Port of Manchester.

TO THE CHAIRMAN AND MEMBERS OF
THE MANCHESTER PORT SANITARY AUTHORITY.

GENTLEMEN,

I have pleasure in presenting my Annual Report for the year 1924, this constituting the nineteenth it has been my privilege to compile.

I have to tender my sincere thanks to the Officers of H.M. Customs, the Board of Trade and the Manchester Ship Canal Company for valuable co-operation and willing assistance rendered during the year.

I have the honour to be,

Yours faithfully,

W. F. DEARDEN,

Medical Officer of Health.

Medical Officer's Department,
168, Trafford Road, Salford,

1924	...	...	...	...	180

Cases of Sickness of all kinds have been notified, as usual, by the Liverpool Port Sanitary Authority, the Manchester Ship Canal Co., H.M. Customs, Shipowners and Medical Practitioners, but the bulk of information has been obtained by the Inspectors during their visits to the vessels in port.

Infectious cases are dealt with separately in Table IV., and non-infectious sickness, injury and death in Table V.

INFECTIOUS DISEASES.

The diseases notifiable to the Authority under this heading are Smallpox, Scarlet Fever, Diphtheria, Membranous Croup, Enteric Fever (Typhoid and Paratyphoid), Pneumonia, Cholera, Plague, Puerperal Fever, Cerebro-Spinal Fever, Acute Poliomyelitis, Acute Polio-encephalitis, Encephalitis Lethargica, Typhus Fever, Relapsing Fever, Continued Fever, Trench Fever, Dysentery, Ophthalmia Neonatorum, Erysipelas, Tuberculosis, Malaria, Chicken-pox, and Whooping Cough.

CHOLERA PLAGUE AND YELLOW FEVER.

There has been no outbreak during the year under this heading, either in the Port or on Manchester-bound vessels.

SMALL-POX.

Two cases were reported. A child passenger on the s.s. "City of Cairo" was removed to hospital, at Marseilles. Disinfection was carried out at that port. The other case occurred on the s.s. "British Commerce," the patient, the mate, being removed to hospital at Abadan. The vessel was stationed there for a considerable time and the mate making a good recovery, was able to rejoin the vessel. No further sickness was reported and all were well on arrival here.

ENTERIC FEVER.

Five cases were reported, three being removed to Ladywell Sanatorium, one to hospital at Liverpool and one to hospital at Balik Papan, the latter case proving fatal. The necessary disinfection was carried out.

PULMONARY TUBERCULOSIS.

Four cases were reported, one being removed to hospital at Norfolk, Va., one dying at Gravosa, one being treated on board, and one being sent home by another vessel.

MALARIA.

Five cases were reported, three being removed to hospital at Durban, one to hospital at Batavia, and one dying at sea.

PNEUMONIA.

Nine cases were reported, one being removed to hospital in Benisaf (Algeria), one in Venice, one in Chester, one in Northwich, one in Manchester, one died whilst the vessel was at Colon, one was treated on board and the remaining two had left the vessels and returned to their homes. The patients removed to hospital at Venice and Chester both died.

CHICKEN-POX.

One case was reported and was isolated on board.

ERYSIPELAS.

One case occurred, the patient leaving the vessel at Northwich.

WHOOPIING COUGH.

Two cases occurred. Two child passengers on the s.s. "City of Poona," from Calcutta, *via* London, were affected. The berth was disinfected during the voyage and again on arrival in London.

The following Table shews the Ports having communication with Manchester that have been considered as infected during the year with either Plague, Cholera or Yellow Fever, also the total number of vessels from each Port of Departure classed as infected under the particular heading.

Name of Country and Port.	Number of Vessels from Ports of Departure Infected with		
	Plague.	Cholera.	Yellow Fever.

PREVENTIVE MEASURES AGAINST IMPORTATION OF INFECTIOUS DISEASE.

The existing facilities for preventing the spread of diseases which come within the scope of paragraph 4 of circular 372 were fully dealt with in the Annual Report for the year 1921. This part of the 1921 Report applies in its entirety to the year under review.

DANGEROUS DRUGS ACT, 1920.

No certificates for the supply of scheduled drugs under this Act have been granted during the year.

RAT DESTRUCTION.

During the year there was a large diminution in the total number of rats destroyed on shipboard. The total number obtained from ships was 3,372 and from dock premises 2,930. On shipboard trapping accounted for 2,483, of which number 705 were from ships arriving from Infected Ports, and 889 were destroyed as a result of the thirty-one fumigations carried out during the year.

So far as concerns the control of rats on vessels within the Port, the usual careful enquiries have been made by the Merchant Shipping Inspectors, and all necessary directions given respecting measures to be taken to prevent the transit of rodents between ship and shore. One ship has been notified as infested, and no prosecutions have taken place during the year. There has been no excessive mortality of rats reported, and no dead ones have been brought to the office of the Authority. The special inspections made during the year amounted to 1,113, 952 by Inspector Atkinson and 161 by Inspector Richmond, and 449 ships were found without rat-guards in position. In addition 314 re-visits were made to note if and in what manner instructions had been carried out.

The following tables have been compiled as suggested by the Ministry of Health :—

PRECAUTIONS AGAINST PLAGUE.

TABLE A.
PARTICULARS RELATING TO VESSELS "INFECTED" OR

Article.	Object of Examination.	Result.
Butter	Evidence of putrefaction	Confirmed.
Ground Nutmegs ...	Unsoundness.	No report yet received.

THE SANITARY CONDITION OF SHIPS.

The number of vessels registered under the Merchant Shipping Act inspected during the year, totals 2,028. Of these 613 were found with insanitary conditions of various kinds. When compared with the numbers for 1923, a decrease under both headings is noted. In 1923 the Inspections numbered 2,040, and the defective vessels 651. The percentage of defective vessels is therefore 1.69 lower for 1924. In the Manchester Section there is a decrease of five inspections from the previous year, and in the Runcorn Section a decrease of 7. The following Table shews the total number of vessels inspected in the Port, together with the total numbers and percentage of defective vessels each year, from 1898 to 1924 inclusive.

Mr. Hadley and Mr. Whalley have assisted in the duties of inspection in each section of the Port as occasion arose.

The total number of vessels inspected within the Port, together with the total number of percentages of defective vessels, from 1898 to 1924 :—

Year.	No. Inspected.	No. Defective.	Percentage.

Totals	396	340	325	251	248	161	262	344	344

Forty-one Public Health Notices have been served, as against thirty-seven in 1923. It has been ascertained that twenty-three of these have been fully complied with, two partly, and one was not complied with. There has been no opportunity of inspecting the other vessels.

PROSECUTION.

The Bishop Wharf Carrying Company were prosecuted for a nuisance existing on their Barge "Emily I.," the case being heard at Ellesmere Port Police Court on December 3rd.

The offence was on all-fours with that referred to in the last Annual Report, viz. :—dampness of cabin and bedding owing to rain

water and river wash penetrating through the scuttle hatchway. On this occasion the Magistrate decided that no nuisance had been proved and dismissed the summons.

Owing to the well known evil influence of the housing conditions on these boats, the bargeman is nothing like the healthy individual he ought to be, so that it is somewhat unfortunate that efforts to improve his surroundings should meet with discouragement of this kind. These men in the nature of things have to live as well as work on their boats. The occupation should be favourable to good health owing to being carried on in the open air and involving a considerable amount of muscular exercise, and although at times there is severe exposure to weather, these occurrences are irregular and rarely prolonged; again it is most unusual on inland waterways to load boats except during daylight.

The recent decennial supplement to the annual reports of the Registrar-General for England and Wales provides exceedingly valuable information on occupational mortalities, and may be usefully quoted to illustrate the unhealthiness of this particular occupation. The period covered is the three years 1910, 1911, and 1912, and a perusal of the table applying to bargemen and lightermen shews the comparative mortality figure of the industry to be 1,102, which compares very badly with the figure of 790 for all occupied males and the figure of 470 for the open air occupation of farm labourer and 858 for what one might conceive to be the like occupation of fisherman. Although there is an excess of liability to fatal accidents as shewn by the mortality rate of 193 against the average one of 49, this is by no means sufficient to explain away the high mortality figure. His life is affected by the drink habit and venereal disease to a slightly greater extent than obtains with the average male worker, but what really appears to carry him off is his excessive liability to respiratory diseases, particularly pneumonia. The fisherman whose record shews the effect of a strenuous life equally with that of the "bargee" is in a totally different class when respiratory diseases are taken into account. The liability of the "bargee" to die from phthisis is the same as that for

all male workers, but there is an excess of liability to die from diseases of the circulatory system. The following table of comparative mortality figures will shew the position at a glance :—

		Barge- man.	Fisher- man.	Occupied and Retired Males.	Farm Labourer.
Phthisis		142	101	142	71
Cancer		88	88	78	54
Locomotorataxy and G.P.I.		38	32	18	6
Cerebral H., Apoplexy	...	48	31	36	16
Other diseases of Nervous System		36	38	28	21
Diseases of the Circulatory System		162	144	118	74
Bronchitis		67	21	38	14
Pneumonia		105	55	67	39
Other Respiratory Diseases		21	12	15	10
Total Respiratory Diseases...		193	88	120	63

An investigation into the class of living accommodation provided on this particular class of craft does not leave much doubt as to the real reason for this excessive mortality from respiratory diseases, as well as accounting to some considerable extent for the greater liability to death from diseases of the circulation.

Vancouver.....	Canned goods, grain, lead	
Wellington	Frozen meats, cheese, wool.	Manchester goods, machinery, salt.

REPORT ON THE ADMINISTRATION OF THE CANAL
BOATS ACTS, 1877-84.

For the Year ended 31st December, 1924.

(1) Two Inspectors have been appointed by the Authority to carry out the provisions of the Canal Boats Acts, viz. :—

HENRY ATKINSON, for Section A (Manchester to Latchford);
WALTER RICHMOND, for Section B (Latchford to Eastham).

Both Inspectors have the Certificate of the Royal Sanitary Institute.

No Inspector is required to devote his whole time to the duties of inspections under the Canal Boats Acts. Their primary duty is the supervision of shipping registered under the Merchant Shipping Acts, and they are only required to inspect canal boats at such times as they can spare from their other duties.

For the purposes of administration, the Port is divided into two sections, viz. :—from Eastham to Latchford, including Widnes and Warrington, with headquarters at Runcorn, and from Latchford to Manchester, with headquarters at Manchester. Each section is under the control of an Inspector, who is directly and solely responsible to the Medical Officer of Health for the proper supervision of his district.

A motor boat is in daily use on the lower reaches of the canal, and this enables the Inspector to keep under constant supervision canal boats using the Port at various points.

(2) During the year there has been an increase of 43 inspections compared with those of the previous year. On the Runcorn section of the canal 805 inspections were made, showing an increase of 32 from the previous year's number. On the Manchester section 19 inspections were made, against 8 during the previous year, an increase of 11.

The number of boats inspected, together with those discovered infringing the terms of the Canal Boats Acts, since the Authority undertook this duty, are as follows :—

Year.	Number Inspected.	Number Defective.	Percentage.
1903	191	77	40.30
1904	230	105	45.65
1905	209	132	63.15
1906	115	73	63.46
1907	84	55	75.47
1908	150	67	44.66
1909	257	101	39.29
1910	230	87	37.82
1911	307	127	41.36
1912	254	89	35.03
1913	432	159	37.03
1914	382	122	31.41
1915	311	79	25.40
1916	409	112	27.38
1917	596	166	27.85
1918	729	203	27.84
1919	493	170	34.48
1920	478	129	26.98
1921	895	180	20.11
1922	979	241	24.82
1923	781	211	27.01
1924	824	219	26.57

The proportion of defective boats to the total number inspected during the year amounted to 26.57 per cent., being 0.44 per cent. lower than in 1923.

(3) The following is a summary of the insanitary conditions and contraventions of the Acts found during the year :—

(a) REGISTRATION.

Not registered..... 4

Registration incorrect 44

(b) NOTIFICATION OF CHANGE OF MASTER 0

(c) CERTIFICATES.

Registration certificate absent 23

„ „ dilapidated..... 3

(d) MARKING.	
No marks	14
Marking indistinct or incorrect.....	27
(e) OVERCROWDING	57
(f) SEPARATION OF SEXES (want of)	33
(g) CLEANLINESS AND REPAIRS.	
Cleansing of cabins required	6
Cabins, etc., dilapidated and repairs required	44
Miscellaneous leakages into cabins	130
Bulkheads defective allowing communication with holds	20
(h) VENTILATION AND LIGHTING.	
Ventilation inefficient and ventilators defective ...	6
Insufficient lighting	1
(i) PAINTING.	
Cabins, lockers, berths, etc., requiring painting ...	50
(j) PROVISION OF WATER CASK.	
No water vessel or vessel not of sufficient capacity.	0
Water casks decayed and water vessels requiring repairs.....	29
(k) REMOVAL OF BILGE WATER.	
Bilge Pumps absent	2
„ „ defective.....	1
Bilges requiring cleansing.....	0
(l) NOTIFICATION OF INFECTIOUS DISEASE.....	0
(m) ADMITTANCE OF INSPECTOR	0
Total	494

The proportion of infringements per boat works out at 1.66.

(4) The Authority issued a batch of summonses against the Chester and Liverpool Lighterage and Warehousing Co. Ltd., and the cases were heard at Ellesmere Port Police Court on 3rd December.

The offences had taken place on fourteen canal boats, and it was owing to the ignoring of Notices and letters by this firm that the Authority decided to prosecute. In fourteen cases the summonses

were issued under Section 1, 3a, of the Regulations, which provides for the living quarters observing a certain standard of sanitation. The complaints were caused through the cabins being leaky, the woodwork decayed, food lockers being broken and leaky, a broken stove pipe and a defective bulkhead. With respect to all these the summonses were dismissed on the ground that Regulation 1, 3a, referred to conditions which had to be complied with as a condition of registration only, and that as a consequence the Manchester Port Sanitary Authority had no power to require the observance of the conditions after registration had been effected. The other ten summonses had relation to the renewal of paint under Regulation IV., 9, and to obliteration of registration marks under Section 3 of the Canal Boats Act, 1877, and in all these convictions were obtained.

The net result of this string of prosecutions appears to be that the owners of canal boats, whilst being compelled to observe certain matters of minor moment, can ignore any Notices and requests to keep the living quarters in a habitable condition.

(5) The usual steps have been taken to secure compliance with the Acts. In all cases complaint notes have been promptly served upon the owners, and if not attended to at the end of the prescribed number of days, a postcard asking for return of the certificate has been duly forwarded.

(6) Three cases of Infectious Disease have been notified on canal boats during the year, namely, one of pulmonary tuberculosis, one of chicken-pox, and one of pneumonia.

(7) No boats have been detained for cleansing or disinfection.

(8) and (9) The Authority is not a Registration Authority.
