The cases occurred sporadically throughout the year and there was no suggestion of an epidemic.

Scarlet Fever. 66 notifications of this disease were received (compared with 30 in 1942). Of these 62 were admitted to Hospital. The diagnosis was not confirmed in three cases and there were no deaths. About two thirds of the cases occurred in the last quarter, the remainder sporadically throughout the year.

Measles. There was a sharp outbreak of this disease in April and May, 411 of a total for the year of 491 notifications being received during this period. There were no deaths.

Whooping Cough. 68 notifications of this disease were received, mainly in September, October and November. There were no deaths.

Other notifiable diseases call for no special comment.

### Head Louse Infestation.

In July the Minister of Health issued a circular dealing with cleanliness and good habits and the elimination of verminous conditions in mothers and young children.

Following this circular a survey of a representative sample of the young child population was made, which confirmed the previous impression that the extent of vermin infestation among young children in Loughborough was not high and did not exceed the proportion found among children attending school, i.e. approximately 5%. In the majority of cases the families affected are well known to the Health Visitors and require constant supervision. The others are chance infestations where it is only necessary to draw the parent's attention to the matter to have it remedied. Leaflets entitled "War against Lice" are distributed in appropriate cases and

detailed printed instructions for cleansing the hair given. Much use has been made of the medicated brilliantine containing "Lethane Special", which is now readily obtainable from the chemists in the town. There is close co-operation between the School Medical and Welfare Departments and an interchange of information with regard to cases requiring supervision.

#### Diphtheria Immunisation.

This has continued steadily throughout the year. Various measures, including posters, cinema slides and personal appeals, are adopted to keep this important measure before the public, in particular a birthday greeting card incorporating a reminder that the child should be immunised is sent to each parent on the child's first birthday. This has proved very popular and effective. Too many parents, however, still defer the procedure until the child is several years old, thus depriving him of a valuable protection in the most susceptible period of his life.

Number of children immunised under the Loughborough Corporation Scheme:-	<u>1942</u>	<u>1943</u>
Children between 1 and 5 years	676	514
over 5 years	<u>429</u>	<u>209</u>
	<u>1105</u>	<u>723</u>

In addition to these a number of children who were immunised in infancy have been given a further dose on attaining the age of 5 years. This is designed to "boost up" the immunity at an age when the child is leaving the comparatively closed environment of his home and making wider contact with his fellows, thus meeting more potential sources of infection.

#### Percentage of Children Immunised.

	<u>1942</u>	<u>1943.</u>
0 - 5 years	53.43%	56.4%
5 - 15 years	74.16%	76.8%

These figures are on the conservative side. While due allowance is made in estimating the percentage immunised for those children immunised privately, it is not possible to obtain a completely accurate figure of the number so treated. It should also be noted that the maximum percentage of children under the age of 5 years that can be immunised is 80%, as immunisation is not carried out until a child is 12 months old.

Town Hall,

LOUGHBOROUGH.

## ANNUAL REPORT OF THE SANITARY INSPECTOR.

FOR THE YEAR 1943.

To the Mayor, Aldermen, and Councillors of the Borough of Loughborough  
Your Worship, Ladies and Gentlemen,

I have pleasure in presenting my thirty-fifth Annual Report on the operations of the Sanitary Department for the year ending December 31st, 1943.

As in previous years the paper restrictions will not permit of a comprehensive report but the brief details outline the continued satisfactory progress of my Department.

The total receipts of £3248.3s.10d for salvage was nearly £500 less in 1943 than the record figure of £3747 for 1942. This reduction is mainly due to the wastepaper receipts, and is only to be expected, as the size of newspapers and magazines get less, and yet there is the increased use for paper to-day, in the home, therefore householders cannot give so much to Salvage. In the Book Drive too, many of the books went to the Forces, which also I am afraid reduced the wastepaper total.

I would, in conclusion like to take this opportunity of thanking the Health Committee, my assistants and clerks for their support and co-operation during the year.

I am, Ladies and Gentlemen,

Your obedient Servant,

H. BINTCLIFFE.

SUMMARY OF WORK CARRIED OUT.

New drains laid	-	-	26
Drains taken out	-	-	4
" unstopped and cleansed	-	-	36
" ventilated and disconnected	-	-	14
Inspection chambers built	-	-	10
New gullies provided	-	-	24
Waste pipes of sinks disconnected	-	-	5
Sink waste pipes renewed or repaired	-	-	34
Sink waste channels repaired	-	-	19
New sink stones provided	-	-	7
Bath and washbasins disconnected	-	-	5
Drains tested by smoke, water or colour test	-	-	55
Water closets repaired	-	-	75
New water closets provided	-	-	10
Pail closets converted to water carriage system	-	-	8
Pail closets provided	-	-	2
Yard surface repaired or paved	-	-	11
Rain water conductors repaired or fixed	-	-	29
Soft water cisterns cleansed	-	-	5
Window and cords repaired	-	-	39
Floors repaired or concreted	-	-	25
Dirty houses cleansed	-	-	6
" cellars	-	-	1
Water or sewage removed from cellars	-	-	13
Roofs stripped and repaired	-	-	77
Ventilators repaired	-	-	14
Damp walls remedied	-	-	8
Damp courses provided	-	-	3
Plaster ceilings repaired	-	-	14
Plaster walls repaired	-	-	34
General internal and external defects remedied	-	-	61
Ashpits dispensed with	-	-	--
Water service pipes repaired	-	-	30
Wells closed	-	-	2
" cleansed and repaired	-	-	2
Houses connected to public sewer	-	-	4
Damp courses repaired	-	-	6

CLOSET ACCOMMODATION.

Total number in district at end of 1943 -	1. Privies	30
	2. Pails	179
	3. W.C's.	11,972

SANITARY INSPECTION.

Total number of inspections	-	11,324
" " " defects or nuisances discovered (excluding smoke nuisances)	-	3997
" " " complaints received	-	70
" " " notices served	-	-
(a) Formal	-	13
(b) Informal	-	311
" " " defects remedied after serving of notices	-	3708

The above inspections include those under the following headings:-  
 Housing inspection under Housing Act, 1936.  
 Inspection of drains, Factories, & Bakehouses.

INSPECTION AND SUPERVISION OF FOOD SUPPLIES

MILK.

Total number of retail Purveyors on Register	41
Number residing in the District including shopkeepers registered for the sale of pasteurised and sterilised milk in bottles only.	7
Number of Retail Purveyors residing outside the district	7
Total number of producers on register including producers who retail their own milk.	42

THE MILK (SPECIAL DESIGNATIONS) ORDERS.

1923 & 1936.

Number of Certified Tuberculin Tested Producers in the district.	2
Number of Accredited Retailers in the district	6
Number of Accredited Bottlers Licensed in the district	2
Number of Certified Tuberculin Tested Retailers residing outside the district retailing in the Borough.	Nil
Total inspections for all purposes.	360

BACTERIOLOGICAL EXAMINATION OF MILK.

59 samples of milk have been submitted during the year for bacteriological examination and 50 were recorded as satisfactory. In the case of unsatisfactory results, frequent inspections have been made to the farms and dairies concerned and advice given to the farmer and dairymen.

The milk supplied to the schools in the Borough is submitted monthly for bacteriological examination and every three months for fat content, and the standard of the milk has reached a high level.

	No. of samples taken.	Satisfactory.	Not satisfactory.	% satisfactory.
1943	59	50	9	84.4
1942	32	24	8	75.0
1941	48	43	5	89.5
1940	39	35	4	89.7
1939	62	53	9	85.5
1938	101	90	11	89.1

MEAT & FOOD CONTROL.

181 pigs were slaughtered in the Borough slaughterhouses during the year. These were slaughtered by local people for their own consumption. 11 stone of pork was destroyed after examination of these animals, as unfit for human consumption. 181 inspections and visits were made.

KNACKERS YARDS.

24 inspections were made of the one registered knackers yard in the district and the conditions were found at all times to be satisfactory.

INSPECTION OF FOODSTORES, ETC.

Number of meat stores etc. inspected	155
" " shops, meat stalls etc. inspected	278
" " premises where food (other than meat) is kept or prepared for sale.	152

18

The first of these is the fact that the defendant has been found guilty of a crime which is a violation of the laws of the United States.

The second of these is the fact that the defendant has been found guilty of a crime which is a violation of the laws of the United States.

THE FACTS OF THE CASE

The defendant was born on [redacted] at [redacted] in the State of [redacted]. He is now [redacted] years of age and is a resident of [redacted] in the State of [redacted].

THE CHARGES

The defendant is charged with the crime of [redacted] under Section [redacted] of the [redacted] Act of [redacted].

The defendant is charged with the crime of [redacted] under Section [redacted] of the [redacted] Act of [redacted].

The defendant is charged with the crime of [redacted] under Section [redacted] of the [redacted] Act of [redacted].

The defendant is charged with the crime of [redacted] under Section [redacted] of the [redacted] Act of [redacted].

THE DEFENSE

The defendant's defense is that he is innocent of the crime charged against him and that he has been wrongfully convicted.

THE VERDICT

The jury has found the defendant guilty of the crime charged against him and has recommended that he be sentenced to [redacted].

THE COURT'S OPINION

The court has considered the evidence and the arguments of both sides and has concluded that the defendant is guilty of the crime charged against him.

### HOUSE DISINFECTION.

Number of infected houses visited	-	-	103
" " " rooms fumigated	-	-	142
" " " " sprayed	-	-	186
" " lots of infected bedding steam disinfected			40
" " " " " destroyed	-	-	59

The usual practice of dealing with infected cases has been continued and disinfectants supplied free to householders when such cases have been notified.

### DISINFESTATION.

54 premises were inspected for vermin, which necessitated 67 rooms being treated. Effective results were obtained after treatment.

### OFFENSIVE TRADES.

20 trades are registered with the Local Authority and during the year under survey, 129 visits were made and conditions found to be satisfactory, no serious infringements were found.

### RATS AND MICE (DESTRUCTION) ACT, 1919

Wartime conditions have necessitated stricter supervision of this branch of our duties. The Ministry of Agriculture and Fisheries have emphasised how important it is to prevent the destruction of our food supplies and desire responsible officers to increase their activities to check this serious menace.

During the year 280 visits were paid to infested premises and the use of the Hydro-Cyanide Acid gas pump has proved very effective in ridding a large number of premises of rats. The payment of 2d. per carcass has been continued and 2074 rats were bought at a cost of £17. 5s. 8d.

### SHOPS ACTS, 1912, 1913, 1928, 1934, & 1936.

170 shops in the Borough were inspected under the above Acts, dealing with sanitary and washing accommodation, ventilators and the working conditions of the shop assistants and hours of employment of the young persons.

No legal proceedings were taken during the year.

### FACTORIES ACT, 1937

Routine inspections of Factories have been carried out in the district. 202 inspections having been made and alterations and improvements affected in the sanitary conditions of several factories.

### SUMMARY OF INSPECTIONS.

Factories with mechanical power	-	-	23
" without " "	-	-	97
Bakehouses inspections	-	-	82

### OUTWORKERS.

105 Outworkers were inspected during the year and it is pleasing to note that the improvement of the working conditions continues. No cases of infectious disease were found.
