ANNUAL REPORT FIGURES FOR 1973

WATER SAMPLING

147 samples of well water* were obtained during the year and the reports on these samples are as follows.

Satisfactory	125
Unsatisfactory	22

5 of the unsatisfactory samples were taken from a private residence and were due to bad storage conditions. When the storage tank was cleaned and chlorinated subsequent samples all proved satisfactory. The remaining 17 unsatisfactory samples were from a shallow well supplying water to a number of properties on a private estate. A new well some 250 ft deep has since been brought into use and the water supply from the old shallow well dispensed with. The new supply has shewn consistently good results.

6 samples of swimming pool water were obtained and all proved to be satisfactory.
