**To the Chairman and Members of the
Maldon Rural District Council**

Mr. CHAIRMAN, LADIES AND GENTLEMEN,

I present for your consideration my Annual Report for 1963.

During the year 212 cases of Infectious Diseases were notified compared with 92 cases the previous year. A better comparison would be with 1961 when 270 cases were notified. These variations are due to outbreaks of Measles, which usually reach epidemic proportions in alternate years.

During the year there were four cases of Acute Infective Hepatitis notified and there were other cases in the area. This illness, because of the long incubation period and the number of mild cases which pass unnoticed, is difficult to trace. It is caused by a virus and I feel a thorough investigation of its extent in the Dengie area would prove rewarding.

Both the Public Health Laboratory Service and the Ministry of Agriculture, Fisheries and Food are taking an active interest in the spread of virus diseases, and I feel that the collaboration with General Practitioners, Hospital Services and Public Health Departments, it should be possible to learn much more about the natural history of this disease which appears to be endemic in this area.

During the year there has been an increasing number of caravans entering the area. Too often, these represent a sub-standard of living. The re-integration of the occupants into the community presents considerable difficulties, especially as housing is in short supply.

I have received information as to a number of cases of Salmonella infection amongst cattle, especially calves, on various farms in the area. These bacteria are also pathogenic to humans and I feel more time should be spent investigating the pattern of spread of infection from cattle to humans in this district. It may be necessary to increase considerably the taking of bacterial samples in slaughterhouses.

I have referred at length to these problems concerning infectious diseases, as it is commonly thought that notifications to Medical Officers of Health serve little purpose. Notifications, if prompt, provide ammunition for research and preventive measures. The problems are still there and so are the solutions if we care to look for them.

Throughout the year I have received great help from your Senior Public Health Inspector and his staff, and I would like also to thank the Chairman and Members of the Public Health Committee for their advice throughout the year.

I have the honour to be, Ladies and Gentlemen,

Your obedient Servant,

T. D. BLOTT.

(b) Infectious Diseases. No arrangements have been made by the District Council.

HOME HELPS. Application should be made to the Area Medical Officer of Health at 75, Springfield Road, Chelmsford; (Tel. No. Chelmsford 4891).

LABORATORIES. Public Health Laboratory Service, Chelmsford & Essex Hospital, London Road, Chelmsford.

During the year no action was taken under Section 47 of the National Assistance Act, 1948, which deals with the removal to suitable premises of persons in need of care and attention.

Section 50 of the National Assistance Act, 1948, made the district council responsible for the burial or cremation of the body of any person who had died or been found dead in their area, where no suitable arrangements for the disposal of the body have been or are being made otherwise than by the authority.

One burial was carried out under the Act during 1963 and since the passing of the Act 14 burials have been carried out.

PUBLIC CLEANSING

Household Refuse

A weekly refuse collection is carried out by contractors in the Parishes of Southminster and Tollesbury and throughout the remainder of the District a fortnightly collection is undertaken.

The more outlying properties have a fortnightly tins and bottles collection by direct labour.

Collection of Pails

A weekly pail closet collection from all Parishes in the area is carried out by private contractors.

Emptying of Cesspools

The Council commenced a scheme for the emptying of cesspools throughout the District in April, 1961. The scheme allows for a once yearly free emptying; additional emptyings being chargeable to the occupier at the contractor's agreed rate with the Council.

Prevention of Damage by Pests Act, 1949.

The Council operates a rat destruction scheme and employs a full time rat catcher.

Work is carried out on farms, domestic premises and Local Authority undertakings including tips, sewage works and sewers throughout the whole of the Rural District.

During the year 780 visits were made by the rat catcher on treatment work. In addition to the treatment work, inspections are regularly carried out throughout the area.

SANITARY INSPECTION OF THE AREA.

The following table, prepared by the Sanitary Inspector is a classified statement of the number of premises visited, the defects or nuisances discovered, and the action and result of action taken in regard to these.

Smoke Abatement. No cause for action occurred throughout the year.

Swimming Baths and Pools. There is a small open-air salt-water pool at Tollesbury and a small open-air pool at Purleigh County Primary School from which samples are regularly taken. All the samples taken during the year gave satisfactory results.

Knackers' Yards. There is one in the district, situated in the parish of Purleigh.

Houseboats. During the year 11 licences to moor or place houseboats were granted under the Essex County Council Act, 1952, Part VII. These are situated in the parishes of Althorne, North Fambridge, Latchingdon and Tollesbury.

Bakehouses. There are 5 in the district, situated in the following parishes :—Tillingham 1, Tollesbury 2, and Wickham Bishops 2.

Regular inspections are carried out. On each inspection the conditions were found satisfactory.

Moveable Dwellings.

THE CARAVAN SITES AND CONTROL OF DEVELOPMENT ACT, 1960.

During the period to which this report relates 40 applications for licences under the above Act were received, and 36 licences were issued.

WATER SUPPLY.

A piped water supply from the mains owned by the District Council was available to 96 per cent of the population. The figures for each parish are set out in the table below.

The supply is augmented from two local works :—

Springs at Warren Bottom and Jacobs Well, Woodham Walter.

Springs at Asheldham.

The supplies from these two works are chlorinated.

Under the Southend Waterworks Act and the South Essex Waterworks Act, the District Council has certain legal rights to be supplied by these companies with a bulk supply of water.

The following table gives details of the water supplied to the District for the year ending 31st March, 1964 :—

Source of Supply	Total Gallons	Average Daily

Report

This sample is clear and bright in appearance and is free from metals. It has, however, a reaction on the acid side of neutrality due to its content of free carbon dioxide and will, therefore, tend to show corrosive action on metals. The hardness of the water is moderate and it contains no excess of mineral or saline constituents in solution. It conforms to the highest standard of organic quality and bacterial purity.

These results are indicative of a pure and wholesome water. For public supply purposes, correction of its corrosive characteristics towards metals would be very desirable.

Report

This sample is clear and bright in appearance and is free from metals. It is alkaline in reaction but not to an excessive degree. The hardness of the water is very moderate and it contains no excess of mineral or saline constituents in solution. It is of satisfactory organic quality and bacterial purity.

These results are indicative of a pure and wholesome water suitable for public supply purposes.

Report

This sample is clear and bright in appearance and is free from metals. It has however an acid reaction due to its content of free carbon dioxide with very low carbonate alkalinity and will therefore tend to show corrosive characteristics. The water is hard in character but its hardness and its content of mineral and saline constituents in solution are not excessive. Its organic quality is of a high standard. It shows bacterial impurity including coliform bacteria in appreciable numbers, but with Bact. coli absent from 100 ml.

These results are consistent with a wholesome water.

Its content of nitrate is however higher than is considered desirable for the preparation of infant feeds. A high standard of bacterial purity should be obtained for public supply.

PUBLIC HEALTH ACT, 1936—SECTION 47.**Conversion of Pail Closets to Water Closets.**

During the period covered by this report, conversions of pail closets to water closets were carried out at 6 properties, and the Council under the above Section paid 50% towards the cost of conversions at those properties.
