Public Health Department,

Manor House,

MANSFIELD WOODHOUSE.

July, 1941.

To the Chairman & Members of the Mansfield
Woodhouse Urban District Council.

Mr. Chairman, Gentlemen,

I present herewith my Annual Report for the year 1940. This report has been compiled on the lines laid down by the Ministry of Health and is again in an abridged form as requested by Circular No. 2067.

During the first half of the year Dr. Preston acted as Temporary Medical Officer of Health and I commenced duties in June, about the time when the first contingent of evacuees arrived in the District. It is pleasing to be able to report that although the population of the area was suddenly increased especially the child population, the health of the inhabitants of the District generally has continued to be satisfactory. The number of cases of infectious diseases notified during the year compare very favourably with surrounding districts. Your Maternity and Child Welfare Clinics continued to be well attended throughout the year.

My thanks are due to the Chairman and Members of the Committees, the Officials, and the staff of the Health Department, for their help and co-operation.

I am, Gentlemen,

Your obedient Servant,

PETER P. FOX.

1911-12 Annual Report

Health Department

San Francisco

1911-12

To the Board of Health

San Francisco

Mr. Chairman, Gentlemen,

I present herewith my Annual Report for the year 1911. This report has been compiled on the basis of the data furnished to me by the various departments of the Health Department and is intended to be a summary of the work done during the year.

The first part of the report deals with the general health of the city. It shows that the mortality rate for the year was 15.5 per 1,000, which is a slight improvement over the rate of 16.5 per 1,000 for the year 1910. The most common causes of death were diseases of the heart and lungs, and diseases of the digestive system. The mortality rate for children under five years of age was 105.5 per 1,000, which is a slight improvement over the rate of 110.5 per 1,000 for the year 1910. The mortality rate for infants under one year of age was 215.5 per 1,000, which is a slight improvement over the rate of 225.5 per 1,000 for the year 1910.

The second part of the report deals with the work of the various departments of the Health Department. It shows that the Sanitation Department has done a great deal of work in cleaning up the city and in improving the sanitary conditions of the various tenement houses. The Health Officer has also done a great deal of work in inspecting the various public buildings and in enforcing the health laws.

I am, gentlemen,

Very respectfully,

W. H. H. H.

SECTION A. - SOCIAL CONDITIONS & STATISTICAL SUMMARY FOR 1940.

Area of District in Acres (exclusive of area of water)	4,834.
Population (estimated Registrar General's Figures 1940)	15,380.
Number of Inhabited Houses (end of 1941) according to the Rate Books.	4,247.
Rateable Value.	63,479.
Sum represented by a Penny Rate.	242.

EXTRACTS FROM VITAL STATISTICS.

<u>Live Births:</u>	<u>Total.</u>	<u>Male.</u>	<u>Female.</u>
Legitimate.	284	149	135
Illegitimate.	12	9	2

Birth Rate 19.245 per 1,000 population.

<u>Stillbirths:</u>	10	5	5
Rate per 1,000 live and still births	19.889		

<u>Deaths:</u>	143	81	62
----------------	-----	----	----

Death Rate 9.297 per 1,000 population.

Deaths from Puerperal Causes:-

	<u>Deaths.</u>	<u>Rate per 1,000 total (live and still) births.</u>
Puerperal Sepsis.	-	-
Other Puerperal Causes.	1	3.271

Infantile Mortality Death Rate.

Mansfield Woodhouse.	33.78
England and Wales.	55.0

Death Rate of Infants under 1 year of age:-

All infants per 1,000 registered live births.	33.78
Legitimate infants per 1,000 legitimate live births.	35.211
Illegitimate infants per 1,000 illegitimate live births.	-

Some important comparative figures:-

	<u>Total Deaths.</u>	
	<u>1940.</u>	<u>1939.</u>
Measles (all ages.)	2	-
Whooping Cough (all ages.)	-	1.
Diarrhoea (under 2 years.)	1	-
Influenza (all ages.)	4	4.
Bronchitis and Pneumonia (all ages.)	23	15.
Phthisis (all ages.)	8	5.
Tuberculosis (all forms.)	10	7.
Cancer.	15	12.

Table A at the end of the Report gives a classification of deaths, Tables B and E show year analyses of infantile deaths and notifiable diseases, respectively, Table C compares vital statistics with those of last year and Table D gives comparative vital statistics and an analysis of mortality.

Death Rate of Infants under 1 year of age:

All Infants for 1900-1901 115 deaths
Infants under 1 year of age for 1900-1901 115 deaths
Infants under 1 year of age for 1901-1902 115 deaths

Some important communicable diseases:

Total Deaths

Disease	1900-1901	1901-1902
Diphtheria (all ages)	2	1
Whooping cough (all ages)	1	1
Dysentery (under 5 years)	1	1
Influenza (all ages)	1	1
Scarlet fever (all ages)	10	10
Measles (all ages)	8	8
Tuberculosis (all ages)	10	10
Other	15	15

Table A at the end of the Report gives a classification of deaths, Table B and C give an analysis of infantile deaths and non-infectious diseases, respectively, Table D compares infantile deaths with those of last year and Table E gives comparative vital statistics and an analysis of mortality.

SECTION B. - BIRTH RATE AND DEATH RATE.

<u>Medical Officer of Health.</u>	<u>1940.</u>	<u>1939.</u>
Total number of registered live births.	296	290.
Birth Rate per 1,000 population.	19.245	19.398
Birth Rate for England and Wales.	14.246	15.0
Total Number of Deaths.	143	135.
Death Rate per 1,000 population.	9.295	9.23
Death Rate for England and Wales.	14.3	12.1
Corrected Death Rate for Mansfield Woodhouse (comparability factor 1.29)	11.249	
Death Rate from Tuberculosis.	.65	.468
Death Rate from Cancer.	.975	.802

258 births were notified; 258 by midwives and nil by doctors. 10 stillbirths were notified.

MATERNAL MORTALITY.

The arrangements for the investigation and treatment of cases of puerperal fever and for the hospital treatment of complicated maternity cases is as reported in previous reports.

SECTION C. - SANITARY CIRCUMSTANCES OF THE AREA.

WATER SUPPLY. No change has taken place in the Water Supply to the District. Quarterly samples are taken for Bacteriological examination and satisfactory reports are obtained.

The average total consumption of water per head of population for all purposes throughout the year 1940 was 23.47 gallons; for domestic purposes only, 21.20 gallons. There has been a considerable increase in the consumption of water for domestic purposes during the year owing to the influx of evacuees into the District.

SEWAGE DISPOSAL. The method of sewage disposal remains unaltered and the analysis of the effluent continues to be satisfactory. Early in 1938 the works became affected by Colliery subsidence; the defects are kept under constant observation and levels are taken periodically.

ESTIMATED NUMBER OF HOUSES AND SANITARY CONVENIENCES IN THE
DISTRICT AT THE END OF THE YEAR, 1940.

	<u>Total.</u>	<u>North Ward.</u>	<u>West Ward.</u>	<u>East Ward.</u>
Houses.	4247.	1655.	1602.	990.

Ashbins.	4404.	1489.	1587.	928.
Cesspools.	74.	30.	25.	19.

53 new houses were completed during the year. There are about 8 railway carriages and caravans used as dwellings in the district.

PUBLIC CLEANSING.

No alteration has taken place in the methods of collection and disposal of house refuse as reported in previous reports, but an extensive and successful salvage scheme has been put into operation.

Public Health Department,
Honor House,
MARSHFIELD WOODHOUSE.

July, 1941.

SANITARY INSPECTOR'S REPORT.

To the Chairman and Members of the Mansfield
Woodhouse Urban District Council.

Mr. Chairman, Gentlemen,

I have the honour to present to you my fourth Annual Report, which in accordance with Circular 2067 is again unfortunately in a much abridged and condensed form.

Difficulties brought about by war conditions have been very pronounced during the year, general Housing work having been almost completely curtailed and shortage of labour and materials have slowed down repair work very considerably.

Practically the whole of my time for one period during the summer was taken up with the duties of Billotting Officer, when several hundred evacuees arrived in the District.

With regard to the inauguration of centralised slaughtering, which takes place in the adjacent Borough I am of opinion that methods of transport and handling of carcasses leave much to be desired.

I should like to again express my thanks to you, Mr. Chairman and Gentlemen for the interest and support you have again extended to my work during these difficult times, and also to Drs. Preston and Fox, the Staff of the Health Department and to Officials of the Council generally who have always shown their readiness to co-operate.

I am, Mr. Chairman & Gentlemen,

Your Obedient Servant,

WILLIAM V. HARGREAVE.

Public Health Department,
Manor House,
MANSFIELD WOODHOUSE.

July, 1941.

Handwritten notes at the top of the page, including a date and possibly a name.

REPORT OF THE CHAIRMAN AND MEMBERS OF THE BOARD OF
MEDICAL EDUCATION

Mr. Chairman, Gentlemen:
I have the honor to greet you in your
annual report, which in accordance with Chapter 2007 is
being submitted to you in a most timely and condensed

form. It is gratifying to note that the conditions
have been very favorable during the year, general health
work having been almost entirely untroubled and progress
of labor and industry have advanced rapidly and very
generally.

Practically the whole of my time for the past
year has been devoted to the study of the history of medicine
and the various branches of the medical profession. It is
of course, with several hundred volumes of literature
at my disposal.

With regard to the improvement of our
education, which has been the object of our
study, I am of opinion that the most important and practical
change that can be made is to be made.

I should like to again express my thanks to you,
Mr. Chairman and Gentlemen for the interest and support you
have again extended to my work during these difficult times,
and also to Dr. Foster and Fox, the staff of the Health
Department and to the members of the Council generally who
have always shown their readiness to co-operate.

I am, Mr. Chairman & Gentlemen,
Your obedient servant,
WILLIAM V. WOODWARD

Public Health Department,

SUMMARY OF SANITARY IMPROVEMENTS CARRIED
OUT UNDER THE HOUSING ACTS.

<u>Dwelling-houses.</u>	
<u>Internal.</u>	171.
<u>External.</u>	130.
<u>Cooking Facilities.</u>	3.
<u>Walls and ceiling plaster.</u>	12.
<u>Miscellaneous (doors, floors, stairs.)</u>	28.
<u>Washing Accommodation.</u>	13.
<u>Dampness remedied.</u>	2.
<u>Ventilation Improved.</u>	14.
<u>Foodstores improved.</u>	12.
<u>Coalstores.</u>	11.
<u>Waterclosets.</u>	12.
<u>Drainage.</u>	4.

RATS AND MICE (DESTRUCTION) ACT, 1919

During the year three complaints were received and nine visits made to premises for the purposes of abating the infestations. No National Rat Week was held, but frequent and regular visits were made to the refuse tip and other council properties and from information received about 350 rats were destroyed during the year.

SMOKE ABATEMENT.

Again no complaints were received and no action was necessary.

SHOPS ACT, 1934.

During the year 25 inspections were made of shops respecting the provisions of Section 10 of the above Act. No contraventions were observed.

CAMPING SITES.

There are no camping sites in the District.

OFFENSIVE TRADES.

No. on the Register at the end of 1940:-

Tripe Boiling.	3.
Gut Scraping)	
Fat Melting)	1.
Blood Drying)	

The businesses have again been carried on satisfactorily. I am pleased to be able to report that considerable improvements both in the premises and in the provision of new plant and machinery have been completed at the fat melting and blood drying factory during the year.

FISH FRYING.

These premises have now all been provided with suitable buildings for the preparation and storage of fish and potatoes and it has been unnecessary to take any action during the year against the occupiers.

SLAUGHTER HOUSES.

Prior to the operation of the Food and Drugs Act, 1938 three slaughter houses were licensed and one registered; under the new Act each occupier applied for a license for his premises, these were granted, although the premises are not now in use due to the centralised slaughtering taking place in Mansfield. It was thought that the present time was not opportune for the carrying out of improvements to the buildings and this has therefore been left in abeyance until such times as private slaughtering may again be permitted.

GENERAL STATE

There are no other cases in the District.

REVENUE STATE

No. on the Register as of 1st of 1910:-

Three Bidders
One Bidder
Two Bidders
One Bidder
One Bidder
One Bidder

The business transactions have been carried on satisfactorily. It is also to be noted that considerable improvements have been made in the provision of water and electricity have been provided. The first building and the other factory during the year.

FINANCIAL STATE

These figures have been provided for various buildings and the other improvements. It is also to be noted that considerable improvements have been made in the provision of water and electricity have been provided. The first building and the other factory during the year.

CONCLUSION

It is to be noted that the first and second of 1910 have also been provided for various buildings and the other improvements. It is also to be noted that considerable improvements have been made in the provision of water and electricity have been provided. The first building and the other factory during the year.

SLAUGHTER OF ANIMALS ACT, 1933.

13, persons in the District are licensed under this Act to slaughter animals.

ERADICATION OF BED BUGS.

	<u>Infested.</u>	<u>H.C.N.</u>	<u>Disinfested.</u> <u>Furnox Blocks</u> <u>& Zaldecido.</u>
Council Houses.	2.	-	2.
Other Houses.	6.	-	6.

In cases of severe infestation the H.C.N. method is carried out in respect of Council Houses by a firm of Contractors and this method is recommended to owners of verminous properties.

I am pleased to report that it has again been unnecessary to treat any Council Houses by this method during the year.

In less severe cases, eradication has been obtained by the use of Furnox Blocks and vermicial solutions, applied by the Council's Staff, and in all cases, bedding and clothing is removed to the Council's steam disinfector and dealt with by the Council's staff.

COCKROACHES.

Much trouble in council houses has been experienced by cockroach infestation, the source of which remains a mystery. Successful eradications has been obtained by lifting the floor boards and blowing a powder consisting of two parts sodium flouride to one part pyrethrum powder into the space below at intervals of seven days. Usually three applications was found to be sufficient. 17 houses were treated during the year.

MEMORANDUM FOR THE RECORD
DATE: 10/15/50

TO: SAC, NEW YORK
FROM: SAC, NEW YORK
SUBJECT: [Illegible]

Reference is made to the report of the New York Office dated 10/10/50, captioned as above. The report contains information regarding the activities of the [Illegible] in the New York area. It is noted that the [Illegible] has been active in the [Illegible] and has been in contact with [Illegible].

It is recommended that the New York Office continue to maintain close contact with the [Illegible] and to report any further information received. The Bureau is advised of this report and the recommendation of the New York Office.

MORTUARY.

The mortuary and post-mortem rooms have again proved to be a great convenience.

SCHOOLS.

The influx of several hundred children from evacuated areas has not necessitated any extension of the sanitary arrangements at the schools.

SECTION D. — HOUSING.
HOUSING STATISTICS OF THE YEAR 1940.

<u>1. Inspections of Dwelling-houses during the year.</u>	
(1)(a) Total number of dwelling-houses inspected for housing defects (under Public Health or Housing Acts.)	867.
(b) Number of inspections made for the purpose.	1399.
(2)(a) Number of dwelling-houses (included under sub-head (1) above) which were inspected and recorded under the Housing Consolidated Regulations, 1925 and 1932.	10.
(b) Number of inspections made for the purpose.	47.
(3) Number of dwelling-houses found to be in a state so dangerous or injurious to health as to be unfit for human habitation.	-
(4) Number of dwelling-houses (exclusive of those referred to under the preceding sub-head) found not to be in all respects reasonably fit for human habitation.	405.
<u>2. Remedy of Defects during the year without Service of Formal Notices:-</u>	
Number of defective dwelling-houses rendered fit in consequence of informal action by the local authority or their officers.	363.
<u>3. Action under Statutory Powers during the Year:-</u>	
(a) Proceedings under Sections 9, 10 and 16 of the Housing Act, 1936:-	
(1) Number of dwelling-houses in respect of which notices were served requiring repairs.	7.
(2) Number of dwelling-houses which were rendered fit after service of formal notices:-	
(a) By owners.	5.
(b) By local authority in default of owners.	-

HOUSING ACT, 1936.

The following tables show the work completed during 1940 and the position with regard to all action from 1931 to 1940.

	<u>1940.</u>	<u>Total</u> <u>1931-1940.</u>
No. of representations made under Section 11.	Nil.	195.
No. of Demolition Orders made.	Nil.	152.
No. of undertakings accepted to make the houses fit for human habitation.	Nil.	24. †
Consideration adjourned.	Nil.	18.
No. of undertakings given by the owners to cease to use the premises for human habitation.	Nil.	14.
No. of houses demolished.	Nil.	142.
No. of houses where demolition is pending.	Nil.	-
No. of families rehoused in council houses.	Nil.	145.
No. of persons displaced from unfit houses.	Nil.	556.

† Includes four houses made fit for human habitation after an appeal to the County Court.

The Council resolved that Demolition Orders be made in respect of the following houses,

Nos. 12, 13, 14, 15, 16, 17, 18 and 19, Portland Street.

This, however was not carried out because of the difficult Housing conditions prevailing.

SECTION E. -- INSPECTION & SUPERVISION OF FOOD.

MILK SUPPLY.

Registration of persons and premises.

Milk producers on the register.	15.
No. of premises registered as Dairies.	16.
No. of registered retail purveyors, resident within the District.	55.
No. of registered retail purveyors outside the District.	17.
Average number of cows kept.	131.
Wholesale milk traders on register.	15.
No. of inspections to Dairies, Cowsheds and Milkshops.	38.
No. of premises discontinued during the year.	5.

DESIGNATED MILKS.

The following licences have been granted for the sale of Designated milks, viz:-

Accredited milk	2 supplementary licences.
Pasteurised milk.	6 supplementary licences.
Pasteurised milk.	13 retail shop licences.

In addition there are three accredited producers in the District.

During the year it was necessary to call the occupiers attention to the following defects or contraventions, all of which were remedied.

Dairies limowashed.	8.
Cowsheds limowashed.	5.

BACTERIOLOGICAL TESTS OF MILK.

12 samples of milk were taken during the year and bacteriologically examined at the City Analyst's Nottingham. It was not necessary to take any action as a result of the Analyst's reports.

The purpose of this report is to provide a comprehensive overview of the current state of the project. It details the progress made since the last meeting, including the completion of the initial design phase and the commencement of development. The report also identifies the challenges encountered and the strategies implemented to address them. Key findings and recommendations are presented at the end of the document.

The following table summarizes the project's performance metrics over the last quarter. The data shows a steady increase in productivity and a decrease in the number of bugs reported, indicating that the development process is becoming more efficient. The team's collaboration and communication have been instrumental in achieving these results.

In addition to the technical progress, the team has also focused on improving the user experience. Through user research and feedback, we have identified several areas for improvement and have implemented changes to make the interface more intuitive and user-friendly. These changes are expected to result in higher user satisfaction and retention.

The project is currently on track to meet the deadline. However, it is important to remain vigilant and address any potential risks or issues as they arise. The team will continue to work hard to ensure the highest quality of the final product. Thank you for your support and guidance throughout the project.

INSPECTION OF MEAT AND OTHER FOODS.

Carcases inspected and Condemned.

LIBRARY

SECTION F. - PREVALENCE OF, AND CONTROL OVER

INFECTIOUS DISEASES.

The number of cases of notifiable infectious diseases showed an increase over the preceding year; 646 cases exclusive of Tuberculosis were notified as against 66 in 1939. The high figure of notifications received during 1940 is accounted for by reason of the fact that measles and whooping cough were added to the list of notifiable diseases during the year. The means of Hospital Isolation were as in 1939.

<u>Disease.</u>	<u>No. of Cases Notified.</u>	<u>Removed to Hospital.</u>	<u>Isolated at Home.</u>	<u>Deaths.</u>
Scarlet Fever	47	16	31	-
Diphtheria	10	10	-	-
Ophthalmia Neonatorium	2	-	2	-
Small Pox	-	-	-	-
Pneumonia	23	-	23	11
Measles and Whooping Cough	548	-	548	2
Erysipelas	8	-	8	-
Cerebro-spinal Meningitis	7	7	-	1
Typhoid Fever	1	1	-	1
Totals	646	34	612	15

MEASLES AND WHOOPING COUGH.

These diseases have shown the usual seasonal prevalence. No hospital accommodation is at present available for severe cases, but it is hoped that the new hospital will meet this requirement.

PREVENTION OF BLINDNESS.

No action has been taken under Section 66 of the Public Health Act, 1925 for the prevention of blindness or for the treatment of persons suffering from any disease of the eye.

Inventory

PATHOLOGICAL AND BACTERIOLOGICAL FACILITIES.

The pathological and bacteriological facilities remain as reported in previous years.

The following specimens were examined at Mansfield during the year 1940:-

	<u>Positive.</u>	<u>Negative.</u>	<u>Total.</u>
Diphtheria.	15	48	63
Tuberculosis.	2	5	7
Gonococcal Smears.	-	3	3
	17	56	73

ARRANGEMENTS FOR DISINFECTION.

The following disinfection work was carried out during the year 1940:-

<u>Beds.</u>	<u>Bedding.</u>	<u>Clothing.</u>	<u>Miscellaneous.</u>	<u>Total.</u>
104	689	107	31	931

NUMBER OF HOUSES DISINFECTED.
During the year 1940.

Scarlet Fever.	47
Diphtheria.	10
Scabies.	5
Tuberculosis.	5
Other Causes.	11
	78
Total houses disinfected.	78
Total rooms disinfected.	93

TUBERCULOSIS.

The facilities for the diagnosis and treatment of tuberculosis remain unaltered.

No. of cases of pulmonary tuberculosis treated at the Ransom Sanatorium during the year 1940:-

Discharged during the year:

<u>Men.</u>	<u>Women.</u>	<u>Children.</u>	<u>Total.</u>
-	4.	-	4.

In the Sanatorium on 31st December, 1940:

<u>Men.</u>	<u>Women.</u>	<u>Children.</u>	<u>Total.</u>
2.	2.	4.	8.

One case was admitted to the sanatorium during the year for observation and was discharged as Non-tuberculous.

TUBERCULOSIS.

The total number of names on the Tuberculosis Register on the 31st December 1940 was 149 as compared with 153 at the corresponding period for the previous year. 11 cases were notified during the year and one case returned to the district, which increases the number on the register to 165. As, however, 10 deaths occurred and 6 cases were struck off either as cured or as having left the district, the number remaining on the register is 149.

The total number of cases on the Tuberculosis Register on the 31st December 1940 was 149 as compared with 125 at the corresponding period for the previous year. 11 cases were notified during the year and one case returned to the district, which increases the number on the register to 140. As, however, 10 deaths occurred and 9 cases were struck off either as cured or as having left the district, the number remaining on the register is 149.
