THE UNITED STATES

AND CANADA

1951

BOROUGH OF LYDD, KENT

ANNUAL REPORTS OF THE MEDICAL OFFICER OF HEALTH AND PUBLIC
HEALTH INSPECTOR FOR THE YEAR 1971

Mr. Mayor, Aldermen and Councillors,

I have the honour to present to you my Annual Report for the year 1971.

Population

The Registrar General's Estimate of the mid-year Home Population was 4,340 which was a decrease of 40 from that of the previous year.

Live Births and Birth Rate

The number of live births was 76 (42M. 34F.) which was an increase of 8 over that of the previous year, and the crude birth rate was accordingly 17.5; after adjustment by the Registrar General's Comparability Factor which is computed from a population standardised for age and sex distribution, the rate becomes 23.5 and was higher than that of 16.0 for England and Wales.

Stillbirths and Rate

There were no stillbirths registered during the year. The stillbirth rate per 1,000 total live and stillbirths was accordingly nil compared with 12.0 for England and Wales.

Infantile Deaths

There were no infant deaths registered during the year.

The infantile mortality rate was therefore nil compared with 18.0 for England and Wales.

Maternal Deaths and Mortality Rate

This rate was also nil as there were no maternal deaths which is a reflection of the high standard of modern obstetric practice.

Total Deaths and Death Rate

The total number of deaths from all causes was 36 (20M. 16F.) and the crude death rate was accordingly 8.3 which, after adjustment by the Registrar General's Comparability Factor, as for births, becomes 9.9 compared with that of 11.6 for England and Wales.

The chief group cause of deaths was those from natural causes amongst the aged, namely Heart and Circulatory Diseases and Vascular lesions of the Nervous System; of those there were 18.

Ischaemic Heart Disease (i.e. Coronary Thrombosis and Coronary Atheroma) was the cause of 14 of those deaths. These deaths were in the following age-groups:- 4 between 55 - 64; 7 between 65 - 74 and 3 over 75 years. The causation is still obscure, but the disease is a common cause of death in middle and old age.

Coronary Atheroma of the Heart is also not an uncommon cause of death, often unsuspected in life, as revealed by post-mortem examinations.

Cancer, as invariably in previous years, was the second highest cause of deaths - 8 in the following age-groups:- 1 between 25 - 34; 2 between 55 - 64; 2 between 65 - 74 and 3 over 75 years.

Cancer of the Lung was the cause of 4 (3M. 1F.) deaths, in the following age-groups:- 1 between 55 - 64; 2 between 65 - 74 and 1 over 75 years.

The other causes of death were miscellaneous and there was no unusual mortality. There was no death from Infectious Disease.

Cancer causes a relentless toll of human lives all over the world and is invariably the second highest cause of deaths of which heart and arterial diseases are the chief cause; the majority of the latter cases are due to old age and coronary thrombosis. However, many deaths from Cancer occur in younger age-groups, usually over the age of 40 years. The majority are in all probability due to delay by patients in seeking medical advice, having regard also to the fact that the onset of the disease is insidious or latent.

It is an old adage that 'prevention is better than cure', and there is sufficient modern knowledge about the causes of some forms of Cancer to enable their prevention.

Modern surgery and X-rays and other radiations used, singly or in combination, have transformed the treatment of this group of diseases.

Almost all skin Cancers and over 80% of Cancers of the Cervix of the Uterus can be cured if they are treated early.

Infectious Diseases

The following cases of Infectious Diseases were notified:-

Measles	129
Infective Jaundice	2
Whooping Cough	1

Measles is still endemic and prevalent although vaccination is an inhibiting factor in the prevention of larger outbreaks; the serious complications of former years are now relatively infrequent and when they do occur are usually treated successfully by specific anti-biotics.

A new era in the history of the prevalence of serious Infectious Diseases has been reached, in prevention and treatment. For example, the remarkable advance in this Century of medical science, with emphasis on the last 40 years, has prevented by vaccination and immunisation lethal and disabling infectious such as Poliomyelitis, Diphtheria, Whooping Cough and recently Measles and German Measles and by treatment with specific Anti-biotics and Sulpha drugs, diseases caused by bacteria such as Acute Meningitis, the Pneumonias, Puerperal Sepsis, Scarlet Fever, Erysipelas, Typhoid and Paratyphoid Fevers, and Food Poisoning etc.

Influenza, which is still epidemic in the winter months is by and large the most dangerous infection and it is still equivocal whether vaccination is preventive, unless a vaccine specific to the strain which is likely to become epidemic is prepared in time before the epidemic occurs. Fortunately there was no epidemic last winter.

All virus infections per se do not respond to treatment by the Anti-biotics or Sulpha drugs, but fortunately serious complications caused by bacteria usually respond successfully to treatment.

Vaccination against the virus of Measles has recently been introduced, and it is expected that the biennial outbreaks which occur will be eventually controlled. Vaccination is available at the Child Welfare Clinics and from the Family Doctor.

Vaccination against German Measles has been more recently introduced for girls aged 11 - 14 years who might in later years suffer from the infection during pregnancy and give birth to a baby with congenital defects.

Vaccination against Smallpox was discontinued at Child Welfare Centres on 30th July, 1971 as the Department of Health and Social Security consider mass vaccination of the child population to be unnecessary.

Tuberculosis

There was one new case of Pulmonary Tuberculosis notified during the year, the patient being a 38 year old man. There were no deaths from Tuberculosis during the year.

This disease, which in past history has been a scourge of man, and was known as the 'White Plague' is in these days almost completely under control, by prevention (including the elimination of housing overcrowding and a higher standard of living), and by treatment. Since 1950, the number of cases amongst adolescents amongst whom it was common, has gradually decreased to a minimum. Protection of school children by B.C.G. vaccination, which is offered to those aged 13 years and over, has been an important factor.

Food Poisoning

No cases of Food Poisoning were notified during the year. This fact is an excellent tribute to the invaluable routine preventive work in Food Hygiene carried through by the Public Health Inspectorate.

In conclusion, I would state that the Public Health of the Borough was satisfactory throughout the year and I wish to take this opportunity of thanking you for your support of and interest in the Department and also the staff for their co-operation and efficient service.

I am,

Your obedient Servant,

J. MARSHALL, M.B., Ch.B., D.P.H.

Central Public Health Office,
14, Church Rd.,
Ashford, Kent.

Tel. No. Ashford 24411.

STATISTICAL AND SOCIAL CONDITIONS OF THE AREA

FOR 1971

Area:- 11,932

Registrar-General's Estimate of the Resident Population 4,340

Number of Inhabited Houses According to the Rate Books 1,757
(10% of this figure are vacant properties during the winter)

Rateable Value as at 1st April, 1971 £366331

Sum Represented by a Penny Rate £3,500

SOCIAL CONDITIONS

The ancient town of Lydd is situated in the extreme south-east corner of Kent, part of its western boundary coinciding with the boundary between Kent and Sussex. The Borough of Lydd, comprises the old town of Lydd, together with the coastal areas of Dungeness, Lydd-on-Sea, and Greatstone (part). Its 12,000 acres include the well-known foreland of Dungeness. The area is very flat, and visibility is potentially good. Within the Borough boundaries are to be found the best and the poorest soil formations - rich alluvium providing fattening pastures for at least ten sheep per acre, and vast areas of shingle which, although a very poor 'soil' does nevertheless support soem forms of hardy plant life.

The Borough is predominantly agricultural in character, being chiefly concerned in sheep and cattle raising and arable farming. There are a number of extensive beach quarrying and crushing plants within the district. The War Department own approximately one-sixth of the Borough, from the west end of the High Street down to the sea. Within it are Lee, Metford and Clarke Camps and extensive anti-tank, mortar, rifle and machine gun ranges. Lydd (Ferryfield) Airport is situated one and half miles from the centre of the town and the Airport is now mainly concerned with providing private flying facilities and its eventual use is still in doubt.

The Borough has $9\frac{1}{2}$ miles of coastline, and of the coastal districts, Dungeness is largely devoted to the fishing industry, and Greatstone, where there is a large Holiday Camp, and Lydd-on-Sea, cater chiefly for the holiday-makers. Development for residential and holiday purposes continues with no sign of abatement in the last-mentioned two areas. A total of 55 private dwellings were completed during the year.

Work continued during the year on the new Council Housing Development, to provide 29 houses, and 28 old persons flat-lets in a single unit with a Warden's flat. The Estate which was almost completed by the end of the year will be known as "Vine Lands" and the flat-lets unit will be "Mittell Court".

At the 31st December, 1971 the Borough Council has provided 338 permanent dwellings, as shown in the table below. Thus more than one-fifth of the dwellings in the Borough have been provided by the Council.

	Houses			2-Storey Flats	Old Persons Bungalows		Total
	4-bed	3-bed	2-bed	2-bed	2-bed	1-bed	
Pre-War Period	-	26	-	-	6	-	32
Post-War Period	10	198	48	28	-	22	306

In addition, the Borough Council own a further six dwellings not originally provided by them.

Work on construction of Dungeness 'B' Nuclear Power Station, which commenced in October 1965, continued throughout the year. The interchange of electric power between this country and France via the 400 Kv supergrid from Canterbury, the Converter Station near Pigwell, Lydd and the Cross-Channel Cable also continued.

A total of 300 houses and other property had been connected to the new main sewerage system by the end of the year, leaving a further 50 laterals, provided by the contract, available for the future connection of existing properties. Main sewers and a modern treatment works are available to serve the whole of the built-up area of the town of Lydd with allowance made for the sewerage system to accept discharge from other areas planned for residential development and also provision made in the construction and layout of the treatment works for the eventual doubling of the capacity of the works should this ever be necessary.

Community life in the Borough continued to be very much in evidence, and there are Local Organisations covering a wide range of interests. In the field of sport there are Angling, Badminton, Cricket, Lawn Tennis, Table Tennis, and the Dungeness Sports and Social Clubs. For children and the youth of the Borough there are the Venture-Scouts, Scouts and Cub-Scouts, Guides and Brownie-Guides, the Methodist Youth Club and the Lydd Youth Set. Other interests are served by the Ancient Order of Foresters, British Legion (Men's and Women's Branches), Golden Needle League, Methodist Women's Guild, Mother's Union, Odd-Fellows, Parents and Teachers Association, R.A.O.B., Royal Naval Association, St. John Ambulance Brigade, Seniors Club, Small Bore Rifle Club, Women's Institute, War Memorial Institute Club, Wildfowling Society, etc. The Clubs and Societies again combined their efforts in organising "Lydd Club Day" on the third Saturday in June.

Preparations continued for the twinning of Lydd with Etrecty, a town of similar size, situated approximately 30 miles south of Paris. Unfortunately the hoped-for twinning ceremony in Etrecty did not materialise during the year, but it is expected that this will be arranged during 1972. Many exchanges between the inhabitants of the two towns have and are being arranged and it is hoped that these will continue to be extended.

Wrapped or part wrapped	Nil	-	-	-	-

MILK AND DAIRIES

Milk and Dairies (General) Regulations, 1959

No. of registered distributors 9
No. of registered dairies -

Comments

Two complaints were received during the year regarding milk stains in a bottle which could not be removed by normal washing. The matter was investigated and it was found that these cases were examples of a yet undefined agency which has caused a number of similar cases throughout the milk industry and was not the result of inadequate bottle washing at the creamery. No further complaints were received & the precautions now taken appear to be adequate.

<u>Slaughterhouses/Abattoir in operation owned or leased by Local Authority</u>	<u>Private Slaughterhouses Licensed Operating</u>	<u>Bacon Factories</u>	<u>Knackers' Yards</u>
NIL	- -	-	-

INSPECTION OF MEAT AND OTHER FOODS

Unsound food surrendered

The following goods were surrendered and condemned:-

14lbs. Plaice Fillets in the initial stages of decomposition.

19lbs. 8 $\frac{1}{2}$ ozs. Canned food, found either opened and found decomposed or unopened in defective cans.

Total weight condemned - 33lbs. 8 $\frac{1}{2}$ ozs.

--	-------------------------------------	---------------------------------------

A.P.C. Caravan Site, Poplar Lane	70	210
----------------------------------	----	-----

Rising Sun Caravan Site New St., Lydd.	7	21
---	---	----

CESSPOOL EMPTYING

Cesspools and septic tanks are emptied on request. All those properties capable of connection to Main Drainage are charged £2 per emptying. All other domestic properties are allowed two free emptyings per year and 50p is charged for all emptyings in excess of the two emptyings. Business premises are emptied on a rechargeable basis. 509 Cesspools and Septic Tanks were emptied during the year.

DRAINAGE

Total number of inhabited houses (including flats) is		1757
Total number of houses connected to the sewers		697
Number of houses not connected to the sewers		1060
Number of houses connected to cesspools		1060
Number of houses with pail closets		None known

REFUSE COLLECTION AND DISPOSAL

During the year a new mechanical excavator was purchased and its used mainly for spreading refuse and digging cover materials at the refuse tip and also for excavation of new areas of tipping space.

SALVAGE

No paper salvage undertaken because overheads exceed income.

DISINFESTATION

The number of houses found to be infested with vermin was as follows:-

	<u>Bugs</u>	<u>Fleas</u>	<u>Cockroaches</u>
Council houses	Nil	1	Nil
Other houses	Nil	2	Nil

Comments

During the summer months our coastal area requires constant surveillance in order to control by burning what seems to be an ever increasing number of caterpillar nests. The hairs of fully grown caterpillars cause irritation to the eyes and skin in particular to those of young children.

FACTORIES ACT, 1937 to 1959

1. Inspection for purposes of provision as to health (including inspections made by Public Health Inspectors).

Premises (1)	Number of			
	Number on Register (2)	Inspections (3)	Written Notices (4)	Occupiers Prosecuted (5)
